"It will be observed that this notification gave it to be understood that these pice are being manufactured by these private persons under the authority of the Government. Of course, there was not a word of truth in that statement, but at the same time they must have discovered that the penal law was not sufficient to reach them. When their proceedings were brought to the notice of the Government of Bengal in December, 1886, that Government issued a proclamation stating that the manufacture was unauthorized, and that the pice would not be received in the Government treasuries or post offices. It was hoped—but I do not know how far the hope has been realised—that by this means the circulation of the pice would be stopped.

"A short time after this date the pice were found in the districts near Gya, namely, Shahabad, Sarun and Gorakhpur; and in some or all of these districts it was found necessary to issue a proclamation informing the people that these pice were not pice of legitimate manufacture, and would not be accepted in any Government treasury or institution. The operations of the firm seem to have extended still farther. In May, 1887, the Deputy Commissioner of Hissar, in the Punjab, reported that a local trader, Jai Ram Dass, had presented Jadu Roy's proclamation and solicited permission to commence a similar manufacture. And in July a Mr. Carapiet, of Mirzapur, solicited a similar permission from the Government of the North-Western Provinces, stating that he had heard that an authorized manufacture had been started in Gya and other places. The Magistrate of Mirzapur, to whom the application was referred for some enquiries, stated that he had received similar applications from other people, but, of course, had rejected them all. During the same months the Collector of Saharanpur brought to notice that his district was being flooded with dumpy pice known as Mansúrí pice, which he had reason to believe were manufactured at Jagadhri in the Ambala district and at Nayanagar near Ajmere. We could not stop the circulation, but we directed that the Mansúrí pice should be refused by Government and railway officers and the municipalities, and we made enquiries regarding the alleged manufacture.

"About the same time information came independently from Ludhiana, from the octroi-collectors, that large quantities of the pice had been imported there under consignment to local traders, who were busy issuing them in large quantities. They were described as coming from Nayanagar near Gya, which appears to be a mixture of the names of two of the places of manufacture already noticed. The sale of these pice was going on openly, one trader stating that

he had disposed of Rs. 15,000 worth within a year. Moreover, there was also a local manufacturer whose name was Gauri, and whose issues received the name of Gauri-wala pice. Other pieces of information have reached us, but it is evident from what I have said that the trade is openly practised, and that the time has come when Government must choose between accepting it and putting it down.

"It is unnecessary to state here such elementary principles as that the State has the right to the profit accruing by the issue of token coin, and that moreover the State is bound, for the convenience of the people, to supply, for the purposes of circulation and exchange, coin that shall have the character of legal tender, and to protect them from coin which has not that character. The laws for the protection of coinage are in every country very severe. In India they are equally so, but, as already explained, they do not, as matters stand, reach coiners of the kind to which I have been alluding. It is one thing to permit a people who are in a comparatively early stage as respects the development of commerce and trade to continue to pass from hand to hand the imperfect copper coin which has come down to them from before British times; but it is quite a different thing to allow people to set up within our own territory a manufacture for the purpose of perpetuating these imperfect coin, and not only to compete with the State in the exercise of a function which, in India especially, represents the sovereign power, but to appropriate a profit which properly belongs to the State generally.

"The facts which I have stated show that the same reasons which have led to the attachment in all countries of severe penalties to the unauthorized fabrication of coin compel us in India to penalize equally the fabrication of copper dumps intended to be used as coin.

"The opportunity of this Bill has been taken to improve the law relating to coinage in another point which the Government for some time has had in contemplation. In December, 1885, a man of the name of Jala Vijanand was found in Bombay engaged in manufacturing certain current Turkish coins which go by the name of ghazis. Complaints had for some time been made on the part of the Turkish Government that these coins had been imported into Turkey from Bombay, and there can be little doubt that this manufacture was connected with these complaints. Upon the trial which took place before the High Court in Bombay the whole of the facts were admitted, but the man pleaded that he manufactured the coins not for use in circulation but for use as ornaments. The fact that he was a working goldsmith by trade gave colour to this plea, and at all events he was pronounced not guilty.

"The law, as it stands at present, attaches a penalty to the counterfeiting of coin, but it defines this counterfeiting in this way. 'A person is said to "counterfeit" who causes one thing to resemble another thing, intending by means of that resemblance to practise deception or knowing it to be likely that deception will thereby be practised.' It is consequently incumbent on a Judge, trying a case like this in India, to leave to the jury the question whether it is sufficiently proved that the person charged with counterfeiting coin intended to practise deception, or knew it to be likely that deception would be practised. Under the law, however, as it stands in England the Judge would have instructed the jury that the facts, admitted by the defendant in this case, of themselves constituted an offence punishable with seven years' imprisonment. Suppose the circumstances had been reversed; suppose, for example, we had been receiving importations of rupees from Turkey; that some person in Turkey had been arrested in the open practice of the fabrication of these rupees, that he had been taken before a Turkish Court, and had there pleaded that he did not make the coin for circulation, but only for the purposes of ornament; and suppose the Turkish Court had been obliged to acquit him; one could easily imagine that we would have said many evil things of the insufficiency of the Turkish law or the incompetency of the Turkish Courts. It is obvious that the Turkish Government have the same cause of complaint against us as we under the circumstances stated would have against them; and, now that the defect in our law has been pointed out, we ought not to place ourselves a second time in the position of having to give the Turkish authorities

such an unsatisfactory answer as on that occasion we were obliged to give. We propose, therefore, to adopt in this respect the law already current in England and in Canada and to make the mere making of a similitude of any actually current coin a punishable offence."

The Motion was put and agreed to.

The Hon'ble MR. WESTLAND also introduced the Bill. He said :—

"As regards the first intention of the Bill, that relating to copper dumps, the third section is the principal one. It prohibits the making of pieces of metal intended or likely to be used as money, and attaches a penalty of three years', or on a second conviction seven years', imprisonment to the offence.

"The main difficulty in drawing the Bill has been to frame it so that no penalty should attach to the mere passing of dumps received in actual circulation. At the same time we cannot place ourselves in this position that, when a man is arraigned for manufacture, he should be able to escape by pleading that he only stayed outside and passed the coins into circulation while his brother manufactured them inside. We must attach a penalty to issue, but we carefully guard it in several ways. First, we define issue, not as passing on in circulation, but as initiating the circulation. We make 'issue' an offence not cognizable by the police, and require the authority of a District Magistrate before cognizance is taken of it.

"If we prohibit manufacture in India, we must also prohibit systematic importation, in merchantable quantities, of dumps manufactured (say) in Nepal or elsewhere. The ordinary law enables us to do this, but the fourth section of the present Bill provides a penalty similar to that for manufacture in India.

"It need not be said that any prohibition issued as here proposed will be carefully so worded as not to extend to persons who merely cross a frontier with a few dumpy pice in their pocket belonging to the circulation of the State from which they come.

"We deem it necessary to provide by the law that dumpy pice shall not be received by railway companies or municipalities. So far as the Executive Government is concerned, we do not receive dumpy pice in any Government establishment. Though we do not interfere with their circulation, it is our deliberate purpose to discourage them, and to draw a line of distinction between authorized pice of Government issue and dumps; and we do not think it right that public bodies, like municipalities, which are constituted by our law should be permitted to treat as lawful coin of the realm a coin which has no authority from Government, and is in many cases the produce of what we now stigmatize as a severely punishable offence.

"The last section deals with the question of the Turkish coins, and its wording is based upon that of the English law. It will be for the Select Committee to whom this Bill will be referred to consider the question whether the necessity for this section might not be avoided by a revision of the definition of 'counterfeiting' as it exists in the Penal Code. There are two points which have to be considered in matters relating to coinage. The first is the prevention of fraud, and the second the maintenance of a certain fixed standard of purity and genuineness. Now, as the law at present stands, there is nothing to prevent any one undertaking the manufacture of coin so long as the intention to defraud cannot be proved against him. That is to say, although we carefully provide a huge establishment at the cost of the State for the manufacture and maintenance of our current coin, and carefully provide precise and exact limits regarding the regulation and manufacture of coin on the part of the Government, we do not protect the monopoly of manufacture by subjecting to penalty any person who on his own account manufactures coin if it is meant to be good. It is true that private persons are not likely to undertake a business of the kind, as it is pretty certain to end in loss; but at the same time the privilege of coinage is a prerogative of the Sovereign Power, and the value of a rupee rests upon the assurance which people have that it has issued from our Mints, and from no other place. As I have mentioned, the law of England attaches a penalty to the

making of coin quite irrespective of any question of fraud, and we might do well to follow the example of English law in applying penal legislation to protect the purity and genuineness of our coin, as well as to guard against the fraud ordinarily implied in counterfeiting."

The Hon'ble MR. WESTLAND also moved that the Bill and Statement of Objects and Reasons be published in the Gazette of India in English, and in the local official Gazettes in English and in such other languages as the Local Governments think fit.

The Motion was put and agreed to.

INVENTIONS AND DESIGNS BILL.

The Hon'ble MR. SCOBLE presented the Report of the Select Committee on the Bill to consolidate and amend the law relating to the Protection of Inventions and Designs. He said :—

" Many communications have been received by the Committee or published in the Press regarding this Bill. We have endeavoured to give them all our attentive consideration, and I will now briefly state the alterations which we have thought it desirable to introduce. These alterations relate mainly to matters of detail, for we have determined to adhere to the main principle of the Act of 1859 as originally framed by Sir Barnes Peacock, under which the exclusive privilege springs into existence by operation of law and is not conferred by grant from the Crown.

" The first requisite of a patent, we have been told, is that it should be cheap. Inventors are often poor men, and are prevented from reaping the fruit of their ingenuity by the cost of obtaining protection. We have fixed a scale of fees in Schedule IV suited to the poorest purse. The term of a patent being maintained at fourteen years, we propose that the initial payments of ten rupees on filing the application and thirty rupees on filing the specification—forty rupees in all—shall secure the exclusive privilege for four years, a period sufficient in ordinary cases to determine whether the patent is worth maintaining or not. If it is, the inventor can retain it by annual payments of fifty rupees for the next five years and one hundred rupees for the last five years of the time. If he obtains an extension of the time, he will have to pay one hundred rupees annually. By omitting to make the payment he may abandon the exclusive privilege at any time, and his invention, *valeat quantum*, becomes available for the benefit of the public. In this way the inventor is made the judge whether it is worth his while to maintain his patent or not ; and the fees are graduated so as to correspond approximately with the increasing value which the invention may be supposed to acquire as it becomes more generally known and used. By this procedure also patents for inventions of small value are speedily eliminated and cease to stand in the way of more valuable combinations.

" In the next place, as the consideration for every patent is the communication of useful information to the public, we have provided, in section 9, that the specification must describe the invention in such full, clear and exact terms that any person skilled in the art, process or manufacture to which the invention relates shall be able to make and use it without difficulty. This is the American rule, and is supported by a long series of decisions in the English Courts. To secure this complete description we provide that drawings or photographs must be supplied when necessary ; and, objection having been taken to the expense of models, we propose that these shall be furnished only when especially required by Government. To ensure proper publication of the invention in India, we think that specifications should be filed not only in Calcutta, Madras and Bombay, but also in Rangoon, and such other places as the Governor General in Council may from time to time appoint.

" As litigation in regard to patents is frequently of the most vexatious and expensive character, we have provided that, when a plaintiff impeaches the validity of a patent under section 30, he may be required by the Court to give security for costs, and that the Court may add, as parties to the suit, any persons claiming an interest in the subject-matter. In this way, it is hoped, multi-

plicity of actions may be avoided and frivolous applications discouraged. In like manner, we propose that, when application is made for the prolongation of the term of a patent beyond fourteen years, the Court may hear what is to be urged for or against the extension by any person interested in obtaining or opposing it. As there would be a manifest inconvenience in maintaining in India a patent which had expired in the United Kingdom or any foreign country, we have provided that when from any cause a patent ceases to exist in its country of origin it shall also come to an end in this country.

"With a view to encourage foreign inventors, we have provided that any act required to be done in regard to the obtaining of an exclusive privilege in India by an inventor may be done on his behalf by an agent duly authorised in writing; and, as it may be difficult for an inventor to protect his rights in a country of such extent as this, we have provided that he may assign them in any province or other local area as he may see fit. We have not thought it wise to adopt a suggestion that has been made that Government should maintain a special police for the purpose of discovering and punishing infringement of patents. The patentee must guard his own privilege: the duty of the legislature and of the Government is at an end when he is provided with reasonable facilities for doing so.

"In the part relating to designs we have made a few amendments of a subsidiary character.

"Surprise has been expressed in some quarters that this Bill does not, like its English prototype, deal with trademarks as well as with inventions and designs. Upon this point it may be sufficient to say that a Bill for the registration of trademarks was prepared in 1879 at the suggestion of the Bombay Mill-owners Association and the Bombay Chamber of Commerce, and abandoned in 1881 at the almost unanimous request of the mercantile community throughout the country, including the two Associations above-named."

DEBTORS BILL.

The Hon'ble MR. SCOBLE also moved that the Hon'ble Mr. Halliday be added to the Select Committee on the Bill to amend the law relating to Imprisonment for Debt.

The Motion was put and agreed to.

RESERVE FORCES BILL.

The Hon'ble LIEUTENANT-GENERAL CHESNEY moved for leave to introduce a Bill to regulate Her Majesty's Indian Reserve Forces. He said:—

"The object of the Bill is stated in the title, but I may just mention for the information of the Council that in 1885, when the Government were engaged in various measures for improving the efficiency of the Indian Army, they determined, with the approval of Her Majesty's Government, to introduce into that army the system, which has been established some years with great success in the British Army, of what is known as the reserve system, under which soldiers are returned to private life on reduced rates of pay with the liability to be called upon to join their regiments in cases of emergency. It is considered that a system of this kind, which is unquestionably not only efficient but economical, is peculiarly adapted to the circumstances of the Indian Army, because that army is composed in a great measure of people drawn from the agricultural population, who ordinarily live in their villages, ready to be found, and to whom it is thought such a system would be peculiarly acceptable. I may mention that although the Indian Army is technically a long service army, insomuch that every soldier is eligible for pension if he serves for a pensionary period, and is entitled to remain in the service until he has become eligible for pension, nevertheless, as a matter of fact, it is a short service army, so far that a great many of the soldiers take their discharge within from five to ten years' service. The reason for this state of things is generally supposed to be that these men, being agriculturists and having an interest in their lands, cannot conveniently absent themselves from their homes for long periods of service. But, although long service is not practicable for many of them, they are a class

of men who are military in their instincts and are quite ready to come for shorter periods; and it is hoped and believed that the attraction of a reserved rate of pay, carrying with it only the liability to be called upon for active service on emergency, as I have mentioned, will be acceptable to a large number of those men who now take their final discharge after short periods of service in the Army. I should mention that, although the reserve system was nominally introduced by notification about a year ago, practically not much progress has been made with it up to this time, in consequence, first, of a large part of the army being engaged in active service in Burma, and also because the Bengal Army has been undergoing a small augmentation, and until that is completed it is not possible to allow men to be drafted into the reserve. It was originally contemplated that the reserved soldier would be on the footing of a man on unlimited furlough, and that his legal status should not be affected by his going into the reserve on this condition. But on further consideration it was found desirable, following the practice in England, where a special Reserve Act has been passed, to deal with soldiers in the reserve also of the Indian Army in this country by a legislative enactment setting forth the conditions of service in the army reserve."

The Motion was put and agreed to.

The Hon'ble LIEUTENANT-GENERAL CHESNEY also introduced the Bill.

The Hon'ble LIEUTENANT-GENERAL CHESNEY also moved that the Bill and Statement of Objects and Reasons be published in the Gazette of India in English, and in the local official Gazettes in English and in such other languages as the Local Governments think fit.

The Motion was put and agreed to.

The Council adjourned to Friday, the 24th February, 1888.

S. HARVEY JAMES,
Secretary to the Govt. of India,
Legislative Department.

FORT WILLIAM; }
The 23rd February, 1888. }

SUPPLEMENT TO
The Gazette of India.

No. 8.} CALCUTTA, SATURDAY, FEBRUARY 25, 1888.

OFFICIAL PAPERS.

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully or make known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.

Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately in a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.

CIVIL WORKS.
Irrigation.

**ADMINISTRATION REPORT OF IRRIGATION WORKS IN THE MADRAS
PRESIDENCY FOR 1886-87.**

No. 39 I., dated Calcutta, the 22nd February 1888.

RESOLUTION—By the Government of India, Public Works Department.

Read—

Administration Report of Irrigation Works in the Madras Presidency for 1886-87.

OBSERVATIONS.—The Budget grant, Revised Estimate, and Direct Capital Outlay are shown in the following statement :—

	Number of works on which expenditure was incurred.	Budget grant.	Budget Estimate.	Direct expenditure of the year.	Total expenditure to end of year including indirect charges.
MAJOR WORKS.		Rs.	Rs.	Rs.	Rs.
Productive Public Works .	8	15,05,000	12,87,088	9,82,833	5,04,92,739
Protective Works (Rushikulya Project)	1	2,80,000	2,39,410	2,22,317	7,02,873
MINOR WORKS AND NAVI- GATION.					
Ordinary Irrigation Works for which Capital and Reve- nue Accounts are kept .	12	5,27,000	4,88,827	4,65,579	1,13,75,968*

* Exclusive of expenditure on projects and on some works of which the capital accounts are not yet compiled.

The figures for Minor Works and Navigation include a grant-in-aid from Protective funds for the construction of the Buckingham Canal. The large lapses in the expenditure of the grants for Major Works occurred chiefly on the Godavari and Kistna Delta Systems and on the Barur Tank Project. In the Godavari Delta the short outlay is said to be due to the attention of the establishment being fully taken up in repairing damages caused by floods; in the Barur Tank Project the construction of certain works was deferred. The lapse under the head of Major Works was Rs. 5,80,000, or 32 per cent. of the Budget grant.

2. The total of the direct and indirect Capital outlay on Productive Public Works amounted at the close of the year to Rs. 5,04,92,739, including the purchase money of the Kurnool Canal; the gross revenue, after deducting the portion due to old irrigation, was Rs. 43,28,358; the maintenance and collection charges amounted to Rs. 13,14,389; the net revenue was therefore Rs. 30,13,969, giving a return of 5.96 per cent. on the Capital outlay. In the previous year the similar return on outlay was 5.77 per cent. These figures include the Kurnool Canal, which is unremunerative, and the Barur Tank, which is not in operation. The Capital of the other Productive Public Works amounts to Rs. 2,85,55,316, and the net revenue derived from them in 1886-87 was Rs. 31,37,739, or 10.98 per cent. on the Capital invested.

3. In the following table are given the more important items of information for the Productive Irrigation Works in operation:—

Systems.	Capital outlay, direct and indirect.	Acres irrigated.	Revenue from all sources.	Charges including collection.	Net revenue.	Percentage of Net Revenue on Capital outlay.
	Rs.	Acres.	Rs.	Rs.	Rs.	
Godavari Delta	1,23,30,479	598,236	19,81,163	6,10,712	13,70,451	11.11
Kistna .	79,21,264	337,419	12,34,407	4,00,223	8,34,184	10.53
Cauvery .	17,75,829	1,006,626	7,38,212	41,453	6,96,759	39.23
Penner Anicut	17,42,885	63,480	1,33,853	18,871	1,14,982	6.59
Srivaikuntham	14,29,508	40,078	1,13,450	23,533	89,917	6.29
Kurnool Canal	2,16,55,457	22,676	65,964	1,89,734	-1,23,770	...
Sangam Anicut	33,55,351	47,421	61,309	29,863	31,446	0.93
Total	5,02,10,773	2,115,936	43,28,358	13,14,389	30,13,969	...

The figures of money given in this statement refer only to the new works, but the area irrigated includes both the old irrigation that existed before these works were undertaken and the new irrigation, and is inclusive of both the first and second crops. The total area occupied for irrigation in the year was 2,002,195 acres, of which 1,960,610 acres were effectively irrigated in the first crop and 155,326 acres in the second, making the total of 2,115,936 acres shown above. In the previous year the total area irrigated by these same works was 2,098,223 acres, made up of 1,943,025 acres first crop and 155,198 acres second crop.

4. The following figures show the progress of irrigation from the above systems during the last three years:—

		Acres.	Irrigation Revenue. Rs.	Rate per acre.
1884-85	{ First crop	1,666,865	52,54,870	3.15
	{ Second „	126,830	3,28,020	2.55
		1,793,695	55,77,890	
1885-86	{ First crop	1,943,025	61,19,049	3.14
	{ Second „	155,198	3,89,877	2.51
		2,098,223	65,08,926	
1886-87	{ First crop	1,960,610	62,00,974	3.16
	{ Second „	155,326	4,03,446	2.59
		2,115,936	66,04,420	

5. The following statement shows the principal facts connected with the Minor Irrigation Works for which Capital and Revenue Accounts are kept :—

Systems	Capital outlay, direct and indirect.	Acres irrigated.	Revenue from all sources on new works.	Charges including collection.	Net Revenue.	Percentage of Net Revenue on Capital outlay.
	Rs.	Acres.	Rs.	Rs.	Rs.	
IMPERIAL.						
Chambrambakam Tank	7,36,569	19,402	41,263	5,368	35,895	4.87
Palar Anicut	17,88,379	89,763	1,29,199	50,321	78,878	4.41
Palandurai Anicut	4,31,869	3,632	6,097	14,640	—8,543	...
PROVINCIAL.						
Madras Water-supply	17,54,045	9,684	22,998	42,799	—19,801	...
Buckingham Canal	66,65,086	Nil	60,949	1,12,901	—51,952	...
Total	1,13,75,968	122,481	2,60,506	2,26,029	34,477	...

The total area irrigated by the Minor Works given in the above statement was made up of 89,571 acres of first and 32,910 acres of second crop, the area occupied for irrigation being 90,251 acres. The results obtained from this class of works was more favourable during the year under review than in the previous one. Both of the Provincial systems suffered considerably from the cyclone which occurred on the 9th November 1886.

6. The Minor Irrigation Works for which Capital and Revenue accounts are not kept, are sub-divided into three classes, as shown in the following statement :—

Classes.	Acres irrigated.	Irrigation revenue.
	Acres.	Rs.
Works for which a continuous record of expenditure is kept individually	477,522	17,53,745
Works for which a continuous record of expenditure is kept collectively	1,340,083	35,24,259
Minor Irrigation Works	1,667,621	37,40,003
Total	3,485,226	90,18,007

the total area irrigated was made up of 2,688,228 acres of first and 796,998 acres of second crop.

7. The total area irrigated by all the works in Madras in 1886-87 may be thus stated :—

	First crop. Acres.	Second crop. Acres.	Total. Acres.
Major Works	1,960,610	155,326	2,115,936
Minor Works (of which Capital and Revenue Accounts are kept)	89,571	32,910	122,481
Minor Works (of which Capital and Revenue Accounts are not kept)	2,688,228	796,998	3,485,226
Total	4,738,409	985,234	5,723,643
Corresponding figures of 1885-86	4,621,430	964,877	5,586,307

The increase in the area of irrigation extended with fair uniformity over all the different works.

8. The River Godavari rose above the crest of the Dowlaishweram Anicut on the 7th June 1886, and remained above that level until the 22nd March 1887: the river remained above the crest a month longer than in the previous year. The highest flood on record occurred in the river in August 1886; the river commenced to rise rapidly on the morning of the 18th: by the 19th there was 11·9 feet of water passing over the crest of the Anicut: on the morning of the 21st it had reached its greatest height, 16·9 feet over the crest. This is 1·65 feet higher than the highest flood previously recorded, which occurred in 1861. The flood of 1886 remained for two days-and-a-half above the level of the flood of 1861 and then fell rapidly.

9. Considerable damage resulted from this extraordinary flood. The head lock at Dowlaishweram was destroyed. A breach 625 feet wide occurred in the river embankment, and considerable damage was done by the water, which flooded the country in the neighbourhood; the canal banks were breached in many places in all the three sections of the Delta. One lock weir was destroyed in the central section, and a large surplus sluice situated in the left embankment of the river some miles above the anicut, which had been constructed in 1885, at a cost of Rs. 34,910 was swept away. The water passing through the breach did damage to buildings in the neighbourhood of Rajahmundry. The great scouring sluices at Dumagudem, on the Upper Godavari works, which cost originally more than 1½ lakhs of rupees, were destroyed. Some 23,089 acres of crops were destroyed by the floods.

10. There was no unusual rise in the Kistna River; but very heavy rainfall in August and October 1886 damaged the Ellore and Commamur Canals of the Kistna Series. There was ample water both for irrigation and navigation in these canals, and the year, on the whole, was a favourable one.

11. The rivers which supply the other Major Works were subject to no unusual floods, which were in all cases considerably below the maximum levels. The Penner river failed for some days in September 1886 to give a sufficient supply to the Sangam Anicut System. The Kurnool Canal was breached in several places by excessive rainfall and by an overflow of the Kundari River. The closing of one of the largest breaches cost more than Rs. 10,000.

12. The Kurnool Canal continues to be extremely unpromising in its progress; the area irrigated by it remains practically the same. Concessions have been made which comprise provision of water free of charge for five years, then at half rates for five years, after which full rates will be charged. Considerable reduction in rates is also made in the case of dry lands which have not been irrigated for ten years back. Under these concessions, 3,348 acres of waste land in Kurnool and 1,705 acres in Cuddapah were brought into cultivation.

13. The following table shows the chief statistics of navigation on the canals in Madras:—

Canals.	Length of navigable channel.	Navigation Receipts.	Value of goods.	Ton-mileage.
	Miles.	Rs.	Rs.	
Godavari Canals	456	86,893	1,25,33,511	6,345,757
Kistna " 	281	24,045	1,17,39,140	8,663 014
Kurnool Canal	190	4,578	4,04,160	197,300
Buckingham " 	262	56,895	1,13,76,892	16,353,548
Total	1,189	1,72,411	3,60,53,703	31,559,419
Corresponding figures of 1885-86	1,182	1,75,348	3,72,93,656	35,669,897

There has been a falling off in the traffic on all the canals as compared with the previous year, although the receipts on the Buckingham Canal were slightly larger. The working expenses of all the navigable canals is considerably in excess of the receipts. The Buckingham Canal, which is purely a navigation canal, was worked at a net loss of Rs. 51,952; this result is, however, considerably better than that obtained in the previous, or from an average of the past three years.

14. The areas irrigated by the Chembrambakam Tank, the Palar Anicut System, and the Palandorai Anicut System showed a slight increase in all cases. All these works showed greatly improved financial results, owing to a considerable reduction in the cost of maintenance. The last system, however, is still worked at a loss.

15. The final grant for Minor Works and Navigation, for which neither Capital nor Revenue Accounts are kept, was Rs. 18,50,448, and the direct expenditure was Rs. 18,08,038. The total expenditure was Rs. 16,593 in excess of that of the previous year. Excluding the old maintenance charges of works for which Capital and Revenue Accounts are kept, the expenditure amounted to 16.19 per cent. on the irrigation receipts. This result shows an improvement in the corresponding figures of the previous year and a large improvement on that of the year 1884-85.

16. The direct outlay on agricultural works in 1886-87 was Rs. 3,71,884, and the allotment Rs. 3,77,009. The outlay in 1885-86 was Rs. 3,91,306.

17. The final grant for Protective Works amounted to Rs. 3,89,410. The expenditure on the Rushikulya Project was Rs. 2,22,317, and on the Buckingham Canal Rs. 1,42,822, and the total outlay during the year Rs. 3,65,139.

18. The designation of the work of investigating the requirements of the tanks in Madras has been altered from the "Tank Maintenance Scheme" to the "Tank Restoration Scheme." Estimates for improvements, aggregating Rs. 3,64,236, were prepared during the year, and Rs. 4,66,886 were actually expended against a grant of Rs. 4,79,700. The money was chiefly utilised on the reconstruction of old anicuts, and on the construction of minor weirs and sluices.

19. The average rainfall over the whole Presidency was 38.89 inches as against 34.42 inches in 1885-86. There were 14.27 inches in the north-east and 24.62 inches in the south-west monsoons. From May to October 1886 the rainfall was abundant and seasonable, but the north-east monsoon was generally deficient, except in the four northern districts and in Kurnool, where the fall was excessive. Considerable damage was done to various works in the districts of Vizagapatam, Godavari, and Kurnool. An unexpected freshet in the Vellaur River in March 1887 carried away three courses of the body wall of the Palandorai Anicut, which had been breached in December 1884 and was under repair.

ORDER.—Ordered that copies of this Resolution be forwarded to the Secretary of State for India, and of the Resolution and Report to the Departments of Finance and Commerce and Revenue and Agriculture, for information.

Also that copies of this Resolution be forwarded to the Government of Madras for information.

Also that a copy of the Resolution be forwarded to the Local Governments

The Governments of Bombay, Bengal, the North-Western Provinces and Oudh, and Administrations
and the Punjab, in the Public Works Department. marginally noted, for
The Chief Commissioner of the Central Provinces. information.
The Agent to the Governor General for Rajputana.

Also that a copy be forwarded to the Publisher of the *Gazette of India*, for publication in the Supplement to the Gazette.

R. HOME, Colonel, R.E.,

Deputy Secy. to the Govt. of India.

GOVERNMENT OF INDIA.

M. C. BRACKENBURY, Major, R. E.,
Under-Secretary.

CALCUTTA,

The 22nd February, 1888.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the Week ending Feb. 15th, 1888.

During the past week the weather has been unsettled.

On the 9th the barometer was falling throughout India, and slight local depressions were visible near Khandwa and between Raipur and Cuttack. A south-easterly current prevailed in the North-Western Provinces, while around the depressions, the wind showed a feeble cyclonic circulation, and rain in small amounts was falling in parts of the Punjab, the west of the North-Western Provinces, and snow and rain on the hills of the North-West Himalaya. On the 10th the chart showed that the depression, which lay between Raipur and Cuttack yesterday, had either filled up or travelled into Bengal, where now existed a well-marked depression, with its centre near Dacca. At the same time fresh but slight depressions had appeared—one in Sind and one in Hyderabad. The skies became overcast in the Punjab, Bengal and at the hill stations, and a general and rather heavy rain was reported from Bengal. The largest amounts registered were $1\frac{1}{2}$ inches at Saugor Island and Calcutta, and over 1 inch at Burdwan and Darjeeling. On the following day the depression over Bengal had disappeared, and the barometer risen quickly over that province and in Assam. A large low-pressure area, with its centre apparently near Kurrachee, was overlying Lower Sind, Guzerat and Central India, and occasioning a considerable fall of the barometer over that region and its neighbourhood. Besides, slight depressions were also shown along the foot of the North-West Himalaya, over the Bombay, Deccan and near Raipur. Except at Kurrachee, where a moderately strong easterly current was blowing, the winds were exceedingly variable in their directions and the weather showery in Bengal and Assam. On the 12th the chart showed that the low-pressure area had enlarged and was now overlying North-Western India, Guzerat and the Central Provinces. Winds, whilst remaining variable, being influenced by the low-pressure area, had strengthened at Goa and Belgaum; and sporadic showers of rain had occurred at Sibsagar, Darjeeling, Jeypur and Gopalpore. During the following 24 hours, the barometric depression assumed a definite though irregular shape, and extended from Sind eastward across the central parts of the country as far as Orissa. The winds, although blowing with a high force at a few stations, were still irregular in their directions. The skies were overcast in the Upper Assam Valley, at the head of the Bay, and in the Kumaon hills, and fairly general rain fell in Bengal, the North-Western Provinces, and the Central and North-Western Punjab, and snow on almost all the hills. The principal amount of rain (0·80. inch) was reported from Dacca, while the undrifted snow at Murree and Mussooree measured about five inches in depth. By 10 A. M. of the 14th, the low-pressure area had extended to the North-Western Provinces and Bengal, and now covered a well-defined tract represented by Northern India, Orissa, the central parts of the country and the Deccan, with its centre somewhere to the east of Seoni. The distribution of pressure was still abnormal over a large part of the country. A normal north-westerly current obtained in the Punjab, Rajputana, Guzerat and on the Malabar coast, and a north-easterly wind in Sind and the Upper Assam Valley. Over the remainder of the country, the circulation was being affected by the low-pressure area. The skies still remained densely clouded in the Kumaon hills, parts of Bengal and in Assam, and rather heavy rain fell at Sibsagar. At the same time, a south-westerly wind was blowing at Colombo and giving a few drops of rain to Ceylon. On the 15th, with some exceptions of but little importance, the barometer was giving way all over the country and the pressure becoming rather uniform over a large tract of the country, except in the extreme North-West, where the baro-

meter stood high; and also in Bengal, Orissa and the Deccan, where the readings remained low. The winds were returning to their normal directions and blowing strongly at Gopalpore and Thyetmio. Rather heavy rain fell at Saugor Island and showers at two or three stations elsewhere.

Pressure.—The mean pressure of the week has been above the monthly average in Burma and Ceylon; below it elsewhere. The deficiency per station has been greatest in Sind, as also has been the excess in Ceylon.

Temperature.—The temperature has been slightly in excess of the normal in Ceylon and the Madras Presidency; below it in all other parts of India. The greatest cold, relative to the average, was in the hills of Upper India.

Humidity.—The air has been damper than the average in all places except Ceylon.

Rain.—The precipitation has been general and heavy in Bengal and Assam and slight in the North-Western Provinces and the Punjab, except on the hills, where it has been fairly moderate. A few drops also fell in Ceylon and locally at Moulmien, Bombay, Seoni and Gopalpore. In the central and southern parts of the country, the weather was dry throughout the week.

The concluding table gives the total rainfall for the past week:—

DIVISIONS.	Number of stations.	Total rainfall.
Burma	1	0.11
Bengal and Assam	14	14.44
North-Western Provinces and Oudh	5	0.39
Panjab	6	0.79
Hill Stations	5	2.83
Ceylon	2	0.04
Malabar Coast	0	0
Bombay	1	0.02
Berars and Central Provinces	1	0.06
Guzerat and Central India	0	0
Sind—Rajputana	1	0.02
Madras	1	0.15

HEM RAJ,

for Offg. Meteorological Reporter to the Govt. of India.

Simla, 17th February, 1888.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—For week ending 18th February 1888.—No rain except a small quantity in Ganjam, Vizagapatam and Malabar. Rainfall to date generally sufficient except in parts of Vizagapatam, Madura, Tinnevely and Salem. Crops generally good, but very slightly damaged here and there by rain, disease or insects. Wet crops under rain-fed tanks in parts of Madura withering owing to deficient supply. Pasture generally sufficient, but scanty in Malabar and parts of Madura and Anantapur and decreasing in Vizagapatam. No great fluctuations in prices. General prospects favourable.

Bombay.—*For week ending 22nd February 1888.*—Rain in parts of Sind and Sholapur; beneficial to standing crops in Shikarpur and Upper Sind Frontier and to pasturage in the latter district. Wheat, linseed, late *rowari* and exotic cotton blighted in Dharwar and wheat damaged by rust in parts of Kaira. Standing crops fair in Thana, Kolaba, Belgaum, and Broach and good in other districts. Cotton-picking in progress in Dharwar and in parts of Gujarat and Kathiawar. Harvesting of late crops in progress in Karachi, Ahmedabad, Kaira, Surat, Khandesh, Nasik, Ahmednagar, Sholapur, Bijapur, Belgaum, Dharwar, Kanara and Kathiawar. Preparation for sowing of next season's crops progressing in Karachi, Bijapur and Dharwar. Probable outturn of late crops 13 annas in Karachi, 12 annas in Hyderabad, 8 to 10 annas in Surat, 7 to 9 annas in Bijapur, 12 to 14 annas in Poona, and 7 annas on an average in Dharwar. Probable outturn of wheat 14, and of linseed 8 annas in Khandesh, and of wheat in three talukas of Kaira 10 annas on an average. Fodder scarce in three talukas of Karachi, one of Nasik and one of Dharwar.

Bengal—*For week ending 21st February 1888.*—Cold season is almost over, and weather is becoming warm. Prospects of *rabi* crops are generally good, the recent rain having materially benefited them. Poppy is in excellent condition, the plants are in flower, and in some places opium is being extracted. Transplanting of spring rice is almost finished. Harvesting of mustard, pulses, tobacco and sugarcane goes on. Ploughing for early rice and jute is in progress. Price of rice has remained almost stationary during the last fortnight; it is lower than last year in Eastern Bengal, but is higher in most other parts of the Province.

N.-W. Provinces and Oudh.—*For week ending 22nd February 1888.*—Weather generally fine but cloudy in Kumaun and Meerut Divisions where sunshine is now needed. Heat is increasing. Wheat slightly injured by blight in Benares and Meerut, otherwise crops are ripening well. The poppy crop is thriving. Supplies are ample but high prices generally continue. Cattle are generally in satisfactory condition.

Punjab.—*For week ending 22nd February 1888.*—Slight rainfall in some districts. Prices are reported to be stationary in seven districts and falling in four. Ploughings for *kharif* in progress throughout the Province. *Rabi* prospects have improved by the recent fall of rain and are now reported good. More rain is wanted at Hissar. Crops slightly damaged by hail in Hissar. Stock cattle are healthy except in two tahsils of Shahpur. Fodder scarce in many districts but prospects are improving. Poppy crops average.

Central Provinces.—*For week ending 22nd February 1888.*—Weather cloudy, with slight rain in places. Prospects of wheat and other winter crops are generally favourable, but linseed has been damaged by cloudy weather. Condition of cattle is fair. Prices are high in Jubbulpore.

Burma.—*For week ending 18th February 1888.*—Slight rain has fallen in the Akyab district of Lower Burma and in the Bhamo, Myadoun, Sagaing, Kyaukse, Myingyan, Pagan and Yamethin districts of Upper Burma. Dry-weather crops progressing favourably. Slight cattle-disease reported in two townships of Thonegwa district, otherwise condition of agricultural stock is good. Estimate or outturn of harvest remains the same as last week. Price of paddy has risen in the Bassein, Henzada, Shwegyin, Mergui and Shwebo districts, and fallen somewhat in the Kyaukpyu, Lower Chindwin and Myingyan districts.

Assam.—*For week ending 22nd February 1888.*—Weather seasonable. Slight rain fell in some districts. Harvest of mustard going on, sugarcane is being crushed and land is being prepared for summer rice. Potato sowing going on in the Hill Districts.

Mysore and Coorg.—*For week ending 22nd February 1888.*—No rain. Standing crops in good condition. Outturn of harvests favourable. Condition of cattle generally good. Prices have fallen in the Bangalore district and have risen in the Chitaldroog district slightly.

Half an inch of rain in Coorg. Picking of coffee crop nearly completed. Threshing of rice continues. Prices are stationary.

Berar and Hyderabad.—*For week ending 22nd February 1888.*—Weather cloudy. The harvesting of *kharif* crops is almost completed. Standing *rabi* crops are in good condition, and in some places cutting of *rabi* crops is in progress. Agricultural stock generally in good condition. No marked fluctuations in prices of food-grains.

Some rain in Hyderabad during the week. Agricultural prospects continue good. Prices stationary.

Central India.—*For week ending 22nd February 1888.*—Slight rain at Indore, Gwalior and Goona. No change in agricultural operations, standing crops, or outturn of harvest, since last report. Agricultural stock indifferent in Western Malwa and bad in Goona. Pasturage and fodder good. Prices of food-grains are rising in Indore and Bundelkhand, high in Western Malwa, Goona and Neemuch, and elsewhere steady. Opium crops have been slightly damaged in Western Malwa. Reports from other parts not complete.

Rajputana.—*For week ending 22nd February 1888.*—Agricultural operations satisfactory. Standing crops good. Agricultural stock generally in good condition. Pasturage or fodder sufficient. Prices still high, but tendency to fall in Marwar and Sirohi. Cotton below the average in some States.

E. C. BUCK,
Secretary to the Government of India.

AGRICULTURE.

The 2nd March, 1888.

No. 214—53-4A.—The following letter and enclosed proclamation received from the Acting Colonial Secretary, Government of Jamaica, are published for general information:—

No. 18273, dated Jamaica, the 24th December, 1887.

From—J. ALLWOOD, Esq., Acting Colonial Secretary, Jamaica,
To—The Secretary to the Government of India.

The Director of the Royal Gardens, Kew, having urged upon the Secretary of State for the Colonies the importance of taking all possible precautions against the introduction of the Coffee Leaf disease into the West Indies and Sir H. Holland having brought the matter to the notice of the Governor of Jamaica, in connection with the Local Law, 4 of 1884, "the Seeds and Plants Importation Law, 1884," under which the Governor is empowered by proclamation to prohibit the importation from any country of articles likely to introduce that disease into Jamaica, His Excellency has deemed it advisable to exercise the powers given by that law and to issue the Proclamation of which I have now the honour, by His Excellency's direction, to forward you a copy for the information of the Government of India.

Proclamation by HIS EXCELLENCY SIR HENRY WYLLIE NORMAN, General of Her Majesty's Forces, Knight Grand Cross of the Most Honourable Order of the Bath, Knight Grand Cross of the Most Distinguished Order of Saint Michael and Saint George, Companion of the Most Eminent Order of the Indian Empire, Captain General and Governor-in-Chief in and over the Island of Jamaica and its Dependencies.

In virtue of the power vested in me in that behalf by the First Section of Law 4 of 1884, entitled "The Seeds and Plants Importation Law, 1884," I do hereby prohibit, until further Proclamation, the importation into this Island of Seeds or Plants, or any description of earth or soil, or any article packed therewith, that may have come either directly or indirectly from any of the following countries:—Natal, South India, Ceylon, Mauritius, Java, and Fiji.

Given under my Hand and the Broad Seal of this Island, at King's House, this Second day of December, in the Fifty-first Year of Her Majesty's Reign, Annoque Domini, 1887.

E. C. BUCK,

Secretary to the Government of India.

ORDER—By the Government of India, Department of Finance and Commerce.

Read—

Despatch from the Secretary of State for India, No. 12 (Public), dated 2nd February, 1888, and Order of Her Majesty in Council forwarded therewith.

Ordered, that copy of the Despatch and of the Order in Council be forwarded to the Governments of Bombay, Madras and Bengal, and to the Chief Commissioner, Burma, for information and guidance.

Ordered also, that the Despatch and the Order in Council be published in the *Gazette of India*, for general information.

Public.

No. 12.

To His Excellency the Right Honourable the Governor-General of India in Council.

MY LORD,—I forward for the information of your Excellency in Council and of the Governments of Madras and Bombay ten copies of an Order of Her Majesty in Council, extending the provisions of the Foreign Deserters

Dated 29th December, 1887.

Act, 1852, to crews of ships belonging to the Republic of Paraguay.

INDIA OFFICE,

London, 2nd February, 1888.

I have, &c.,

(Signed) CROSS.

AT THE COURT AT OSBORNE HOUSE, ISLE OF WIGHT,

The 29th day of December, 1887.

PRESENT,
THE QUEEN'S MOST EXCELLENT MAJESTY
LORD PRESIDENT
SIR AUGUSTUS PAGET
MR. RITCHIE

WHEREAS by the "Foreign Deserters Act," 1852, it is provided that whenever it is made to appear to Her Majesty that due facilities are or will be given for recovering and apprehending seamen who desert from British merchant ships in the territories of any foreign power, Her Majesty may, by Order in Council stating that such facilities are or will be given, declare that seamen, not being slaves, who desert from merchant ships belonging to a subject of such Power when within Her Majesty's dominions shall be liable to be apprehended and carried on board their respective ships, and may limit the operation of such Order, and may render the operation thereof subject to such conditions and qualifications, if any, as may be deemed expedient:

And whereas it hath been made to appear to Her Majesty that due facilities for recovering and apprehending seamen who desert from British merchant ships in the territories of the Republic of Paraguay will be given under a Treaty between the Governments of Great Britain and Paraguay signed at Assumption on the 16th October 1884.

NOW, THEREFORE, Her Majesty, by virtue of the powers vested in Her by the said "Foreign Deserters Act," 1852, and by and with the advice of Her Privy Council, is pleased to order and declare, and it is hereby ordered and declared, that, from and after the publication hereof in the *London Gazette*, seamen, not being slaves (and not being British subjects), who desert from merchant ships belonging to the Republic of Paraguay within Her Majesty's dominions shall be liable to be apprehended and carried on board their respective ships; provided always, that if any such deserter has committed any crime in Her Majesty's dominions he may be detained until he has been tried by a competent Court, and until his sentence (if any) has been fully carried into effect.

And the Secretary of State for the Home Department, the Secretary of State for the Colonies, and the Secretary of State for India in Council, are to give the necessary directions herein accordingly.

C. L. PEEL.

E. J. SINKINSON,

Offg. Secretary to the Government of India.

MILITARY DEPARTMENT.

Fort William, the 25th February, 1888.

FIELD OPERATIONS.

No. 169.—His Excellency the Governor-General in Council has ordered the despatch of a force as detailed below for operations on the Sikkim-Tibet Frontier:—

Staff.

Colonel T. Graham, R.A., Commanding.
Captain E. A. Travers, 1st Battalion, 2nd Gurkha Regiment, Deputy Assistant Adjutant-General.

(1).—Strength of Force.

9-1st Brigade, Northern Division, R. A.	4 guns.
2nd Battalion, Derbyshire Regiment	200 men.
Head-quarters wing, 13th Bengal Infantry	400 men.
32nd Bengal Infantry (Pioneers) (about)	700 men.

(2).—General Regulations.

The organisation of the force will be in conformity with existing rules for field service.

No men should be allowed to accompany the force but those in every way fit for service in a cold climate.

Families of British troops left in India will remain at their present stations, and will receive in addition to subsistence allowance half rations for the wives and children.

(3).—Ammunition.

168 rounds per gun, 200 rounds per rifle, and 100 rounds per carbine

(4).—Camp Equipage.

Mountain { Double fly, for Europeans.
Artillery { Single fly, for Natives.

Entrenching tools on field service scale, and in addition 100 dhaoos per regiment, 50 per battery, and 50 per cent. for number of followers.

(5).—Stores.

One month's supply of Quartermaster's stores to be carried by troops, as far as the base dépôt.

(6).—Supplies.

Provision for one month's supplies to be made. Rations will be issued on the field service scale for British and Native troops and followers.

Free rations will be allowed from date of departure from, to date of return to, Siligori and Darjeeling.

The troops must cut their own firewood, if possible.

Officers will be held responsible for the suitable clothing of their attendants.

(7).—Transport.

As far as possible mules, supplemented by coolies.

(8).—Telegraph.

The needful extension of the telegraph along the line of movement of the troops will be carried out under orders to be issued in the Public Works Department.

(9).—General.

A base depot will be formed at Siligori or at some place conveniently near under an officer to be detailed from outside the force, who, with the representatives of the Quartermaster-General's and Commissariat Departments, must reach the base ten days before the troops are ordered to assemble, all stores and supplies being timed to arrive during the intervening days. All packages to be made up in mule loads, not exceeding 80lbs, and marked according to regulations. The base depot establishment deemed necessary will be sanctioned in excess of the main force.

All European officers will be provided with a map, on cloth, of the proposed theatre of operations.

Postal arrangements to be made in communication with the Deputy Commissioner of Darjeeling. Any necessary provision for the line of communications to be made by the force.

Reports to be submitted direct to Army Headquarters, or as the Commander-in-Chief may direct.

(10).—Medical.

All medical, sanitary, and hospital arrangements will be carried out under the directions of the Surgeon-General, Her Majesty's Forces, Bengal.

(11).—Pay and Accounts.

No field audit office will be established; the accounts of the force will be sent direct to the Military Accounts Department, Calcutta, for audit.

A field treasure chest will accompany the force under charge of an officer to be nominated by the officer commanding the force.

Troops, followers, and departments will receive the usual advances of pay allowed by regulations, and the Controller of Military Accounts, Calcutta, will arrange for the provision of the necessary quantity of specie to accompany the force.

(12).—Commissariat.

Three Commissariat Officers (two for supply and one for transport) with a small establishment of warrant and non-commissioned officers, clerks and agents, will accompany the force.

The scale of rations on payment for officers, &c., and the rate at which recoveries for the same are to be effected, as well as the scale of forage rations to those who are entitled to the same, will be found in the "Commissariat Field Manual" and "Field Service Account Manual."

The 2nd March, 1888.

APPOINTMENTS.**No. 170.—HYDERABAD CONTINGENT—****1st Infantry.**

Major A. J. Garrett, Bengal S. C., Wing Commander and 2nd-in-Command, 5th Infantry, Assistant Adjutant-General, Hyderabad Contingent, to be Commandant, *vice* Colonel A. C. Havelock, whose tenure of appointment has expired. Dated 11th February, 1888.

No. 171.—MILITARY SECRETARIAT—

Matter intended for publication in the Supplement should reach the Press not later than Thursday.

E. J. DEAN,

Publisher, Gazette of India.

HIGH COURT—ORIGINAL SIDE.

NOTIFICATION.

Calcutta, the 18th February, 1888.

It is ordered that in substitution for the Rules passed on the 26th day of January last, the following rules be read and passed as the rules and orders of the High Court of Judicature at Fort William in Bengal, to take effect from the 1st day of March, 1888:—

1. A list of references of every description which are ripe for hearing and are pending before the Court itself or before any of the officers of the Court, or any other Commissioner appointed to take accounts or make enquiries, shall be published at such times and in such manner as the Judge ordinarily taking motions on the Original Side of the Court may from time to time determine.

2. The printed cause list for each day shall contain a list of the references liable to be heard on that day by the officers before whom such references are pending.
 3. Such list of references shall be divided into two parts, the first of such parts to consist of references of an urgent nature or which can be quickly concluded, and to be styled "list of urgent references;" the second part to consist of all other references and to be styled "list of ordinary references."
 4. Urgent references shall include the following:—
Accounts in mortgage suits.
Sales by the Registrar.
The settlement of proclamations, of conditions of sale, or of conveyances.
Inquiries under Section 267 of the Civil Procedure Code, or under Section 90 of the Probate and Administration Act.
Inquiries as to what would be proper to be allowed for maintenance or marriage expenses.
Inquiries as to whether proposed terms of settlement would be for the benefit of a minor.
References as to the appointment of guardian, and such other enquiries and references as may be determined by the Court or a Judge.
 5. Any Judge sitting on the Original Side may order any particular reference or enquiry to be transferred from either list to the other. Such order need not be made in Court, but may be made upon a representation made by the Registrar or other officer, or Commissioner. It shall not be made except by consent or on notice.
 6. No reference shall be placed in the list of references for the day unless it be ripe for hearing.
No ordinary reference shall be deemed ripe for hearing until a Judge or the officer to whom the matter is referred has certified that the points in issue have been ascertained.
 7. The Registrar or other officer shall at the commencement of each daily sitting hear applications with regard to pending references, and shall not hear any reference until such applications have been exhausted, but such application shall not ordinarily be made or heard on any day after the hearing of references have been commenced.
 8. The officer or Commissioner shall on each day in the first place hear in order the urgent references on his list for the day, and shall then proceed to hear in order the ordinary references on his list for the day.
 9. Each reference shall, unless otherwise ordered by a Judge, be taken in its turn, and it shall be continued *de die en diem* until it be concluded.
- No reference on the list of causes for the day shall (without leave of the Court or a Judge) be postponed or adjourned, except under circumstances which would justify the postponement or adjournment of a cause.
10. References not on the list of causes for the day can at the discretion of the person to whom they have been referred, be postponed or adjourned, but subject to the control or orders of the Judge taking motions on the Original Side.
 11. Any Judge sitting on the Original Side may by an order made upon notice in Court or in Chambers postpone or adjourn any reference pending before himself or before any officer or Commissioner.
 12. When in the opinion of the Judge taking motions on the Original Side, it is necessary that some or all of the references pending before any officer of the Court or Commissioner should be heard by the Court itself or by some other officer or Commissioner, such Judge may recall such references into Court and any time make such order as may be necessary for the purpose aforesaid, or if the parties should consent to any such change, he may make such order without recalling the reference into Court.
 13. The Registrar or other officer taking a reference may at any time pending the reference or on its conclusion apply for the opinion of the Court on any question which may arise in the reference and for such purpose may report specially. Such special reference may be made at the instance of either of the parties or at the instance of the officer himself.
 14. In case an officer refuse or decline to make special reference when requested by a party so to do, such party may apply in chambers by a petition or notice to the other parties to the reference for an order requiring the officer to report specially.
The Judge may in his discretion make such order upon such terms as to costs or otherwise as he may think fit.
 15. These rules are to be read with and to form part of the general rules of the Original Side.
 16. These rules shall come into operation on and from the 1st day of March, 1888.

JOHN ELIOT,

Offg. Meteorological Reporter to the Government of India.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat; the copies for subscribers registered by Messrs. Thacker, Spink & Co. are distributed by that firm; and the Madras, Bombay and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad, respectively.

In supersession of previous advertisements, on and from the 1st January, 1885, the terms of subscription and sale will be as follows:—

Terms of subscription, payable annually in advance.

For the complete Series, including postage	Rs 8	
	Without postage.	With postage.
For the Calcutta Series	Rs 0	Rs 2 0
" each of the Madras, Bombay and Allahabad Series	" 6 0	" 7 0
" a part of the Calcutta Series purchased separately, inclusive of postage in India	...	" 2 0
" a part of the Madras, Bombay and Allahabad Series purchased separately, inclusive of postage in India	...	" 1 0

Persons desiring to subscribe for, or purchase, the Report, should apply to—
 Messrs. Thacker, Spink and Co., Calcutta.
 „ Thacker & Co., Bombay.
 „ Higginbotham & Co., Madras.
 The Government Central Book Depot, Bombay.
 „ The Curator of Government Books, North-Western Provinces and Oudh.
 „ Superintendent of Government Printing, Bengal.

Orders and subscriptions for 1885 should be at once remitted.

NOTICE.

Indian Law Reports.

Advertisements will be received for publication on the wrappers of the Indian Law Reports, Calcutta Series, by the Calcutta Central Press Company, "Limited," 5-1, Council House Street, at the following rates, payable in advance:—

	One page.	Half page.	Quarter page.
For one issue	R 20	R 14	R 9
„ three issues	„ 55	„ 36	„ 24
„ six „	„ 100	„ 68	„ 45
„ nine „	„ 145	„ 96	„ 64
„ twelve „	„ 180	„ 120	„ 80

PART IV.

Acts of the Governor General's Council assented to by the Governor General.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 2nd March, 1888, and is hereby promulgated for general information:—

ACT NO. IV OF 1888.

An Act to regulate Her Majesty's Indian Reserve Forces.

WHEREAS it is expedient to provide for the government, discipline and regulation of Her Majesty's Indian Reserve Forces; It is hereby enacted as follows:—

1. (1) This Act may be called the Indian Reserve Forces Act, 1888;
Title and commence-ment. and

(2) It shall come into force on such day as the Governor General in Council may, by notification in the Gazette of India, appoint in this behalf.

2. The Indian Reserve Forces shall consist of the Active Reserve and the Garrison Reserve.
Division of Reserve Forces into Active and Garrison Reserves.

3. (1) A person belonging to the Active Reserve shall be liable to serve beyond the limits of British India as well as within those limits.
Locality of service of Reserves.

(2) A person belonging to the Garrison Reserve shall not be liable without his consent to serve beyond the limits of British India.

4. The Governor General in Council may make rules and orders for the government, discipline and regulation of the Indian Reserve Forces.
Power to make rules for regulation of Reserve Forces.

5. Subject to the provision of section 3 with respect to persons belonging to the Garrison Reserve, and to such rules and orders as may be made under section 4, a person belonging to the Indian Reserve Forces shall, as an officer or soldier, as the case may be, be subject to military law in the same manner and to the same extent as a person belonging to Her Majesty's Indian Forces.
Liability of Reserve Forces to military law.

6. (1) If a person belonging to the Indian Reserve Forces—
Punishment of certain offences by persons belonging to Reserve Forces.

(a) when required by or in pursuance of any rule or order under this Act to attend at any place fails without reasonable excuse to attend in accordance with such requirement, or

(b) fails without reasonable excuse to comply with any such rule or order, or

(c) fraudulently obtains any pay or other sum contrary to any such rule or order,

he shall be liable—

(i) on conviction by a Court-martial, to such punishment other than death, transportation or imprisonment for a term exceeding one year as such Court is by the Indian Articles of War empowered to award, or

(ii) on conviction by a Magistrate of the first class, to imprisonment for a term which may extend, in the case of a first offence under this section, to six months, and, in the case of any subsequent offence thereunder, to one year.

Act V of 1869.

(2) Where a person belonging to the Indian Reserve Forces is required by or in pursuance of any rule or order under this Act to attend at any place, a certificate purporting to be signed by an officer appointed by such a rule or order in this behalf, and stating that the person so required to attend failed to do so in accordance with such requirement, shall, without proof of the signature or appointment of such officer, be evidence of the matters stated therein.

(3) Any person charged with an offence under this section may be taken into and kept in either military or civil custody, or partly into

and in one description of custody and partly into and in the other, or be transferred from one description of custody to the other.

7. Nothing in this Act or in any rule or order thereunder shall make any person transferred to the Indian Reserve Forces before the commencement of this Act subject, without his consent, to any of the provisions of this Act.

Debates of the Legislative Council of His Excellency the Governor General.

GOVERNMENT OF INDIA.
LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR
GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING
LAWS AND REGULATIONS UNDER THE PROVISIONS OF
THE ACT OF PARLIAMENT 24 AND 25 VIC., CAP. 67.

The Council met at Government House on Friday, the 24th February, 1888.

PRESENT :

His Excellency the Viceroy and Governor General of India, K.P., G.C.B.,
G.C.M.G., G.M.S.I., G.M.I.E., P.C., *presiding*.
His Honour the Lieutenant-Governor of Bengal, K.C.S.I., C.I.E.
The Hon'ble Lieutenant-General G. T. Chesney, R.E., C.B., C.S.I., C.I.E.
The Hon'ble A. R. Scoble, Q.C.
The Hon'ble Sir C. U. Aitchison, K.C.S.I., C.I.E., LL.D., D.O.L.
The Hon'ble Sir C. A. Elliott, K.C.S.I.
The Hon'ble J. Westland.
The Hon'ble Rana Sir Shankar Bakhsh Singh Bahádur, K.C.I.E.
The Hon'ble Syud Ameer Hossein, C.I.E.
The Hon'ble Rájá Peári Mohan Mukerji, C.S.I.
The Hon'ble W. S. Whiteside.
The Hon'ble J. W. Quinton, C.S.I.
The Hon'ble R. Steel.
The Hon'ble Sir Dinshaw Manockjee Petit, Kt.
The Hon'ble F. M. Halliday.
The Hon'ble Sir Pasupati Ananda Gajapati Razu, K.C.I.E., Mahárájá of
Vizianagram.

DEBTORS BILL.

The Hon'ble Mr. SCOBLE presented the Report of the Select Committee on the Bill to amend the law relating to Imprisonment for Debt. He said :—

“As the Bill has been reported in a form substantially differing from that in which it was introduced, I feel it my duty to explain, as briefly as may be, the alterations which have been made and the reasons which prompted them.

"The origin of this measure is thus described in the Statement of Objects and Reasons published by my hon'ble friend Mr. Ilbert on the 9th June, 1886:—

'On the 17th November, 1881, a circular was addressed by the Government of India to all Local Governments and Administrations, stating that the Government of India had under consideration the question of amending the provisions of the Code of Civil Procedure bearing upon the question of the arrest of *pardānashin* women in execution of the decrees of Civil Courts, but that before coming to any final conclusion on the subject the Governor General in Council thought it desirable to deal with the larger question of abolishing imprisonment for debt, and for this purpose to enquire whether sufficient reasons exist for the continued maintenance in India of the present system. Local Governments and Administrations were accordingly requested to favour the Government of India with a full expression of their opinion on the matter.

'The replies to the circular disclosed much difference of opinion as regards the advisability of maintaining in India the present system of imprisonment for debt.

'In favour of the maintenance under existing circumstances of the present system of imprisonment for debt were the Madras Government, the Madras High Court, the Bombay Government, the Bombay High Court, the Calcutta High Court, the Calcutta Chamber of Commerce and the Trades Association, Calcutta (unless a change were accompanied by the enactment of a stringent bankruptcy law), the British Indian Association, Calcutta, the Board of Revenue, North-Western Provinces, the Punjab Chief Court, the Chief Commissioner of the Central Provinces, the Chief Commissioner of Assam (provided the law were so altered as to permit the issue of process against the person only after all means of realising the decree by process against property have been exhausted) and the Chief Commissioner and the Judicial Commissioner of Coorg.'

"On the other side were arrayed the Advocate General of Bengal, the Bengal Government, the Government and High Court of the North-Western Provinces, the Punjab Government, the Chief Commissioner of British Burma, the Judicial Commissioner of the same Province, the Recorder of Rangoon and the Resident at Hyderabad. Thus the preponderance of opinion was on the whole in favour of the maintenance of imprisonment for debt under the present condition of India, but a considerable and influential minority were in favour of its abolition.

"In the result, my learned friend, adopting the opinion that imprisonment for debt ought to be abolished, proposed that, 'having regard to the authority and experience of some of those who are opposed to a change in the law, and bearing in mind the immense diversity of circumstances and conditions which prevails throughout this vast peninsula,' the most prudent course would be to confine its application in the first instance to one province, the North-Western Provinces and Oudh, where the balance of authority, administrative and judicial, was in its favour, leaving it to the Local Governments, with the previous sanction of the Governor General in Council, to apply it to other provinces as they might see fit.

"The Select Committee have not been able to accept this view. They are of opinion that there should be uniformity of practice in regard to execution of decrees wherever the Code of Civil Procedure applies, and that it is the part of the Legislature, and not of Local Governments, to determine whether any, and what, changes should be made in that procedure. Bearing in mind Lord Macaulay's celebrated aphorism—'Uniformity when you can have it; diversity when you must have it; but in all cases certainty,' they have carefully examined the voluminous papers submitted to them with a view to ascertain whether any alteration of the law was called for, and whether men's minds were generally agreed as to the particular alteration necessary.

"Let me here quote Mr. Ilbert's summary of the present state of the law:—

'The present state of the law is this. Under the Civil Procedure Code a decree or order for the payment of money may be enforced by the imprisonment of the judgment-debtor. The Court has a discretionary power to refuse execution at the same time against both person and property, but has no discretionary power to refuse execution either against person or against property at the option of the creditor. When an application for execution of a decree is presented, it must, if it is not barred by efflux of time and is otherwise in order, be admitted, and then the Court must order execution of the decree *according to the nature of the application*. The Court cannot refuse to issue its warrant for the execution of the decree unless it sees cause to the contrary, and "cause to the contrary," as interpreted by the Courts, means some cause which deprives the decree-holder of the right to execute, or to execute against the party against whom execution is sought, or to execute in the mode prayed for.

'Thus, therefore, it may be clear that the debtor has property available for attachment, and that a warrant of arrest has been applied for from vindictive or other improper motives, and yet, if the creditor asks for a warrant of arrest, a warrant must issue. The debtor may be a woman, she may even belong to the class of women who by the law of this country are exempted from public appearance in Court, and yet, if the creditor says that he wishes to send her to prison, to prison she must go.'

"It appeared to the Committee that a state of the law under which the discretion as to whether a debtor shall be arrested and imprisoned or not rests not with the Court but with the creditor was wrong and ought not to be maintained. It has been well said that—'to arrest without enquiry is to punish the larger number of debtors because the smaller require to be coerced;' and it is easy to see how such a power is likely to be misused. The Committee accordingly examined the opinions before them with a view to ascertain whether such a modification of the law as would vest the discretion in the Court was generally desired.

"It would be wearisome to go through all the opinions received, but I will venture to quote a few of them. The Bengal Government wrote:—

'Honest debtors would have a sufficient protection if the Code of Civil Procedure were amended so as to give the Court the discretion of refusing applications to execute process against the person.'

"The Bengal Chamber of Commerce 'would like to see imprisonment, in default of satisfying a decree of the Civil Courts for money, fenced round so as to exclude its being used for malicious motives out of spite, or to satisfy feelings of hatred or revenge.' How this might best be done they say is a problem for those to solve who have proposed the new change in the law. But they suggest that the Judge, after hearing the statements on both sides, might decide whether it is or is not a case where imprisonment for debt might properly be resorted to.

"In the opinion of the Bombay Government,—

'The Courts should have the power to distinguish between the two classes of debtors, and to send to jail those who will not pay, or who, not having the means of paying immediately, refuse to enter into such terms as the Court considers fair and reasonable.

'His Excellency in Council would prefer a provision that upon an application for the arrest of any debtor the Court should cause the defendant to be brought before it, and should satisfy itself that he has not the means of discharging the debt either immediately, or in such manner and within such time as the Court may consider reasonable. If the defendant fails to satisfy the Court, the warrant for arrest should issue.

'The Court would generally be able to satisfy itself by examining the parties and any witnesses whom they might produce, both as to the present means of the defendant and his prospect of future earnings; and, in the event of immediate payment being impossible, it might in most cases substitute for the extortionate bond required by the creditor an order for payment by instalments (including reasonable interest) under section 210 of the Civil Procedure Code. The whole amount of the debt should be made payable immediately, on default of payment of any instalment, and in that event a warrant of arrest should be granted without further inquiry.'

"Mr. Justice West writes:—

'Looking to all the circumstances, a discretionary power should, I think, be given to the Civil Courts as to the issue of a warrant of arrest before the failure of other means of enforcing a decree, and there the legislature should, for the present, be content to stop.'

"The Advocate General of Bombay says:—

'No doubt there are cases in which the power of imprisonment for debt is abused by the creditor, as may be said of all legal process; but I think that these cases would be fully provided for by an amendment of the Civil Procedure Code giving the Court power to refuse an order for arrest of a judgment-debtor or to make an order for his release after arrest in such cases as are provided by section 30 of the Presidency Small Cause Courts Act, 1882; and I think that such an amendment ought to be made.'

"Mr. Justice Brandt, of the Madras High Court, says, and Mr. Justice Parker concurs with him:—

'I should be in favour of an amendment of the provisions of the Code of Civil Procedure in this respect to the extent of vesting the Court executing the decree with full discretion as to whether it would allow process to issue for the arrest of the person of the judgment-debtor, before and until process against property has been issued and proved infructuous.'

" Acting upon the opinions thus expressed, the Select Committee have, in sections 2 and 4 of the Bill, provided that, when an application is made for the execution of a decree for money by arrest and imprisonment, the Court may issue, instead of a warrant, a notice calling on the debtor to show cause why he should not be committed to jail. If the debtor appears upon this notice and satisfies the Court that he is unable, from poverty or other sufficient cause, to satisfy the decree, the Court may release him; if he fails to appear or to satisfy the Court of his inability to pay, the Court may arrest and imprison him. As a guide to the discretion of the Court we have adopted the main provisions of the original Bill as to the circumstances a consideration of which may influence the Court in determining whether or not to exercise the power of imprisonment against a debtor. This is a point on which great differences of opinion may and do prevail, but, having regard to the fact that a man may be guilty of many of the malpractices mentioned without bringing himself within the clutches of the criminal law, the Committee has decided to maintain these provisions.

" It may be thought that this is but a slight alteration of the existing law, that under section 336 of the Code as it stands a debtor has only to inform the Court that he intends to apply to be declared an insolvent, and that upon declaring his intention so to apply within a month, and giving security that he will appear when called upon, the Court shall release him. But the alteration is important. Under the existing law the debtor comes before the Court in custody; under the proposed Act he may come as a free man. It is obvious that he will be in a far better position to prepare a statement of his affairs and to ask his friends to become security for him if he is at liberty than if he is exposed to the indignity and inconvenience of arrest and consequent imprisonment. This consideration applies of course to the honest debtor, whom alone we are concerned to protect: and it is surely fair that his poverty should not be made the occasion of aggravating his misfortune. On the other hand, it is only fair to give the creditor every reasonable facility for obtaining the property of his debtor; and experience seems to establish that in India at all events the remedy is not complete without the power of imprisonment in proper cases.

" One class of judgment-debtors, however, the Committee propose absolutely to exempt from liability to arrest and imprisonment for debt, and that is—women. This is in accordance with the views of the British Indian Association as to *pardánashin* ladies expressed in a letter to the Government of Bengal under date the 28th of June, 1882. 'The law,' they say, 'ought to be adapted to the peculiar circumstances of the country. The Committee submit that the Indian feeling regarding the sanctity of the *zanána* is not a mere sentiment: it is bound up with the deeply cherished religious feelings and social usages of the people.' The proposal in the Bill is to render a woman's property alone answerable for debts incurred by her: we thus assimilate the position of all women to that enjoyed by some married women under Act III of 1874. That there is abundant ground for making this exemption general is clear from the papers which have been before the Committee. Although it may not be true, as stated by one officer, that 'it is almost invariably the female who is selected for imprisonment,' there is no doubt that a system under which, from want of better accommodation, respectable though poor women may be lodged in a criminal jail with thieves and prostitutes for their companions, is self-condemned. The only difficulty in the way of total exemption of women arises from the fact that a woman may, of her own motion or at the instigation of designing persons, institute a false and vexatious suit against an innocent defendant and go harmless if the suit is dismissed and costs are decreed against her. To guard against this we have provided in section 5 that, when a woman is sole plaintiff, the Court may, on proper grounds shown, require her to give security for costs.

" Section 9 of the Bill provides for the cancellation by the Court of an order for arrest or imprisonment in case of the serious illness or confirmed bad health of the debtor, and by the Local Government if he is suffering from any infectious or contagious disease: but a debtor released under these circumstances is liable to be re-arrested.

"The Select Committee has not adopted that portion of the original Bill which cast the burden of maintaining a debtor while in jail upon the State. Imprisonment being used as a means of compelling payment, it seems just that the creditor, who asks the State to assist him in obtaining payment by this means, should pay the expenses of the process. By retaining this obligation of the creditor to support his debtor while in jail, a debtor is not likely to be kept in jail longer than is necessary to convince the creditor that the debtor has no means of satisfying the debt.

"As originally drafted the Bill related to decrees or orders of Revenue Courts. The general consensus of opinion on the part of the officers and Administrations consulted was that the collection of revenue should not be made subject to the provisions of the Bill, and its operation as regards rent and revenue will extend only to decrees passed in rent-suits by Civil Courts or Courts regulated by the Code of Civil Procedure and to the collection of revenue under the rules of the Code, as in Bengal and Burma. With a view to assimilate the maximum time of imprisonment for rent-defaulters to that fixed for other civil debtors throughout India, we have recommended certain subsidiary amendments in Madras Act VIII of 1865 and the North-Western Provinces Rent Act, 1881.

"It only remains for me to thank the Council for the patience with which they have listened to these observations. But the Bill is one of great importance; and having regard to the alterations which have been introduced, I ask the Council to direct its re-publication. The effect of the Bill will now be to prevent the imprisonment of debtors who are paupers but not fraudulent; and to leave creditors the power of imprisoning debtors when a Court has been satisfied that such process may justly be resorted to."

The Hon'ble SIR CHARLES ELLIOTT said—

"I was not a member of the Select Committee appointed to examine this Bill, but, as the subject is one in which I have always taken the greatest interest, I think it right to venture to offer a few remarks on the subject for the consideration of the Council. When the proposal to abolish imprisonment for debt altogether was circulated for the opinion of Local Governments, I was not able, as the Hon'ble the Law Member has just stated, to support the proposal in its entirety, feeling that in the present condition of things the temptation which it would place in the way of debtors to fraudulently remove the whole of their property, or to transfer it to others, or to cause it to disappear, would be very great. But I pointed out the extremely unsatisfactory position in which the Civil Courts are placed from the fact that no discretion is allowed to the Courts in the case of judgment-creditors applying for the execution of decrees either against the property or the person of a debtor, and I urged that the law should be modified to the extent of allowing that discretion. I venture to think that the line which has been taken by the present Bill has very happily hit the proper medium between the more advanced proposal which was originally circulated and the provisions in the existing law which have been worked in a very objectionable way. But, though on the main point the Bill has been a very great improvement, I think there are certain other objectionable points in the Code of Civil Procedure which, if it had been in my power, I should wish to have seen changed along with this Bill, but which I have not had an opportunity of bringing before the Select Committee from the fact of my not being here at the time when this Bill was being considered. I think on that account I may venture to lay before the Council now the points which should, in my humble opinion, be taken into consideration whenever an opportunity occurs of amending the Code of Civil Procedure.

"The first point is with regard to section 342 of the Code of Civil Procedure. Under that section, if the decree is for a sum less than Rs. 50, a person can be imprisoned for six weeks; and, if it is for Rs. 50 or over, he can be imprisoned for six months. But I do not find it distinctly laid down what the exact sum is which is referred to as making up the Rs. 50; whether it is the decree for the original debt, or whether it is the decree plus the interest on the debt up to date and the costs which have been incurred since. Under section 235 the creditor when applying for execution has to state the amount of

debt due on the decree, and the interest, and the costs; and it is not clear whether section 342 intends that the whole of these three items should be considered to make up the Rs. 50 or not. The North-Western Provinces Rent Act, as mentioned in the concluding section of this Bill, expressly excludes costs and makes the term of imprisonment depend on whether the amount decreed, exclusive of costs, does or does not exceed Rs. 50. But I am given to understand that in most cases the Courts interpret this phrase to mean the original debt or the part of it remaining unpaid plus the interest and costs. Now, clearly the case may often happen—and I have practically found that it does happen—in which a decree may have been obtained for Rs. 45 and the addition of interest and costs in the case brings it to something over Rs. 50. So that the question whether the imprisonment should be for six weeks or six months depends entirely upon whether in such cases the costs are included in the decree or not. I venture to think it would be well if the Code were so amended as to lay down a uniform procedure on this point.

“The second point I wish to bring forward is with regard to the interpretation of the wording of the same section. The section runs as follows:—

‘No person shall be imprisoned in execution of a decree for a longer period than six months, or for a longer period than six weeks if the decree be for the payment of a sum not exceeding fifty rupees.’

“But some doubt exists as to whether the term should be the whole of six weeks or of six months, as the case may be, or whether in either case it may be a somewhat shorter period—whether the section is meant to be rigid or elastic. I believe the majority of the Courts interpret this section in the sense that it must be rigid, that is to say, when the law says that no person shall be imprisoned for a longer period than six months when the decree is for a sum exceeding Rs. 50, they hold that it means that every such person shall be imprisoned for a period of six months. That seems to me to be a perversion of the meaning of the words. During the course of my inspection of the Civil Courts in Assam I have found that in some cases Munsifs have taken one view, and in other cases they have taken the other. And it seems to me to be exceedingly desirable that the Courts should have power to say, ‘Here is a debt of a little over Rs. 50 (say, Rs. 100); I will give the debtor two or three months’ imprisonment for it, and not the full term of six months which the law provides.’ If there is any opportunity, I think it will be well for the Code to be amended either to carry out the meaning I attribute to the section, or at any rate to make its meaning perfectly clear.

“The third point is with regard to the subsistence-allowance. The hon’ble mover has just informed us that a proposal has been made to the Committee that the cost of the maintenance of civil prisoners should be borne by the State. I am extremely glad to hear that the proposal has been rejected; for it seems to me to be a perfectly axiomatic principle that, if our jails and our jail-establishments are to be used as bailiffs by moneylenders for the purpose of collecting debts due to them, they should be compelled to pay the costs of such procedure. But the law does not say clearly that they should pay the whole costs of this procedure. There is no interpretation in the Act of the term ‘subsistence’, but I believe that, as a matter of fact, it is generally taken to mean simply food. An inspection of the schedules prescribed by the different Local Governments, in which they provide a scale of payment for debtors of different classes, will show that in almost every case for the poorest classes of debtors two annas a day is prescribed, which may be roughly taken as the minimum amount upon which a man can be fed. The Prisons Act (Act XXVI of 1870), which is in force in Assam, provides by section 36 that the clothing and bedding which are required for a civil prisoner may be charged against the creditor. No one who has inspected a jail in bitter cold weather, as I have in Assam, and has seen the state in which the extremely poor classes of debtors are left, can fail to doubt that this is a reasonable and merciful provision. But I go further and say that the creditor should be made to pay not only the cost of food, clothing and bedding, but also a share of the expense which the State has to bear in the watch and ward of the prisoners and also of the building and maintenance of the places in which they are kept. I think it would be well on a

future occasion if the law were so amended as to show that all this expenditure ought to be laid upon creditors and not upon the State.

"My fourth point arises when, having taken the prisoner through his term of imprisonment, we come to the conditions upon which he is to be released. The Code of Civil Procedure provides no form of warrant under which he is to be imprisoned. In the case of a criminal prisoner a specific form of warrant is laid down by law. And beyond that the Prisons Act provides that in the case of criminal prisoners jailors should keep a register of warrants, and a book shewing the names of prisoners and the date upon which each prisoner is to be released. In Bengal the Local Government provides for the same thing by its own circulars. So that in the case of criminal prisoners there is no possibility, except by direct fraud, by which a man can be kept in prison one single day beyond the term of his imprisonment. And it is our custom on inspecting jails to look specially at this register of the dates of release. It provides a page for each day of the year for many years ahead, and we there see the names of the prisoners who are to be released on each day, far ahead of the date of inspection; then we turn up the warrants and verify the register by the warrants. And in this way every inspecting officer who visits a jail sees that there is no possibility of the liberty of a prisoner being infringed for a day longer than his warrant provides. But it is strange that the law has taken no such tender care of civil prisoners. There is no provision which secures that a man shall be released at the time he ought to be let out. The form of warrant under which he is committed to prison is not fixed by the law but is laid down by the High Courts. The North-Western Provinces High Court has provided a form of warrant in these terms:—

'You are hereby required to receive the said prisoner and to keep him in custody for the term of _____, subject to the provisions of section 341 of the Code of Civil Procedure.'

"But the form of warrant issued by the Bengal High Court (unless it has been recently altered) does not contain any provision of this kind. It runs—

'You are required to receive _____ and to keep him in prison until the said decree shall be fully satisfied, or until the prisoner shall be otherwise entitled to be released according to the terms of section 341 of the Civil Procedure Code.'

"That is to say, it leaves the date of the release of the prisoner to be decided by the jailor, according to his knowledge of law and his interpretation of the Act; and that, I submit, is a power which should not be left to a man who is in the somewhat inferior position in which the jailors of minor jails usually are. I think it is necessary when the law is revised that the form of warrant should be prescribed in the Code, and that a similar provision should be made for civil as for criminal prisoners with regard to keeping up a release-book and a registry of warrants.

"Then, the last point I wish to bring forward is with regard to cases of insolvency. It is quite true that, under the wise amendments of the Bill now before the Council, these provisions will become of very much less importance than they have hitherto been. Hitherto they have been the sole protection of the pauper debtor against the malice or the rage of his creditor; whereas now the discretion of the Court is interposed and the creditor will not be allowed by the Court to use the Government jails as a means of wreaking his anger upon the debtor who is honest but who is entirely unable to pay. Still the provision for insolvency, as far as it remains, should, I think, be modified in one respect, namely, that at present a prisoner who applies for insolvency has to furnish sufficient security that he will appear when called upon. Now, the pauper debtor can never furnish security. Over and over again, when I have visited jails, I have found extremely poor prisoners lying in them for extremely small sums (say, for Rs. 10 or Rs. 20). I have asked them why they did not apply to the Court for an order of insolvency, and the answer was generally that they knew nothing whatever about it, that provisions of the law had never been brought to their notice: and afterwards, when measures have been taken to remedy this, the answer has been that the law requires them to find security for their appearance, and that they were quite unable to provide

any security ; therefore that very small provision has completely frustrated the intention of the law with regard to the very class of debtors for whom it was intended. I think their cases should be taken into consideration and some remedy devised to prevent the procedure from being so ineffectual.

“ These are the points which my personal experience of the administration of a province has brought to my notice. It is unfortunate that I was unable to bring them before the Select Committee, owing to the fact of my not having been in India, but last week I took the first opportunity I had to speak to the hon'ble member in charge of the Bill, and he informed me that, if I brought forward these points as amendments, they would necessitate so considerable a change in the Bill that it would be necessary to refer it back to the Local Governments, and therefore a whole session would expire before the Bill could be passed. Admitting, as I do, that the Bill is an extremely valuable one, I completely accepted the force of his objection, and the only thing I can do now is to give what publicity I can to the points which I desire to see amended in the Code of Civil Procedure, because, as I understand, in a very short time the amendment of the Code will be taken in hand, and I trust that, having brought forward the points in this way, they will be considered by the Select Committee and the Council.”

The Hon'ble LIEUTENANT-GENERAL CHESNEY gave notice that at the next Meeting he would move that the Army Reserve Bill be taken into consideration.

The Council adjourned to Friday, the 2nd March, 1888.

SUPPLEMENT TO
The Gazette of India.

No. 9.} CALCUTTA. SATURDAY. MARCH 3, 1888.

OFFICIAL PAPERS.

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.

Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately in a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of the Week ending Feb. 22nd, 1888.

The meteorological history of the past week is, in fact, the history of the remarkably low pressures which prevailed over by far the greater part of the country during the first four or five days, and which were partly, if not wholly (leaving out of consideration the disturbances from *without*) due to the excessive heat, as well as to the increased charge of vapour.

On the 16th the barometer was giving way over North-Western India, the Eastern Peninsula and at the majority of the peninsular stations, and the depression which had appeared over Upper Sind on the last day of the previous week, had apparently travelled in a south-easterly direction and now lay over the area represented by the stations, Indore, Amraoti, Seoni and Saugor. At the same time, the large area of relatively low readings existing previously over Northern India, the Central Provinces, Orissa and the Deccan, had become diffused and the only parts where prevailed relatively high pressure were Guzerat, Khandeish, Rajputana, Central India, and parts of the Carnatic. The atmosphere was seemingly in a disturbed state along the foot of the North-West Himalaya; and a large depression was overlying the Deccan, the Circars and Orissa. Except in the neighbourhood of the depressions, the winds were fairly normal in all parts of the country, and slight rain was falling in Orissa and locally at Saugor Island and Silchar. On the following day the chart showed that the depressions had coalesced and were now existing as one diffused depression over Central India, the eastern districts of the Central Provinces, the trans-Gangetic portions of the North-Western Provinces, Behar and East and North Bengal. At the same time a slight but fresh depression had appeared near Kurnool, and the distribution of pressure remained still abnormal. The skies were overcast in the Upper Assam Valley and Sikkim; and nearly one inch rain fell at Gopalpore and showers at False Point and Akyab. On the 18th the barometer was rising

all over the country, except in Beluchistan and Sind, where there had occurred a fresh but significant fall. The depressions noticed over Northern India the day before was filling up, while the one near Kurnool had enlarged and was occupying a well-defined area represented by the stations, Kurnool, Secunderabad, Bellary and Belgaum. The general distribution was assuming a normal form and the readings were again becoming high in North-Western India. The wind had veered round to S.S.W. at Quetta and save in Orissa, at the head of the Bay and in parts of the Carnatic, where it blew from a south-westerly quarter, over the rest of the country the general circulation was either normal or variable. The skies had, in consequence of the fresh depression over Sind, become overcast in North-Western India and Beluchistan, and rain in small amounts fell at Quetta and at Sibsagar. During the next twenty-four hours the depression over Sind had apparently travelled to the neighbourhood of Indore and the pressure increased in its rear; while the one over the Deccan moved slowly in a north-westerly direction and invaded the Bombay Deccan. A north-easterly current swept over the Panjab and a rather strong south-easterly wind blew over the Panjab Himalaya, carrying large quantities of moisture to those regions. The skies became overcast on the hill stations in the Panjab, and rain in small amounts fell over a large part of the Panjab, and rain and snow on almost all the hills. By the 10 A. M. of the 20th, the depressions had coalesced and begun to exist as one large depression over Rajputana, Central India, the Berars, the Eastern Panjab, as well as over the Bombay Deccan, with its centre somewhere near Indore. The relative distribution of pressure was still irregular. The wind circulation over a large part of the country was under the influence of the low-pressure area, while on the Bombay coast and in the Kumaon hills the wind force was high. Rain in small amounts had fallen at the most northerly districts of the North-Western Provinces and snow and rain on all the hills. On the 21st the chart showed that the barometer was rising all over the country, and that the depression shown near Indore on the preceding day had since travelled in a north-easterly direction and almost filled up, the relics of it, however, still occupied the area represented by the stations, Calcutta, Hazaribagh, Jubbulpore and Saugor. The distribution of pressure had become more normal than hitherto and south to south-west winds prevailed over the Central Provinces, Central Bengal and along the Orissa and Bengal coasts; and a south-easterly current blew over the Deccan and along the Coromandel Coast as far north as Gopalpore. The skies were still overcast over a large tract of the country and rain fell in parts of the North-Western and Central Provinces, as well as on almost all the hills, and locally at a few stations elsewhere. The amounts, however, nowhere exceeded one inch. By the 10 A. M. of the 22nd, the distribution of pressure had become still more normal, though the pressure was everywhere (except in Burma, Assam and parts of Bengal where it was about the average) greatly above the February average, more especially so in the Panjab. The skies had cleared all over the country, except in the central parts, where they were still covered and rain in small amounts fell at Belgaum, Sholapur, Amraoti, Akola and Seoni.

Pressure.—Compared with the mean of the month, pressure has been low everywhere, except in Ceylon; the deficiency *per station* being greatest in Sind and Rajputana and least in Bombay.

Temperature.—On the contrary, temperature was high everywhere on the plains.

Humidity.—The air was damper in all parts, except Northern India and Ceylon.

Rain.—There has been hardly any rain in Burma, Behar, Guzerat, Central India and the Peninsula. Elsewhere, the amounts received are generally small, except on the hills, where they are comparatively large. The seasonal rainfall is everywhere in excess of the average, except in Burma, Upper India (the Panjab Himalaya excepted, where it is considerably above the average), Ceylon, Travancore and the Circars, where it is still below the normal.

The concluding table gives the total rainfall of the past week for the different provinces.

DIVISIONS.	Number of stations.	Total rainfall.
Burma	1	0.54
Bengal and Assam	6	1.42
North-Western Provinces and Oudh	4	1.65
Panjab	6	0.95
Hill Stations	6	2.96
Ceylon	1	0.77
Malabar Coast	3	0.79
Bombay	2	0.18
Berars and Central Provinces	7	1.04
Guzerat and Central India	1	0.07
Sind—Rajputana	2	0.81
Madras	1	0.95

HEM RAJ,

for Offg. Meteorological Reporter to the Govt. of India.

Simla, 26th February, 1888.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 25th February 1888.*—No rain except a small quantity in Ganjam, Vizagapatam, Bellary, Salem, and Malabar. Rainfall to date generally sufficient except in parts of Vizagapatam, Madura, Tinnevely and Salem. Crops generally good, but very slightly damaged here and there by rain, disease or insects. Wet crops under rain-fed tanks in parts of Madura have withered owing to deficient supply of water. Pasture generally sufficient, but scanty in Malabar and parts of Madura and Anantapur, and decreasing in Vizagapatam and parts of Cuddapah and Coimbatore. Prices slightly rising in some districts but stationary in others. General prospects favourable.

Bombay.—*For week ending 29th February 1888.*—Rain in parts of Sind, Gujarat, Kathiawar, Khandesh, Nasik, Poona, Sholapur, Bijapur, Belgaum, Dharwar and Kanara; beneficial to standing crops in Shikarpur. Standing crops in Dharwar and wheat in parts of Panch Mahals damaged by rain and standing crops in one taluka of Nasik by hailstorm; wheat, linseed, late *jowari* and exotic cotton blighted in Dharwar; standing crops fair in Thana, Kolaba and Belgaum and good in other districts. Cotton crops middling in Bijapur; cotton-picking in progress in Ahmedabad, Broach, Surat, Dharwar and Kathiawar. Harvesting of late crops in progress in parts of Karachi, Ahmedabad, Kaira, Surat, Nasik, Poona, Ahmednagar, Sholapur, Bijapur, Belgaum, Dharwar, Kanara and Kathiawar. Operations for cultivation of next season's crops continue in Karachi, Kaira, Bijapur, Belgaum and Kathiawar. Probable outturn of cotton in Broach 12 annas. Fodder scarce in one taluka of Dharwar and one of Hyderabad.

Bengal.—*For week ending 28th February 1888.*—No rain. Weather fine and becoming gradually warmer. *Rabi* crops are ripening, and prospects continue generally favourable. Mustard and tobacco are being gathered. Spring rice is doing well. Ploughing for autumn crops progresses; and in Behar sowing of indigo has begun. Opium is being collected, and is a good crop. In Rajshahye *ganja* promises to be a good crop. Sugarcane is being crushed, and is generally yielding well.

N.-W. P. and Oudh.—*For week ending 29th February 1888.*—Light rain fell in many districts during the week. The weather is generally cloudy and is rapidly getting warmer. *Rabi* crops are ripening and harvesting has begun. Agricultural prospects are excellent and the poppy crop is flourishing. Supplies are ample and prices are beginning to fall. Health of cattle is generally satisfactory.

Punjab.—*For week ending 29th February 1888.*—Rain has fallen in most districts. Prices are reported to be stationary in eight and falling in four districts but slightly rising in Delhi. Ploughings for *kharij* in progress throughout the Province. *Rabi* prospects are reported good. More rain is wanted at Peshawar. No damage done to crops. Stock cattle are generally healthy. Fodder scarce in some districts but prospects are improving. Poppy crops average.

Central Provinces.—*For week ending 29th February 1888.*—Weather cloudy and rainy, except in Chattisgarh. Hail has done some damage to the crops in Saugor and Seoni. Wheat, gram and linseed have been injured somewhat in Hosangabad by rust. Prospects are otherwise good. Prices high in Jabalpur and Saugor. Cattle in good condition.

Burma.—*For week ending 25th February 1888.*—No rain has fallen anywhere except a slight shower in Kyaukpyu. Prospects of dry-weather crops continue favourable. Condition of agricultural stock is generally good. Estimates of the probable outturn of harvest remain the same as last week. Price of paddy has risen in the Kyaukpyu, Bassein, Lower Chindwin, Kyaukse, Myingyan and Minbu districts.

Assam.—*For week ending 29th February 1888.*—Weather much warmer. Slight rain in Lakhimpore. Gathering of mustard over in most districts. Crushing of sugarcane nearly finished. Ploughing progressing and sowing of summer rice begun.

Mysore and Coorg.—*For week ending 29th February 1888.*—Slight rain reported in Shimoga, Kadur and Hassan districts. Standing crops in good condition. Sowing operations coming to a close, except in parts of the Kadur district. Outturn of harvests generally favourable. Condition of stock cattle good.

Coorg has had no rain. Coffee-picking for the most part completed. Prices stationary.

Berar and Hyderabad.—*For week ending 29th February 1888.*—Weather rather cloudy and warm in Berar. Slight rain during the week in some parts of the province. Harvesting of *rabi* crops in progress. Prospects of the *rabi* crops favourable. Prices of food grains stationary. Cattle in fair condition. Fodder sufficient.

There has been no rain in Hyderabad during the week. Agricultural prospects continue good. Prices stationary.

Central India.—*For week ending 29th February 1888.*—Heavy rain in Indore, Bhopal, Bhopawar and Goona, and fair amount in other Agencies. No change since last report in agricultural operations. Western Malwa, Bhopawar and Goona report that crops have been damaged by rain and hailstones. No change in the condition of agricultural stock. Condition of pasturage and fodder indifferent in Western Malwa, otherwise no change. Prices remain high, except in Bhopawar where they have fallen. Opium crops reported good in Bhopawar, Goona and Neemuch and fair in Western Malwa. No report from other Agencies.

Rajputana.—*For week ending 29th February 1888.*—Rainfall general throughout Rajputana. Agricultural operations satisfactory. Standing crops in good condition. Crop prospects and agricultural stock generally good. Pasturage or fodder sufficient except in some States. Prices as last reported. Opium crop somewhat injured by cloudy weather and rain in Meywar and Haroti.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Report of the Select Committee on the Bill to amend the Code of Civil Procedure and the Indian Limitation Act, 1877, was presented to the Council of the Governor General of India for the purpose of making Laws and Regulations on the 10th March, 1888 :—

WE, the undersigned, Members of the Select Committee to which the Bill to amend

From Mr. P. R. Desai, Pleader, District Court, Satara, dated 16th September, 1886 [Paper No. 1].

From Mr. Nanabhai Chanjibhai, Pleader, Karachi, dated 20th September, 1886 [Paper No. 2].

From Secretary to Chief Commissioner, Coorg, No. 1943—3976, dated 29th October, 1886, and enclosures [Papers No. 3].

From Honorary Secretary, British Indian Association, No. 1035, dated 15th November, 1886 [Paper No. 4].

From Superintendent, Kapurthala State, No. 527, dated 19th November, 1886, and enclosures [Papers No. 5].

From Acting Chief Secretary to Government, Madras, No. 2990, dated 6th November, 1886, and enclosures [Papers No. 6].

From Chief Commissioner, Ajmere-Merwara, No. 1305—690-II, dated 19th November, 1886, and enclosure [Papers No. 7].

From Secretary for Berar to Resident, Hyderabad, No. 438G., dated 24th November, 1886, and enclosures [Papers No. 8].

From Acting Chief Secretary to Government, Madras, No. 3138, dated 24th November, 1886, and enclosures [Papers No. 9].

From Babu Haridas Ghosh, Pleader, Hoshungabad, dated 10th December, 1886 [Paper No. 10].

Memorial of certain Cloth Merchants of Allahabad, dated 14th December, 1886 [Paper No. 11].

From Secretary to Chief Commissioner, Burma, No. 706—27L., dated 24th December, 1886, and enclosures [Papers No. 12].

From Officiating Secretary to Chief Commissioner, Central Provinces, No. 32—355, dated 4th January, 1887, and enclosures [Papers No. 13].

From Acting Under Secretary to Government, Bombay, No. 7627, dated 31st December, 1886, and enclosures [Papers No. 14].

From Secretary to Government, Punjab, No. 21, dated 10th January, 1887, and enclosures [Papers No. 15].

From Secretary to Chief Commissioner, Assam, No. 84, dated 18th January, 1887 [Paper No. 16].

From Officiating Chief Secretary to Government, Bengal, No. 408J., dated 24th January, 1887, and enclosures [Papers No. 17].

Memorandum by the Hon'ble Rana Sir Shankar Baksh Singh, Bahadur [Paper No. 18].

From Secretary to Government, Punjab, No. 252, dated 11th March, 1887, and enclosures [Papers No. 19].

From Secretary to Government, North-Western Provinces and Oudh, No. 265—VII-250, dated 31st March, 1887, and enclosures [Papers No. 20].

From Chief Secretary to Government, Bengal, No. 1488J., dated 28th March, 1887, and enclosure [Papers No. 21].

Memorandum by Mr. P. R. Desai, Pleader, District Court, Tanna, dated 17th May, 1887 [Paper No. 22].

Circular to all Local Governments and Administrations, No. 1585—96, dated 16th September, 1887.

From Secretary for Berar to Resident, Hyderabad, No. 488G., dated 29th November, 1887, and enclosures.

From Chief Secretary to Government, Madras, No. 2695, dated 25th November, 1887, and enclosures.

From Officiating Chief Secretary to Chief Commissioner, Burma, No. 267, dated 9th December, 1887, and enclosures.

From Chief Commissioner, Ajmere-Merwara, No. 1456, dated 7th December, 1887, and enclosure.

From Secretary to Chief Commissioner, Assam, No. 2970, dated 19th December, 1887, and enclosures.

the Code of Civil Procedure and the Indian Limitation Act, 1877, was referred, have considered the Bill and the papers noted in the margin, and have now the honour to submit this our Report with copy of the Bill as amended by us annexed thereto.

2. We have omitted most of the sections of the Bill as introduced which had reference to insolvency, representation of minors and imprisonment for debt. The first and second of those matters will be more conveniently considered by the Select Committees on the Bankruptcy and Guardians and Wards Bills respectively, and the third has recently been con-

From Acting Under Secretary to Government, Bombay, No. 7417, dated 24th December, 1887, and enclosures.

From Secretary for Berar to Resident, Hyderabad, No. 525G., dated 27th December, 1887.

From Officiating Secretary to Government, Punjab, No. 24, dated 10th January, 1888, and enclosures.

From Registrar, High Court, Calcutta, No. 305, dated 8th February, 1888.

From Chief Secretary to Government, Bengal, No. 459J., dated 7th February, 1888, and enclosures.

Notes by Judicial Commissioner, Oudh, dated 11th February, 1888 [Paper No. 23].

From J. Deas, Esq., District Judge, Jaunpur, No. 6, dated 6th January, 1888.

From Chief Commissioner, Central Provinces, No. 891—31, dated 15th February, 1888, and enclosures.

Notes by P. V. Krishnaswami Aiyar, First Grade Pleader, Madras.

Notes by Yellepedy Janaki Ramayya, District Judge, Coconada.

considered by the Select Committee on the Bill to amend the law relating to Imprisonment for Debt.

3. The following portions of the Bill, as amended by us, appear to call for remark :—

(1) *Section 3.*—The object of the section which it is proposed to insert after section 4 of the Code is to preserve the summary character of rent-litigation which, as the Government of the North-Western Provinces and Oudh has pointed out, the rulings cited in the margin of the proposed section may otherwise have the effect of destroying.

(2) *Section 5.*—The proposed addition to section 14 has reference to the conflicting rulings of the High Courts with respect to suits in British India on judgments of Foreign Courts, and is designed to remove one of the objections to such suits being maintainable.

(3) *Section 6.*—The need of such a section as it is proposed to insert after section 16 of the Code is said to be much felt where large areas are subject to fluvial action. The section was originally inserted in the Punjab Land-revenue Bill of 1886, but the Select Committee on that Bill was of opinion that the section is one which should be of general rather than local operation.

(4) *Section 9.*—The section which it is proposed to substitute for section 53 is, with slight modification, in a form which has been suggested by the Hon'ble Mr. Justice Straight.

(5) *Sections 10, 11, 15 and 16.*—These sections are added to the Bill for the purpose of accommodating the language of the Code more closely to the system of process-serving obtaining in some parts of British India.

(6) *Section 12.*—This section will admit of summonses being sent for service to Superintendents of foreign States, and to Courts established or continued by the authority of the Governor General in Council in foreign territory, as well as to British Residents and Agents.

(7) *Section 13.*—The criticisms on the form and substance of sections 141 and 142 of the Code are so numerous and appear to us to be so well founded that we have deemed it necessary to re-draft those sections instead of only amending the former of them.

(8) *Section 17.*—The enactment of this section is advocated by high authority in Bengal and other parts of India. The section follows sections 357 *et seqq.* of the Code of Criminal Procedure, 1882, section 20 of the Burma Courts Act, 1875, sections 11 and 12 of the Central Provinces Laws Act, 1875, and section 19 of the Oudh Laws Act, 1876.

(9) *Sections 18 and 19.*—The amendment of section 191 in such a manner as to make it clear that the section does not require the re-hearing of a suit by a successor of a Judge who, having part heard the suit, has been prevented by death, transfer or other cause from concluding the trial thereof is considered by the Government of the North-Western Provinces and Oudh to be necessary in view of the administrative inconvenience, and the trouble and expense to suitors, which must result from the cases reported at I. L. R. 7 All. 857 and 8 All. 35. It is proposed also to apply the principle of section 191 of the Code to suits transferred from one Court to another, and to supplement the section by an addition to section 193.

(10) *Section 20.*—Such an amendment of section 209 as is here proposed has the support of Sir Meredyth Plowden and other Judges of the Chief Court of the Punjab.

(11) *Section 21.*—We have so amended section 216 of the Code as to make it applicable not only to such equitable cases of set-off as form the subject of the report at I. L. R. 7 All. 284 and the reports there cited, but also to any equitable right to set off a sum which is not a debt.

(12) *Section 22.*—As section 223 is now drawn, it is open to doubt in what cases decrees may be sent for execution to the Courts of Small Causes at Calcutta, Madras, Bombay and Rangoon. The ordinary jurisdiction of a Provincial Court of Small Causes extends under sub-section (2) of section 15 of Act IX of 1887 to suits of value not exceeding five hundred rupees, and its extraordinary jurisdiction under sub-section (3) of the same section to suits of value not exceeding one thousand rupees. The jurisdiction of a Presidency Court of Small Causes extends to suits of value not exceeding two thousand rupees; and it is proposed by section 47 of the Lower Burma Courts Bill, now pending before the Council of the Governor General, to take power to extend the whole or any part of the Presidency Small Cause Courts Act to the Court of Small Causes at Rangoon.

(13) *Section 23.*—The words "or continued" have been inserted in section 229 and other sections after the word "established" because there are Courts in Kattiawar which were established by the Governor of Bombay in Council.

(14) *Section 24.*—Under this section it will be competent to Courts in British India to send their decrees for execution to those Courts out of British India which are authorised by section 229 of the Code to cause their decrees to be executed by British Indian Courts.

(15) *Section 25.*—The last paragraph of section 230 is spent and may now be removed from the Code.

(16) *Section 26.*—It is proposed to amend section 244 of the Code in order to remove doubts which have arisen as to how representatives are to be ascertained, and whether orders staying execution are orders under the section.

(17) *Section 27.*—The conflicting rulings of the Courts with respect to the construction to be placed on the last paragraph of section 258 render it necessary to amend that paragraph.

In section 66, sub-section (1), of the Bill we have proposed to extend from twenty to ninety days the period of limitation for an application by a judgment-debtor for the issue of a notice to a decreeholder to show cause why a payment or adjustment out of Court should not be recorded as certified.

(18) *Section 28.*—We have added a clause exempting from liability to sale in execution of a decree of a Civil Court any moveable property which any local law exempts from liability to sale in satisfaction of an arrear of land-revenue.

(19) *Section 29.*—This section is intended to remove a doubt as to attachment being a necessary preliminary to the sale of property in execution of a decree which orders the sale in pursuance of a contract specifically affecting the property.

(20) *Section 30.*—The addition which we have proposed to make to section 320 follows the interpretation which has been placed on that section by the Allahabad High Court (I. L. R. 5 All. 314) and by the executive authorities of the North-Western Provinces, the Central Provinces and Lower Burma.

(21) *Section 31.*—Sub-section (1) will remove the doubt as to the construction to be placed on the words "under arrest" in section 349.

Sub-sections (2) and (3) correct obvious errors in the Code.

Sub-section (4) has been inserted at the instance of the High Court at Fort William. The inconvenience of there being two different systems of insolvency law in force in the same place was pointed out by several Judges of that Court in their remarks on the Indian Bankruptcy Bill of 1886. In not excluding from the operation of Chapter XX of the Code the towns mentioned in section 66 of the Burma Courts Act, 1875, we have had regard to the opinion expressed by the Recorder of Rangoon in his letter No. 66—19, dated the 7th April, 1885, and by the Officiating Recorder in his letter No. 107—43, dated the 20th June, 1885, at the time when the Bill which became Act XIV of 1885 was under consideration, and to the fact that jurisdiction in insolvency is exercised under the Code in Rangoon by the First Judge of the Court of Small Causes established there.

(22) *Sections 32, 33 and 66.*—We have extended to six months the period of limitation for applications under sections 365, 366 and 368 of the Code and provided for such applications being admitted after that period in exceptional cases.

(23) We have omitted section 20 of the Bill as introduced. The addition which it was proposed by that section to make to section 396 of the Code would effect a change in the substantive law of the country which should not in our opinion be brought about in such a Bill as that on which we are reporting.

(24) *Sections 37, 38, 40 and 41.*—The object of these sections is to remove the difficulties which have recently attended litigation on behalf of the minor Rājā of Kapurthala, one of the ruling chiefs of the Punjab and a landholder in that Province and in Oudh.

(25) *Section 43.*—On the recommendation of the Government of the North-Western Provinces and Oudh, it is proposed that the Collector shall not be appointed a Receiver without his consent.

(26) *Section 47.*—Section 551 and connected sections have been re-cast in the manner suggested by Mr. R. J. Crosthwaite, the Judicial Commissioner of the Central Provinces. In regard to the amendment of the sections so as to provide for the dismissal of appeals for default under section 551, Mr. Crosthwaite writes as follows:—

"This amendment is necessary, because, as section 551 stands now, an appellant can, if his appeal is fixed for hearing under that section, refrain from appearing and then appeal from the decree of the first Appellate Court dismissing his appeal. The Court of second appeal will then have to consider the appeal and decide it, because the provisions of section 556 do not apply in the case of an appeal dealt with under section 551. When a first appeal is dismissed under section 556 for default, there is practically no second appeal, because the second Appellate Court must hold that, as the appellant did not appear in the Court of first appeal, that Court's decree dismissing the appeal was under section 556 correct; but when an appeal is fixed for hearing under section 551, and the appellant not appearing, his appeal is dismissed, section 550 does not apply; and an appellant can thus ignore the Court of first appeal and take his appeal to the High Court. Section 556 does not I think apply, because there can be no doubt that the words 'on the day so fixed' mean 'the day fixed under section 552 for hearing the appeal'. This state of the law is anomalous and, considering that a Court of second appeal is supposed to go by the findings of fact of the Court of first appeal, inconvenient. If an appellant does not appear on the day fixed for hearing, whether it be fixed under section 551 or section 552, his appeal should be dismissed; but he should have a right to apply for re-admission under section 558."

(27) *Section 48.*—We have endeavoured by this section to remove difficulties which the Courts have experienced in the admission of objections taken by way of cross-appeal.

(28) *Sections 49, 50, 51 and 52.*—The sections of the Code which these sections affect have in practice been found to limit unduly the discretion of Appellate Courts.

(29) *Section 55, sub-section (2).*—This sub-section has been suggested by the Judicial Commissioner of the Central Provinces with reference to the case reported at I. L. R. 11 Bom. 603.

(30) *Section 56.*—We propose that appeals from such orders as are appealable should lie in all cases to the ordinary appellate authority.

(31) *Section 60.*—This section is intended to give effect to the suggestion contained in the following extract from a letter received by the Government of India from the High Court at Fort William:—

“In this province it is often difficult to tell whether a suit should be instituted in the Small Cause Court or a Court possessing ordinary civil jurisdiction. Numerous cases have been brought to the cognizance of this Court in which great inconvenience, hardship and injustice have been caused in this way. A suit is brought in the first instance in the Small Cause Court, and that Court declares that it has no jurisdiction and dismisses the suit. The plaintiff then institutes the same suit in the Munsif's Court, which, upon trial, gives him a decree. The defendant thereupon appeals to the higher Courts, and it is held that the Munsif had no jurisdiction, and accordingly the suit is dismissed. The result is that the unfortunate suitor gets no relief anywhere. And this same result also follows when the Court of first instance holds that it has no jurisdiction, and also when the suit is in the first instance instituted in the Civil Court and the suitor subsequently goes to the Small Cause Court. The Judges think questions of jurisdiction and errors as to jurisdiction should be susceptible of being dealt with and cured by the High Court by transfer, affirmation of decree or otherwise; and they think that the order of the High Court as to jurisdiction should be final.”

(32) *Section 61.*—We have so modified the proposed addition to section 648 as to admit of orders being sent to the Courts of Small Causes at Calcutta, Madras, Bombay and Rangoon for the attachment of moveable property only.

(33) *Section 64.*—This section corrects a defect in the form under section 263 which has been noticed by Mr. Justice Brandt.

(34) *Section 65.*—By this section it is proposed to set at rest the question whether the registration of certificates of sale of property of value exceeding one hundred rupees is or is not compulsory. Whatever the law may have been before the passing of Act XII of 1879, the legislature could hardly have contemplated the registration of such certificates by auction-purchasers after the passing of that Act.

RANA SHANKAR BAKSH SINGH.

PEARI MOHAN MUKERJI.

G. H. P. EVANS.

J. W. QUINTON.

The 10th March, 1888.

No. II.

A Bill to amend the Code of Civil Procedure, the Indian Registration Act, 1877, and the Indian Limitation Act, 1877.

of 1882.¹ WHEREAS it is expedient to amend the Code of Civil Procedure, the Indian Registration Act, 1877, and the Indian Limitation Act, 1877; It is hereby enacted as follows:—

I. (1) This Act may be called the Civil Procedure Code Amendment Act, 1888; and

(2) It shall come into force on the first day of July, 1888.

2. (1) In this Act, unless there is something repugnant in the subject or context, "section" means a section, "schedule" a schedule, and "Chapter" a Chapter, of the Code of Civil Procedure.

(2) Any reference in any enactment heretofore passed or hereafter to be passed to any Act amended by this Act shall, so far as may be, be read as if made to that Act as so amended.

3. The following shall be inserted after section 4, namely:—

of 1882. "4 A. (1) Where any Revenue Courts are governed by the provisions of the Code of Civil Procedure in those matters of procedure upon which any special enactment applicable to them is silent, the Local Government, with the previous sanction of the Governor General in Council, may, by notification in the official Gazette, declare that any portions of those provisions shall not apply to those Courts, or shall only apply to them with such modifications as the Local Government, with the sanction aforesaid, may prescribe.

w.] "(2) 'Revenue Court' in sub-section (1) means a Court having jurisdiction under any local law to entertain suits relating to the rent, revenue or profits of land used for agricultural purposes, but does not include a Civil Court having original jurisdiction under this Code to try such suits as being suits of a civil nature of which its cognizance is not barred by any enactment for the time being in force."

Act XV, 2, s. 23; III, 1884, 3.] Repeal of part of section 8. 4. The second paragraph of section 8 is hereby repealed.

Addition to section 14. 5. To section 14 the following shall be added, namely:—

L. R. 6 m. 292 and Mad. 191.] "Where a suit is instituted in British India or on the judgment of any foreign Court in Asia

or Africa except a Court* of Record established by Letters Patent of Her Majesty or any predecessor of Her Majesty or a Supreme Consular Court established by an Order of Her Majesty in Council, the Court in which the suit is instituted shall not be precluded from inquiry into the merits of the case in which the judgment was passed."

Addition of new section after section 16. 6. The following shall be inserted after section 16, namely:—

"16A. (1) When it is alleged to be uncertain within the local limits of the jurisdiction of which of two or more Courts any immovable property is situate, any one of those Courts may, if satisfied that there is ground for the alleged uncertainty, record a statement to that effect and thereupon proceed to entertain and dispose of any suit relating to that property, and its decree in the suit shall have the same effect as if the property were situate within the local limits of its jurisdiction:

"Provided that the suit is one with respect to which the Court is competent as regards the nature and value of the suit to exercise jurisdiction.

"(2) Where a statement has not been recorded under sub-section (1), and an objection is taken before an appellate or revisional Court that a decree or order in a suit relating to such property was made by a Court not having jurisdiction where the property is situate, the appellate or revisional Court shall not allow the objection if in its opinion there was, at the time of the institution of the suit, any reasonable ground for uncertainty as to the Court having jurisdiction with respect thereto."

7. In section 17, after Explanation II, the following shall be inserted, namely:—

"EXPLANATION III.—In suits arising out of contract, the cause of action arises within the meaning of this section at any of the following places, namely:—

- (i) the place where the contract was made;
- (ii) the place where the contract was to be performed or performance thereof completed;
- (iii) the place where in performance of the contract any money to which the suit relates was expressly or impliedly payable."

8. In section 27 there shall be inserted after the words "the Court may" the words "at any stage of the suit", and after the words "any other person or persons" the words "with his or their consent".

*e.g., Supreme Court of the Straits Settlements, Her Majesty's Supreme Court for China and Japan at Shanghai.

[I. L. R. 4 All. 423 and All. 277.]

[I. L. R. 6 Ca 370. Cf. Rule under Judicature Acts. XVI. 2.]

[I. L. R. 9
Cal. 695, 6
Mad. 239, 5
Bom. 609, and
7 All. 79.]

Substitution of new
section for section 53.

When plaint may be
rejected, returned for
amendment or amended.

9. For section 53 the following shall be substituted, namely :—

“ 53. The plaint may, at the discretion of the Court,—

- (a) at, or at any time before, the settlement of issues be rejected if it does not disclose a cause of action ;
- (b) at, or at any time before, the settlement of issues be returned for amendment within a time to be fixed by the Court, and upon such terms as to the payment of costs occasioned by such amendment as the Court thinks fit, if it—
 - (i) is not signed and verified as hereinbefore required,
 - (ii) does not state correctly and without prolixity the several particulars hereinbefore required, or contains particulars other than those so required,
 - (iii) is wrongly framed by reason of nonjoinder or misjoinder of parties, or joins causes of action which ought not to be joined in the same suit, or
 - (iv) is not framed in accordance with the provisions of section 42 ;
- (c) at any time before judgment be amended by the Court upon such terms as to the payment of costs as the Court thinks fit :

[L. R. 14 In.
App. 111.]

“ Provided that a plaint shall not be amended either by the party to whom it is returned for amendment, or by the Court, so as to convert a suit of one character into a suit of another and inconsistent character.

“ When a plaint is amended under this section the amendment shall be attested by the signature of the Judge.”

Substitution of new
section for section 72.

Delivery or transmission of summons for service.

10. For section 72 the following shall be substituted, namely :—

“ 72. (1) If the defendant resides within the jurisdiction of the Court in which the suit is instituted, or has an agent resident within that jurisdiction who is empowered to accept the service of the summons, the summons shall ordinarily be delivered or sent to the proper officer to be served by him or one of his subordinates.

“ (2) The proper officer may be an officer of another Court than that in which the suit is instituted, and, where he is such an officer, the summons may, subject to any rules which the High Court may make in this behalf, be sent to him by post or in such other manner as the Court may direct.”

11. In section 82, for the first twenty words the following shall be substituted, namely :—

“ When a summons is returned under section 80, the Court shall if the return under that section has not been verified by the affidavit of the serving-officer, and may if it has been so verified, examine the serving-officer on oath, or cause him to be so examined by another Court, touching his proceedings ”.

Substitution of new
section for section 90.

Service in foreign
territory through British
Resident or Court.

12. For section 90 the following shall be substituted, namely :—

“ 90. If there is a British Resident or Agent, or a Superintendent appointed by the British Government, or a Court established or continued by the authority of the Governor General in Council, in or for the territory in which the defendant resides, the summons may be sent to such Resident, Agent, Superintendent or Court, by post or otherwise, for the purpose of being served upon the defendant ; and, if the Resident, Agent or Superintendent or the Judge of the Court returns the summons with an endorsement under his hand that the summons has been served on the defendant in manner hereinbefore directed, such endorsement shall be evidence of the service.”

Substitution of new
sections for sections 141
and 142.

13. For sections 141 and 142 the following shall be substituted, namely :—

“ 141. (1) Subject to the provisions of the next following sub-section, there shall be endorsed on every document which has been admitted in evidence in the suit the following particulars, namely :—

- (a) the number and title of the suit,
- (b) the name of the person producing the document,
- (c) the date on which it was produced, and
- (d) a statement of its having been so admitted,

and the endorsement shall be signed by the Judge.

“ (2) If a document so admitted is an entry in a book, account or record and a copy thereof has been substituted for the original under the next following section, the particulars aforesaid shall be endorsed on the copy and the endorsement thereon shall be signed by the Judge.

“ 141A. (1) If a document admitted in evidence in the suit is an entry in a shop-book or other account in current use, the party on whose behalf the account is produced may furnish a copy of the entry.

“ (2) If such a document is an entry in a public record produced from a public office or by a public officer, or an entry in a book or account belonging to a person other than a

party on whose behalf the book or account is produced, the Court may require a copy of the entry to be furnished—

- (i) where the record, book or account is produced on behalf of a party, then by that party, or
- (ii) where the record, book or account is produced in obedience to an order of the Court acting of its own motion, then by either or any party.

“(3) When a copy of an entry is furnished under the foregoing provisions of this section, the Court shall, after causing the copy to be examined, compared and attested in manner mentioned in section 62, mark the entry and cause the book, account or record in which it occurs to be returned to the person producing it.

“142. When a document relied on as evidence by either party is considered by the Court to be inadmissible in evidence, there shall be endorsed thereon the particulars mentioned in clauses (a), (b) and (c) of section 141, sub-section (1), and a statement of its having been rejected, and the endorsement shall be signed by the Judge.

“142A. (1) Every document which has been admitted in evidence, or a copy thereof where a copy has been substituted for the original under section 141A, shall form part of the record of the suit.

“(2) Documents not admitted in evidence shall not form part of the record and shall be returned to the parties respectively producing them.”

14. In section 143, for the words and figures “sections 62, 141 and 142” there shall be substituted the following, namely:—

“section 62, section 141A, sub-section (3), or section 142A, sub-section (2).”

15. In section 159 the words “or sent” shall be inserted after the word “delivered”.

16. In section 168, for the words “shall examine the serving-officer on oath” the following shall be substituted, namely:—“shall if the certificate of the serving-officer has not been verified by affidavit, and may if it has been so verified, examine the serving-officer on oath, or cause him to be so examined by another Court.”

17. The following shall be inserted after section 185, namely:—

“185A. (1) The Local Government may, by notification in the official Gazette, direct, with respect to any Judge specified in the notification, or falling under a description set forth therein, that

evidence in cases in which an appeal is allowed shall, instead of being taken down in the manner prescribed in the foregoing sections, be taken down by him with his own hand in the English language.

“(2) Where a Judge is prevented by any sufficient reason from complying with a direction under sub-section (1), he shall record the reason and cause the evidence to be taken down in writing from his dictation in open Court.

“(3) Evidence taken down under sub-section (1) or sub-section (2) shall be in the form mentioned in section 182, and be read over and signed, and, as occasion may require, interpreted and corrected, as if it were evidence taken down under that section.

“(4) The Local Government may, by notification in the official Gazette, revoke or vary a direction notified under sub-section (1).”

Addition to section 18. For section 191 the following shall be substituted, namely:—

“191. (1) Where the Judge taking down any evidence, or causing any memorandum to be made, under this Chapter, is prevented by death, transfer or other cause from concluding the trial of the suit, any successor to such Judge may deal with such evidence or memorandum as if he himself had taken it down or caused it to be made, and proceed with the suit from the stage at which his predecessor left it.

“(2) The provisions of sub-section (1) shall apply, so far as they can be made applicable, to a suit transferred under section 25:

“Provided that a Court transferring a suit under that section may, if it thinks fit, direct that the Court to which the suit is transferred shall recall all or any of the witnesses who have been examined and take their evidence afresh.”

19. To section 193 the following shall be added, namely:—

“A Court continuing a suit under section 191 may recall and re-examine a witness who has departed in accordance with section 173.”

20. (1) In section 209, for the first thirteen words the words “When a decree is for the payment of money” shall be substituted.

(2) To the same section the following shall be added, namely:—

“Where such a decree is silent with respect to the payment of further interest on such aggregate sum as aforesaid from the date of the decree to the date of payment or other earlier date, the Court shall be deemed to have refused such interest, and a separate suit therefor shall not lie.”

21. (1) In section 216, for the first twenty-four words the following shall be substituted, namely :—

"If the defendant has been allowed a set-off against the claim of the plaintiff,"

(2) To the same section the following shall be added, namely :—

"The provisions of this section shall apply whether the set-off is admissible under section 111 or otherwise."

22. In section 223, for the words "in a case cognizable by a Court of Small Causes" the following shall be substituted, namely :—

"in a suit of which the value as set forth in the plaint did not exceed two thousand rupees and which, as regards its subject-matter, is not excepted by the law for the time being in force from the cognizance of either a Presidency or a Provincial Court of Small Causes".

23. In section 229, after the word "established" the words "or continued" shall be inserted.

Addition of new section after section 229.

24. After section 229 the following shall be inserted, namely :—

"229A. So much of the foregoing sections of this Chapter as empowers a Court to send a decree for execution to another Court shall be construed as empowering a Court in British India to send a decree for execution to any Court established or continued by the authority of the Governor General in Council in the territories of any Foreign Prince or State to which the Governor General in Council has, by notification in the Gazette of India, declared this section to apply."

Repeal of part of section 230.

25. The last paragraph of section 230 is hereby repealed.

26. (1) In section 244, for clause (c), the following shall be substituted, namely :—

"(c) any other questions arising between the parties to the suit in which the decree was passed, or their representatives, and relating to the execution, discharge or satisfaction of the decree or to the stay of execution thereof."

(2) To the same section the following shall be added, namely :—

"If a question arises as to who is the representative of a party for the purposes of this section, the Court may either stay execution of the decree until the question has been determined by a separate suit or itself determine the question by an order under this section."

[I. L. R. 7
Cal. 733, 8
Cal. 477 & 7
All. 73.]

27. For the last paragraph of section 258 the following shall be substituted, namely :—

"Unless such a payment or adjustment has been certified as aforesaid, it shall not be recognized as a payment or adjustment of the decree by any Court executing the decree."

28. (1) In the first proviso to section 266, clause (a), the words "and bedding" shall be inserted after the word "apparel".

(2) In the same proviso, clause (b), after the word "cattle" the words "and seed-grain" shall be inserted.

(3) In the same proviso, for clause (h) the following shall be substituted, namely :—

"(h) the salary of a public officer or of any servant of a Railway Company or local authority to the extent of—

(i) the whole of the salary where the salary does not exceed twenty rupees monthly ;

(ii) twenty rupees monthly where the salary exceeds twenty rupees and does not exceed forty rupees monthly ; and

(iii) one moiety of the salary in any other case."

(4) To the same proviso, after clause (l), the following shall be added, namely :—

"(m) any allowance declared by any law passed under the Indian Councils Act, 1861, by a Governor or a Lieutenant-Governor in Council to be exempt from liability to attachment or sale in execution of a decree ;

"(n) where the judgment-debtor is a person liable for the payment of land-revenue, any moveable property which under any law* applicable to him is exempt from sale for the recovery of an arrear of such revenue."

(5) In the Explanation to the same proviso, for the word and letter "and (j)" the letters and word "(j) and (m)" shall be substituted.

29. In section 289 the words "on the spot where the property is attached" are hereby repealed.

30. To section 320 the following shall be added, namely :—

"Rules under this section may confer upon the Collector or any gazetted subordinate of the Collector all or any of the powers which the Court might exercise in the execution of the decree if the execution thereof had not been transferred to the Collector, including the powers of the Court under sections 294 and 312, and

"363. If there are more plaintiffs than one, and any of them dies, and if the right to sue does not survive to the surviving plaintiff or plaintiffs alone, but survives to him or them and the legal representative of the deceased plaintiff jointly, the Court may cause the legal representative, if any, of the deceased plaintiff to be made a party, and shall thereupon cause an entry to that effect to be made on the record and proceed with the suit."

(2) For section 365 the following shall be substituted, namely:—

"365. In case of the death of a sole plaintiff Procedure in case of death of sole or sole surviving plaintiff, the legal representative of the deceased may, where the right to sue survives, apply to the Court to have his name entered on the record in place of the deceased plaintiff, and the Court shall thereupon enter his name and proceed with the suit."

(3) To section 368 the following shall be added, namely:— [I. L. R. 9
Bom. 56, and
7 All. 396.]

"The legal representative of a deceased defendant may apply to have himself made a defendant in place of the deceased defendant, and the provisions of this section, so far as they are applicable, shall apply to the application and to the proceedings and consequences ensuing thereon."

(4) After section 372 the following shall be added, namely:—

"372A. The provisions of section 5 of the Indian Limitation Act, 1877, applicable to appeals shall apply to applications under sections 365, 366, 368 and 371."

Addition to section 381. 33. To section 381 the following shall be added, namely:— [I. L. R. 6
Bom. 482, and
Act VIII,
1859, s. 35.]

"or show good cause why such time should be extended, in which case the Court may extend it.

"Where a suit is dismissed under this section, the plaintiff may apply for an order to set the dismissal aside, and, if it is proved to the satisfaction of the Court that he was prevented by any sufficient cause from furnishing the security within the time allowed, the Court shall set aside the dismissal upon such terms as to security, costs or otherwise as it thinks fit, and shall appoint a day for proceeding with the suit.

"The dismissal shall not be set aside unless the plaintiff has served the defendant with notice in writing of his application.

"The provisions of the Indian Limitation Act, XV of 1877, with respect to an application under section 103, and of this Code with respect to an appeal from an order rejecting such an application, shall apply, so far as they can be made applicable, to an application under this section for an order to set aside the dismissal of a suit, and to an appeal from an order rejecting such an application, respectively."

34. In section 386, for the words "or to any pleader of a High Court whom the Court issuing the commission thinks fit to appoint" the following shall be substituted, namely:—

"or to any pleader or other person whom the

Court issuing the commission may, subject to any rules of the High Court in this behalf, think fit to appoint."

35. In section 419, after the words "Government Pleader in any Court" the words "or such other person as the Local Government may for any Court appoint in this behalf" shall be inserted.

36. In section 424, after the words "intending plaintiff" the words "and the relief which he claims" shall be inserted.

37. (1) In section 432, after the words "British India" the following shall be inserted, namely:—

"or at the request of any person competent in the opinion of the Government to act on behalf of such Prince or Chief,".

(2) To the same section the following shall be added, namely:—

"An appointment under this section may be made for the purpose of a specified suit or of several specified suits, or for the purpose of all such suits as it may from time to time be necessary to prosecute or defend on behalf of the Prince or Chief.

"A person appointed under this section may authorise or appoint persons to make and do appearances, applications and acts in any such suit or suits as if he were himself a party to the suit or suits."

38. For section 433 the following shall be substituted, namely:—

"433. (1) Any such Prince or Chief, and any ambassador or envoy of a Foreign State, may, with the consent of the Governor General in Council, certified by the signature of one of the Secretaries to the Government of India (but not without such consent), be sued in any competent Court.

(2) Such consent may be given with respect to a specified suit or to several specified suits, or with respect to all suits of any specified class or classes, and may specify, in the case of any suit or class of suits, the Court in which the Prince, Chief, ambassador or envoy may be sued; but it shall not be given unless the Prince, Chief, ambassador or envoy—

- (a) has instituted a suit in the Court against the person desiring to sue him, or
- (b) by himself or another trades within the local limits of the jurisdiction of the Court, or
- (c) is in possession of immoveable property situate within those limits and is to be sued with reference to such possession or for money charged on that property.

"(3) No such Prince, Chief, ambassador or envoy shall be arrested under this Code, and,

except with the consent of the Governor General in Council certified as aforesaid, no decree shall be executed against the property of any such Prince, Chief, ambassador or envoy.

"(4) The Governor General in Council may, by notification in the Gazette of India, authorise a Local Government and any Secretary to that Government to exercise, with respect to any Prince, Chief, ambassador or envoy named in the notification, the functions assigned by the foregoing sub-sections to the Governor General in Council and a Secretary to the Government of India, respectively.

"(5) A person may, as a tenant of immoveable property, sue, without such consent as is mentioned in this section, a Prince, Chief, ambassador or envoy from whom he holds or claims to hold the property."

39. (1) Section 434 shall become section 229B, and any reference made before the commencement of this Act in any notification or other document to section 434 shall be read as a reference to section 229B.

(2) In section 229B, the words "or continued" shall be inserted after the word "established".

40. After section 433 the following section shall be inserted, namely:—

"434. A Sovereign Prince or ruling Chief may sue, and shall be sued, in the name of his State: [Cf. I. All. 65 7 Bom Rep. 150.]

"Provided that in giving the consent referred to in the last foregoing section the Governor General in Council or Local Government, as the case may be, may direct that any such Prince or Chief shall be sued in the name of an agent or in any other name."

41. To section 464 the following shall be prefixed, namely:—

"Nothing in this Chapter applies to a Sovereign Prince or ruling Chief suing or being sued in the name of his State or being sued, by direction of the Governor General in Council or a Local Government, in the name of an agent or in any other name, and".

42. In section 503, clause (d), the words "as the Court thinks fit" shall be inserted after the words "by way of remuneration".

43. In section 504, for the words "the Court may appoint the Collector" the words "the Court may, with the consent of the Collector, appoint him" shall be substituted.

44. In section 539, for the words "having a direct interest" the words "having an interest" shall be substituted. [2 Swt 518, at R. 8, 178.]

Addition to section 540. 45. To section 540 the following shall be added, namely :—

"An appeal may lie under this section from an original decree passed *ex parte*."

Addition to section 549. 46. To section 549 the following shall be added, namely :—

"If such security be furnished, any costs for which a surety may have rendered himself liable may be recovered from him in execution of the decree of the Appellate Court in the same manner as if he were the appellant."

Substitution of new section for section 551. 47. (1) For section 551 the following shall be substituted, namely :—

"551. (1) The Appellate Court, if it thinks fit, may, after fixing a day for hearing the appellant or his pleader and hearing him accordingly if he appears on that day, dismiss the appeal without sending notice of the appeal to the Court against whose decree the appeal is made and without serving notice on the respondent or his pleader.

"(2) If on the day fixed under sub-section (1) or any other day to which the hearing may be adjourned the appellant does not attend in person or by his pleader, the appeal shall be dismissed for default.

"(3) The dismissal of an appeal under this section shall be notified to the Court against whose decree the appeal is made."

(2) For the first paragraph of section 552 the following shall be substituted, namely :—

"Unless the Appellate Court dismisses the appeal under the last foregoing section, it shall fix a day for hearing the appeal."

(3) In section 558 the words and figures "section 551, sub-section (2)," shall be inserted before the word and figures "section 556".

Amendment of, and addition to, section 561. 48. (1) For the proviso to the first paragraph of section 561 the following shall be substituted, namely :—

"Provided he has filed the objection in the Appellate Court within one month from the date of the service on him or his pleader under section 553 of notice of the day fixed for hearing the appeal, or within such further time as the Appellate Court may see fit to allow."

(2) To the same section the following shall be added, namely :—

"Unless the respondent files with the objection a written acknowledgment from the appellant or his pleader of having received a copy thereof, the Appellate Court shall cause such a copy to be served, as soon as may be after

the filing of the objection, on the appellant or his pleader, at the expense of the respondent.

"The provisions of Chapter XLIV shall, so far as they can be made applicable, apply to an objection under this section." [I. L. R. 1 Bom. 75 and 8 Mad. 214.]

Amendment of section 562. 49. (1) In section 562 the words "so as to exclude any evidence of fact which appears to the Appellate Court essential to the determination of the rights of the parties" are hereby repealed.

(2) In the same section, for the word "investigate" the word "determine" shall be substituted.

Repeal of section 563. 50. Section 563 is hereby repealed.

Amendment of section 565. 51. In section 565, for the word "shall" the word "may" shall be substituted.

Amendment of section 566. 52. (1) In section 566 the words "and the evidence upon the record is not sufficient to enable the Appellate Court to determine such issue or question" are hereby repealed.

(2) In the same section, between the words "the Appellate Court may," and the words "frame issues," the words "if necessary" shall be inserted.

Amendment of section 582. 53. (1) In section 582, for the words "the words 'plaintiff,' 'defendant' and 'suit' shall be held to include an appellant, a respondent and an appeal, respectively," the following shall be substituted, namely :—

"the word 'plaintiff' shall be held to include a plaintiff-appellant or defendant-appellant, the word 'defendant' a plaintiff-respondent or defendant-respondent, and the word 'suit' an appeal."

(2) In the same section, the words and figures "including those of section 372A," shall be inserted after the words "The provisions hereinbefore contained".

Addition to section 584. 54. To section 584 the following shall be added, namely :—

"An appeal may lie under this section from an appellate decree passed *ex parte*."

Amendment of section 588. 55. (1) In section 588, clause (9), for the word "or" the word "for" shall be substituted. [Gazette of India, 19th August, 1882, Part I, page 535.]

(2) In the same section, clause (16), for the words "the first paragraph of" the words "and orders under" shall be substituted.

Repeal of part of section 589. 56. The first paragraph of section 589, and the word "other" in the second paragraph of that section, are hereby repealed.

Repeal of section 599 and part of section 601. 57. Section 599, and in section 601 the words "within thirty days from the date of the order", are hereby repealed.

[I. L. R. 2
All. 604 and
12 Cal. 402.]

58. After the second paragraph of section 610 Addition to section the following shall be inserted, namely:—

"In so far as the order awards costs to the respondent, it may be executed against a surety therefor, to the extent to which he has rendered himself liable, in the same manner as it may be executed against the appellant:

"Provided that such notice in writing as the Court in each case thinks sufficient has been given to the surety."

59. To section 626 the following proviso shall be added, namely:—

"and

[I. L. R. 10
Cal. 80 and 4
All. 278.]

"(c) an application made under section 624 to the Judge who delivered the judgment may, if that Judge has ordered notice to issue under proviso (a) to this section, be disposed of by his successor."

Addition of new sections after section 646.

60. After section 646 the following shall be inserted, namely:—

"646A. (1) If at any time before judgment a Court in which a suit has been instituted doubts whether the suit is cognizable by a Court of Small Causes or is not so cognizable, it may submit the record to the High Court with a statement of its reasons for the doubt as to the nature of the suit.

"(2) On receiving the record and statement the High Court may order the Court either to proceed with the suit or to return the plaint for presentation in such other Court as it may in its order declare to be competent to take cognizance of the suit.

"646B. (1) If it appears to a District Court that a Court subordinate thereto has, by reason of erroneously holding a suit to be cognizable by a Court of Small Causes or not to be so cognizable, failed to exercise a jurisdiction vested in it by law, or exercised a jurisdiction not so vested, the District Court may, and, if required by a party, shall, submit the record to the High Court with a statement of its reasons for considering the opinion of the subordinate Court with respect to the nature of the suit to be erroneous.

"(2) On receiving the record and statement, the High Court may pass such order in the case as it thinks fit.

"(3) With respect to any proceeding subsequent to decree in any case submitted to the High Court under this section, the High Court may make such order as in the circumstances appears to it to be just and proper.

"(4) A Court subordinate to a District Court shall comply with any requisition which the District Court may make for any record or information for the purposes of this section."

61. (1) For the third paragraph of section 648 Amendment of, and the following shall be substituted:—

"and the Court making an arrest under this section shall send the person arrested to the Court

by which the warrant of arrest was issued, unless he shows cause to the satisfaction of the former Court why he should not be sent to the latter Court, or unless he furnishes sufficient security for his appearance before the latter Court or (where the case is one under Chapter XXXIV) for satisfying any decree that may be passed against him by that Court, in either of which cases the Court making the arrest shall release him."

(2) To section 648 the following shall be added, namely:—

"Where a person to be arrested or moveable property to be attached under this section is within the local limits of the ordinary original civil jurisdiction of the High Court of Judicature at Fort William in Bengal or at Madras or Bombay or of the Court of the Recorder of Rangoon, the copy of the warrant of arrest or of the order of attachment, and the probable amount of the costs of the arrest or attachment, shall be sent to the Court of Small Causes of Calcutta, Madras, Bombay or Rangoon, as the case may be, and that Court, on receipt of the copy and amount shall proceed as if it were the District Court."

62. In section 650A, the words "or continued" shall be inserted after the word "established".

63. To section 652 the following shall be added namely:—

"A High Court not established under the Statute 24 and 25 Victoria, chapter 104 (*an Act for establishing High Courts of Judicature in India*) may, from time to time, with the previous sanction of the Local Government, make, with respect to any matter other than procedure, any rule which any High Court so established might under section 15 of that Statute make with respect to any such matter for any part of the territories under its jurisdiction which is not included within the limits of a presidency-town. Rules so made shall be published in the same manner, and shall thereupon have the same force, as rules made and published under this section for the regulation of matters connected with procedure."

64. In form No. 137 of the fourth schedule the words "bound by the decree" shall be inserted after the words "removed any person".

65. (1) After clause (n) of section 17 of the Indian Registration Act 1877, as amended by the Indian Registration Act 1886, the following clause shall be added, namely:—

"(o) a certificate of sale granted to the purchaser of any property sold by public auction by a Civil or Revenue officer."

(2) In the second paragraph of section 50 of the same Act, for the word and letter "and (n)" the letters and word "(n) and (o)" shall be substituted.

1 of 1877.

(3) The Indian Registration Act, 1877, shall be construed as if the amendments made in it by this section had been made therein by Act XII of 1879 (*an Act to amend the Code of Civil Procedure, the Registration Act, 1877, and the Limitation Act, 1877*):

Provided that nothing in this sub-section shall be deemed to affect a decree or order made by any Court before the commencement of this Act.

66. (1) No. 161 of the second schedule to the Indian Limitation Act, 1877, shall be transposed and become No. 173A, and the entry against it in the second column of that schedule shall be "Ditto", signifying ninety days.

(2) Nos. 171, 171A and 171B of the same schedule are hereby repealed.

(3) For No. 171C of the same schedule the following shall be substituted, namely:—

Description of Application.	Period of Limitation.	Time from which period begins to run.
<p>171. Under section 371 of the Code of Civil Procedure, or under that section and section 582 of the same Code, for an order to set aside an order for abatement or dismissal.</p>	<p>Sixty days.</p>	<p>The date of the order for abatement or dismissal.</p>

(4) After No. 175 of the same schedule the following shall be inserted, namely:—

[Cases cited at s. 32 of the Bill.]

Description of Application.	Period of Limitation.	Time from which period begins to run.
<p>175A. Under section 365 of the Code of Civil Procedure by the legal representative of a deceased plaintiff, or under that section and section 582 of the same Code by the legal representative of a deceased plaintiff-appellant or defendant-appellant.</p>	<p>Six months</p>	<p>The date of the death of the deceased plaintiff or of the deceased plaintiff-appellant or defendant-appellant.</p>
<p>175B. Under section 366 of the Code of Civil Procedure by a defendant, or under that section and section 582 of the same Code by a plaintiff-respondent or defendant-respondent.</p>	<p>Ditto</p>	<p>The date of the death of the deceased plaintiff or of the deceased defendant-appellant or plaintiff-appellant.</p>
<p>175C. Under section 368 of the Code of Civil Procedure to have the legal representative of a deceased defendant made a defendant, or under that section and section 582 of the same Code to have the legal representative of a deceased plaintiff-respondent or defendant-respondent made a plaintiff-respondent or defendant-respondent.</p>	<p>Ditto</p>	<p>The date of the death of the deceased defendant or of the deceased plaintiff-respondent or defendant-respondent.</p>

GOVERNMENT OF INDIA.
LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR
GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING
LAWS AND REGULATIONS UNDER THE PROVISIONS OF
THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House on Saturday, the 10th March, 1888.

PRESENT:

His Excellency the Viceroy and Governor General of India, K.P., G.C.B.,
G.C.M.G., G.M.S.I., G.M.I.E., P.C., *presiding*.

The Hon'ble F. M. Halliday.
The Hon'ble Sir Pasupati Ananda Gajapati Razu, K.C.I.E., Mahárájá of
Vizianagram.

CIVIL PROCEDURE CODE, &c., AMENDMENT BILL.

The Hon'ble MR. SCOBLE presented the Report of the Select Committee on the Bill to amend the Code of Civil Procedure and the Indian Limitation Act, 1877. He said:—

“Although this Bill is somewhat formidable in appearance, I do not think it will be found upon examination to contain much controversial matter. I am free to confess that I approached its consideration rather more than twelve months ago by no means with a light heart. The revision of the Code of Civil Procedure is not a matter to be readily undertaken by any one familiar with the working of the Courts and who knows from practical experience how easy it is to pick holes and how difficult it is to mend them. No one could be more averse than I am to what is called ‘tinkering’ enactments of this kind. But being confronted with an amending Bill on my arrival in this country, and overwhelmed with suggestions for still further amendments, I have had to deal with the matter, however reluctantly; and, with the assistance of the Select Committee, I hope to have produced a practically useful measure.

“As the Council are aware, the last edition of the Code was published in 1882. The six years which have since elapsed have brought to light some defects in its method, and some difficulties in its construction, which it is the object of the present Bill to remedy. The defects have been pointed out by the Courts which have had to administer the Code; the difficulties have resulted from imperfections of expression which have led different High Courts to construe the same sections in different ways. In dealing with this Bill the Select Committee has attempted no startling innovations, but has limited itself to the more modest, and, I think, more useful, task of making plain that which was before obscure, and supplying that which experience has shown to have been accidentally omitted or imperfectly expressed.

“At the risk of being somewhat tedious—for details of this kind, though important, are not interesting to a lay audience—I must ask the Council to

bear with me while I point out the principal alterations effected in the Code by this Bill. Taking the sections in their order, the first to which I desire to call attention is section 3, which has been introduced on the suggestion of the Government of the North-Western Provinces and Oudh. The object is to preserve the summary character of rent-litigation under local laws; and it is justified on the ground that holding the provisions of the Civil Procedure Code to be applicable to the proceedings of the Rent and Revenue Courts, in all points which are not provided for in the special Acts governing those classes of Courts, may be the source of considerable embarrassment to the Administration, both by throwing impediments in the way of the easy realization of the rents from which the land-revenue is paid, and imposing increased labour on the Rent Courts whose time is already fully occupied.

"Section 5 relates to suits on foreign judgments. Upon this point there is a conflict of decisions between the High Courts of Madras and Bombay, which we have settled by declaring that Courts in British India shall not be precluded from enquiring into the merits of the case in which the judgment was passed by any Court in Asia or Africa, excepting only Courts established by the authority of the British Government in our colonies and dependencies. This will avoid the anomaly of placing the Courts of Siam or Cabul on the same footing as the Queen's Courts in Ceylon or Hongkong.

"Section 6 is intended to avoid a difficulty as to jurisdiction which frequently arises where the boundaries of estates or holdings are destroyed or altered by fluvial action.

"Section 7 is based upon a suggestion of Mr. Justice Straight, and makes it clear that, in order to found jurisdiction it is enough that a material part of the cause of action arises within the local limits of the jurisdiction of the Court in which the suit is instituted.

"The object of section 9 is to give to the Courts greater power of amendment of plaints than they at present possess. The tendency of the Courts in England is to allow the greatest latitude in this direction. In a recent case before the Court of Appeal (*Weldon v. Neal*, 19 Q. B. D. 395) Lord Justice Lopes says: 'However negligent or careless the first omission, and however late the proposed amendment, the amendment should be allowed if it can be allowed without injustice to the other side.' In this country, where, as the Advocate General of Bengal observes, 'there is every likelihood of a poor suitor acting in ignorance or under the advice of ignorant advisers, and launching an honest case in a clumsy and irrational manner,' it appeared to the Select Committee there was abundant reason for adopting the English rule. The only necessary limitation is to prevent a suit of one character from being turned by amendment into a suit of a different character; and it is therefore provided that amendments which would have this effect are not to be allowed.

"Sections 10, 11, 12, 15 and 16 are intended to facilitate the service of summonses by an agency other than that of the Courts which issued them.

"Section 14 substitutes for sections 141 and 142 of the Code a simpler method of dealing with the documentary evidence produced in suits.

"Section 17 empowers the Local Governments to authorize selected Judges to take down the evidence in appealable cases in the English language. This section is regarded by the Bengal Government as 'perhaps the most important in the Bill,' and the Lieutenant-Governor believes that 'a cautious use of the power therein conferred will effect an enormous saving of time both in original as well as in appellate Courts.' District Judges are of the same opinion. Mr. Stevens, of Gya, writes—'It is scarcely possible to exaggerate the trouble, annoyance and waste of time which are frequently caused by the present mode of recording evidence;' and Mr. Towers, of Midnapore, says—'I believe the change would be a very salutary one in all District Courts, and probably in those of most Subordinate Judges, which are always situated at head-quarters, and the pleaders practising in which are good English scholars. For myself I believe I could do twice the amount of appellate work if I had a record of the evidence in

English. In original cases also it will save District Judges much time and trouble to have but one record. The expense of translations in the High Court will also be much reduced, and there will be a very appreciable gain to litigants.' From Madras, Mr. Justice Parker writes—'These provisions have long been most desirable in the Madras Presidency. The present practice is as much disliked by the Bar as by the Judge, and causes great loss of time.' The Bombay Government, on the other hand, consider the alteration undesirable; and there would be much force in their observation that "Judges are of necessity frequently sent to districts with the language of which they are unacquainted, and in such cases it is not desirable that there should be no vernacular record of the evidence" if the proposal were absolute; but, as Local Governments may limit and revoke the exercise of the power as they please, it may surely be expected of them not to misuse the discretion with which they are invested.

"Sections 18 and 19 make it clear that the law does not require the re-hearing of a suit by the successor of a Judge who, having part heard the suit, has been prevented by death, transfer or other cause from concluding the trial; but that the hearing may be taken up at the stage at which it was left by the previous Judge, with liberty to recall and re-examine any witnesses from whom further evidence may be desired.

"In section 20 we carry out a suggestion of the Chief Court of the Punjab with regard to the award of interest on decrees for money.

"Section 21 is designed to bring equitable set-offs, which the Courts are in the habit of allowing, within the operation of section 216 of the Code.

"In section 26 we have empowered the Court executing a decree to determine questions as to stay of execution: and, as considerable difficulties have been felt with regard to the meaning of the word 'representatives' in section 244 of the Code, we have provided a procedure by which, in case of dispute, the representative of a party for the purposes of the section may be ascertained.

"There have been so many conflicting rulings of the High Courts upon the effect to be given to payments or adjustments of decrees which have not been certified to the Court charged with the execution of those decrees, that we have provided in section 27 that, unless such payment or adjustment has been certified as required by the Code, it shall not be recognized as a satisfaction of the decree by any Court executing the decree. This provision will, it is hoped, have the effect of inducing parties who settle out of Court to report to the Court that such settlement has been made.

"Section 28 brings the provisions of the Code in regard to the attachment of property in execution of a decree into accordance with recent legislation, and removes a doubt as to the extent to which the salaries of certain classes of public servants are liable to be attached.

"Under section 320 of the Code, Local Governments were empowered to direct that the execution of decrees affecting immoveable property might be transferred, in certain cases, from the Court to the Collector; and subsequent sections provided that the Collector might sell, let or mortgage the property as might seem most desirable under the circumstances. The Local Governments were authorized to make rules for the guidance of the Collector and his subordinates in executing the decree; but no provision was made as to the authority to which an appeal would lie from orders passed by the Collector in exercise of the powers conferred on him. The High Courts of Calcutta and Bombay have expressed the opinion that the proceedings of the Collector should be subject to appeal to the District Judge and the High Court; but there is a Full Bench decision of the Allahabad High Court, with which the Select Committee concurs, to the contrary effect. We think it was the intention of the Legislature that any appeal from the orders of the Collector in matters of this kind should go to the superior Revenue-authorities. There are obvious reasons of convenience in favour of this course, and we have so provided in section 30 of the Bill.

"The most important clause in section 31 is that which provides that Chapter XX of the Code, which relates to proceedings in insolvency, shall not

apply within the towns of Calcutta, Madras and Bombay. This provision has been introduced at the suggestion of the High Court of Calcutta, the Judges of which point out the inconveniences of the present dual system, and say that 'it seems to be quite unnecessary to have two different systems of insolvency law at work in the same place. The provisions of the Insolvent Act, though in many respects imperfect, are now understood by practitioners, and great confusion and uncertainty has in some cases arisen from the introduction of a new and more imperfect procedure.' As the question of amending and consolidating the law of bankruptcy and insolvency in British India is now before the Council, it seems desirable that the presidency-towns should, at all events for the present, retain the system to which they have for long years been accustomed. In regard to small insolvencies, moreover, I am in great hopes that they will be to a great extent got rid of when the Debtors Bill passes into law.

"The remaining sections of the Bill relate mainly to minor alterations. Sections 32, 53 and 66 extend the period during which the representatives of deceased suitors may apply to be entered on the record as plaintiffs or defendants. Section 33, restoring a provision of the Code of 1859, relaxes the stringency of the existing law respecting the dismissal of suits for default in giving security for costs. Section 34 enlarges the class of persons to whom commissions to examine witnesses may be issued, subject to such rules as the High Court may make in the matter. Sections 37, 38, 40 and 41 are to remove difficulties which at present beset ruling chiefs when they sue in our Courts.

"Section 44 is in accordance with the views of the Muhammadan Educational Endowment Committee, recently appointed by the Government of Bengal, and is intended to facilitate proceedings in suits relating to public charities. The Committee represent that it has been decided by a Divisional Bench of the Calcutta High Court (I. L. R. 8 Cal. 32) that the interest possessed in a mosque by those who live in the village in which it is situated, and are in the habit of worshipping in it, is not a direct interest within the meaning of section 539 of the Code. 'It would seem to follow that the real beneficiaries of a public trust, that is to say, those members of the general community who derive advantage from it in its ordinary operation, can seldom proceed under the section; while those whose interest in the foundation is more direct, as being entitled to share in its management, and who therefore can institute suits, are the very men who are likely to be guilty of malversation or other breach of the conditions of the trust. The Committee consider it most impolitic to deny the remedy to all except those who inflict the wrong, and would strike the word "direct" out of the section.' We have adopted this suggestion.

"Section 47 is intended to get rid of an anomaly which arises under the present state of the law in regard to the dismissal of appeals by default, and is proposed by Mr. R. J. Crosthwaite, the Judicial Commissioner of the Central Provinces, who writes as follows:—

'This amendment is necessary, because, as section 551 stands now, an appellant can, if his appeal is fixed for hearing under that section, refrain from appearing, and then appeal from the decree of the first Appellate Court dismissing his appeal. The Court of second appeal will then have to consider the appeal and decide it, because the provisions of section 556 do not apply in the case of an appeal dealt with under section 551. When a first appeal is dismissed under section 556 for default, there is practically no second appeal, because the second Appellate Court must hold that, as the appellant did not appear in the Court of first appeal, that Court's decree dismissing the appeal was under section 556 correct; but when an appeal is fixed for hearing under section 551, and the appellant not appearing, his appeal is dismissed, section 556 does not apply; and an appellant can thus ignore the Court of first appeal and take his appeal to the High Court. Section 556 does not, I think, apply, because there can be no doubt that the words 'on the day so fixed' mean 'the day fixed under section 552 for hearing the appeal.' This state of the law is anomalous, and, considering that a Court of second appeal is supposed to go by the findings of fact of the Court of first appeal, inconvenient. If an appellant does not appear on the day fixed for hearing, whether it be fixed under section 551 or section 552, his appeal should be dismissed; but he should have a right to apply for re-admission under section 558.'

"Upon the sections which follow from 48 to 59 I need not trouble the Council with any observations. But section 60 is of more importance. It embodies a

suggestion made by the Judges of the High Court of Calcutta, who thus describe the difficulty which it is intended to cure :—

'In this province it is often difficult to tell whether a suit should be instituted in the Small Cause Court or a Court possessing ordinary civil jurisdiction. Numerous cases have been brought to the cognizance of this Court in which great inconvenience, hardship and injustice have been caused in this way. A suit is brought in the first instance in the Small Cause Court, and that Court declares that it has no jurisdiction and dismisses the suit. The plaintiff then institutes the same suit in the Munsif's Court, which, upon trial, gives him a decree. The defendant thereupon appeals to the higher Courts, and it is held that the Munsif had no jurisdiction, and accordingly the suit is dismissed. The result is that the unfortunate suitor gets no relief anywhere. And this same result also follows when the Court of first instance holds that it has no jurisdiction, and also when the suit is in the first instance instituted in the Civil Court and the suitor subsequently goes to the Small Cause Court. The Judges think questions of jurisdiction and errors as to jurisdiction should be susceptible of being dealt with and cured by the High Court by transfer, affirmation of decree or otherwise; and they think that the order of the High Court as to jurisdiction should be final.'

"I will not detain the Council by a detailed reference to the remaining sections of the Bill; but there is one important omission to which I desire briefly to advert. A recent decision of the Privy Council (*Rájá Amir Hassun Khan v. Sheo Buksh Sing*, L. R. I. A. 237) has given a more limited construction to section 622 of the Code than had been put upon it by the Courts in India; and many suggestions have been made with a view to the extension of the revisional powers of the High Courts to all cases in which there had been a material irregularity in procedure or the decision was based on an erroneous view of the law. The Committee have not been able to adopt these suggestions, the more especially as they have been favoured with one by the Chief Justice of Bengal which would have the effect of doing away with second appeals altogether and substituting for them a right of application to the High Court as a Court of review in all cases in which it could be shown that a failure of justice had occurred. This suggestion, coming from so high an authority, deserves, and will receive, the most respectful consideration; but the proposal is of too sweeping a character to be hastily adopted, and the Committee did not think it desirable to delay their Report on this Bill for the purpose of consulting other authorities upon it.

"I have only to add that the draft has been twice circulated, in its original and in an amended form, to Local Governments and High Courts, and that the Bill as reported is the outcome of a most careful consideration on the part of the Committee of the criticisms which have been received from Judicial officers and others engaged in the daily working of the Code, and therefore best able to indicate the points in which it is susceptible of improvement. To these gentlemen I desire to tender my best thanks for the valuable assistance which they have tendered and which has, I hope, enabled the Select Committee to work out a series of amendments of the Code which will simplify and facilitate in many important respects the administration of justice."

The Council adjourned to Friday, the 16th March, 1888.

S. HARVEY JAMES,

*Secretary to the Govt. of India,
Legislative Department.*

The undermentioned Surgeons appointed to the Bengal Establishment in G. G. O. No. 779 of 1887, reported their arrival at Bombay on the dates specified :—

Courtenay Clarke Manifold,—2nd November, 1887.

Charles Edward Sunder,—21st January, 1888.

No. 195.—PUNJAB FRONTIER FORCE—

1st Punjab Cavalry.

Jemadar Janmeja Singh, appointed on probation in G. G. O. No. 58 of 1886, is confirmed in

that rank, with effect from the 26th February, 1886.

STAFF CORPS.

No. 196.—The undermentioned officers appointed by the Secretary of State for India probationers for the Indian Staff Corps, are posted as follows, with effect from the dates of their arrival in India :—

Bengal Staff Corps.

Lieutenant A. C. Hickley, West Riding Regiment.

Lieutenant H. J. M. Macandrew, Lincolnshire Regiment.

Second Lieutenant R. E. Chaplin, Leicestershire Regiment.

Second Lieutenant F. Shakespear, Manchester Regiment.

Second Lieutenant T. S. Marquis, South Wales Borderers.

Second Lieutenant A. G. DeV. Chichester, Manchester Regiment.

Madras Staff Corps.

Second Lieutenant C. L. Peacocke, Royal Artillery.

Second Lieutenant E. E. Beddek, Northamptonshire Regiment.

Second Lieutenant F. W. Lethbridge, East Kent Regiment.

Second Lieutenant G. R. deH. Smith, North Lancashire Regiment.

Bombay Staff Corps.

Lieutenant W. H. Errington, South Staffordshire Regiment.

Lieutenant C. C. Cook, Royal Artillery.

Second Lieutenant C. D. Lester, North Lancashire Regiment.

No. 197.—Lieutenant Cecil Pender Griffiths Griffin, Worcestershire Regiment, officiating Squadron Officer, 17th Bengal Cavalry, having completed eighteen months' probationary service, is admitted to the Bengal Staff Corps from the 14th July, 1886, subject to the confirmation of the Secretary of State for India.

FURLOUGH AND LEAVE.

No. 198.—The undermentioned officers are granted furlough out of India, with the necessary subsidiary leave :—

Lieutenant-Colonel A. S. Roberts, General List, Infantry, Deputy Commissioner, 2nd grade, Punjab, (p. a.) for 243 days, under rule IX of the regulations of 1868.

Lieutenant H. L. C. H. Stafford, R.E., Assistant Engineer, 1st grade, Military Works Department, (u. p. a.) for 182 days, under rule XI of the regulations of 1868.

Surgeon-Major G. C. Hall, Superintendent, Central Jail, Allahabad, (p. a.) for 182 days, under rule IX of the regulations of 1868.

Conductor G. Bailey, Ordnance Department, (m. c.) for one year, under the regulations of 1868.

Sub-Conductor J. Toohey, Ordnance Department, (m. c.) for one year, under rule VI of the regulations of 1875.

No. 199.—The undermentioned officers are granted leave out of India under the leave rules for the Staff Corps, with effect from the dates on which they are respectively struck off duty :—

Colonel A. H. Prinsep, Bengal Cavalry, 11th Bengal Lancers, (p. a.) for one year. Pension service,—32nd year, commenced 2nd December, 1887.

Colonel J. D. Macpherson, Bengal S. C., 4th Bengal Cavalry, (p. a.) for one year. Pension service,—30th year, commenced 12th April, 1887.

Captain J. E. Barr, Bengal S. C., 3rd Bengal Infantry, (p. a.) for one year. Pension service,—20th year, commenced 4th February, 1888.

Lieutenant E. F. H. McSwiney, D. S. O., Bengal S. C., 3rd Cavalry, Hyderabad Contingent, (m. c.) for one year. Pension service,—10th year, commenced 22nd January, 1888. This cancels the leave granted to him in G. G. O. No. 75 of 1888.

Lieutenant W. Stewart, Bengal S. C., 10th Bengal Lancers, (p. a.) for one year. Pension service,—9th year, commenced 21st June, 1887.

Lieutenant D. E. Mocatta, Bengal S. C., 2nd Battalion, 3rd Goorkha Regiment, (p. a.) for one year. Pension service,—6th year, commenced 10th May, 1887.

No. 200.—Colonel J. M. Heywood, R.E., Chief Engineer, 3rd class, Public Works Depart-

ment, is granted special leave under P. W. D. Resolution No. 1940-G, dated the 3rd October, 1887, with effect from the 19th March, 1888.

No. 201.—Colonel W. W. Boddam, Bengal S. C., is permitted to reside out of India under clause 37 (b), India Army Circulars, 1887. Pension service,—38th year, commenced 29th August, 1887.

No. 202.—The undermentioned officers have been granted extensions of furlough by the Secretary of State for India :—

Colonel J. FitzGerald, Bengal S. C., (m. c.) for six months.

Major W. Brydon, Bengal S. C., (m. c.) for six months.

Surgeon-Major O. Baker, (p. a.) for 10 days.

LONDON GAZETTE.

No. 203.—The following extract is published for general information :—

"London Gazette," dated the 7th February, 1888, page 819.

*War Office, Pall Mall,
7th February, 1888.*

MEMORANDA.

* * * * *

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat; the copies for subscribers registered by Messrs. Thacker, Spink & Co. are distributed by that firm; and the Madras, Bombay and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad, respectively.

In supersession of previous advertisements, on and from the 1st January, 1885, the terms of subscription and sale will be as follows:—

Terms of subscription, payable annually in advance.

For the complete Series, including postage

Without postage. R22 8

For the Calcutta Series

each of the Madras, Bombay

and Allahabad Series. R10 0 R12 0

a part of the Calcutta Series

purchased separately, inclusive

of postage in India. R6 0 R7 0

a part of the Madras, Bombay and

Allahabad Series purchased

separately, inclusive of postage

in India. R2 0 R2 0

Persons desiring to subscribe for, or purchase, the Report,

should apply to—

Messrs. Thacker, Spink and Co., Calcutta.

Thacker & Co., Bombay.

Higginbotham & Co., Madras.

The Government Central Book Depot, Bombay.

The Curator of Government Books, North-Western

Provinces and Oudh.

Superintendent of Government Printing, Bengal.

Orders and subscriptions for 1885 should be at once remitted.

NOTICE.

Vizianagram.

RESERVE FORCES BILL.

The Hon'ble LIEUTENANT-GENERAL CHESNEY moved that the Bill to regulate Her Majesty's Indian Reserve Forces be taken into consideration. He said :—

"In introducing this Bill into Council a fortnight ago I explained that the object of it was, following the system in force in regard to the English army, to

establish a simple procedure to provide for the conditions of service of the men about to be brought into the Indian reserve force under measures lately determined upon with the approval of Her Majesty's Government. In ordinary course the Bill would have been referred to a Select Committee, and also to the different Local Governments and Administrations, who would have been invited to record their opinions on the Bill, and the Select Committee would not have proceeded to consider the Bill until those reports had been laid before it. Meanwhile, men passing into the reserve of the army under the conditions at present subsisting would, as a matter of equity, as soon as this Bill was passed, be given an opportunity of re-considering their position, and of electing or otherwise for the reserve under the new conditions. I mentioned to the Council in introducing the Bill that the army reserve measures had so far taken very little effect, partly because the army was engaged in active operations and consequently the men were not allowed to transfer themselves to the reserve, and also partly because the establishment of the infantry of the Indian army was not quite complete. But these causes which suspended the progress of this measure having now terminated, and there being reason to believe that much more active and considerable progress will shortly be made in the formation of the reserve, it is I think exceedingly desirable that all the men who draft into it should be subject at once to their final conditions, and that they should be spared the trouble of being called upon to join their regiments in order to have a new set of conditions explained to them and their assent or dissent obtained to them. That is the reason why it is very desirable that this measure should become law at once.

•“The provisions of the Bill are of an extremely simple kind. It is very unlikely that reference to the Local Governments and Administrations would result in any substantial change or in any change even in the wording of the Bill; it may be observed also that the conditions established by it are of a more easy character as regards the soldier than those under which he is now serving in the reserve, inasmuch as that the penalties which the Bill provides in the event of a man failing to obey the summons when called upon to join his regiment are of a much easier and lighter nature than the penalties to which the man is now liable who, whilst on furlough, disobeys an order to join his regiment. So that it may be said that the soldier will gain rather than lose by the Bill becoming law.

“Under these circumstances I beg to ask that the Bill be now taken into consideration.”

The Motion was put and agreed to.

The Hon'ble LIEUTENANT-GENERAL CHESNEY also moved that the Bill be passed.

The Motion was put and agreed to.

The Council adjourned to Saturday, the 10th March, 1888.

S. HARVEY JAMES,
Secy. to the Govt. of India,
Legislative Department.

SUPPLEMENT TO
The Gazette of India.

No. 10.} CALCUTTA, SATURDAY, MARCH 10, 1888.

OFFICIAL PAPERS.

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully or make known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.

Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.

Irrigation.

**REVENUE REPORT OF IRRIGATION WORKS IN THE BOMBAY PRESIDENCY
(EXCLUDING SIND) FOR 1886-87.**

No. 46 I., dated Calcutta, the 2nd March 1888.

RESOLUTION—By the Government of India, Public Works Department.

Read—

Letter from the Government of Bombay, Public Works Department, No. 12 W. I., dated the 6th February 1888, forwarding the above Report, and the Resolution of the Local Government reviewing it.

OBSERVATIONS.—The Report of the Chief Engineer for Irrigation has been so carefully reviewed in the Resolution of the Government of Bombay, that the Government of India finds that very few additional remarks are required.

2. The Capital outlay, direct and indirect, incurred up to the end of

A

1886-87, is shown in the following statement for all works in the Deccan and Guzerat, for which Capital and Revenue accounts are kept :—

	Number of Works.	Expenditure during the year 1886-87.	Expenditure to end of the year 1886-87.	Sanctioned Estimate.
		Rs.	Rs.	Rs.
Productive Public Works . . . In operation . . .	7	67,093	1,02,74,199	1,05,01,332
Protective Public Works . . .	In operation . . .	3	4,22,621	60,69,756
	In abeyance . . .	2	3,658	99,322
Minor Works (of which Capital and Revenue Accounts are kept) . . .	In operation . . .	25	65,400	56,79,567
	Under construction . . .	1	16,500	1,19,636
	In abeyance . . .	1	8,889	1,82,647
Total	5,84,161	2,24,25,127	2,53,31,730

There appears to be some discrepancy, which should be eliminated from future reports, in the number and nomenclature of the Minor Works for which Capital and Revenue Accounts are kept. The statement on page 1 of Part I of the Revenue Report mentions only 22 minor works as being in operation, but from other statements it would appear that there are 25 such works. The works at present in abeyance are the Chankapur and Maladevi Tanks under the head of Protective Works, and the second section of the Gokak canal under Minor Works.

3. The Revenue Accounts of the year showed the following actual results :—

	Gross Revenue.	Net Revenue.	Percentage of net Revenue on total Capital outlay to end of the year.
	Rs.	Rs.	
Productive Public Works	2,57,796	1,23,598	1.2
Protective „ „	13,461	—22,433	Nil.
Minor Works (of which Capital and Revenue Accounts are kept)	63,211	—6,114	Nil.
Total . . .	3,34,468	95,051	0.42

There is a considerable improvement in the net Revenue from Productive Public Works, but none in the other classes, both of which continue to work at a loss to the State.

4. The Minor Works of which only Revenue Accounts are kept produced a gross revenue of Rs. 5,16,741 and a net revenue of Rs. 2,69,140 during the year. These results compare favourably with those of previous years.

5. The areas irrigated by the different classes of works are shown below :—

	1886-87.	1885-86.	1884-85.
	Acre.	Acre.	Acre.
Productive Public Works	21,187	26,107	21,609
Protective „ „	7,625	16,135	2,677
Minor Works—			
For which Capital and Revenue Accounts are kept	13,816	17,208	15,369
For which only Revenue Accounts are kept	141,856	121,221	140,635

The decrease in area in the case of the first three classes in the above table, as compared with the previous year, is due to the rainfall of the season having been very favourable for cultivation. The extension of the area under sugarcane was, however, very marked, and this is a very satisfactory feature in the operations of the year, and has resulted in a considerable increase in the average water-rate per acre irrigated. It seems now to be clearly proved that the reduction in the water-rates, which was determined upon in 1883-84, has failed to extend the area of irrigation and that a gradual return to the old rates should be contemplated.

6. There has been no material decrease in maintenance charges on canals in full operation ; the present cost of maintenance cannot be considered otherwise than excessive. It is noticed that the recent amalgamation of the duties of the Public Works Department Establishment may be expected to effect some improvement under this head. The necessity for economy must be continually kept in view.

7. The diminution in the balance of demands unrealized at the end of the year is satisfactory.

8. In the concluding paragraphs of the Resolution of the Government of India on the Revenue Report of 1885-86 the delay in the submission of this Report was noticed. The report for 1886-87 was received on the 10th of February 1888, or one day earlier than that of the previous year. It is noticed that the Report of the Chief Engineer for Irrigation was submitted on the 22nd November 1887 ; it is not understood why the review of the Local Government with the report could not have been prepared and despatched from Bombay on an earlier date than the 6th of February 1888.

ORDER.—Ordered, that copies of this Resolution and of the Report be forwarded to the Department of Finance and Commerce, and to the Revenue and Agricultural Department for information.

Ordered also, that copies of this Resolution be forwarded to the Government of Bombay for information and guidance, and that copies of the Report

The Governments of Madras, Bengal, the North-Western Provinces and Oudh, and the Punjab.

The Chief Commissioners, Central Provinces and Burma.

The Foreign Department for communication to the Resident at Mysore and Coorg.

The Resident at Hyderabad.

The Agents to the Governor General for Central India and Rajputana.

and of the Resolution be forwarded to the Local Governments and Administrations noted in the margin, in the Public Works

Department, for information.

Ordered further, that this Resolution and the Resolution by the Local Government be published in the Supplement to the *Gazette of India*, and that copies of this Resolution be forwarded to Her Majesty's Secretary of State.

R. HOME, Colonel, R.E.,
Deputy Secy. to the Govt. of India.

No. 12 W. I.—269, dated 6th February, 1888.

RESOLUTION—By the Government of Bombay, Public Works Department.

Letter from the Chief Engineer for Irrigation and Superintending Engineer, Central Division, No. 3305, dated 22nd November 1887.

Forwards the Irrigation Revenue Report of the Bombay Presidency, excluding Sind, for 1886-87, Parts I and II.

RESOLUTION.—The Irrigation Works in the Deccan and Gujarat, to which this report refers, comprise in all thirty-four new schemes in operation, and a large number of old tanks and small canals (included in Part II), which are maintained by Government, but on which there has been no Capital expenditure.

2. The works of the former class, for which Capital Accounts are kept, include seven projects classified as Productive Public Works, three as Protective, and twenty-four as Minor Works. Statement 1 B. includes one more work (the Nilgund Tank) which does not appear in the list of works in operation in the first paragraph of the report, or in Statement 1 C. The omission should be explained.

3. The Capital outlay during the year amounted to Rs. 5,84,161, and at the end of the year stood at Rs. 2,24,25,127. This is inclusive of three works in progress, and one in abeyance.

4. The following is an abstract of the Capital Account :

						During year.	To end of year.
						Rs.	Rs.
Major Works—							
Productive Works	67,093	1,02,74,199
Protective Works	4,26,279	61,69,078
● TOTAL, MAJOR WORKS						4,93,372	1,64,43,277
Minor Works	90,789	59,81,850
GRAND TOTAL						5,84,161	2,24,25,127

5. The following are the unexpended balances of the sanctioned estimates for the works of each class :—

	Rs.
Productive Works	2,27,133
Protective Works	23,28,319
Minor Works	3,51,151

Rs. 29,06, 603

Of this amount, Rs. 16½ lakhs under head “Protective” is for the Chankápur and Maladevi Tanks, both of which are at present in abeyance.

6. The works in operation, excluding old works, comprise in all 560 miles of Main and Branch Canals, and 416 miles of distributaries. The reservoirs cover an area of 26,786 acres or 42 square miles.

7. The financial results of the year were as follows :—

	Area irrigated.	REVENUE REALIZED.		Total.	Working expenses.	Net Revenue.
		Direct receipts (water-rates), &c.	Share of land revenue.			
	Acres.	Rs.	Rs.	Rs.	Rs.	Rs.
Productive Works .	21,187	2,52,332	5,464	2,57,796	1,34,198	1,23,598
Protective Works .	7,025	13,461	...	13,461	35,894	-22,433
Minor Works for which Capital Accounts are kept	13,816	59,124	4,087	63,211	69,325	-6,114
TOTAL .	42,628	3,24,917	9,551	3,34,468	2,39,417	95,051
Minor Works for which only Revenue Accounts are kept. .	141,856	6,029	5,10,712	5,16,741	2,47,601	2,69,140
GRAND TOTAL .	184,484	3,30,946	5,20,263	8,51,209	4,87,018	3,64,191

8. Taking all the works for which Capital Accounts are kept together, there was a decrease in area irrigated, as compared with the previous year, of 16,822 acres, which is ascribed to the exceptionally favorable rainfall throughout the season. The Revenue *Assessments* during the year show an increase of Rs. 20,243, and the realizations an increase of Rs. 54,591, as compared with the previous year, notwithstanding the falling off in area irrigated.

9. On the other hand, the figures of working expenses show an increase of Rs. 28,731.

10. The amount on account of assessments of direct receipts unrealized at the close of the year was Rs. 23,739, showing a satisfactory decrease on the amount outstanding at the close of the previous year, which was Rs. 50,730.

11. The interest charges on the Capital outlay on the Productive Works during the year amounted to Rs. 3,91,209, against which the net revenue realized from works of that class was Rs. 1,23,598, showing a loss of Rs. 2,67,611, whereby the interest account was increased to Rs. 56,02,838.

In the previous year the interest charges on Productive Works were Rs. 3,87,865, and the net revenue was Rs. 94,292, showing a loss of Rs. 2,93,573.

There was thus an improvement of Rs. 29,306 in net revenue, and an increase of Rs. 3,344 only in the interest charges during the year.

12. The assessments of the year compare with those of the previous year as follows :—

	ASSESSMENTS.	
	1886-87.	1885-86.
	Rs.	Rs.
Major Works—		
Productive	2,31,523	2,18,408
Protective	12,741	7,544
Minor Works	56,211	57,250
TOTAL .	3,03,475	2,83,232

and taking the figures in detail :—

	1886-87.			1885-86.		
	Water-rates.	Other receipts.	Total.	Water-rates.	Other receipts.	Total.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Productive Works .	1,30,636	1,03,887	2,34,523	1,17,141	1,01,267	2,18,408
Protective Works .	10,251	2,490	12,741	6,553	991	7,544
Minor Works .	47,916	8,295	56,211	48,602	8,678	57,280
TOTAL .	1,88,803	1,14,672	3,03,475	1,72,296	1,10,936	2,83,232

13. The water-rates per acre irrigated were :—

	1886-87.	1885-86.
	Rs.	Rs.
Productive Works	6.16	4.19
Protective Works	1.34	0.40
Minor Works	3.47	2.82
TOTAL	4.43	2.89

The increase in average rate is due partly to the free grant of water in the previous year for fresh irrigation on the newly opened Nira Canal and Mhaswad Tank, and partly to the areas irrigated in 1885-86 having included a large area of inferior crops assessed at low rates, for which water was taken in consequence of the unfavorable rainfall in that year.

14. The following table shows the principal crops irrigated each year :—

	1886-87.	1885-86.
	Acres.	Acres.
Gardens and Orchards	2,993	3,462
Sugar	5,239	4,100
Wheat	9,497	10,604
Rice	4,294	3,166
Jowar	3,827	13,347
Bajri	2,976	7,237
Gram	1,983	3,508
Ground-nut	5,418	5,604
Condiments	1,255	1,085

The principal decreases were thus in Jowar and Bajri.

15. In para. 8 of the report the matter of the effect of the general reduction of water-rates ordered in 1883-84 is referred to. It appears to be established that the reduction has not resulted in a large extension of the area irrigated, which is dependent chiefly on the amount and distribution of the rainfall. On the expiry of the current year the reduced rates will have been in force five years, and a detailed report should be made during next rains for submission to the Secretary of State, with a view to the subject being re-considered, as the reduction appears to have resulted only in a considerable loss of revenue to the State without a corresponding or proportionately larger benefit to the people.

16. The item "other receipts" comprises the following :—

	Rs.
Plantations	13,431
Miscellaneous	91,690
Share of Land Revenue	9,551
	Rs. 1,14,672

The receipts under "Miscellaneous" are principally from water-supply of towns, of which Rs. 79,437 was for Poona. The amounts for Sholapur and Karad are not shown. The revenue from plantations shows considerable development, the figures for the last four years being—

	Rs.
1883-84	5,491
1884-85	8,807
1885-86	10,938
1886-87	13,431

17. The increase in working expenses has already been referred to. It is accounted for in part by the recent opening of the Nira Canal and Mhaswad Tank. It is hoped that with the recent amalgamation of duties there will be an improvement in future under this head, as the charges for Establishment will be less. The maintenance charges per acre irrigated amounted to Rs. 4.39, which is excessive.

18. A large number of the works show a loss on the working of the year. Only 16 out of 34 show a surplus of revenue over expenses. Of these the Mutha Canal heads the list with a net revenue of Rs. 1,07,329, and the Krishna Canal comes next with a net revenue of Rs. 8,965. The Khari Cut Works show satisfactory development. Of the 18 works on which there was a loss, the recently opened Nira Canal and Mhaswad Tank show the largest debit, but this will of course improve. The Mhaswad Tank Canal No. II, which commands the bulk of the land to be irrigated by that scheme, was only opened at the beginning of the year, and the prospects of the water being extensively utilized are encouraging. Of the rest, the Jamda Canals and the Ashti Tank give the worst results. The position, as a whole, would be very different, if each of the works on which there is now a loss could be made to pay its working expenses.

19. The past history of the Jamda Canals and of the Pravara River Works (Lakh and Ojhar Canals) shows that, until the storage tanks at Chankapur and Maladevi, which have been commenced, but are at present in abeyance, are completed, they will continue to yield results altogether disproportionate with the expenditure incurred upon them, or with their capabilities with an improved supply, and it is feared they will continue to be a burden on the finances, though useful to a limited extent in mitigating the local effects of seasons of drought.

20. The debits to Capital Account for Establishment charges came to 39 per cent. on outlay, which is very high. The Revenue Accounts were debited with Establishment charges to the extent of 12.7 per cent. on direct receipts and 26.9 per cent. on the outlay for repairs. The charge to works for which only Revenue Accounts are kept (Part II) was Rs. 1,23,637, as compared with an outlay of Rs. 70,055 only: the charge amounts to 24 per cent. on the gross revenue derived from the works. It is anticipated that the recent amalgamation of Public Works and Irrigation duties in certain of the districts will improve these results in future years, but it will be the special duty of the Superintending Engineers to see that the maintenance of works of irrigation is as carefully supervised as formerly, and that there is no sacrifice of efficiency.

21. Copies of the report and of this Resolution should be forwarded, as usual, to the Government of India and the Secretary of State.

**REPORT ON POSTAL LIFE INSURANCE AND MONTHLY ALLOWANCE SCHEME
FOR 1886-87.**

No. 1306A., dated Calcutta, 8th March 1888.

ORDER—By the Government of India, Department of Finance and Commerce.

READ—

Letter from the Director General of the Post Office of India, No. 10771, dated the 30th December 1887, and enclosures.

Ordered, that the above letter and of its enclosures be published in the *Gazette of India* for general information.

CHARLES J. WEIR,
Officiating Under-Secretary to the Government of India.

From F. R. HOGG, Esq., Director General of the Post Office of India, to the Secretary to the Government of India, Department of Finance and Commerce,—No. 10771, dated 30th December 1887.

I have the honour to submit the Annual Report on the operations of the Postal Life Insurance and Monthly Allowance scheme during the official year 1886-87.

2. This scheme is restricted to postal employés and was introduced in February 1884, so that the year under report is the third complete year of its existence. The minimum sum for which a life can be insured is ₹50, the maximum ₹4,000, and the benefit can be secured either by an immediate lump payment or by monthly payments which continue during life or terminate at the age when officers usually expect to retire from the public service. A monthly allowance is either immediate or deferred while the annuity thus purchased must be for a sum of not less than eight annas or more than fifty rupees per month.

3. During the year, the rule under which one-half surrender value can be allowed when payments are discontinued, was modified so as to exclude policies and contracts on which three years' subscriptions have not been paid. Five applications for life insurance were refused because of unfavourable medical reports on the lives of the persons who applied for these insurances.

4. Statement No. I shows that, during the year under report, 141 persons insured their lives for sums which aggregated ₹1,36,650, and that the total realisations on account of premium, both on old and new policies, came to ₹29,283. Claims were met to the extent of ₹7,715, of which ₹7,600 represent the value of seven policies paid on six lives insured, and the remainder, the half surrender value, on five policies relinquished. Ten policies were surrendered for a gross assured sum of ₹5,050, and eleven policies lapsed for a total amount of ₹9,650.

LIFE INSURANCE.	Up to 31st March 1886.	Up to 31st March 1887.
Number of lives insured	568	709
Amount received in premia	₹ 39,567	₹ 68,850
Amount of Insurance	7,55,075	8,91,725
Amount of claims met	5,773	13,488

On the margin is entered a summary which contrasts the principal results of the business for two years. None of the new policies were effect-

ed by a single payment: 102 policies, securing a total assurance of ₹1,00,550, were obtained under the system of paying the premium for a fixed period; and 39 policies, for a total sum of ₹36,100, were issued under the plan of life payments. Fifty-seven of the new policies were taken out in the Lower Provinces of Bengal: 20 in Madras, 19 in Bombay, and 18 in Assam. Burma is the only circle in which no advantage at all was taken of the scheme. Deducting 63 policies, for a total sum of ₹73,250, which were surrendered, cancelled, discharged, or allowed to lapse since the business began, 646 policies were in force on the 31st March 1887, representing an aggregate assurance of ₹8,18,475 as detailed below:—

- 1 for ₹700 effected by a payment of premium in one sum.
- 240 „ ₹3,00,775 effected by payment of premium up to the age of 50.
- 195 „ ₹2,54,750 effected by payment of premium up to the age of 55.
- 210 „ ₹2,62,250 effected by payment of premium during life.

5. A distribution of Life Insurance policies among the several grades of postal officials is given on the margin.

POSTAL OFFICIALS.	Number on 31st March 1887.	NUMBER OF LIFE INSURANCE POLICIES TAKEN OUT.			Percentage of lives insured.
		Up to 31st March 1886.	During 1886-87.	TOTAL.	
Superintendents and Inspectors	352	45	12	57	16.19
Post-Masters, Sub-Post-Masters and Village Post-Masters	4,901	187	35	222	4.53
Schoolmasters and extraneous Agents	2,214	1	3	4	.18
Clerks	5,342	242	59	301	5.63
Postmen and Village Postmen	14,021	67	23	90	.64
Road Establishment	12,098	17	3	20	.16
Signallers, &c., in combined offices	642	9	6	15	2.33
TOTAL	39,570	568	141	709	1.79

Excluding the poorer paid classes, amongst whom the exercise of providence of this kind must be very exceptional, the percentage of lives insured on the total number of employes has

risen from 3.80 per cent. in 1885-86 to 4.45 per cent. in 1886-87.

6. Under the head of Monthly Allowance, no advance has taken place. One contract for a deferred allowance of Rs 5 was concluded, and one contract for a like amount was surrendered, so that at the close of the year four contracts only existed for sums aggregating Rs 24. The same results appeared in the last annual report.

7. The following figures exhibit the financial result of the business :—

Life Insurance.				R	a.	p.	R	a.	p.
				R	a.	p.			
Balance on 31st March 1886 as shewn in last report				...			33,793	12	3
Add Interest for 1883-84				0	4	5

(h) Total receipts from 2nd November, 1886, to 5th February, 1887.

M. C. BRACKENBURY, Major, R. E.,
Under-Secretary.

CALCUTTA,
The 7th March, 1888.

GOVERNMENT OF INDIA.
REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Summary for India for the Week ending Feb. 29th,
1888.

Pressure over Northern India during the week under review has been in an unsettled state; considerable oscillations have taken place from day to day, and the general distribution has undergone large and important modifications. Over the Peninsula, on the contrary, the daily changes have been in general slight, and the distribution has been fairly steady throughout. In consequence, while the weather over Southern India has been settled and fine, conditions over Central and North-Western India have been the reverse, fine weather having alternated with overcast skies and more or less heavy showers.

On the 23rd pressure was highest within a band stretching from Jacobabad and Mooltan westward as far as Ajmere and Agra, while it was low off the west coast and over the east of the Bay. The wind directions were generally fairly normal, though some irregularity was introduced by the presence of small areas of slightly deficient pressure over the Central Provinces and the Konkan. The former of these depressions was occasioning slight rain in the west of the Central Provinces and at Indore. A local shower was also reported from Cochin, but elsewhere the weather was fine. On the 24th pressure had fallen rapidly over North-Western India, and the area of highest readings had been transferred to the central parts of the country. The showery weather over the more central stations continued, and the skies were also overcast in the North-West. The chart of the 25th showed an irregular distribution of pressure. In the North-West the barometer had risen fast and an area of high pressure was re-established over the Punjab, while that already existing over the Central Provinces held steadily. The winds were consequently very irregular in direction over North-Western and Central India. The weather remained showery in the Central Provinces, and the rainfall area had extended north-westward across Rajputana and as far as Mooltan. On the 26th the barometer was still rising over North-Western India, but the rainfall area had continued to extend, and on this day rain was reported from most of the Punjab stations and from several in the North-Western Provinces. Snow and sleet fell on the hills, while at Colombo a local fall of $2\frac{1}{2}$ inches of rain was reported. On the 27th rain and snow were again reported from the hill stations and rain from Lucknow, Sialkot, and Jubbulpore, but the distribution of pressure and the winds were becoming more regular, and the weather appeared more settled. This improvement continued during the 28th, and by the morning of the 29th fine weather with light regular breezes prevailed generally. The only rainfall reported on this day was a few drops at Raipur.

Pressure.—The mean pressure of the week has been below the average of the month in Burma, Assam, East Bengal, and at some places in Western India, but has been above the average elsewhere. The excess was much greater in the upper than in the lower strata of the atmosphere, the stations of Murree, Simla, Darjeeling, and Pachmarhi all showing an excess of about 0.07."

Temperature.—Compared with the average of the month there has been a general excess of heat, but a considerable portion of this is probably attributable to the method of comparison. Over Northern and Central India a very marked increase of temperature occurred between the beginning and close of the week.

Humidity.—The air has been damper than usual over a large part of Central and North-Western India.

Rain.—No rain has fallen during the week in Burma, Bengal, Assam, and Madras and only insignificant amounts in Malabar and Bombay, but in all the other provinces the rainfall has been fairly heavy. The largest amount fell in Ceylon.

The report of the 29th shows that for the four months November to February the rainfall has been deficient over Burma, the greater part of Upper India, and in the Circars and the Deccan, but that elsewhere the total fall has been in

excess of the average. In Upper India the deficiencies are in general comparatively small.

The concluding table gives the total rainfall of the past week according to provinces.

DIVISIONS.	Number of stations.	Total rainfall.
Burma	0	0
Bengal and Assam	0	0
North-Western Provinces and Oudh	4	2'21
Punjab	6	1'82
Hill Stations	6	3'22
Ceylon	2	3'61
Malabar Coast	1	0'68
Bombay	1	0'26
Berars and Central Provinces	6	3'08
Guzerat and Central India	5	2'55
Sind—Rajputana	3	2'20
Madras	0	0

W. L. DALLAS,

Simla, 4th March, 1888.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 3rd March 1888.*—No rain except a small quantity in Vizagapatam, Tinnevely and Nilgiris. Rainfall to date generally sufficient, except in parts of Vizagapatam, Madura, Tinnevely and Salem. Crops generally good, but very slightly damaged here and there by disease, insects or want of rain. Wet crops under rain-fed tanks in parts of Bellary and Madura have withered owing to deficient water supply. Pasture generally sufficient, but scanty in Malabar and parts of Madura and Anantapur, and decreasing in Vizagapatam and Salem. Prices of rice and *ragi* falling in many districts, of other grains rising or stationary. General prospects favourable.

Bombay.—*For week ending 7th March 1888.*—Rain in parts of Sind, Poona, and Sholapur. Oilseeds blighted in one taluka of Hyderabad and cotton damaged by clouds and blight in Broach. Standing crops fair in Nasik and Thana, middling in Kaira, and good in other districts. Cotton-picking in progress in Ahmedabad, Broach, Surat, Bijapur, Belgaum, Dharwar, Wadhwan and Baroda. Harvesting of late crops in progress in most districts of the Presidency Proper and Sind. Preparation for cultivation of next season's crops continue in Ratnagiri, Belgaum, Dharwar, Satara, Bijapur, and Kathiawar. Probable outturn of large crops from 7 to 11 annas in Kaira, 8 to 12 annas in Baroda, 10 annas on an average in Belgaum; and of cotton and wheat in Upper Sind Frontier from 13 to 14 annas. Prospects of cotton in Broach unfavourable. Probable outturn of opium in Baroda 12 annas. Fodder scarce in one taluka of Dharwar.

Bengal.—*For week ending 6th March 1888.*—Cold season is over and the weather has become warm, although the mornings and evenings are still cool. No rain during the week. *Rabi* crops are in good condition; the earlier sorts of them are being harvested. Tobacco is being cut, and also *ganja* in the Rajshahye district. Sugar manufacture is proceeding. Collection of opium is in full swing, the weather being very favourable. Spring rice is still being transplanted and is doing well. Lands are being ploughed for early rice and jute. In Behar indigo sowings are in progress. No marked change in the price of rice in the last fortnight, which is cheaper than last year in Eastern Bengal, but dearer in most other parts of the province.

North-Western Provinces and Oudh.—*For week ending 7th March 1888.*—Some rain fell at Jhansi where crops have been slightly injured by red rust, otherwise weather is clear. Heat increasing. The *rabi* crops are being harvested and a good outturn is expected. The opium crop is in good condition; collection has commenced. Prices are now generally falling. Condition of agricultural stock is satisfactory.

Punjab.—*For week ending 7th March 1888.*—No rain except a slight fall at Shahpur. Prices are generally falling, though stationary in some districts. Sowings of extra *rabi* and ploughing for *kharif* in progress throughout the province. *Rabi* prospects are reported good. More rain is wanted at Hissar and Shahpur. No damage done to crops. Stock cattle are reported healthy. Fodder scarce in some districts, though the supply is on the whole improving. Poppy crops average.

Central Provinces.—*For week ending 7th March 1888.*—Weather cloudy, with slight rain in places. Winter crops being cut. Wheat rusted in a few low-lying fields in Seoni, and linseed damaged by cloudy weather in Raipur and Bilaspur; prospects otherwise good. Prices falling in Saugor. Cattle in good condition.

Burma—*For week ending 3rd March 1888.*—No rain. Progress of dry weather crops continues favourable. Estimates of outturn of harvest remain the same as last week except that in Bhamo, where no estimate had been given before, a 14-anna crop is now expected. The price of paddy has risen in Sandoway, Prome, Henzada, Toungoo and Shwebo districts and has fallen in Kyaukphyu and Minbu districts. Food supply is still reported to be insufficient in Myingyan district.

Assam.—*For week ending 7th March 1888.*—Slight rain in Lakhimpur. Weather seasonably warm. Nights still cool. Pressing of sugarcane and gathering of mustard nearly over. Outturn of latter below average. More rain wanted for early rice.

Mysore and Coorg.—*For week ending 7th March 1888.*—No rain. Standing crops in good condition, except in parts of one taluk in the Tumkur district, where the paddy crop is reported to be suffering from want of water. Outturn of harvests favourable. Prices have slightly risen in the Bangalore district.

Coorg has also had no rainfall. There are no crops on the ground. Prices are slightly rising.

Berar and Hyderabad.—*For week ending 7th March 1888.*—Weather cloudy, and slight rain has fallen all over the province. Harvesting of *kharif* crop has almost been completed, and that of the *rabi* crops in progress. Land is being prepared for the ensuing *kharif* crop. Fodder is getting insufficient in the Amraoti district. Prices are stationary.

There has been no rain in Hyderabad during week. Agricultural prospects continue good. Prices stationary.

Central India.—*For week ending 7th March 1888.*—Slight rain has fallen in Bhopawar and Indore. No change in agricultural operations and standing crops. Prospects of probable outturn not so good in Bhopawar. No change in other Agencies. No further damage to crops. Pasturage and fodder indifferent in Western Malwa, elsewhere good. Prices of food-grains rising in Bundelkhand and Bhopawar, high in Western Malwa, Goona, and Neemuch. Elsewhere steady. Opium crop damaged in Bhopawar by hail and rain, fair in Western Malwa, and not reported on from other Agencies.

Rajputana—*For week ending 7th March 1888.*—Rain in Ulwar and in Bikanir. Agricultural operations satisfactory. Standing crops slightly injured in parts of Jhallawar, Kotah, Harowtee, Ajmere and Jeypore, otherwise good. Crop prospects and agricultural stock good. Pasturage or fodder scarce in Dholepur and Ulwar, elsewhere sufficient. Prices have slightly risen in Partabgarh and Kotah, fallen in Kherwara, Meywar and Jeypore. Elsewhere high but steady. Opium has been slightly injured in Jhallawar.

Government of India.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the
Governor-General in Council, appear in monthly parts, pub-
lished as soon as possible after the first of each month, at Cal-
cutta, Madras, Bombay, and Allahabad, and comprise four
series,—one for the Calcutta High Court, a second for the
Madras High Court, a third for the Bombay High Court, and
a fourth for the Allahabad High Court. The cases heard by
the Privy Council on appeal from each High Court are
reported in the series for that High Court. Cases heard by
the Privy Council on appeal from Provinces in India not sub-
ject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat; the
copies for subscribers registered by Messrs. Thacker, Spink
& Co. are distributed by that firm; and the Madras, Bombay
and Allahabad Series are distributed direct from Madras,
Bombay, and Allahabad, respectively.

In supersession of previous advertisements, on and from the 1st
January, 1885, the terms of subscription and sale will be as
follows :—

Terms of subscription, payable annually in advance.

For the complete Series, including postage	Without postage.	With postage.
R22 8

THE FIRST SCHEDULE.—ENACTMENTS REPEALED.

THE SECOND SCHEDULE.—APPLICATION WHERE PATENT HAS NOT BEEN OBTAINED.

THE THIRD SCHEDULE.—APPLICATION WHERE PATENT HAS BEEN OBTAINED.

THE FOURTH SCHEDULE.—FEES (*Inventions*).

THE FIFTH SCHEDULE.—APPLICATION FOR ORDER FOR REGISTRATION OF DESIGN.

THE SIXTH SCHEDULE.—FEES (*Designs*).*An Act to consolidate and amend the law relating to the Protection of Inventions and Designs.*

WHEREAS it is expedient to consolidate and amend the law relating to the protection of inventions and designs; It is hereby enacted as follows:—

I. (1) This Act may be called the Inventions and Designs Act, 1888.

Title, extent and commencement. (2) It shall extend to the whole of British India; and

(3) It shall come into force on the first day of July, 1888.

2. (1) The enactments described in the first schedule are hereby repealed to the extent specified in the third column thereof.

(2) But this repeal of enactments shall not affect any exclusive privilege acquired, or any conditions or restrictions imposed with respect to any such privilege, or any right or liability accrued or incurred, under any of those enactments before the commencement of this Act, or any relief in respect of any such privilege, right or liability.

(3) Any enactment or document referring to any enactment hereby repealed shall be construed to refer to this Act or to the corresponding portion thereof.

3. The remainder of this Act is divided into Parts, as follows:—

PART I.—INVENTIONS.

PART II.—DESIGNS.

PART I.
INVENTIONS.

4. In this Part, unless there is something repugnant in the subject or context,—

Definitions.

(1) "invention" includes an improvement:

(2) "inventor" does not include the importer into British India of a new invention unless he is the actual inventor:

(3) "applicant" means a person who has applied under this Part for leave to file a specification of an invention, whether he has filed the specification or not:

(4) "assign" includes a grantee of the exclusive privilege of making, selling or using an invention, or of authorising others so to do, during the term for which the privilege is to continue or may be extended, or for any shorter term:

(5) "inventor", "actual inventor" and "applicant" include the executors, administrators or assigns of an inventor, actual inventor and applicant, as the case may be:

(6) "manufacture" includes any art, process or manner of producing, preparing or making an article, and also any article prepared or produced by manufacture:

(7) "write" includes print, lithograph, photograph, engrave, and every other mode in which words or figures can be expressed on paper or on any substance:

(8) "Secretary" means a Secretary to the Government of India appointed by the Governor General in Council to discharge the functions of the Secretary under this Act, and includes any under-secretary, assistant-secretary or other officer subordinate to the Government of India to the extent to which such officer may be authorised by general or special order of the Governor General in Council to discharge any of those functions:

(9) "District Court" has the meaning assigned to that expression by the Code of Civil Procedure: and

(10) "High Court" has the meaning assigned to that expression by the Code of Criminal Procedure, 1882, in reference to proceedings against European British subjects.

*The Inventions and Designs Act, 1888.**(Part I.—Inventions.—Sections 5-9)*

5. (1) The inventor of a new manufacture, whether he is a British subject or not, may apply to the Governor General in Council for leave to file a specification thereof.

Application for leave to file specification.

(2) The application must be in writing signed by the applicant and in the form or to the effect of the second schedule if the inventor has not obtained a patent in the United Kingdom, and in the form or to the effect of the third schedule if he has obtained a patent in the United Kingdom.

(3) It must state the name, occupation and address of the applicant, and, where a patent has been obtained in the United Kingdom, the date of the patent and the date of the actual sealing thereof, and must describe with reasonable precision and detail the nature of the invention, and of the particular novelty whereof it consists, and be supplemented by such further particulars relating to the invention, and by such drawings or photographs illustrative thereof, as the Governor General in Council may see fit to require from the applicant.

(4) If in any case it appears to the Governor General in Council that an application ought to be further supplemented by a model of anything alleged to constitute an invention, he may require the applicant to furnish such a model neatly and substantially made of durable material and of dimensions not exceeding those, if any, specified in the requisition therefor.

6. (1) Upon an application under the last foregoing section the Governor General in Council may, after such inquiry as he thinks fit, make an order authorising the applicant to file a specification of the invention.

Order to file specification.

(2) Before making an order under sub-section (1), the Governor General in Council may direct that the application be referred for inquiry and report to any person whom he thinks fit.

(3) When such enquiry and report are made by a person who is not in the service of the Government, there shall be payable to that person by the applicant such fee as the Governor General in Council, after considering the report, may determine.

(4) When an application is to be referred to such a person, the applicant shall deposit, in such place and within such time as the Governor General in Council may by rule or otherwise prescribe, such sum as will, in the opinion of the Secretary, be sufficient to defray any fee which is likely to be determined under sub-section (3).

(5) If the sum is not deposited in the place and within the time prescribed, the application may be rejected.

(6) If the fee as determined by the Governor General in Council exceeds the sum so deposited, an order shall not be made under sub-section (1) until the applicant has paid the balance of the fee.

(7) If the sum deposited exceeds the fee so determined, the excess shall be refunded to the applicant.

7. (1) If two or more inventors apply on the same day for leave to file specifications of inventions which appear to the Governor General in Council

Applications in respect of contemporaneous inventions.

to be identical or so similar as to be practically identical, the Governor General in Council may, in his discretion, authorise both or all the applicants, subject to the other provisions of this Part, to file specifications of their respective inventions.

(2) If they apply on different days for leave to file specifications of such inventions as aforesaid, the applicant who applied on the first of the different days shall be deemed to have a preferential claim to an order authorising the filing of his specification.

8. (1) If within six months from the date of an order under section 6, sub-section (1), or within such further time, not exceeding three months, as the Governor General in Council, in his discretion, may, on cause shown to his satisfaction and on payment of the fee prescribed in that behalf in the fourth schedule, see fit to allow, the applicant causes a specification of his invention to be filed in manner by this Part required, and the fee prescribed in the fourth schedule in respect of the filing of the specification to be paid, the applicant shall, subject to the other provisions of this Part, be entitled to the exclusive privilege of making, selling and using the invention in British India, and of authorising others so to do, for a term of fourteen years from the date of the filing of the specification.

Acquisition and continuance of exclusive privilege.

(2) But an exclusive privilege in respect of an invention of a new manufacture shall, notwithstanding anything in sub-section (1), cease if the inventor fails to pay, within the time limited in that behalf by the fourth schedule, any fee prescribed in that schedule in respect of the continuance of the privilege.

(3) If, nevertheless, in any case, by accident, mistake or inadvertence, an inventor fails to pay any such fee within the time so limited, he may apply to the Governor General in Council for an enlargement of the time for making the payment.

(4) Thereupon the Governor General in Council may enlarge the time accordingly, on payment of the fee prescribed in that behalf in the fourth schedule and subject to the following conditions, namely:—

(a) the time for making a payment shall not in any case be enlarged for more than three months; and

(b) if any suit is instituted in respect of an infringement of the exclusive privilege committed after a failure to make a payment within the time limited for the making thereof and before the enlargement of that time, the Court disposing of the suit may, if it thinks fit, refuse to award or give any damages in respect of the infringement.

9. (1) A specification filed under this Part must be in writing signed by the applicant, and must set forth the precise invention in respect of which the applicant claims to become entitled to an exclusive privilege.

Form and contents of specification.

(2) If the specification is of an invention which is an improvement only, it must by explicit language distinguish between what is old and what is claimed to be new.

*The Inventions and Designs Act, 1888.**(Part I.—Inventions.—Sections 10-15.)*

(3) Every specification must explain the principle of the invention set forth therein and the best mode in which the applicant has contemplated applying that principle, and must describe the manner of making and using the invention in such full, clear, concise and exact terms as to enable any person skilled in the art or science to which the invention appertains, or with which it is most closely connected, to make or use the same.

10. Every application for leave to file a specification, and every specification filed under this Part, must be left with, or sent by post to, the Secretary, and the date of the delivery or receipt thereof shall be endorsed thereon and recorded in his office.

11. (1) At the time of delivering or sending the specification for the purpose of its being filed, the applicant shall cause to be delivered or sent therewith to the Secretary as many copies thereof, not being fewer than four, as may be required by the rules for the time being in force under this Part.

(2) One of these copies shall be retained by the Secretary, and one shall be sent to the Governor of Fort St. George in Council, one to the Governor of Bombay in Council, one to the Chief Commissioner of Burma, and the others, if any, to such authorities as the Governor General in Council may appoint in this behalf.

(3) The copies of the specification which are sent under sub-section (2) to the authorities mentioned or referred to in that sub-section shall be open to the inspection of any person at all reasonable times at places to be appointed by those authorities.

12. (1) A book, to be called the register of inventions, shall be kept in the office of the Secretary wherein shall be entered and recorded every application for leave to file a specification, every order made on any such application, every specification filed in pursuance thereof, and every subsequent proceeding relating to the invention described therein.

(2) Applications for leave to file a specification shall be numbered consecutively in the order in which they are delivered or received, and be dated as of the day of their delivery or receipt, and shall be entered in the register of inventions in the order of their respective numbers.

(3) A reference shall be made in that register, in the margin of the entry of each application, to every order on or in respect of the application, to the specification, if any, filed in pursuance thereof, and to every subsequent proceeding relating to the invention which forms the subject of the application.

13. (1) Another book, to be called the address-book, shall be kept in the office of the Secretary wherein any person filing a specification under this Part, or any person in whom an exclusive privilege acquired under this Part, or any share or interest therein, may become vested, may from time to time cause to be stated some place in British India where notice of any rule or proceeding relating to the exclusive privilege may be served on him.

(2) A reference to each entry in the address-book shall be made in the register of inventions in the margin of the entry in that register of the application for leave to file the specification.

14. (1) Every entry in the register of inventions or address-book, and every document entered and recorded in the register, shall, for the purposes of the law of evidence for the time being in force, be deemed to be a public document and shall be open to the inspection of any person at all reasonable times at the office of the Secretary.

(2) The books kept under section 11 and section 35 of Act No. XV of 1859 (*an Act for granting exclusive Privileges to Inventors*) shall be deemed to be parts of the register of inventions and address-book respectively.

15. (1) The inventor of a new manufacture may, at any time not more than one year and not less than six months before the time limited for the expiration of an exclusive privilege acquired under section 8, apply to the Governor General in Council for an extension of the privilege for a further term.

(2) When an application is made under sub-section (1), the Governor General in Council may, if he thinks fit, refer it to a High Court for report.

(3) The Court to which the application is referred shall, in making its report, have regard to the nature and merits of the invention in relation to the public, to the profits made by the inventor as such, and to all the circumstances of the case.

(4) The procedure on the reference shall be such as the Court thinks fit, and may include the issue of citations calling upon persons claiming to have any interest in the reference to appear before the Court on the day on which the reference is to be considered, or on any day to which the consideration thereof may be adjourned, and make with respect thereto any representation which they may see fit in relation to any of the matters to which the Court is required by the last foregoing sub-section to have regard in making its report.

(5) If the Governor General in Council is of opinion, or, where a reference has been made under sub-section (2), if the Court reports, that the inventor has been inadequately remunerated

*The Inventions and Designs Act, 1888.**(Part I.—Inventions.—Sections 16-21.)*

by his exclusive privilege, the Governor General in Council may, on payment of the fee prescribed in that behalf in the fourth schedule, make an order extending the term of the privilege for a further term not exceeding seven or, in exceptional cases, fourteen years from the expiration of the first term of fourteen years.

(6) But an exclusive privilege of which the term has been extended under the last foregoing sub-section shall, notwithstanding anything in that sub-section, cease if the inventor fails to pay before the expiration of each year of such extended term the fee prescribed in the schedule aforesaid in respect of the continuance of the privilege.

16. An order under section 6, sub-section (1), authorizing the filing of a specification, or under section 15, sub-section (5), extending the term of an exclusive privilege, may be made subject to such conditions as the Governor General in Council thinks expedient.

17. (1) Subject to any conditions imposed under the last foregoing section—

(a) with respect to the filing, by a person employed in the service of Her Majesty in India, of the specification of a manufacture invented by him in the course of his employment, or

(b) with respect to the extension, in favour of any person, of the term of an exclusive privilege,

an exclusive privilege acquired under this Part shall have to all intents the like effect as against Her Majesty as it has against a subject.

(2) But the officers or authorities administering any department of the service of Her Majesty may, by themselves, their agents, contractors or others, at any time after the delivery or receipt of the application for leave to file the specification of an invention, use the invention for the services of the Government on terms to be before or after the use thereof agreed on, with the approval of the Governor General in Council, between those officers or authorities and the inventor, or, in default of such agreement, on such terms as may be settled by the Governor General in Council.

18. (1) If, after the filing of the specification, the applicant has reason to believe that through mistake or inadvertence he has erroneously made any mis-statement in his application or specification or included therein something which at the date of the delivery or receipt of his application was not new or whereof he was not the inventor, or that the specification is in any particular defective or insufficient, he may apply to the Governor General in Council for leave to file a memorandum point-

ing out the mis-statement or disclaiming any part of the alleged invention, or for leave to file an amended specification, as the case may be.

(2) The application must be in writing signed by the applicant, and must state how the error, defect or insufficiency occurred and that it was not fraudulently intended.

(3) Upon the application the Governor General in Council may make an order allowing the memorandum or amended specification to be filed.

(4) The provisions of section 6 with respect to applications, and of sections 9 and 11 with respect to specifications and copies thereof, shall apply, so far as they can be made applicable, to applications and to amended specifications, respectively, made and filed under this section.

19. An amended specification filed under the last foregoing section shall, except as to any suit or proceeding relating to the exclusive privilege which may be pending at the time of the filing of the amended specification, have the same effect as if it had been the specification first filed:

Provided that nothing in an amended specification shall be construed to extend or enlarge an exclusive privilege before acquired.

20. A person shall not be entitled to an exclusive privilege under this Part—

(a) if the invention is of no utility, or

(b) if the invention, at the date of the delivery or receipt of the application for leave to file the specification thereof, was not a new invention within the meaning of this Part, or

(c) if the applicant is not the inventor thereof, or

(d) if the original or any amended specification does not fulfil the requirements of this Part, or

(e) if the original or any subsequent application relating to the invention or the original or any amended specification contains a wilful or fraudulent mis-statement, or

(f) if the application for leave to file the specification of the invention was made under this Part after the expiration of one year from the date of the acquisition of an exclusive privilege in respect of the invention in any place beyond the limits of British India and the United Kingdom.

21. An invention shall be deemed a new invention within the meaning of this Part if it has not before the date of the delivery or receipt of the application for leave to file the

Novelty of invention dependent on public use or knowledge thereof before application to file specification.

*The Inventions and Designs Act, 1888.**(Part I.—Inventions.—Sections 22—29.)*

specification thereof been publicly used in any part of British India or of the United Kingdom, or been made publicly known in any part of British India or of the United Kingdom by means of a written publication.

22. The public use or knowledge of an invention before the date of the delivery or receipt of the application for leave to file a specification thereof shall not be deemed a public use or knowledge within the meaning of this Part if the knowledge has been obtained surreptitiously or in fraud of the inventor or has been communicated to the public in fraud of the inventor or in breach of confidence :

Provided that the inventor has not acquiesced in the public use of his invention, and that, within six months after the commencement of that use, he applies for leave to file a specification.

23. Use of an invention in public by the inventor thereof, or by his servant or agent, or by any other person by his license in writing, for a period not exceeding one year immediately preceding the date of the delivery or receipt of his application for leave to file a specification thereof, or knowledge of the invention resulting from such use thereof in public, shall not be deemed a public use or knowledge within the meaning of this Part.

24. If an inventor who has obtained a patent for his invention in the United Kingdom causes an application for leave to file a specification of the invention under this Part to be delivered or received by the Secretary within twelve months from the date of the actual sealing of the patent, the invention shall be deemed a new invention within the meaning of this Part if it was not publicly used or known in any part of British India at or before the date of the application for the patent, notwithstanding that it may have been publicly used or known in some part of British India or of the United Kingdom before the date of the delivery or receipt of the application under this Part for leave to file the specification.

25. If an inventor applies for leave to file a specification under this Part while his application for a patent is pending in the United Kingdom, and the interval between the date of his application for the patent and the date of the delivery or receipt of his application under this Part does not exceed twelve months, the invention shall not be deemed to have been publicly used, or made publicly known, within

the meaning of this Part, by reason only of the invention having been used, or a description thereof having been published, in any part of British India or of the United Kingdom during the interval.

26. If an inventor, being the exhibitor of his invention at an industrial or international exhibition, certified as such by the Governor General in Council, causes an application for leave to file a specification of the invention to be delivered to or received by the Secretary within six months from the date of the admission of the invention into that exhibition, the invention shall not be deemed to have been publicly used, or made publicly known, within the meaning of this Part, by reason only of the invention having at any time after admission into the exhibition been publicly used or made publicly known.

27. (1) An exclusive privilege acquired under this Part shall cease if the Governor General in Council declares the privilege, or the mode in which it is exercised, to be mischievous to the State, or generally prejudicial to the public.

(2) It shall also cease if a breach of any condition on which the applicant was authorised to file a specification, or on which the term of the exclusive privilege was extended, is on an application under this Part to a High Court proved to the satisfaction of that Court, and if the Governor General in Council thereupon declares the privilege to have ceased.

28. (1) An exclusive privilege acquired under this Part in respect of an invention for which a patent has been obtained in the United Kingdom shall cease on the revocation or expiration of the patent.

(2) Such a privilege in respect of an invention for which a patent has not been obtained in the United Kingdom shall cease on the revocation or expiration of any patent or exclusive privilege which has been obtained or acquired for or in respect of the invention in any other country.

29. (1) An inventor may institute a suit in the District Court against any person who, during the continuance of an exclusive privilege acquired by him under this Part in respect of an invention, makes, sells or uses the invention without his license, or counterfeits or imitates it.

(2) The suit shall not be defended upon the ground of any defect or insufficiency of the specification of the invention, or upon the ground that the original or any subsequent application relating to the invention, or the original or any amended specification, contains a

*The Inventions and Designs Act, 1888.**(Part I.—Inventions.—Sections 30-34.)*

wilful or fraudulent mis-statement, or upon the ground that the invention is of no utility:

(3) Nor shall it be defended upon the ground that the plaintiff was not the inventor, unless the defendant shows that he himself is the actual inventor or has obtained from the actual inventor a right to make, sell or use the invention, or to counterfeit or imitate it, as the case may be:

(4) Nor shall it be defended upon the ground that the invention was not new, unless the defendant, or some person through whom he claims, has, before the date of the delivery or receipt of the application for leave to file the specification, publicly or actually used in some part of British India or of the United Kingdom the invention or that part of it with respect to which the exclusive privilege is alleged to have been infringed.

30. Any person may apply to a High Court for a rule to show cause why the Court should not declare that an exclusive privilege in respect of an invention to be specified in the rule has not been acquired under this Part by reason of all or any of the objections following (to be specified in the rule), that is to say:—

Application to declare exclusive privilege in respect of an invention not to have been acquired.

- (a) that the invention is of no utility, or
- (b) that the invention was not, at the date of the delivery or receipt of the application for leave to file the specification, a new invention within the meaning of this Part, or
- (c) that the applicant was not the inventor thereof, or
- (d) that the original or any amended specification does not fulfil the requirements of this Part, or
- (e) that the applicant has knowingly or fraudulently included in the application for leave to file the specification or in the original or any amended specification, as part of his invention, something which was not new or whereof he was not the inventor, or
- (f) that the original or any subsequent application relating to the invention, or the original or any amended specification, contains a wilful or fraudulent mis-statement, or
- (g) that some part of the invention, or the manner in which that part is to be made and used, as described in the original or any amended specification, is not thereby sufficiently described, and that this insufficiency was fraudulent and is injurious to the public.

31. Any person may apply to a High Court for a rule to show cause why the Court should not declare that an exclusive pri-

Like application as to part of an invention.

vilage in respect of any part of an invention, to be specified in the rule has not been acquired under this Part, by reason of all or any of the objections following (to be specified in the rule) that is to say:—

- (a) that that part of the invention is wholly distinct from the other parts thereof and is of no utility, or
- (b) that that part of the invention was not, at the date of the delivery of receipt of the application for leave to file the specification, a new invention within the meaning of this Part, or
- (c) that the applicant was not the inventor of that part of the invention, or
- (d) that that part of the invention, or the manner in which it is to be made and used, is not sufficiently described in the original or any amended specification, and that this insufficiency is injurious to the public.

32. The High Court may, irrespective of any provisions of the Code of Civil Procedure in this behalf, require a person applying for a rule under either of the two last foregoing sections to give security for the payment of all costs incurred or likely to be incurred by any person appearing to show cause against the rule.

33. (1) Any person authorised by the Governor General in Council in this behalf may apply to a High Court for a rule to show cause why the question of the breach of any condition on which leave to file a specification has been granted, or any other question of fact on which the cessation of an exclusive privilege under section 27 may, in the judgment of the Governor General in Council, depend, should not be tried in the form of an issue directed by the Court.

(2) If the rule is made absolute, the Court, unless the breach or other matter of fact is admitted, may direct the issue to be tried and certify the result of the trial to the Governor General in Council.

34. (1) Notice of any rule obtained or proceeding taken under section 30, section 31 or section 33 shall be served on all persons appearing from the address-book to be proprietors of the exclusive privilege, or to have shares or interests therein, and it shall not be necessary to serve the notice on any other person.

(2) The notice shall be deemed to be sufficiently served if a copy thereof is left at the place for the time being stated in the address-book, by delivering the copy to any person resident at or in charge of the place or, if there

Security for costs of application under either of the two last foregoing sections.

Application on breach of condition.

Notice of proceedings to persons interested.

XIV

*The Inventions and Designs Act, 1888.**(Part I.—Inventions.—Sections 35-38.)*

is no person resident at or in charge of the place, or if the place is not within the local limits of the jurisdiction of the Court, by causing the notice to be sent to the place by post by a registered letter directed to the person to whom the notice is addressed.

35. (1) The High Court may, if it thinks fit, direct an issue for the trial, before itself or any other High Court, or any District Court, of any question of fact arising upon an application under section 30, section 31 or section 33, and the issue shall be tried accordingly.

(2) If the issue is directed to another Court, the finding shall be certified by that Court to the Court directing the issue.

(3) If the issue is directed to a District Court, the finding of that Court shall not be subject to appeal, but the evidence taken upon the trial shall be recorded, and a copy thereof, certified by the Judge of the Court, shall be transmitted, together with any remarks which he may think fit to make thereon, to the High Court, and the High Court may thereupon act upon the finding of the District Court, or dispose of the application upon the evidence recorded, or direct a new trial, as the justice of the case may require.

36. (1) If it appears to the High Court at the hearing of an application under section 30 or section 31 that, by reason of any of the objections specified in the rule, the exclusive privilege in the invention or in any part thereof has not been acquired, the Court shall make an order accordingly, and thereupon the applicant shall, so long as the order continues in force, cease to be entitled to the exclusive privilege.

(2) If it appears to the High Court, at the hearing of any such application as last aforesaid, that the applicant has, in the description of his invention in the application for leave to file a specification thereof or in the original or any amended specification, erroneously included something which at the date of the delivery or receipt of the application for leave to file the specification was not new or whereof he was not the inventor, or that the specification is in any particular defective or insufficient, but that the error, defect or insufficiency was not fraudulently intended, the Court may adjudge the exclusive privilege to have been acquired and to be valid, save as to the part thereof affected by the error, defect or insufficiency: or

(3) If it appears to the High Court that the error, defect or insufficiency can be amended without injury to the public, the Court may adjudge the exclusive privilege in respect of the whole of the invention to be valid, and may, upon such terms as it thinks reasonable, order the specification to be amended in any particular in which it is erroneous, defective or insufficient; and thereupon the applicant shall, within

a time to be limited by the Court for the purpose, file in the office of the Secretary a specification amended according to the order.

(4) The provisions of section 18 with respect to the distribution and disposal of copies of amended specifications, and of section 19 with respect to the effect of such specifications, shall apply, so far as they can be made applicable, to an amended specification filed under this section.

(5) An exclusive privilege in respect of an invention shall not be defeated upon the ground that the application for leave to file the specification of the invention contains a mis-statement, unless the mis-statement was wilful or fraudulent.

37. (1) In a suit for the infringement of an exclusive privilege acquired under this Part the plaintiff shall deliver with his plaint particulars of the breaches complained of in the suit, and the defendant shall deliver a written statement of the particulars of the grounds, if any, upon which he means to contend that the plaintiff is not entitled to an exclusive privilege in respect of the invention.

(2) In like manner, upon an application to a High Court under section 30, section 31 or section 33, the person making the application shall deliver particulars of the objections or grounds on which he means to rely.

(3) At the hearing of any such suit or application, or at the trial of any issue arising out of any such application, evidence shall not be allowed to be given in proof of any breach of the exclusive privilege, or of any ground impeaching the validity of that privilege, or of any objection or ground affecting such a privilege, unless such breach or other matter as aforesaid has been stated in the particulars delivered under this section.

(4) If it is alleged that the invention was publicly used or known before the date of the delivery or receipt of the application for leave to file the specification thereof, the places where and the manner in which the invention was so publicly used or known shall be stated in the particulars.

(5) Notwithstanding anything in the foregoing portion of this section, the Court in which the suit or application is pending, or an issue arising out of the application is being tried, may allow the plaintiff or defendant respectively to amend the particulars delivered under this section upon such terms as it thinks fit.

38. If, in a suit instituted in the District Court at any time within fourteen years from the date of the filing of a specification of an invention under this Part, the actual inventor proves to the satisfaction of the Court that the applicant was not the actual inventor,

*The Inventions and Designs Act, 1888.**(Part I.—Inventions.—Sections 39-43.)*

and that at the time of the application for leave to file the specification the applicant knew or had reason to believe that the knowledge of the invention was obtained by himself or by some other person surreptitiously or in fraud of the actual inventor, or by means of a communication made in confidence by the actual inventor to him or to any person through whom he derived the knowledge, the Court may make a decree declaring an exclusive privilege in respect of the invention to be vested, subject to the other provisions of this Part, in the actual inventor for a term of fourteen years from the date on which the specification was filed, and requiring the applicant to account for and pay over to the actual inventor the profits derived by him from the invention or so much of those profits as the Court, having regard to the degree of diligence exerted by the actual inventor in proceeding under this section and to all the other circumstances of the case, may see fit to require the applicant to pay.

39. A Court making a decree in a suit under section 29 or section 38, or an order on an application under section 30, section 31 or section 33, shall send a copy of the decree or order, as the case may be, to the Secretary, who shall cause an entry thereof and reference thereto to be made in the register of inventions and against any entry in the address-book affected thereby.

Registration of cessation of exclusive privilege.

40. In the following cases, namely:—

- (a) when an exclusive privilege acquired under this Part has ceased under section 8 or section 15 by reason of a fee in respect of the continuance of the privilege not having been paid within the time limited by the fourth schedule for the payment thereof, and the period, if any, within which an order might have been made for enlarging the time for the making of the payment has expired;
- (b) when an exclusive privilege acquired under this Part has been declared by the Governor General in Council under section 27 to have ceased;
- (c) when an exclusive privilege acquired under this Part has ceased under section 28 by reason of the revocation or expiration of a patent or exclusive privilege;
- (d) when the whole or any part of an exclusive privilege acquired under this Part has ceased under section 36 in consequence of an order under that section;
- (e) when an exclusive privilege has been declared by a decree to have vested in an actual inventor under section 38;

(f) when an exclusive privilege acquired under this Part has ceased by reason of the expiration of the term for which it was acquired;

the Secretary shall cause an entry with respect to the cessation or vesting of the exclusive privilege to be made in the register of inventions, and a reference to that entry to be made in the margin of the entry in that register of the application for leave to file the specification of the invention.

41. (1) If any person is aggrieved by an entry in the register of inventions or address-book, or by the omission of an entry therefrom, and a proceeding is not provided in the foregoing portion of this Part whereby the register or book may be rectified, he may apply to a High Court for an order for the rectification of the register or book, and the Court may make such order on the application as it thinks fit.

(2) A copy of the order shall be forwarded by the Court to the Secretary, who shall cause an entry thereof and reference thereto to be made in the register of inventions and against any entry in the address-book affected thereby.

(3) When the Secretary is a party to an application under this section, the costs of another party thereto shall not be adjudged to be payable by the Secretary.

42. A High Court to which an application has been made under section 30, section 31, section 33 or section 41 may stay proceedings on, or dismiss the application if in its opinion the application would be disposed of more justly or conveniently by another High Court.

43. If on the petition of any person interested it is proved to the Governor General in Council that, by reason of an inventor who has acquired an exclusive privilege under this Part failing to grant licenses on reasonable terms,—

- (a) the exclusive privilege is not being worked in British India, or
- (b) the reasonable requirements of the public with respect to the invention cannot be supplied, or
- (c) any person is prevented from working or using to the best advantage an invention of which he is possessed,

the Governor General in Council may order the inventor to grant, or may himself on behalf of the inventor grant, licenses on such terms as to the amount of royalties, security for payment, or otherwise, as the Governor General in Council, having regard to the nature of the invention and the circumstances of the case, may deem just.

*The Inventions and Designs Act, 1888.**(Part I.—Inventions.—Sections 44-49.—(Part II.—Designs.—Sections 50-52.)*

44. Any person for the time being entitled to an exclusive privilege under this Part, or to any share or interest in such a privilege, in any local area may, subject to the conditions of his title thereto, assign the privilege or such share or interest, as the case may be, for any place in or part of that local area.

45. If an applicant is absent from British India, an application for leave to file a specification, or a specification, or an application for leave to file a memorandum or amended specification, may, instead of being signed by the applicant under section 5, section 9 or section 18, as the case may be, be signed on behalf of the applicant by an agent in British India authorised by him in writing in that behalf.

46. (1) An application under this Part for leave to file a specification, memorandum or amended specification must be verified by the person making the application.

(2) If that person is absent from British India, the application may be verified by the agent who signs the application on his behalf.

(3) The verification must be signed by the person making it, and must be to the effect that the facts stated in the application are true to his knowledge, except as to matters stated on information and belief, and that as to those matters he believes them to be true.

47. Subject to the provisions of the two last foregoing sections and of any other enactment for the time being in force, any act which is required or authorised by this Part to be done by any person may be done on his behalf by an agent in British India having authority in writing from that person so to do the act.

48. (1) There shall be paid in respect of the several proceedings specified in the fourth schedule the fees in that schedule prescribed.

(2) The Governor General in Council may, if he thinks fit, reduce any of those fees and revoke or vary the reduction.

(3) The fees payable under this section shall be collected by means of stamps or otherwise as the Governor General in Council directs.

(4) A proceeding in respect of which a fee is payable under the fourth schedule shall be of no effect unless the fee has been paid.

49. (1) The Governor General in Council may make such rules and prescribe such forms as he thinks necessary for carrying out the purposes of this Part, and may alter or amend either of the forms in the second and third schedules.

(2) Rules under this section may provide, among other matters, for the printing of specifications, memoranda and amended specifications, and for the distribution or sale of printed copies thereof.

PART II.

DESIGNS.

50. In this Part, unless there is something repugnant in the subject or context,—

Definitions.

(1) "design" means some peculiar shape, configuration or form given to an article, or arrangement of lines or the like used on or with an article, but not the article itself:

(2) "copyright" means the exclusive right to apply a design to an article:

(3) the author of any new and original design shall be considered the "proprietor" thereof, unless he executed the work on behalf of another person for a good or valuable consideration, in which case that person shall be considered the "proprietor", and every person acquiring for a good or valuable consideration a new and original design, or the right to apply the same to an article, either exclusively of any other person or otherwise, and also every person on whom the property in the design or the right to the application thereof shall devolve, shall be considered the "proprietor" of the design in the respect in which the same may have been so acquired, and to that extent, but not otherwise: and

(4) "Secretary", "District Court" and "High Court" have the same meanings as in Part I.

51. (1) Any person, whether a British subject or not, claiming to be the proprietor of any new and original design not previously published in British India may apply to the Governor General in Council for an order for the registration of the design.

(2) The application must be in writing in the form or to the effect of the fifth schedule, and must contain a statement of the nature of the design and be accompanied by as many copies of drawings, photographs or tracings thereof, not being fewer than four, as may be required by the rules for the time being in force under this Part.

(3) It must be left with, or sent by post to, the Secretary, and the date of the delivery or receipt thereof in the office of the Secretary shall be endorsed thereon and recorded in that office.

52. (1) Upon the application the Governor General in Council may, after such inquiry as he thinks fit, make an order authorizing the registration of the design.

*The Inventions and Designs Act, 1888.**(Part II.—Designs.—Sections 53-61.)*

(2) When an order has been made under sub-section (1), the Secretary shall cause the design to be registered in a book to be kept by him for the purpose and to be called the register of designs.

(3) The date of registration shall be recorded in the register.

53. When a design is registered, the proprietor thereof shall, subject to the other provisions of this Part, have copyright in the design during five years from the date of registration.

54. (1) Before delivery on sale of any article marked registered to which a registered design has been applied, the proprietor of the design shall cause the article to be marked with the word "registered" either in full or in an abbreviated form.

(2) If he fails to cause the article to be so marked, the copyright in the design shall cease unless the proprietor shows that he took all proper steps to ensure the marking of the article.

55. If the proprietor of a design exhibited at an industrial or international exhibition, certified as such by the Governor General in Council, causes an application for an order for the registration of the design to be delivered to or received by the Secretary within six months from the date of the admission of the design into that exhibition, the design shall not be deemed not to be a new and original design not previously published in British India within the meaning of section 51 by reason only of the design having been exhibited at the exhibition.

56. Any person in whom the copyright in a design has become vested may apply to the Secretary for the entry of his name in the register of designs as proprietor of the copyright, and the Secretary may, if he sees fit, cause the entry to be made.

57. (1) The registered proprietor of a design may institute a suit in the District Court for the recovery of any damages arising from the application by any person to any article of the design or of any fraudulent or obvious imitation thereof for the purpose of sale, or from the publication, sale or exposure for sale by any person of any article to which the design, or any fraudulent or obvious imitation thereof, has been applied, that person knowing or having reason to believe that the proprietor had not given his consent to such application.

(2) When the Court makes a decree in a suit under this section, it shall send a copy of the decree to the Secretary, who shall cause an

entry thereof to be made in the register of designs.

58. (1) When, from the expiration of the term of a copyright or from any other cause, the copyright in a design has ceased, the Secretary shall cause an entry with respect to the cessation of the right to be made in the register of designs.

59. (1) A High Court may, on the application of any person aggrieved by an entry in the register of designs, or by the omission of an entry therefrom, make such order for the rectification of the register as it thinks fit.

(2) An order under sub-section (1) may declare copyright in a design not to have been acquired.

(3) A copy of the order shall be forwarded by the Court to the Secretary, who shall cause an entry thereof to be made in the register of designs.

(4) When the Secretary is a party to an application under this section, the costs of another party thereto shall not be adjudged to be payable by the Secretary.

60. A High Court to which an application has been made under the last foregoing section may stay proceedings on, or dismiss, the application if, in its opinion, the application would be disposed of more justly or conveniently by another High Court.

61. The provisions of the following portions of Part I, namely:—

- (a) section 11, with respect to copies of specifications,
 - (b) section 14, with respect to the register of inventions and the matters entered therein, and
 - (c) section 47, with respect to the performance by an agent of any act required or authorised by that Part to be done by a principal,
- shall, so far as they can be made applicable, apply, respectively, to—
- (a) copies of drawings, photographs or tracings accompanying an application for an order for the registration of a design in respect of which such an order has been made,
 - (b) the register of designs and the matters entered and documents referred to therein, and
 - (c) the performance by an agent of any act required or authorised by this Part to be done by a principal.

The Inventions and Designs Act, 1888.

(Part II.—Designs.—Sections 62-63. *The First Schedule.—Enactments repealed.*
(*The Second Schedule.—Application where Patent has not been obtained. The Third Schedule.—Application where Patent has been obtained.*)

62. (1) There shall be paid in respect of the several proceedings specified in the sixth schedule the fees in that schedule prescribed.

(2) The Governor General in Council may, if he thinks fit, reduce any of those fees and revoke or vary the reduction.

(3) The fees payable under this section shall be collected by means of stamps or otherwise as the Governor General in Council may direct.

(4) A proceeding in respect of which a fee is payable under the sixth schedule shall be of no effect unless the fee has been paid.

63. The Governor General in Council may make such rules and prescribe such forms as he thinks necessary for carrying out the purposes of this Part, and may alter or amend the form in the fifth schedule.

THE FIRST SCHEDULE.

ENACTMENTS REPEALED.

(See section 2.)

Number and year.	Subject or title.	Extent of repeal.
XV of 1859	For granting exclusive Privileges to Inventors.	So much as has not been repealed.
XIII of 1872	Patterns and Designs Protection Act, 1872.	So much as has not been repealed.
XVI of 1883	Protection of Inventions Act, 1883.	The whole.
I of 1879	Indian Stamp Act, 1879.	Article 48, Schedule I.

THE SECOND SCHEDULE.

APPLICATION WHERE PATENT HAS NOT BEEN OBTAINED.

(See sections 5 and 49.)

TO THE GOVERNOR GENERAL IN COUNCIL.

The application of (*here insert name, occupation and address*) for leave to file a specification under Part I of the Inventions and Designs Act, 1888.

1. The applicant is in possession of an invention for (*state the title of the invention*); he is the inventor thereof (*or, as the case may be, the executor, administrator or assign of the inventor*); and, to the best of his information and belief, the invention is new within the meaning of Part I of the Inventions and Designs Act, 1888, and no circumstance exists which, if the applicant is authorised to file a specification and files it in accordance with that Part, will disentitle him to an exclusive privilege thereunder in respect of the invention.

2. The following is a description of the invention (*here describe it and the particular novelty whereof it consists*).

3. The applicant therefore applies for leave to file a specification of the invention pursuant to Part I of the Inventions and Designs Act, 1888.

(Signature and verification.)

THE THIRD SCHEDULE.

APPLICATION WHERE PATENT HAS BEEN OBTAINED.

(See sections 5 and 49.)

TO THE GOVERNOR GENERAL IN COUNCIL.

The application of (*here insert name, occupation and address*) for leave to file a specification under Part I of the Inventions and Designs Act, 1888.

1. The applicant (*or, as the case may be, A. B. of whom the applicant is the executor, administrator or assign*) has obtained a patent in the United Kingdom dated and sealed as of the day of , and actually sealed on the day of , for (*state the title of the invention*).

2. To the best of the information and belief of the applicant, the invention is new within the meaning of Part I of the Inventions and Designs Act, 1888, and no circumstance exists which, if the applicant is authorised to file a specification and files it in accordance with that Part, will disentitle him to an exclusive privilege thereunder in respect of the invention.

3. The following is a description of the invention (*here describe it and the particular novelty whereof it consists*).

4. The applicant therefore applies for leave to file a specification of the invention pursuant to Part I of the Inventions and Designs Act, 1888.

(Signature and verification.)

The Inventions and Designs Act, 1888.

(*The Fourth Schedule.—Fees (Inventions).*) (*The Fifth Schedule.—Application for Order for Registration of Design.*) (*The Sixth Schedule.—Fees (Designs).*)

THE FOURTH SCHEDULE.

FEES (*Inventions*).

(See sections 8, 15 and 48.)

	Rs. a. p.
(1) in respect of an application for leave to file a specification (section 5)	10 0 0
(2) in respect of the filing of a specification (section 8)	30 0 0
(3) in respect of an extension of the time for filing a specification (section 8)	20 0 0
(4) in respect of the continuance of an exclusive privilege (section 8)—	
(a) after the filing of the specification and before the expiration of the fourth year from the date of the filing thereof	50 0 0
(b) after the expiration of the fourth year and before the expiration of the fifth year from that date	50 0 0
(c) after the expiration of the fifth year and before the expiration of the sixth year from that date	50 0 0
(d) after the expiration of the sixth year and before the expiration of the seventh year from that date	50 0 0
(e) after the expiration of the seventh year and before the expiration of the eighth year from that date	50 0 0
(f) after the expiration of the eighth year and before the expiration of the ninth year from that date	100 0 0
(g) after the expiration of the ninth year and before the expiration of the tenth year from that date	100 0 0
(h) after the expiration of the tenth year and before the expiration of the eleventh year from that date	100 0 0
(i) after the expiration of the eleventh year and before the expiration of the twelfth year from that date	100 0 0
(j) after the expiration of the twelfth year and before the expiration of the thirteenth year from that date	100 0 0
Provided that the inventor may pay the sum total of the said fees in respect of the continuance of the exclusive privilege, or any part thereof short of the sum total, at any time before the same falls due.	
(5) in respect of an enlargement of the time for payment of a fee under article (4) of this schedule (section 8)—	
(i) if the enlargement does not exceed one month	10 0 0
(ii) if the enlargement exceeds one month, but does not exceed two months	25 0 0
(iii) if the enlargement exceeds two months	50 0 0
(6) in respect of an application for an extension of an exclusive privilege for a further term (section 15)	50 0 0
(7) in respect of an order extending the term of an exclusive privilege (section 15)	100 0 0
(8) in respect of the continuance of an exclusive privilege of which the term has been extended (section 15)	100 0 0
to be paid before the expiration of each year of the extended term:	
Provided that the inventor may pay the sum total of the said fees in respect of the continuance of the exclusive privilege, or any part thereof short of the sum total, at any time before the same falls due.	
(9) in respect of an application for leave to file a memorandum or amended specification (section 18)	20 0 0
(10) in respect of a petition to the Governor General in Council for a compulsory license (section 43)	50 0 0

THE FOURTH SCHEDULE—continued.

	Rs. a. p.
(11) for the inspection of any book or other document which is open to inspection under Part I	1 0 0
(12) for copies—	
(a) when the number of words copied does not exceed four hundred	1 0 0
(b) for every hundred words in excess of four hundred	0 4 0
(c) of drawings or photographs	cost according to agreement.
(13) for certifying copies—	
for every hundred words	0 2 0

THE FIFTH SCHEDULE.

APPLICATION FOR ORDER FOR REGISTRATION OF DESIGN.

(See sections 51 and 63.)

The application of (*here insert name, occupation and address*) for an order for the registration of a design under Part II of the Inventions and Designs Act, 1888.

1. The applicant claims to be the proprietor of the design of which the nature is hereinafter stated.

2. To the best of his information and belief, that design is within the meaning of Part II of the Inventions and Designs Act, 1888, a new and original design not previously published in British India.

3. copies of (*drawings*), (*photographs*), (*tracings*) of the design accompany this application.

4. The following is a statement of the nature of the design (*here describe its nature*).

5. The applicant therefore applies for an order for the registration of the design pursuant to Part II of the Inventions and Designs Act, 1888.

(Signature.)

THE SIXTH SCHEDULE.

FEES (*Designs*).

(See section 62.)

	Rs. a. p.
(1) in respect of an application for an order for the registration of a design (section 51)	10 0 0
(2) in respect of a mutation of names in the register of designs (section 56)	5 0 0
(3) for the inspection of any book or other document which is open to inspection under Part II	1 0 0
(4) for copies—	
(a) when the number of words copied does not exceed four hundred	1 0 0
(b) for every hundred words in excess of four hundred	0 4 0
(c) of drawings, photographs or tracings	cost according to agreement.
(5) for certifying copies—	
for every hundred words	0 2 0

PART V.

Bills introduced into the Council of the Governor General of India for making Laws and Regulations or published under Rule 22.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Report of the Select Committee on the Bill to amend the Code of Civil Procedure and the Indian Limitation Act, 1877, was presented to the Council of the Governor General of India for the purpose of making Laws and Regulations on the 10th March, 1888:—

WE, the undersigned, Members of the Select Committee to which the Bill to amend the Code of Civil Procedure and the Indian Limitation Act, 1877, was referred, have considered the Bill and the papers noted in the margin, and have now the honour to submit this our Report with copy of the Bill as amended by us annexed thereto.

From Mr. P. R. Desai, Pleader, District Court, Satara, dated 16th September, 1886 [Paper No. 1].
 From Mr. Nanabhai Chanjibhai, Pleader, Karachi, dated 20th September, 1886 [Paper No. 2].
 From Secretary to Chief Commissioner, Coorg, No. 1943—3976, dated 29th October, 1886, and enclosures [Papers No. 3].
 From Honorary Secretary, British Indian Association, No. 1035, dated 15th November, 1886 [Paper No. 4].
 From Superintendent, Kapurthala State, No. 527, dated 19th November, 1886, and enclosures [Papers No. 5].
 From Acting Chief Secretary to Government, Madras, No. 2990, dated 6th November, 1886, and enclosures [Papers No. 6].
 From Chief Commissioner, Ajmere-Merwara, No. 1305—690-II, dated 19th November, 1886, and enclosure [Papers No. 7].
 From Secretary for Berar to Resident, Hyderabad, No. 438G., dated 24th November, 1886, and enclosures [Papers No. 8].
 From Acting Chief Secretary to Government, Madras, No. 3138, dated 24th November, 1886, and enclosures [Papers No. 9].
 From Babu Haridas Ghosh, Pleader, Hoshungabad, dated 10th December, 1886 [Paper No. 10].
 Memorial of certain Cloth Merchants of Allahabad, dated 14th December, 1886 [Paper No. 11].
 From Secretary to Chief Commissioner, Burma, No. 706—27L., dated 24th December, 1886, and enclosures [Papers No. 12].
 From Officiating Secretary to Chief Commissioner, Central Provinces, No. 32—355, dated 4th January, 1887, and enclosures [Papers No. 13].
 From Acting Under Secretary to Government, Bombay, No. 7627, dated 31st December, 1886, and enclosures [Papers No. 14].
 From Secretary to Government, Punjab, No. 21, dated 10th January, 1887, and enclosures [Papers No. 15].
 From Secretary to Chief Commissioner, Assam, No. 84, dated 18th January, 1887 [Paper No. 16].
 From Officiating Chief Secretary to Government, Bengal, No. 408J., dated 24th January, 1887, and enclosures [Papers No. 17].
 Memorandum by the Hon'ble Rana Sir Shankar Baksh Singh, Bahadur [Paper No. 18].
 From Secretary to Government, Punjab, No. 252, dated 11th March, 1887, and enclosures [Papers No. 19].
 From Secretary to Government, North-Western Provinces and Oudh, No. 265—VII. 250, dated 31st March, 1887, and enclosures [Papers No. 20].
 From Chief Secretary to Government, Bengal, No. 1483J., dated 28th March, 1887, and enclosure [Papers No. 21].
 Memorandum by Mr. P. R. Desai, Pleader, District Court, Tanna, dated 17th May, 1887 [Paper No. 22].
 Circular to all Local Governments and Administrations, No. 1585—96, dated 16th September, 1887.
 From Secretary for Berar to Resident, Hyderabad, No. 488G., dated 29th November, 1887, and enclosures.
 From Chief Secretary to Government, Madras, No. 2695, dated 25th November, 1887, and enclosures.
 From Officiating Chief Secretary to Chief Commissioner, Burma, No. 267, dated 9th December, 1887, and enclosures.

2. We have omitted most of the sections of the Bill as introduced which had reference to insolvency, representation of minors and imprisonment for debt. The first and second of those matters will be more conveniently considered by the Select Committees on the Bankruptcy and Guardians and Wards Bills re-

From Chief Commissioner, Ajmere-Merwara, No. 1456, dated 7th December, 1887, and enclosure.

From Secretary to Chief Commissioner, Assam, No. 2970, dated 19th December, 1887, and enclosures.

From Acting Under Secretary to Government, Bombay, No. 7417, dated 24th December, 1887, and enclosures.

From Secretary for Berar to Resident, Hyderabad, No. 525G., dated 27th December, 1887.

From Officiating Secretary to Government, Punjab, No. 24, dated 10th January, 1888, and enclosures.

From Registrar, High Court, Calcutta, No. 305, dated 8th February, 1888.

From Chief Secretary to Government, Bengal, No. 459J., dated 7th February, 1888, and enclosures.

From Registrar, High Court, Calcutta, No. 352, dated 13th February, 1888, and enclosure.

Notes by Judicial Commissioner, Oudh, dated 11th February, 1888 [Paper No. 23].

From J. Deas, Esq., District Judge, Jaunpur, No. 6, dated 6th January, 1888.

From Chief Commissioner, Central Provinces, No. 891—31, dated 15th February, 1888, and enclosures.

Notes by P. V. Krishnaswami Aiyar, First Grade Pleader, Madura.

Notes by Yellepedy Janaki Ramayya, District Judge, Coconada.

spectively, and the third has recently been considered by the Select Committee on the Bill to amend the law relating to Imprisonment for Debt.

3. The following portions of the Bill, as amended by us, appear to call for remark :—

(1) *Section 3.*—The object of the section which it is proposed to insert after section 4 of the Code is to preserve the summary character of rent-litigation which, as the Government of the North-Western Provinces and Oudh has pointed out, the rulings cited in the margin of the proposed section may otherwise have the effect of destroying.

(2) *Section 5.*—The proposed addition to section 14 has reference to the conflicting rulings of the High Courts with respect to suits in British India on judgments of Foreign Courts, and is designed to remove one of the objections to such suits being maintainable.

(3) *Section 6.*—The need of such a section as it is proposed to insert after section 16 of the Code is said to be much felt where large areas are subject to fluvial action. The section was originally inserted in the Punjab Land-revenue Bill of 1886, but the Select Committee on that Bill was of opinion that the section is one which should be of general rather than local operation.

(4) *Section 9.*—The section which it is proposed to substitute for section 53 is, with slight modification, in a form which has been suggested by the Hon'ble Mr. Justice Straight.

(5) *Sections 10, 11, 15 and 16.*—These sections are added to the Bill for the purpose of accommodating the language of the Code more closely to the system of process-serving obtaining in some parts of British India.

(6) *Section 12.*—This section will admit of summonses being sent for service to Superintendents of foreign States, and to Courts established or continued by the authority of the Governor General in Council in foreign territory, as well as to British Residents and Agents.

(7) *Section 13.*—The criticisms on the form and substance of sections 141 and 142 of the Code are so numerous and appear to us to be so well founded that we have deemed it necessary to re-draft those sections instead of only amending the former of them.

(8) *Section 17.*—The enactment of this section is advocated by high authority in Bengal and other parts of India. The section follows sections 357 *et seqq.* of the Code of Criminal Procedure, 1882, section 20 of the Burma Courts Act, 1875, sections 11 and 12 of the Central Provinces Laws Act, 1875, and section 19 of the Oudh Laws Act, 1876.

(9) *Sections 18 and 19.*—The amendment of section 191 in such a manner as to make it clear that the section does not require the re-hearing of a suit by a successor of a Judge who, having part heard the suit, has been prevented by death, transfer or other cause from concluding the trial thereof is considered by the Government of the North-Western Provinces and Oudh to be necessary in view of the administrative inconvenience, and the trouble and expense to suitors, which must result from the cases reported at I. L. R. 7 All. 857 and 8 All. 35. It is proposed also to apply the principle of section 191 of the Code to suits transferred from one Court to another, and to supplement the section by an addition to section 193.

(10) *Section 20.*—Such an amendment of section 209 as is here proposed has the support of Sir Meredyth Plowden and other Judges of the Chief Court of the Punjab.

(11) *Section 21.*—We have so amended section 216 of the Code as to make it applicable not only to such equitable cases of set-off as form the subject of the report at I. L. R. 7 All. 284 and the reports there cited, but also to any equitable right to set off a sum which is not a debt.

(12) *Section 22.*—As section 223 is now drawn, it is open to doubt in what cases decrees may be sent for execution to the Courts of Small Causes at Calcutta, Madras, Bombay and Rangoon. The ordinary jurisdiction of a Provincial Court of Small Causes extends under sub-section (2) of section 15 of Act IX of 1887 to suits of value not exceeding five hundred rupees, and its extraordinary jurisdiction under sub-section (3) of the same section to suits of value not exceeding one thousand rupees. The jurisdiction of a Presidency Court of Small Causes extends to suits of value not exceeding two thousand rupees; and it is proposed by section 47 of the Lower Burma Courts Bill, now pending before the Council of the Governor General, to take power to extend the whole or any part of the Presidency Small Cause Courts Act to the Court of Small Causes at Rangoon.

(13) *Section 23.*—The words "or continued" have been inserted in section 229 and other sections after the word "established" because there are Courts in Kattiawar which were established by the Governor of Bombay in Council.

(14) *Section 24.*—Under this section it will be competent to Courts in British India to send their decrees for execution to those Courts out of British India which are authorised by section 229 of the Code to cause their decrees to be executed by British Indian Courts.

(15) *Section 25.*—The last paragraph of section 230 is spent and may now be removed from the Code.

(16) *Section 26.*—It is proposed to amend section 244 of the Code in order to remove doubts which have arisen as to how representatives are to be ascertained, and whether orders staying execution are orders under the section.

(17) *Section 27.*—The conflicting rulings of the Courts with respect to the construction to be placed on the last paragraph of section 258 render it necessary to amend that paragraph.

In section 66, sub-section (1), of the Bill we have proposed to extend from twenty to ninety days the period of limitation for an application by a judgment-debtor for the issue of a notice to a decreeholder to show cause why a payment or adjustment out of Court should not be recorded as certified.

(18) *Section 28.*—We have added a clause exempting from liability to sale in execution of a decree of a Civil Court any moveable property which any local law exempts from liability to sale in satisfaction of an arrear of land-revenue.

(19) *Section 29.*—This section is intended to remove a doubt as to attachment being a necessary preliminary to the sale of property in execution of a decree which orders the sale in pursuance of a contract specifically affecting the property.

(20) *Section 30.*—The addition which we have proposed to make to section 320 follows the interpretation which has been placed on that section by the Allahabad High Court (I. L. R. 5 All. 314) and by the executive authorities of the North-Western Provinces, the Central Provinces and Lower Burma.

(21) *Section 31.*—Sub-section (1) will remove the doubt as to the construction to be placed on the words "under arrest" in section 349.

Sub-sections (2) and (3) correct obvious errors in the Code.

Sub-section (4) has been inserted at the instance of the High Court at Fort William. The inconvenience of there being two different systems of insolvency law in force in the same place was pointed out by several Judges of that Court in their remarks on the Indian Bankruptcy Bill of 1886. In not excluding from the operation of Chapter XX of the Code the towns mentioned in section 66 of the Burma Courts Act, 1875, we have had regard to the opinion expressed by the Recorder of Rangoon in his letter No. 66—19, dated the 7th April, 1885, and by the Officiating Recorder in his letter No. 107—43, dated the 20th June, 1885, at the time when the Bill which became Act XIV of 1885 was under consideration, and to the fact that jurisdiction in insolvency is exercised under the Code in Rangoon by the First Judge of the Court of Small Causes established there.

(22) *Sections 32, 53 and 66.*—We have extended to six months the period of limitation for applications under sections 365, 366 and 368 of the Code and provided for such applications being admitted after that period in exceptional cases.

(23) We have omitted section 20 of the Bill as introduced. The addition which it was proposed by that section to make to section 396 of the Code would effect a change in the substantive law of the country which should not in our opinion be brought about in such a Bill as that on which we are reporting.

(24) *Sections 37, 38, 40 and 41.*—The object of these sections is to remove the difficulties which have recently attended litigation on behalf of the minor Rájá of Kapurthala, one of the ruling chiefs of the Punjab and a landholder in that Province and in Oudh.

(25) *Section 43.*—On the recommendation of the Government of the North-Western Provinces and Oudh, it is proposed that the Collector shall not be appointed a Receiver without his consent.

(26) *Section 47.*—Section 551 and connected sections have been re-cast in the manner suggested by Mr. R. J. Crosthwaite, the Judicial Commissioner of the Central Provinces. In regard to the amendment of the sections so as to provide for the dismissal of appeals for default under section 551, Mr. Crosthwaite writes as follows:—

"This amendment is necessary, because, as section 551 stands now, an appellant can, if his appeal is fixed for hearing under that section, refrain from appearing and then appeal from the decree of the first Appellate Court dismissing his appeal. The Court of second appeal will then have to consider the appeal and decide it, because the provisions of section 556 do not apply in the case of an appeal dealt with under section 551. When a first appeal is dismissed under section 556 for default, there is practically no second appeal, because the second Appellate Court must hold that, as the appellant did not appear in the Court of first appeal, that Court's decree dismissing the appeal was under section 556 correct; but when an appeal is fixed for hearing under section 551, and, the appellant not appearing, his appeal is dismissed, section 556 does not apply; and an appellant can thus ignore the Court of first appeal and take his appeal to the High Court. Section 556 does not I think apply, because there can be no doubt that the words 'on the day so fixed' mean 'the day fixed under section 552 for hearing the appeal'. This state of the law is anomalous and, considering that a Court of second appeal is supposed to go by the findings of fact of the Court of first appeal, inconvenient. If an appellant does not appear on the day fixed for hearing, whether it be fixed under section 551 or section 552, his appeal should be dismissed; but he should have a right to apply for re-admission under section 558."

(27) *Section 48.*—We have endeavoured by this section to remove difficulties which the Courts have experienced in the admission of objections taken by way of cross-appeal.

(28) *Sections 49, 50, 51 and 52.*—The sections of the Code which these sections affect have in practice been found to limit unduly the discretion of Appellate Courts.

(29) *Section 55, sub-section (2).*—This sub-section has been suggested by the Judicial Commissioner of the Central Provinces with reference to the case reported at I. L. R. 11 Bom. 603.

(30) *Section 56.*—We propose that appeals from such orders as are appealable should lie in all cases to the ordinary appellate authority.

(31) *Section 60.*—This section is intended to give effect to the suggestion contained in the following extract from a letter received by the Government of India from the High Court at Fort William :—

“In this province it is often difficult to tell whether a suit should be instituted in the Small Cause Court or a Court possessing ordinary civil jurisdiction. Numerous cases have been brought to the cognizance of this Court in which great inconvenience, hardship and injustice have been caused in this way. A suit is brought in the first instance in the Small Cause Court, and that Court declares that it has no jurisdiction and dismisses the suit. The plaintiff then institutes the same suit in the Munsif's Court, which, upon trial, gives him a decree. The defendant thereupon appeals to the higher Courts, and it is held that the Munsif had no jurisdiction, and accordingly the suit is dismissed. The result is that the unfortunate suitor gets no relief anywhere. And this same result also follows when the Court of first instance holds that it has no jurisdiction, and also when the suit is in the first instance instituted in the Civil Court and the suitor subsequently goes to the Small Cause Court. The Judges think questions of jurisdiction and errors as to jurisdiction should be susceptible of being dealt with and cured by the High Court by transfer, affirmation of decree or otherwise; and they think that the order of the High Court as to jurisdiction should be final.”

(32) *Section 61.*—We have so modified the proposed addition to section 648 as to admit of orders being sent to the Courts of Small Causes at Calcutta, Madras, Bombay and Rangoon for the attachment of moveable property only.

(33) *Section 64.*—This section corrects a defect in the form under section 263 which has been noticed by Mr. Justice Brandt.

(34) *Section 65.*—By this section it is proposed to set at rest the question whether the registration of certificates of sale of property of value exceeding one hundred rupees is or is not compulsory. Whatever the law may have been before the passing of Act XII of 1879, the legislature could hardly have contemplated the registration of such certificates by auction-purchasers after the passing of that Act.

The 10th March, 1888.

No. II.

A Bill to amend the Code of Civil Procedure, the Indian Registration Act, 1877, and the Indian Limitation Act, 1877.

IV of 1882. WHEREAS it is expedient to amend the Code of Civil Procedure, the Indian Registration Act, 1877, and the Indian Limitation Act, 1877; It is hereby enacted as follows:—

1. (1) This Act may be called the Civil Procedure Code Amendment Act, 1888; and

(2) It shall come into force on the first day of July, 1888.

2. (1) In this Act, unless there is something repugnant in the subject or context, "section" means a section, "schedule" a schedule, and "Chapter" a Chapter, of the Code of Civil Procedure.

(2) Any reference in any enactment heretofore passed or hereafter to be passed to any Act amended by this Act shall, so far as may be, be read as if made to that Act as so amended.

Addition of new section after section 4.

3. The following shall be inserted after section 4, namely:—

"4 A. (1) Where any Revenue Courts are governed by the provisions of the Code of Civil Procedure in those matters of procedure upon which any special enactment applicable to them is silent, the Local Government, with the previous sanction of the Governor General in Council, may, by notification in the official Gazette, declare that any portions of those provisions shall not apply to those Courts, or shall only apply to them with such modifications as the Local Government, with the sanction aforesaid, may prescribe.

(2) 'Revenue Court' in sub-section (1) means a Court having jurisdiction under any local law to entertain suits relating to the rent, revenue or profits of land used for agricultural purposes, but does not include a Civil Court having original jurisdiction under this Code to try such suits as being suits of a civil nature of which its cognizance is not barred by any enactment for the time being in force."

[Cf. Act XV, 1882, Schedule I.]

Repeal of part of section 8.

4. The second paragraph of section 8 is hereby repealed.

Addition to section 14.

5. To section 14 the following shall be added, namely:—

[I. L. R. 6 Bom. 292 and 6 Mad. 191.] "Where a suit is instituted in British India on the judgment of any foreign Court in Asia

or Africa except a Court* of Record established by Letters Patent of Her Majesty or any predecessor of Her Majesty or a Supreme† Consular Court established by an Order of Her Majesty in Council, the Court in which the suit is instituted shall not be precluded from inquiry into the merits of the case in which the judgment was passed."

Addition of new section after section 16.

6. The following shall be inserted after section 16, namely:—

"16A. (1) When it is alleged to be uncertain within the local limits of the jurisdiction of which of two or more Courts any immovable property is situate, any one of those Courts may, if satisfied that there is ground for the alleged uncertainty, record a statement to that effect and thereupon proceed to entertain and dispose of any suit relating to that property, and its decree in the suit shall have the same effect as if the property were situate within the local limits of its jurisdiction:

"Provided that the suit is one with respect to which the Court is competent as regards the nature and value of the suit to exercise jurisdiction.

(2) Where a statement has not been recorded under sub-section (1), and an objection is taken before an appellate or revisional Court that a decree or order in a suit relating to such property was made by a Court not having jurisdiction where the property is situate, the appellate or revisional Court shall not allow the objection if in its opinion there was, at the time of the institution of the suit, any reasonable ground for uncertainty as to the Court having jurisdiction with respect thereto."

7. In section 17, after Explanation II, the following shall be inserted, namely:—

"EXPLANATION III.—In suits arising out of contract, the cause of action arises within the meaning of this section at any of the following places, namely:—

- (i) the place where the contract was made;
- (ii) the place where the contract was to be performed or performance thereof completed;
- (iii) the place where in performance of the contract any money to which the suit relates was expressly or impliedly payable."

8. In section 27 there shall be inserted after the words "the Court may" the words "at any stage of the suit", and after the words "any other person or persons" the words "with his or their consent".

*e.g., Supreme Court of the Straits Settlements.
†e.g., Her Majesty's Supreme Court for China and Japan at Shanghai.

[I. L. R. 4 All. 423 and 5 All. 277.]

Mad. 239, 5
Bom. 609, and
7 All. 79.]

Substitution of new
section for section 53.

When plaint may be
rejected, returned for
amendment or amended.

9. For section 53 the following shall be substituted, namely:—

“53. The plaint may, at the discretion of the Court,—

- (a) at, or at any time before, the settlement of issues be rejected if it does not disclose a cause of action;
- (b) at, or at any time before, the settlement of issues be returned for amendment within a time to be fixed by the Court, and upon such terms as to the payment of costs occasioned by such amendment as the Court thinks fit, if it—
 - (i) is not signed and verified as hereinbefore required,
 - (ii) does not state correctly and without prolixity the several particulars hereinbefore required, or contains particulars other than those so required,
 - (iii) is wrongly framed by reason of nonjoinder or misjoinder of parties, or joins causes of action which ought not to be joined in the same suit, or
 - (iv) is not framed in accordance with the provisions of section 42;
- (c) at any time before judgment be amended by the Court upon such terms as to the payment of costs as the Court thinks fit:

[L. R. 14 In.
App. 111.]

“Provided that a plaint shall not be amended either by the party to whom it is returned for amendment, or by the Court, so as to convert a suit of one character into a suit of another and inconsistent character.

“When a plaint is amended under this section the amendment shall be attested by the signature of the Judge.”

Substitution of new
section for section 72.

Delivery or transmission of summons for service.

10. For section 72 the following shall be substituted, namely:—

“72. (1) If the defendant resides within the jurisdiction of the Court in which the suit is instituted, or has an agent resident within that jurisdiction who is empowered to accept the service of the summons, the summons shall ordinarily be delivered or sent to the proper officer to be served by him or one of his subordinates.

“(2) The proper officer may be an officer of another Court than that in which the suit is instituted, and, where he is such an officer, the summons may, subject to any rules which the High Court may make in this behalf, be sent to him by post or in such other manner as the Court may direct.”

11. In section 82, for the first twenty words the following shall be substituted, namely:—

“When a summons is returned under section 80, the Court shall if the return under that section has not been verified by the affidavit of the serving-officer, and may if it has been so verified, examine the serving-officer on oath, or cause him to be so examined by another Court, touching his proceedings”.

Substitution of new
section for section 90.

12. For section 90 the following shall be substituted, namely:—

“90. If there is a British Resident or Agent, or a Superintendent appointed by the British Government, or a Court established or continued by the authority of the Governor General in Council, in or for the territory in which the defendant resides, the summons may be sent to such Resident, Agent, Superintendent or Court, by post or otherwise, for the purpose of being served upon the defendant; and, if the Resident, Agent or Superintendent or the Judge of the Court returns the summons with an endorsement under his hand that the summons has been served on the defendant in manner hereinbefore directed, such endorsement shall be evidence of the service.”

Substitution of new
sections for sections 141
and 142.

13. For sections 141 and 142 the following shall be substituted, namely:—

“141. (1) Subject to the provisions of the next following sub-section, there shall be endorsed on every document which has been admitted in evidence in the suit the following particulars, namely:—

- (a) the number and title of the suit,
- (b) the name of the person producing the document,
- (c) the date on which it was produced, and
- (d) a statement of its having been so admitted,

and the endorsement shall be signed by the Judge.

“(2) If a document so admitted is an entry in a book, account or record and a copy thereof has been substituted for the original under the next following section, the particulars aforesaid shall be endorsed on the copy and the endorsement thereon shall be signed by the Judge.

“141A. (1) If a document admitted in evidence in the suit is an entry in a shop-book or other account in current use, the party on whose behalf the account is produced may furnish a copy of the entry.

“(2) If such a document is an entry in a public record produced from a public office or by a public officer, or an entry in a book or account belonging to a person other than a

party on whose behalf the book or account is produced, the Court may require a copy of the entry to be furnished—

(i) where the record, book or account is produced on behalf of a party, then by that party, or

(ii) where the record, book or account is produced in obedience to an order of the Court acting of its own motion, then by either or any party.

"(3) When a copy of an entry is furnished under the foregoing provisions of this section, the Court shall, after causing the copy to be examined, compared and attested in manner mentioned in section 62, mark the entry and cause the book, account or record in which it occurs to be returned to the person producing it.

"142. When a document relied on as evidence by either party is considered by the Court to be inadmissible in evidence, there shall be endorsed thereon the particulars mentioned in clauses (a), (b) and (c) of section 141, sub-section (1), and a statement of its having been rejected, and the endorsement shall be signed by the Judge.

"142A. (1) Every document which has been admitted in evidence, or a copy thereof where a copy has been substituted for the original under section 141A, shall form part of the record of the suit.

"(2) Documents not admitted in evidence shall not form part of the record and shall be returned to the parties respectively producing them."

14. In section 143, for the words and figures "sections 62, 141 and 142" there shall be substituted the following, namely:—

"section 62, section 141A, sub-section (3), or section 142A, sub-section (2)."

15. In section 159 the words "or sent" shall be inserted after the word "delivered".

16. In section 168, for the words "shall examine the serving-officer on oath" the following shall be substituted, namely:—"shall if the certificate of the serving-officer has not been verified by affidavit, and may if it has been so verified, examine the serving-officer on oath, or cause him to be so examined by another Court,".

17. The following shall be inserted after section 185, namely:—

"185A. (1) The Local Government may, by notification in the official Gazette, direct, with respect to any Judge specified in the notification, or falling under a description set forth therein, that

evidence in cases in which an appeal is allowed shall, instead of being taken down in the manner prescribed in the foregoing sections, be taken down by him with his own hand in the English language.

"(2) Where a Judge is prevented by any sufficient reason from complying with a direction under sub-section (1), he shall record the reason and cause the evidence to be taken down in writing from his dictation in open Court.

"(3) Evidence taken down under sub-section (1) or sub-section (2) shall be in the form mentioned in section 182, and be read over and signed, and, as occasion may require, interpreted and corrected, as if it were evidence taken down under that section.

"(4) The Local Government may, by notification in the official Gazette, revoke or vary a direction notified under sub-section (1)."

18. For section 191 the following shall be substituted, namely:—

"191. (1) Where the Judge taking down any evidence, or causing any memorandum to be made, under this Chapter, is prevented by death, transfer or other cause from concluding the trial of the suit, any successor to such Judge may deal with such evidence or memorandum as if he himself had taken it down or caused it to be made, and proceed with the suit from the stage at which his predecessor left it.

"(2) The provisions of sub-section (1) shall apply, so far as they can be made applicable, to a suit transferred under section 25:

"Provided that a Court transferring a suit under that section may, if it thinks fit, direct that the Court to which the suit is transferred shall recall all or any of the witnesses who have been examined and take their evidence afresh."

19. To section 193 the following shall be added, namely:—

"A Court continuing a suit under section 191 may recall and re-examine a witness who has departed in accordance with section 173."

20. (1) In section 209, for the first thirteen words the words "When a decree is for the payment of money" shall be substituted.

(2) To the same section the following shall be added, namely:—

"Where such a decree is silent with respect to the payment of further interest on such aggregate sum as aforesaid from the date of the decree to the date of payment or other earlier date, the Court shall be deemed to have refused such interest, and a separate suit therefor shall not lie."

21. (1) In section 216, for the first twenty-four words the following shall be substituted, namely :—

“If the defendant has been allowed a set-off against the claim of the plaintiff.”

(2) To the same section the following shall be added, namely :—

“The provisions of this section shall apply whether the set-off is admissible under section 111 or otherwise.”

22. In section 223, for the words “in a case cognizable by a Court of Small Causes” the following shall be substituted, namely :—

“in a suit of which the value as set forth in the plaint did not exceed two thousand rupees and which, as regards its subject-matter, is not excepted by the law for the time being in force from the cognizance of either a Presidency or a Provincial Court of Small Causes”.

23. In section 229, after the word “established” the words “or continued” shall be inserted.

24. After section 229 the following shall be inserted, namely :—

“229A. So much of the foregoing sections of this Chapter as empowers a Court to send a decree for execution to another Court shall be construed as empowering a Court in British India to send a decree for execution to any Court established or continued by the authority of the Governor General in Council in the territories of any Foreign Prince or State to which the Governor General in Council has, by notification in the Gazette of India, declared this section to apply.”

25. The last paragraph of section 230 is hereby repealed.

26. (1) In section 244, for clause (c), the following shall be substituted, namely :—

“(c) any other questions arising between the parties to the suit in which the decree was passed, or their representatives, and relating to the execution, discharge or satisfaction of the decree or to the stay of execution thereof.”

(2) To the same section the following shall be added, namely :—

“If a question arises as to who is the representative of a party for the purposes of this section, the Court may either stay execution of the decree until the question has been determined by a separate suit or itself determine the question by an order under this section.”

27. For the last paragraph of section 258 the following shall be substituted, namely :—

“Unless such a payment or adjustment has been certified as aforesaid, it shall not be recognized as a payment or adjustment of the decree by any Court executing the decree.”

28. (1) In the first proviso to section 266, clause (a), the words “and bedding” shall be inserted after the word “apparel”.

(2) In the same proviso, clause (b), after the word “cattle” the words “and seed-grain” shall be inserted.

(3) In the same proviso, for clause (h) the following shall be substituted, namely :—

“(h) the salary of a public officer or of any servant of a Railway Company or local authority to the extent of—

(i) the whole of the salary where the salary does not exceed twenty rupees monthly;

(ii) twenty rupees monthly where the salary exceeds twenty rupees and does not exceed forty rupees monthly; and

(iii) one moiety of the salary in any other case.”

(4) To the same proviso, after clause (l), the following shall be added, namely :—

“(m) any allowance declared by any law passed under the Indian Councils Act, 1861, by a Governor or a Lieutenant-Governor in Council to be exempt from liability to attachment or sale in execution of a decree;

“(n) where the judgment-debtor is a person liable for the payment of land-revenue, any moveable property which under any law* applicable to him is exempt from sale for the recovery of an arrear of such revenue.”

(5) In the Explanation to the same proviso, for the word and letter “and (j)” the letters and word “(j) and (m)” shall be substituted.

29. In section 289 the words “on the spot where the property is attached” are hereby repealed.

30. To section 320 the following shall be added, namely :—

“Rules under this section may confer upon the Collector or any gazetted subordinate of the Collector all or any of the powers which the Court might exercise in the execution of the decree if the execution thereof had not been transferred to the Collector, including the powers of the Court under sections 294 and 312, and

"363. If there are more plaintiffs than one, and any of them dies, and if the right to sue does not survive to the surviving plaintiff or plaintiffs alone but survives to him or them and the legal representative of the deceased plaintiff jointly, the Court may cause the legal representative, if any, of the deceased plaintiff to be made a party, and shall thereupon cause an entry to that effect to be made on the record and proceed with the suit."

(2) For section 365 the following shall be substituted, namely:—

"365. In case of the death of a sole plaintiff or sole surviving plaintiff, the legal representative of the deceased may, where the right to sue survives, apply to the Court to have his name entered on the record in place of the deceased plaintiff, and the Court shall thereupon enter his name and proceed with the suit."

(3) To section 368 the following shall be added, namely:— [L. R. 9
Bom. 56, and
7 All. 396.]

"The legal representative of a deceased defendant may apply to have himself made a defendant in place of the deceased defendant, and the provisions of this section, so far as they are applicable, shall apply to the application and to the proceedings and consequences ensuing thereon."

(4) After section 372 the following shall be added, namely:—

"372A. The provisions of section 5 of the Indian Limitation Act, 1877, applicable to appeals shall apply to applications under sections 365, 366, 368 and 371."

33. To section 381 the following shall be added, namely:— [L. R. 6
Bom. 482, and
Act VIII
1859, s. 35.]

"or show good cause why such time should be extended, in which case the Court may extend it.

"Where a suit is dismissed under this section, the plaintiff may apply for an order to set the dismissal aside, and, if it is proved to the satisfaction of the Court that he was prevented by any sufficient cause from furnishing the security within the time allowed, the Court shall set aside the dismissal upon such terms as to security, costs or otherwise as it thinks fit, and shall appoint a day for proceeding with the suit.

"The dismissal shall not be set aside unless the plaintiff has served the defendant with notice in writing of his application.

"The provisions of the Indian Limitation Act, XV of 1877, with respect to an application under section 103, and of this Code with respect to an appeal from an order rejecting such an application, shall apply, so far as they can be made applicable, to an application under this section for an order to set aside the dismissal of a suit, and to an appeal from an order rejecting such an application, respectively."

34. In section 386, for the words "or to any pleader of a High Court whom the Court issuing the commission thinks fit to appoint" the following shall be substituted, namely:—

"or to any pleader or other person whom the

Court issuing the commission may, subject to any rules of the High Court in this behalf, think fit to appoint."

35. In section 419, after the words "Government Pleader in any Court" the words "or such other person as the Local Government may for any Court appoint in this behalf" shall be inserted.

36. In section 424, after the words "intending plaintiff" the words "and the relief which he claims" shall be inserted.

37. (1) In section 432, after the words "British India" the following shall be inserted, namely:—

"or at the request of any person competent in the opinion of the Government to act on behalf of such Prince or Chief,".

(2) To the same section the following shall be added, namely:—

"An appointment under this section may be made for the purpose of a specified suit or of several specified suits, or for the purpose of all such suits as it may from time to time be necessary to prosecute or defend on behalf of the Prince or Chief.

"A person appointed under this section may authorise or appoint persons to make and do appearances, applications and acts in any such suit or suits as if he were himself a party to the suit or suits."

38. For section 433 the following shall be substituted, namely:—

"433. (1) Any such Prince or Chief, and any ambassador or envoy of a Foreign State, may, with the consent of the Governor General in Council, certified by the signature of one of the Secretaries to the Government of India (but not without such consent), be sued in any competent Court.

(2) Such consent may be given with respect to a specified suit or to several specified suits, or with respect to all suits of any specified class or classes, and may specify, in the case of any suit or class of suits, the Court in which the Prince, Chief, ambassador or envoy may be sued; but it shall not be given unless the Prince, Chief, ambassador or envoy—

(a) has instituted a suit in the Court against the person desiring to sue him, or

(b) by himself or another trades within the local limits of the jurisdiction of the Court, or

(c) is in possession of immoveable property situate within those limits and is to be sued with reference to such possession or for money charged on that property.

(3) No such Prince, Chief, ambassador or envoy shall be arrested under this Code, and,

except with the consent of the Governor General in Council certified as aforesaid, no decree shall be executed against the property of any such Prince, Chief, ambassador or envoy.

"(4) The Governor General in Council may, by notification in the Gazette of India, authorise a Local Government and any Secretary to that Government to exercise, with respect to any Prince, Chief, ambassador or envoy named in the notification, the functions assigned by the foregoing sub-sections to the Governor General in Council and a Secretary to the Government of India, respectively.

"(5) A person may, as a tenant of immoveable property, sue, without such consent as is mentioned in this section, a Prince, Chief, ambassador or envoy from whom he holds or claims to hold the property."

39. (1) Section 434 shall become section 229B, and any reference made before the commencement of this Act in any notification or other document to section 434 shall be read as a reference to section 229B.

(2) In section 229B, the words "or continued" shall be inserted after the word "established".

40. After section 433 the following section shall be inserted, namely:—

"434. A Sovereign Prince or ruling Chief may sue, and shall be sued, in the name of his State: [Cf. I. L. R. All. 690 and 7 Bom. H. Rep. O. C. 150.]

"Provided that in giving the consent referred to in the last foregoing section the Governor General in Council or Local Government, as the case may be, may direct that any such Prince or Chief shall be sued in the name of an agent or in any other name."

41. To section 464 the following shall be prefixed, namely:—

"Nothing in this Chapter applies to a Sovereign Prince or ruling Chief suing or being sued in the name of his State or being sued, by direction of the Governor General in Council or a Local Government, in the name of an agent or in any other name, and".

42. In section 503, clause (d), the words "as the Court thinks fit" shall be inserted after the words "by way of remuneration".

43. In section 504, for the words "the Court may appoint the Collector" the words "the Court may, with the consent of the Collector, appoint him" shall be substituted.

44. In section 539, for the words "having a direct interest" the words "having an interest" shall be substituted. [2 Swanst. 518, and L. R. 8. Cal. 3 and 7 All. 178.]

Amendment of section 539.

Insertion of new section 434.

Style of Princes and Chiefs as parties to suits.

Addition to section 464.

Princes and Chiefs and wards of Court.

Amendment of section 503.

Amendment of section 504.

Suit against Princes, Chiefs, ambassadors and envoys.

Substitution of new section for section 433.

Amendment of section 419.

Amendment of section 424.

Amendment of section 432.

Addition to section 540. 45. To section 540 the following shall be added, namely :—

"An appeal may lie under this section from an original decree passed *ex parte*."

Addition to section 549. 46. To section 549 the following shall be added, namely :—

"If such security be furnished, any costs for which a surety may have rendered himself liable may be recovered from him in execution of the decree of the Appellate Court in the same manner as if he were the appellant."

Substitution of new section for section 551. 47. (1) For section 551 the following shall be substituted, namely :—

"551. (1) The Appellate Court, if it thinks fit, may, after fixing a day for hearing the appellant or his pleader and hearing him accordingly if he appears on that day, dismiss the appeal without sending notice of the appeal to the Court against whose decree the appeal is made and without serving notice on the respondent or his pleader."

"(2) If on the day fixed under sub-section (1) or any other day to which the hearing may be adjourned the appellant does not attend in person or by his pleader, the appeal shall be dismissed for default."

"(3) The dismissal of an appeal under this section shall be notified to the Court against whose decree the appeal is made."

(2) For the first paragraph of section 552 the following shall be substituted, namely :—

"Unless the Appellate Court dismisses the appeal under the last foregoing section, it shall fix a day for hearing the appeal."

(3) In section 558 the words and figures "section 551, sub-section (2)," shall be inserted before the word and figures "section 556".

Amendment of, and addition to, section 561. 48. (1) For the proviso to the first paragraph of section 561 the following shall be substituted, namely :—

"Provided he has filed the objection in the Appellate Court within one month from the date of the service on him or his pleader under section 553 of notice of the day fixed for hearing the appeal, or within such further time as the Appellate Court may see fit to allow."

(2) To the same section the following shall be added, namely :—

"Unless the respondent files with the objection a written acknowledgment from the appellant or his pleader of having received a copy thereof, the Appellate Court shall cause such a copy to be served, as soon as may be after

the filing of the objection, on the appellant or his pleader, at the expense of the respondent.

"The provisions of Chapter XLIV shall, so far as they can be made applicable, apply to an objection under this section." [I. L. R. 1 Bom. 75 and 8 Mad. 214.]

Amendment of section 562. 49. (1) In section 562 the words "so as to exclude any evidence of fact which appears to the Appellate Court essential to the determination of the rights of the parties" are hereby repealed.

(2) In the same section, for the word "investigate" the word "determine" shall be substituted.

Repeal of section 563. 50. Section 563 is hereby repealed.

Amendment of section 565. 51. In section 565, for the word "shall" the word "may" shall be substituted.

Amendment of section 566. 52. (1) In section 566 the words "and the evidence upon the record is not sufficient to enable the Appellate Court to determine such issue or question" are hereby repealed.

(2) In the same section, between the words "the Appellate Court may," and the words "frame issues," the words "if necessary" shall be inserted.

Amendment of section 582. 53. (1) In section 582, for the words "the words 'plaintiff,' 'defendant' and 'suit' shall be held to include an appellant, a respondent and an appeal, respectively," the following shall be substituted, namely :—

"the word 'plaintiff' shall be held to include a plaintiff-appellant or defendant-appellant, the word 'defendant' a plaintiff-respondent or defendant-respondent, and the word 'suit' an appeal."

(2) In the same section, the words and figures "including those of section 372A," shall be inserted after the words "The provisions hereinbefore contained".

Addition to section 584. 54. To section 584 the following shall be added, namely :—

"An appeal may lie under this section from an appellate decree passed *ex parte*."

Amendment of section 588. 55. (1) In section 588, clause (9), for the word "or" the word "for" shall be substituted. [Gazette of India, 19th August, 1888, Part I, page 535.]

(2) In the same section, clause (16), for the words "the first paragraph of" the words "and orders under" shall be substituted.

Repeal of part of section 589. 56. The first paragraph of section 589, and the word "other" in the second paragraph of that section, are hereby repealed.

Repeal of section 599 and part of section 601. 57. Section 599, and in section 601 the words "within thirty days from the date of the order", are hereby repealed.

[I. L. R. 2
All. 604 and
12 Cal. 402.]

58. After the second paragraph of section 610 Addition to section the following shall be inserted, namely:—

"In so far as the order awards costs to the respondent, it may be executed against a surety therefor, to the extent to which he has rendered himself liable, in the same manner as it may be executed against the appellant:

"Provided that such notice in writing as the Court in each case thinks sufficient has been given to the surety."

626. 59. To section 626 the following proviso shall be added, namely:—

"and

[I. L. R. 10
Cal. 80 and 4
All. 278.]

"(c) an application made under section 624 to the Judge who delivered the judgment may, if that Judge has ordered notice to issue under proviso (a) to this section, be disposed of by his successor."

60. After section 646 the following shall be inserted, namely:—

"646A. (r) If at any time before judgment a Court in which a suit has been instituted doubts whether the suit is cognizable by a Court of Small Causes or is not so cognizable, it may submit the record to the High Court with a statement of its reasons for the doubt as to the nature of the suit.

"(2) On receiving the record and statement the High Court may order the Court either to proceed with the suit or to return the plaint for presentation in such other Court as it may in its order declare to be competent to take cognizance of the suit.

"646B. (r) If it appears to a District Court that a Court subordinate thereto has, by reason of erroneously holding a suit to be cognizable by a Court of Small Causes or not to be so cognizable, failed to exercise a jurisdiction vested in it by law, or exercised a jurisdiction not so vested, the District Court may, and, if required by a party, shall, submit the record to the High Court with a statement of its reasons for considering the opinion of the subordinate Court with respect to the nature of the suit to be erroneous.

"(2) On receiving the record and statement, the High Court may pass such order in the case as it thinks fit.

"(3) With respect to any proceeding subsequent to decree in any case submitted to the High Court under this section, the High Court may make such order as in the circumstances appears to it to be just and proper.

"(4) A Court subordinate to a District Court shall comply with any requisition which the District Court may make for any record or information for the purposes of this section."

61. (r) For the third paragraph of section 648 the following shall be substituted:—

"and the Court making an arrest under this section shall send the person arrested to the Court

by which the warrant of arrest was issued, unless he shows cause to the satisfaction of the former Court why he should not be sent to the latter Court, or unless he furnishes sufficient security for his appearance before the latter Court or (where the case is one under Chapter XXXIV) for satisfying any decree that may be passed against him by that Court, in either of which cases the Court making the arrest shall release him."

(2) To section 648 the following shall be added, namely:—

"Where a person to be arrested or moveable property to be attached under this section is within the local limits of the ordinary original civil jurisdiction of the High Court of Judicature at Fort William in Bengal or at Madras or Bombay, or of the Court of the Recorder of Rangoon, the copy of the warrant of arrest or of the order of attachment, and the probable amount of the costs of the arrest or attachment, shall be sent to the Court of Small Causes of Calcutta, Madras, Bombay or Rangoon, as the case may be, and that Court, on receipt of the copy and amount, shall proceed as if it were the District Court."

62. In section 650A, the words "or continued" shall be inserted after the word "established".

63. To section 652 the following shall be added, namely:—

"A High Court not established under the Statute 24 and 25 Victoria, chapter 104 (*an Act for establishing High Courts of Judicature in India*) may, from time to time, with the previous sanction of the Local Government, make, with respect to any matter other than procedure, any rule which any High Court so established might under section 15 of that Statute make with respect to any such matter for any part of the territories under its jurisdiction which is not included within the limits of a presidency-town. Rules so made shall be published in the same manner, and shall thereupon have the same force, as rules made and published under this section for the regulation of matters connected with procedure."

64. In form No. 137 of the fourth schedule the words "bound by the decree" shall be inserted after the words "remove any person".

65. (r) After clause (n) of section 17 of the Indian Registration Act, 1877, as amended by the Indian Registration Act, 1886, the following clause shall be added, namely:—

"(o) a certificate of sale granted to the purchaser of any property sold by public auction by a Civil or Revenue officer."

(2) In the second paragraph of section 50 of the same Act, for the word and letter "and (n)" the letters and word "(n) and (o)" shall be substituted.

of 1877. (3) The Indian Registration Act, 1877, shall be construed as if the amendments made in it by this section had been made therein by Act XII of 1879 (*an Act to amend the Code of Civil Procedure, the Registration Act, 1877, and the Limitation Act, 1877*):

Provided that nothing in this sub-section shall be deemed to affect a decree or order made by any Court before the commencement of this Act.

66. (1) No. 161 of the second schedule to the Indian Limitation Act, 1877, shall be transposed and become No. 173A, and the entry against it in the second column of that schedule shall be "Ditto", signifying ninety days.

(2) Nos. 171, 171A and 171B of the same schedule are hereby repealed.

(3) For No. 171C of the same schedule the following shall be substituted, namely:—

Description of Application.	Period of Limitation.	Time from which period begins to run
171. Under section 371 of the Code of Civil Procedure, or under that section and section 582 of the same Code, for an order to set aside an order for abatement or dismissal.	Sixty days.	The date of the order for abatement or dismissal.

(4) After No. 175 of the same schedule the following shall be inserted, namely:— [Cases cited at s. 39 of this Bill.]

Description of Application.	Period of Limitation.	Time from which period begins to run.
175A. Under section 365 of the Code of Civil Procedure by the legal representative of a deceased plaintiff, or under that section and section 582 of the same Code by the legal representative of a deceased plaintiff-appellant or defendant-appellant.	Six months	The date of the death of the deceased plaintiff or of the deceased plaintiff-appellant or defendant-appellant.
175B. Under section 366 of the Code of Civil Procedure by a defendant, or under that section and section 582 of the same Code by a plaintiff-respondent or defendant-respondent.	Ditto	The date of the death of the deceased plaintiff or of the deceased defendant-appellant or plaintiff-appellant.
175C. Under section 368 of the Code of Civil Procedure to have the legal representative of a deceased defendant made a defendant, or under that section and section 582 of the same Code to have the legal representative of a deceased plaintiff-respondent or defendant-respondent made a plaintiff-respondent or defendant-respondent.	Ditto	The date of the death of the deceased defendant or of the deceased plaintiff-respondent or defendant-respondent.

S. HARVEY JAMES,
Secretary to the Government of India.

GOVERNMENT OF INDIA,
—
LEGISLATIVE DEPARTMENT.
—

The following Bill was introduced into the Council of the Governor General of India for the purpose of making Laws and Regulations on the 16th March, 1888 :—

NO. 4 OF 1888.

A Bill to declare the imperial standard yard for the United Kingdom to be the legal standard measure of length in British India.

WHEREAS it is expedient to declare the imperial standard yard for the United Kingdom to be the legal standard measure of length in British India; It is hereby enacted as follows—

1. (1) This Act may be called the Measures of Length Act, 1888.

Title, extent and commencement. (2) It extends to the whole of British India; and

(3) It shall come into force on the first day of January, 1889.

- [1 & 42 Vic., 49, s. 10.] 2. The imperial standard yard for the United Kingdom shall be the legal standard measure of length in British India and be called the standard yard.

- [1 & 42 Vic., 49, s. 4.] 3. An accurate copy, approved as such by the Governor General in Council, of the imperial standard yard for determining the length of the imperial standard yard for the United Kingdom shall be kept in such place within the limits of the Town of Calcutta as the Governor General in Council may prescribe, and shall be the standard for determining the length of the standard yard.

4. One-third part of the standard yard shall be called a standard foot, and one thirty-sixth part of such a yard shall be called a standard inch. [41 & 42 Vic., c. 49, s. 11.]

5. Any measure having stamped thereon or affixed thereto a certificate purporting to be made under the authority of the Governor General in Council or of a Local Government, and stating that the measure is of the length of the standard yard or that a measure marked thereon as a foot or inch is of the length of the standard foot or standard inch, as the case may be, shall, when produced before any Court by any public servant having charge of the measure in pursuance of any direction published in an official Gazette by order of the Governor General in Council or the Local Government, be deemed to be correct until its inaccuracy is proved.

6. A public servant having in pursuance of such a direction charge of measures by the public, such a measure as is mentioned in the last foregoing section shall allow any person to inspect it free of charge at all reasonable times and to compare therewith or with any measure marked thereon any measure which such person may have in his possession.

7. There shall be kept by the Commissioner of Police in the Town of Calcutta under section 55 of the Calcutta Police Act, 1865, by the Commissioner of Police in the Town of Madras under section 44 of the Act of the Governor of Fort St. George in Council No. VIII of 1867, by the Presidency Magistrates in the Town of Bombay under section 17 of Act XLVIII of 1860 as amended by the Act of the Governor of Bombay in Council No. IV of 1882, and by the Magistrate under section 20 of Regulation XII of 1827 of the Bombay Code, such certified measures of the standard yard, standard foot and standard inch as are mentioned in section 5.

Ben Act IV of 1866.

STATEMENT OF OBJECTS AND REASONS.

THIS Bill, declaring the imperial standard yard for the United Kingdom to be the legal standard measure of length in British India, is preliminary to intended legislation on the lines of the Merchandise Marks Act, 1887 (50 & 51 Vic., c. 28).

The 16th March, 1888.

PART VI.

Debates of the Legislative Council of His Excellency the Governor General.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR
GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING
LAWS AND REGULATIONS UNDER THE PROVISIONS OF
THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House on Saturday, the 10th March, 1888.

PRESENT:

His Excellency the Viceroy and Governor General of India, K.P., G.C.B.,
G.C.M.G., G.M.S.I., G.M.I.E., P.C., *presiding*.
The Hon'ble Lieutenant-General G. T. Chesney, R.E., C.B., C.S.I., C.I.E.
The Hon'ble A. R. Scoble, Q.C.
The Hon'ble Sir C. U. Aitchison, K.C.S.I., C.I.E., LL.D., D.O.L.
The Hon'ble Sir C. A. Elliott, K.C.S.I.
The Hon'ble J. Westland.
The Hon'ble Rana Sir Shankar Bakhsh Singh Bahadur, K.C.I.E.
The Hon'ble Syud Ameer Hossein, C.I.E.
The Hon'ble Rájá Peári Mohan Mukerji, C.S.I.
The Hon'ble W. S. Whiteside.
The Hon'ble G. H. P. Evans.
The Hon'ble J. W. Quinton, C.S.I.
The Hon'ble R. Steel.
The Hon'ble F. M. Halliday.
The Hon'ble Sir Pasupati Ananda Gajapati Razu, K.C.I.E., Mahárájá of
Vizianagram.

CIVIL PROCEDURE CODE, &c., AMENDMENT BILL.

The Hon'ble MR. SCOBLE presented the Report of the Select Committee on the Bill to amend the Code of Civil Procedure and the Indian Limitation Act, 1877. He said:—

“Although this Bill is somewhat formidable in appearance, I do not think it will be found upon examination to contain much controversial matter. I am free to confess that I approached its consideration rather more than twelve

months ago by no means with a light heart. The revision of the Code of Civil Procedure is not a matter to be readily undertaken by any one familiar with the working of the Courts and who knows from practical experience how easy it is to pick holes and how difficult it is to mend them. No one could be more averse than I am to what is called 'tinkering' enactments of this kind. But being confronted with an amending Bill on my arrival in this country, and overwhelmed with suggestions for still further amendments, I have had to deal with the matter, however reluctantly; and, with the assistance of the Select Committee, I hope to have produced a practically useful measure.

"As the Council are aware, the last edition of the Code was published in 1882. The six years which have since elapsed have brought to light some defects in its method, and some difficulties in its construction, which it is the object of the present Bill to remedy. The defects have been pointed out by the Courts which have had to administer the Code; the difficulties have resulted from imperfections of expression which have led different High Courts to construe the same sections in different ways. In dealing with this Bill the Select Committee has attempted no startling innovations, but has limited itself to the more modest, and, I think, more useful, task of making plain that which was before obscure, and supplying that which experience has shown to have been accidentally omitted or imperfectly expressed.

"At the risk of being somewhat tedious—for details of this kind, though important, are not interesting to a lay audience—I must ask the Council to bear with me while I point out the principal alterations effected in the Code by this Bill. Taking the sections in their order, the first to which I desire to call attention is section 3, which has been introduced on the suggestion of the Government of the North-Western Provinces and Oudh. The object is to preserve the summary character of rent-litigation under local laws; and it is justified on the ground that holding the provisions of the Civil Procedure Code to be applicable to the proceedings of the Rent and Revenue Courts, in all points which are not provided for in the special Acts governing those classes of Courts, may be the source of considerable embarrassment to the Administration, both by throwing impediments in the way of the easy realization of the rents from which the land-revenue is paid, and imposing increased labour on the Rent Courts whose time is already fully occupied.

"Section 5 relates to suits on foreign judgments. Upon this point there is a conflict of decisions between the High Courts of Madras and Bombay, which we have settled by declaring that Courts in British India shall not be precluded from enquiring into the merits of the case in which the judgment was passed by any Court in Asia or Africa, excepting only Courts established by the authority of the British Government in our colonies and dependencies. This will avoid the anomaly of placing the Courts of Siam or Cabul on the same footing as the Queen's Courts in Ceylon or Hongkong.

"Section 6 is intended to avoid a difficulty as to jurisdiction which frequently arises where the boundaries of estates or holdings are destroyed or altered by fluvial action.

"Section 7 is based upon a suggestion of Mr. Justice Straight, and makes it clear that, in order to found jurisdiction it is enough that a material part of the cause of action arises within the local limits of the jurisdiction of the Court in which the suit is instituted.

"The object of section 9 is to give to the Courts greater power of amendment of complaints than they at present possess. The tendency of the Courts in England is to allow the greatest latitude in this direction. In a recent case before the Court of Appeal (*Weldon v. Neal*, 19 Q. B. D. 395) Lord Justice Lopes says: 'However negligent or careless the first omission, and however late the proposed amendment, the amendment should be allowed if it can be allowed without injustice to the other side.' In this country, where, as the Advocate General of Bengal observes, 'there is every likelihood of a poor suitor acting in ignorance or under the advice of ignorant advisers, and launching an honest case in a clumsy and irrational manner,' it appeared to the Select Committee there was abundant reason for adopting the English rule. The only necessary limitation is to prevent a suit of one character from

being turned by amendment into a suit of a different character; and it is therefore provided that amendments which would have this effect are not to be allowed.

"Sections 10, 11, 12, 15 and 16 are intended to facilitate the service of summonses by an agency other than that of the Courts which issued them.

"Section 14 substitutes for sections 141 and 142 of the Code a simpler method of dealing with the documentary evidence produced in suits.

"Section 17 empowers the Local Governments to authorize selected Judges to take down the evidence in appealable cases in the English language. This section is regarded by the Bengal Government as 'perhaps the most important in the Bill,' and the Lieutenant-Governor believes that 'a cautious use of the power therein conferred will effect an enormous saving of time both in original as well as in appellate Courts.' District Judges are of the same opinion. Mr. Stevens, of Gya, writes—'It is scarcely possible to exaggerate the trouble, annoyance and waste of time which are frequently caused by the present mode of recording evidence;' and Mr. Towers, of Midnapore, says—'I believe the change would be a very salutary one in all District Courts, and probably in those of most Subordinate Judges, which are always situated at head-quarters, and the pleaders practising in which are good English scholars. For myself I believe I could do twice the amount of appellate work if I had a record of the evidence in English. In original cases also it will save District Judges much time and trouble to have but one record. The expense of translations in the High Court will also be much reduced, and there will be a very appreciable gain to litigants.' From Madras, Mr. Justice Parker writes—'These provisions have long been most desirable in the Madras Presidency. The present practice is as much disliked by the Bar as by the Judge, and causes great loss of time.' The Bombay Government, on the other hand, consider the alteration undesirable; and there would be much force in their observation that "Judges are of necessity frequently sent to districts with the language of which they are unacquainted, and in such cases it is not desirable that there should be no vernacular record of the evidence" if the proposal were absolute; but, as Local Governments may limit and revoke the exercise of the power as they please, it may surely be expected of them not to misuse the discretion with which they are invested.

"Sections 18 and 19 make it clear that the law does not require the re-hearing of a suit by the successor of a Judge who, having part heard the suit, has been prevented by death, transfer or other cause from concluding the trial; but that the hearing may be taken up at the stage at which it was left by the previous Judge, with liberty to recall and re-examine any witnesses from whom further evidence may be desired.

"In section 20 we carry out a suggestion of the Chief Court of the Punjab with regard to the award of interest on decrees for money.

"Section 21 is designed to bring equitable set-offs, which the Courts are in the habit of allowing, within the operation of section 216 of the Code.

"In section 26 we have empowered the Court executing a decree to determine questions as to stay of execution: and, as considerable difficulties have been felt with regard to the meaning of the word 'representatives' in section 244 of the Code, we have provided a procedure by which, in case of dispute, the representative of a party for the purposes of the section may be ascertained.

"There have been so many conflicting rulings of the High Courts upon the effect to be given to payments or adjustments of decrees which have not been certified to the Court charged with the execution of those decrees, that we have provided in section 27 that, unless such payment or adjustment has been certified as required by the Code, it shall not be recognized as a satisfaction of the decree by any Court executing the decree. This provision will, it is hoped, have the effect of inducing parties who settle out of Court to report to the Court that such settlement has been made.

"Section 28 brings the provisions of the Code in regard to the attachment of property in execution of a decree into accordance with recent legislation,

and removes a doubt as to the extent to which the salaries of certain classes of public servants are liable to be attached.

“Under section 320 of the Code, Local Governments were empowered to direct that the execution of decrees affecting immoveable property might be transferred, in certain cases, from the Court to the Collector; and subsequent sections provided that the Collector might sell, let or mortgage the property as might seem most desirable under the circumstances. The Local Governments were authorized to make rules for the guidance of the Collector and his subordinates in executing the decree; but no provision was made as to the authority to which an appeal would lie from orders passed by the Collector in exercise of the powers conferred on him. The High Courts of Calcutta and Bombay have expressed the opinion that the proceedings of the Collector should be subject to appeal to the District Judge and the High Court; but there is a Full Bench decision of the Allahabad High Court, with which the Select Committee concurs, to the contrary effect. We think it was the intention of the Legislature that any appeal from the orders of the Collector in matters of this kind should go to the superior Revenue-authorities. There are obvious reasons of convenience in favour of this course, and we have so provided in section 30 of the Bill.

“The most important clause in section 31 is that which provides that Chapter XX of the Code, which relates to proceedings in insolvency, shall not apply within the towns of Calcutta, Madras and Bombay. This provision has been introduced at the suggestion of the High Court of Calcutta, the Judges of which point out the inconveniences of the present dual system, and say that ‘it seems to be quite unnecessary to have two different systems of insolvency law at work in the same place. The provisions of the Insolvent Act, though in many respects imperfect, are now understood by practitioners, and great confusion and uncertainty has in some cases arisen from the introduction of a new and more imperfect procedure.’ As the question of amending and consolidating the law of bankruptcy and insolvency in British India is now before the Council, it seems desirable that the presidency-towns should, at all events for the present, retain the system to which they have for long years been accustomed. In regard to small insolvencies, moreover, I am in great hopes that they will be to a great extent got rid of when the Debtors Bill passes into law.

“The remaining sections of the Bill relate mainly to minor alterations. Sections 32, 53 and 66 extend the period during which the representatives of deceased suitors may apply to be entered on the record as plaintiffs or defendants. Section 33, restoring a provision of the Code of 1859, relaxes the stringency of the existing law respecting the dismissal of suits for default in giving security for costs. Section 34 enlarges the class of persons to whom commissions to examine witnesses may be issued, subject to such rules as the High Court may make in the matter. Sections 37, 38, 40 and 41 are to remove difficulties which at present beset ruling chiefs when they sue in our Courts.

“Section 44 is in accordance with the views of the Muhammadan Educational Endowment Committee, recently appointed by the Government of Bengal, and is intended to facilitate proceedings in suits relating to public charities. The Committee represent that it has been decided by a Divisional Bench of the Calcutta High Court (I. L. R. 8 Cal. 32) that the interest possessed in a mosque by those who live in the village in which it is situated, and are in the habit of worshipping in it, is not a direct interest within the meaning of section 539 of the Code ‘It would seem to follow that the real beneficiaries of a public trust, that is to say, those members of the general community who derive advantage from it in its ordinary operation, can seldom proceed under the section; while those whose interest in the foundation is more direct, as being entitled to share in its management, and who therefore can institute suits, are the very men who are likely to be guilty of malversation or other breach of the conditions of the trust. The Committee consider it most impolitic to deny the remedy to all except those who inflict the wrong, and would strike the word “direct” out of the section.’ We have adopted this suggestion.

"Section 47 is intended to get rid of an anomaly which arises under the present state of the law in regard to the dismissal of appeals by default, and is proposed by Mr. R. J. Crosthwaite, the Judicial Commissioner of the Central Provinces, who writes as follows :—

'This amendment is necessary, because, as section 551 stands now, an appellant can, if his appeal is fixed for hearing under that section, refrain from appearing, and then appeal from the decree of the first Appellate Court dismissing his appeal. The Court of second appeal will then have to consider the appeal and decide it, because the provisions of section 556 do not apply in the case of an appeal dealt with under section 551. When a first appeal is dismissed under section 556 for default, there is practically no second appeal, because the second Appellate Court must hold that, as the appellant did not appear in the Court of first appeal, that Court's decree dismissing the appeal was under section 556 correct; but when an appeal is fixed for hearing under section 551, and, the appellant not appearing, his appeal is dismissed, section 556 does not apply; and an appellant can thus ignore the Court of first appeal and take his appeal to the High Court. Section 556 does not, I think, apply, because there can be no doubt that the words 'on the day so fixed' mean 'the day fixed under section 552 for hearing the appeal.' This state of the law is anomalous, and, considering that a Court of second appeal is supposed to go by the findings of fact of the Court of first appeal, inconvenient. If an appellant does not appear on the day fixed for hearing, whether it be fixed under section 551 or section 552, his appeal should be dismissed; but he should have a right to apply for re-admission under section 558.'

"Upon the sections which follow from 48 to 59 I need not trouble the Council with any observations. But section 60 is of more importance. It embodies a suggestion made by the Judges of the High Court of Calcutta, who thus describe the difficulty which it is intended to cure :—

'In this province it is often difficult to tell whether a suit should be instituted in the Small Cause Court or a Court possessing ordinary civil jurisdiction. Numerous cases have been brought to the cognizance of this Court in which great inconvenience, hardship and injustice have been caused in this way. A suit is brought in the first instance in the Small Cause Court, and that Court declares that it has no jurisdiction and dismisses the suit. The plaintiff then institutes the same suit in the Munsif's Court, which, upon trial, gives him a decree. The defendant thereupon appeals to the higher Courts, and it is held that the Munsif had no jurisdiction, and accordingly the suit is dismissed. The result is that the unfortunate suitor gets no relief anywhere. And this same result also follows when the Court of first instance holds that it has no jurisdiction, and also when the suit is in the first instance instituted in the Civil Court and the suitor subsequently goes to the Small Cause Court. The Judges think questions of jurisdiction and errors as to jurisdiction should be susceptible of being dealt with and cured by the High Court by transfer, affirmation of decree or otherwise; and they think that the order of the High Court as to jurisdiction should be final.'

"I will not detain the Council by a detailed reference to the remaining sections of the Bill; but there is one important omission to which I desire briefly to advert. A recent decision of the Privy Council (*Raja Amir Hasan Khan v. Sheo Buksh Sing*, L. R. I. A. 237) has given a more limited construction to section 622 of the Code than had been put upon it by the Courts in India; and many suggestions have been made with a view to the extension of the revisional powers of the High Courts to all cases in which there had been a material irregularity in procedure or the decision was based on an erroneous view of the law. The Committee have not been able to adopt these suggestions, the more especially as they have been favoured with one by the Chief Justice of Bengal which would have the effect of doing away with second appeals altogether and substituting for them a right of application to the High Court as a Court of review in all cases in which it could be shown that a failure of justice had occurred. This suggestion, coming from so high an authority, deserves, and will receive, the most respectful consideration; but the proposal is of too sweeping a character to be hastily adopted, and the Committee did not think it desirable to delay their Report on this Bill for the purpose of consulting other authorities upon it.

"I have only to add that the draft has been twice circulated, in its original and in an amended form, to Local Governments and High Courts, and that the Bill as reported is the outcome of a most careful consideration on the part of the Committee of the criticisms which have been received from judicial officers and others engaged in the daily working of the Code, and therefore best able to

indicate the points in which it is susceptible of improvement. To these gentlemen I desire to tender my best thanks for the valuable assistance which they have rendered and which has, I hope, enabled the Select Committee to work out a series of amendments of the Code which will simplify and facilitate in many important respects the administration of justice."

The Council adjourned to Friday, the 16th March, 1888.

S. HARVEY JAMES,
*Secretary to the Govt. of India,
Legislative Department.*

SUPPLEMENT TO
The Gazette of India.

No. 11.} CALCUTTA, SATURDAY, MARCH 17, 1888.

OFFICIAL PAPERS.

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.

Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Summary for February 1888.

In February, pressure begins to fall generally throughout India. The steady increase which takes place during October, November, December and January reaches its maximum in the last-named month, and during February the decrease commences which lasts throughout the hot weather. In the present year the decrease between January and February has been unusually large, for whereas during January there was a general and rather large excess of pressure as compared with the average, there has during February been a slight to largish deficit. As a rule, the weather over Northern India is distinctly finer during February than during January. This has, however, hardly been the case in the present instance, as the unsettled weather, which prevailed in the north-west, west and centre of India during the latter part of January, continued during February. In Bengal and Assam also very unsettled conditions have at times prevailed.

On the 1st the general distribution of pressure was such as is characteristic of the cold season. A large area of high pressure (30.20" and above) lay over Sind, the Punjab, Rajputana and part of the North-Western Provinces and the Central Provinces, while relatively low readings were reported from the west coast and from the south of the Bay. On the west coast the decrease of pressure occurred more rapidly than is normally the case, and a feeble depression apparently lay between Ratnagiri and Bombay. At both Bombay and Kurrachee the north-easterly wind was blowing rather freshly. The weather was generally fine, the only rainfall reported being at Kurrachee and Jeypore. On the 2nd the distribution was more complicated and less normal. A broad band of relatively high readings stretched across Northern India extending from the Western Punjab to Assam, while almost equally high pressures were reported from

the Carnatic and the west of the Bay. At the same time low-pressure areas prevailed over Burma, and over Guzerat and Sind. The depression which on the previous day had been shown near Bombay had apparently passed northward to the Gulf of Cambay, while a separate and larger storm lay near Kurrachee. With this distribution of pressure the winds were in general very irregular in direction, but well-marked cyclonic circulations were shown over Western India. At Kurrachee the wind was blowing with a velocity of 21 miles per hour from north-east. The weather was very cloudy all over the north-west and rain had fallen at Kurrachee, Hyderabad, Jacobabad, Quetta, and Ajmere, as well at Darjeeling. On the 3rd, pressure decreased rapidly in the north-west of the Punjab and a fresh depression appeared in that region. Accompanying this additional disturbance there occurred a large extension in the rainfall area which included the whole of North-Western India, part of Central India, Sind and Guzerat. On the 4th, pressure rose over Western and fell over Eastern India. Rain ceased in Sind and Guzerat, but in Northern India it continued and extended eastward as far as Benares. On the 5th the weather improved. Rain was reported from Sibsagar, Dhubri, Allahabad and Nowgong, but elsewhere the sky had cleared considerably and conditions appeared more settled. Fine weather continued during the 6th, but on the 7th rain recommenced in Sind and Baluchistan, and during the 8th and 9th extended to the hill and submontane stations in the Punjab and North-Western Provinces. On the 10th the unsettled conditions were transferred from North-Western to North-Eastern India, and rather heavy rain was reported from almost all stations in Bengal and Assam. On the 11th rain still fell at several places in Bengal and Assam, but elsewhere the weather was fine. This fine weather continued during the 12th, but on the 13th at all the hill and submontane stations and also at those in Lower Bengal and Assam further precipitation was reported. From the 14th to the 17th showers of rain, generally of small amount, were of daily occurrence around the head of the Bay and in parts of Eastern Bengal and Assam, but over the greater part of India conditions were fine and fairly settled. On the 18th a brisk barometric fall accompanied with rain and a southerly wind were reported from Quetta, and on the following day rain was falling at several of the Punjab stations and at Jacobabad. On the 20th the rainfall had extended into the North-Western Provinces, while it had almost ceased in the Punjab; but on the 21st rain was reported from the west and north of the Punjab, the west of the North-Western Provinces, Jeypore and the Central Provinces. From this date until the 28th, showers of rain continued to fall at intervals over the Central Provinces, the Punjab and the west of the North-Western Provinces, but the amounts were generally small and on the whole the weather was fair. On the 29th the distribution of pressure and the winds were fairly normal, and the only rainfall reported was a few drops at Raipur.

In Southern India the weather calls for little remark. No rain whatever fell in the Carnatic and hardly any in any other part of the Peninsula. In Burma also the weather, as is generally the case, was very settled.

Pressure.—Has been below the monthly average almost everywhere. At the hill stations in North-West Himalaya, the deficit has been less marked than on the plains; and at Mount Abu, Pachmarhi and Wellington there has been an excess, trifling at Mount Abu, but considerable at Wellington. In Ceylon also there has been a slight excess. The deficiency has been on the whole greater over Northern and Central India than in the Peninsula.

Temperature.—Like January this was a generally cool month, though the relative coolness was less than in the preceding month. In Ceylon, the Carnatic, the Berars, in part of the Central Provinces and at a few places in Bengal and Upper India, there was indeed a slight excess of temperature. The greatest deficiency was $3^{\circ}4$ at Dera Ismail Khan, but this amount was closely approached at Jacobabad and Jeypore. Frost occurred regularly at the hill stations during the first half of the month, the lowest minimum reported being $27^{\circ}1$ on the 10th at Chakrata. Subsequent to the 15th, temperature rose fairly briskly, so that, while the highest maximum reported on the first was 92° at Salem, that on the 29th was 99° at Surat.

Humidity.—Except in Bengal the amount of moisture in the atmosphere has been generally in excess of the average.

Rain.—No rain has fallen during the month in Behar or the Carnatic, and very little in the Berars, the Deccan, Mysore or Burma. On the other hand, Sind, Cutch and Rajputana have received much more than the normal amount, and the Punjab, the cis-Gangetic portions of the North-Western Provinces, Bengal, Guzerat, the Konkan, and Malabar have all received a greater or less excess.

The following table shows the amount of rain and the difference from the average during the month of February 1888, according to districts, as far as is indicated by the telegraphic reports:—

DISTRICTS.	Number of stations.	Average rain-fall in February.	Difference from the average in February, 1888.
Punjab—West	7	1'43	+0'58
Do. East	4	1'15	+0'13
North-Western Provinces—Trans-Gangetic	9	1'25	—0'13
Do. do. Cis-Gangetic	3	0'28	+0'51
Behar	2	0'49	—0'49
North Bengal	2	0'84	—0'05
Assam—Cachar	3	1'71	—0'32
Lower Bengal—Chutia Nagpur	7	1'13	+0'19
Orissa—Northern Circars	6	0'43	+0'11
Central Provinces—South	7	0'38	+0'09

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending March 7th, 1888.

During the greater part of the week under review the weather over India has been very quiet, and principally remarkable for the general uniformity of pressure and the variability of the winds. At the close of the period, however, these conditions gave way and a depression appeared, as so many have done this season, over Guzerat, Rajputana and Central India, which was accompanied by very unsettled weather over the Central Provinces.

On March 1st a large area of relatively high pressure overlay Northern India stretching from north-west to south-east from Mooltan to Saugar Island, a second area overlay the Carnatic, and a third, the Upper Assam Valley, while relatively low readings were reported from the North Konkan, from Sind, and from Burma. The differences of pressure were, however, very slight, the range amounting to only 0'159". The winds varied considerably in direction, but there was a fairly general westerly current down the Gangetic plain and a south-easterly to easterly current over the Peninsula and the south of the Central Provinces. Temperature had risen, and there had been no rain. On the 2nd the barometer had fallen, except in Sind and Guzerat. The distribution was generally similar to that reported on the previous day, but a slight depression had

appeared near Indore, and rain had fallen over the Berars and the south of the Central Provinces. The range of pressure was less than on the 1st. The chart of the 3rd showed very uniform pressures and light variable winds. The weather was very fine, with, on the whole, rising temperature, and no rain beyond an insignificant shower at Colombo. On the 4th the uniformity of pressure had increased and the total barometric difference for the whole of the Indian region was only 0.098". The winds were exceedingly light and very variable in direction. The weather remained very fine, and the only rainfall reported was a few drops at Quetta. On the 5th the distribution of pressure was irregular, and such as has on several occasions prefaced the appearance of unsettled weather over Rajputana, Central India and the Central Provinces. A large area of high pressure overlay the Bay and a second area of high pressure the Punjab, while a shallow diffused depression lay over the western desert with an easterly wind at Quetta and a south-westerly wind in Sind. The sky was cloudy in Baluchistan, the North-Western Punjab, and Sind, and south-easterly winds prevailed at a large number of the central stations. Temperature had generally risen, and except at Quetta there was no rain. On the 6th the depression in the North-West had concentrated and become a well-marked disturbance with its centre near Indore. A cyclonic circulation of the winds was shown around it, and the sky had become more cloudy in the Punjab, Bombay and the Central Provinces, while rain had fallen at Jacobabad and Hyderabad (Sind), as well as at Belgaum. The high pressure over the Bay held steadily. On the 7th the barometric distribution was irregular; one area of high pressure was reported from the North-Western Provinces, the Central Provinces, and the Bay, and a second from the Punjab and Sind, while slight depressions were shown near Indore and over West Bengal. The wind direction was very variable, and rain had fallen at all the more central stations as well as at Belgaum, Ajmere and Jeypore.

Pressure.—The mean pressure of the week has been above the normal average of the month in all places. The excess has been greater in the North-West and Central Provinces and Bengal than elsewhere; but has been on the whole fairly uniform.

Temperature.—In Assam, the Punjab, and at the Hill Stations the weather has been very warm for the season, the mean temperature of the week in those regions having exceeded the monthly average. Elsewhere there has been a deficiency, but in several cases it was small and largely due to the method of comparison.

Humidity.—The air, except in the Central Provinces and on the west coast, has been rather drier than usual.

Rain.—No rain has fallen during the week in Burma, Bengal, the Punjab, or Madras, and in most other parts of the country such rain as has fallen has been light and generally confined to one station per province; but in the Berars, the Central Provinces, Sind and Rajputana, the fall has been more general though not very heavy.

The concluding table gives the total rainfall of the past week according to provinces:—

Divisions.	Number of stations.	Total rainfall.
Burma	0	0
Bengal and Assam	0	0
North-Western Provinces and Oudh	1	0.29
Punjab	0	0
Hill Stations	1	0.28
Ceylon	1	0.15
Malabar Coast	1	0.06
Bombay	1	0.61
Berars and Central Provinces	9	1.63
Guzerat and Central India	1	0.02
Sind—Rajputana	4	0.59
Madras	0	0

Asstt. Meteorological Reporter to the Govt. of India.

Simla, 9th March, 1888.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the State of the Season and Prospects of the Crops.

Madras.—*For week ending 10th March 1888.*—Slight rain in nine districts. Rainfall to date generally sufficient, but more wanted in parts of Vizagapatam, Bellary, Madura, Coimbatore, Salem and South Canara. Crops generally good but very slightly damaged here and there by disease, insects or want of rain. Wet crops under rain-fed tanks and in parts of Bellary and Madura have withered owing to deficient supply of water. Pasture generally sufficient but scanty in Malabar and in parts of Anantapur and Madura and decreasing in Vizagapatam and Coimbatore. Prices of rice and *cholum* generally falling, of *ragi* and *cumbu* generally rising where not stationary. General prospects favourable.

Bombay.—*For week ending 14th March 1888.*—Rain in parts of Poona, Sholapur, Belgaum, Kanara, Hyderabad and Upper Sind Frontier. Standing crops in Shikarpur benefited by the late rains. Standing crops fair in Thana and Colaba and good in other districts. Cotton-picking in progress in parts of Guzerat, Kathiawar and Southern Mahratta Country. Harvesting of late crops in progress in most districts of the Presidency Proper and Sind. Ploughing operations for next season's crops continue in Ratnagiri, Satara, Bijapur, Dharwar, Kanara, Poona and Kathiawar. Probable outturn of late crops 15 annas in Hyderabad. Opium crop in Baroda attacked by a disease called *khakri* and its probable outturn estimated at 8 annas.

Bengal.—*For week ending 13th March 1888.*—Weather has been unsettled for the greater part of the week, and showers are reported in almost all districts of Bengal Proper and in Balasore. *Rabi* crops promise well and are beginning to be harvested. Sugarcane and tobacco are good crops and are being cut. Opium is being collected with good outturn. Spring rice is still being transplanted and is progressing favourably. Rain has been very useful for ploughing, which is well forward. Indigo sowings are in full swing throughout Behar.

North-Western Provinces and Oudh.—*For week ending 14th March 1888.*—Rain fell in a few districts during the week. The weather is generally hot, the harvest is in progress and a good yield is expected. Opium collection is satisfactory. Markets are well supplied and prices are falling.

Punjab.—*For week ending 14th March 1888.*—No rain except a slight fall at Sialkote. Prices are very unsettled; in two districts rise is reported; in others prices are stationary or falling. Sowings of extra *rabi* and ploughings for *khari* in progress throughout the Province. *Rabi* prospects are reported good generally. Stock cattle are reported healthy. Fodder is scarce in some districts, but prospects are improving. Poppy crops average.

Central Provinces.—*For week ending 14th March 1888.*—Weather rather cloudy with slight rain in places. Prospects continue favourable. Hail has damaged the crops in a few places in Seoni.

Reaping and threshing of winter crops in progress.

Burma.—*For week ending 10th March 1888.*—Very slight rain has fallen in Akyab and Tavoy districts of Lower Burma and in the Bhamo, Myadaung, Mandalay, Shwebo, Kyaukse, Myingyan and Yamethen districts of Upper Burma. Progress of dry-weather crops continues favourable. Estimates of outturn of harvest remain the same as last week. Price of paddy has risen in Tharrawaddy, Shwegyin, Myadaung, Shwebo, Minbu and Tounghwingi districts; price of paddy has fallen in Akyab, Kyaukpyu, Thyetmyo, Mergui and Yamethen districts.

Assam.—*For week ending 14th March 1888.*—Weather cloudy and stormy during the week. Rain has done good. Gathering of mustard over; pressing of sugarcane still continues. Early rice is being sown and ploughing continues. A slight shock of earthquake.

Mysore and Coorg.—*For week ending 14th March 1888.*—Slight rain in the Kolar district. Standing crops in good condition. Sowing of paddy and planting of sugarcane almost completed throughout the station. Outturn of crops generally favourable. Condition of stock cattle good.

In Coorg there are no crops on the ground at present. Prices are stationary

Berar and Hyderabad.—*For week ending 14th March 1888.*—Slight rain during the week. Harvesting of wheat, linseed and gram nearly completed and threshing commenced. Land is being prepared for the ensuing *kharif* crops. Fodder continues to be insufficient in the Amraoti district. Prices are stationary.

Hyderabad has had no rain during the week. Agricultural prospects continue good. Prices are stationary.

Central India.—*For week ending 14th March 1888.*—There has been slight rain in all the Agencies except Gwalior and Neemuch. No change in agricultural operations and condition of standing crops since last report. Probable outturn below the average in Western Malwa, Bhopawar and Goona; in other places good. Crops slightly damaged by hailstone and blight in Western Malwa, Bhopawar and Goona. Condition of agricultural stock improved in Bhopawar. No change in other Agencies since last report. Pasturage and fodder continue the same. Prices of food grains are falling in Bundelkhand, no change in other Agencies. Opium crops are reported fair in Western Malwa, good in Goona and Neemuch, bad in Bhopawar, and not reported from other Agencies.

Rajputana.—*For week ending 14th March 1888.*—Some rain fell in Deoli, Tonk, Beawar, Todghur, Jeypore, Ulwar, and in Bikanir. Agricultural operations satisfactory. Standing crops good generally. Crop prospects and agricultural stock good. Damage, more or less, from hailstorms in the Kotah and Ajmere districts. Pasturage or fodder scarce in Dholepore and Ulwar. Prices are steady but tending to fall. Opium damaged at places by hailstorms.

FINANCIAL STATEMENT for 1888-89.

Section I.—Introduction.

The Financial Statement of March 1887 admittedly left the financial position in a state of unstable equilibrium. Its key-note was the following paragraph, in which it was stated that the Government of India had, in consequence of increasing expenditure, exhausted all other resources available to it, but considered it too soon to address itself to the question of new taxation:—

“ It may be added here that, in view of the causes which have led to an increase of expenditure, and to the other considerations which present themselves in connection with the financial situation, it is not the intention of the Government to add to existing taxation. The growth of expenditure in the Estimates of 1886-87 and 1887-88 arises in part from war charges and in part from a further fall in the exchange; and the Government is of opinion that it would be undesirable to seek to meet the deficit at present arising from these causes by the imposition of further burdens. The attention of Her Majesty's Government has, during the year now closing, been turned to the difficulties caused to the Government of India by the fall in silver, and the question of gold and silver currency has been submitted to a Royal Commission, the result of whose deliberations must be awaited. The present military expenditure in Upper Burma is of a temporary nature; and although considerable sums must be expended during the next two or three years in opening up communications in Upper Burma, and in providing the public buildings necessary for the accommodation of the garrison and for the conduct of business, it may be expected that, with the return of order, the revenues of Upper Burma will expand, and that its resources will become, in an increasing degree, available. For the present, therefore, until the outcome of present difficulties is seen more clearly, the Government considers that, in providing for the necessary expenditure arising from its administrative needs, it should avail itself of resources which, in times of surplus, are assigned from its revenues to the construction of railways or to the diminution of the amount which it borrows annually for railways.”

2. The situation during the course of the year became, in an increasing degree, more unfavourable. It soon became manifest that the reduction of Military Expenditure in Burma, which the Budget Estimates had hoped for, could not, for the present, be effected in such a considerable degree as to afford to the finances sensible relief. Opium prices fell off with greater rapidity than could have been foreseen, and our opium revenue threatened to fall short of Budget by Rx. 400,000. Railways from the first instead of improving, as the experience of former years led us to expect, showed returns that were worse than those of 1886-87. Exchange, which seemed in February 1887 to have re-established itself for the time, rapidly dropped and settled at a rate of from $\frac{1}{2}d.$ to $\frac{3}{4}d.$ less than that which had been realized in 1886-87. Salt and other revenues shewed favourable returns, and the expenditure, apart from Exchange, was well within the estimates; but these favourable features were greatly outweighed by the unfavourable results which I have mentioned.

3. The causes which led to the deterioration here explained were not, for the most part, such as seemed likely to disappear with the close of the financial year then current. The Government therefore, before the first half of the year had expired, found itself face to face with the question of extra taxation. The result of their deliberations is already known to the public. It was determined that it was necessary to seek improvement of Revenue to an extent of nearly Rx. 2,000,000. Some small items of new Revenue presented themselves in connection with the new Province of Upper Burma. And the Government of

India had already been considering the question of raising an import duty on petroleum. But these small items went but a short way to fill up the gap, and the Government, as is already known, came to the resolution of restoring the eight-annas salt duty which had been remitted in 1882. The increase of salt duty was imposed, on 19th January 1888, by a notification issued under Act XII of 1882, and the necessary legislative measures were taken to raise a duty on petroleum.

4. A statement of the financial position was made on the occasion of introducing this Bill in January 1888, and the fulness of that statement, and of the discussions that took place upon it, a week later, will excuse me from entering, in this place, upon any explanations of a general character. I have to present little or nothing that is new, so far as the general position is concerned, and shall pass at once to the elucidation of the details which will apply to the particular estimates of the year 1888-89 the general conditions then set forth.

Section II.—Accounts of 1886-87.

5. The following statement shews the actual figures of the Accounts of 1886-87, and compares them with those presented as Revised Estimates for that year, in the Financial Statement of March 1887. The results agree in the main with those which were announced to Parliament in the Under-Secretary of State's Financial Statement of September 9th, 1887,(a) and which had already been published in the *Gazette of India* of April 30th (page 209) :—

		1886-87.		Accounts Better.	Accounts Worse.
		Revised Estimate.	Accounts.		
REVENUE.					
India (Imperial and Provincial)	Rx.	75,754,200	77,010,111	1,255,911	...
England	£	231,600	237,651	6,051	...
Exchange	Rx.	85,900	89,372	3,472	...
TOTAL Rx.		76,071,700	77,337,134	1,265,434	...
EXPENDITURE.					
India—					
Imperial	Rx.	35,736,100	36,181,626	...	445,526
Provincial	Rx.	21,200,900	21,112,381	88,519	...
Adjustment of Provincial	Rx.	—577,300	+35,665	...	612,965
England	£	14,373,000	14,409,949	...	36,949
Exchange	Rx.	5,338,500	5,419,086	...	80,586
TOTAL Rx.		76,071,200	77,158,707	88,519	1,176,026
SURPLUS .		(b)500	(c)178,427	177,927	

(a) "There has been an increase in the Revenue of Rx. 1,100,000; of which the Land Revenue gives Rx. 476,000; Salt Revenue, Rx. 117,000; Excise Revenue, Rx. 109,000; Railways, Rx. 166,000; and Revenue under other heads, Rx. 232,000; making a total improved Revenue, as I have said, of Rx. 1,100,000. Of this improved Revenue, however, Rx. 420,000 belong to the Provincial Governments, leaving an improved Revenue, for Imperial purposes, of Rx. 680,000. Then, on the Expenditure side, the expenditure on the Army has been Rx. 400,000 more than was anticipated. The other heads, besides that of the Army, have altogether improved to the extent of Rx. 504,000, of which Rx. 202,000 belong to the Provincial Governments, leaving a net improvement on these other heads of Rx. 302,000. Altogether, the expenditure has been worse than was anticipated by Rx. 98,000; therefore, on the whole, taking into account the increase of Revenue and the increase of Expenditure, there has been a net improvement of Rx. 582,000, which will turn the surplus of Rx. 62,110, shown in my statement, into a surplus of Rx. 642,110 "

But against last figure the Special Defences expenditure was afterwards charged. See footnote under paragraph 11.

(b) Before deduction of Special Defences expenditure.

After deduction for Special Defences expenditure. See footnote under paragraph 11.

6. It will be seen that the main features in this comparison are that the Revenue in India was Rx. 1,255,911 better than the Estimate of Rx. 75,754,200, and that the "Imperial" Expenditure in India was Rx. 445,526 worse than the Estimate of Rx. 35,736,100. Under other heads there is very little difference from the Revised Estimate, and the only case which calls for any remarks is the small excess of expenditure in England, which is due to some unexpected Military charges. A complete account of the differences, and of the accounts generally, will be found in the Appropriation Report of the Comptroller and Auditor General, published in the *Gazette of India* of March 24th.

7. There is, apparently, a large difference under the head of "Adjustment of Provincial Expenditure," but it requires no separate explanation, as it is really the outcome of the large excess of Revenue, which has already been alluded to, and which amounts, as just stated, to Rx. 1,255,911. Now, although the expenditure is distributed between Imperial and Provincial according to its class, so that some kinds of expenditure are Imperial and some are Provincial, the division of the Revenues is quite different; Imperial and Provincial share, in definite proportions, the same Revenues. Accordingly, the improvement of Revenue by Rx. 1,255,911 was distributed between the Imperial Account, which received Rx. 731,465, and the Provincial Account, which received Rx. 524,446. According to the Revised Estimates, the Provincial Expenditure was to be met as follows:—

	Rx.
To the extent of the Provincial Revenues of the current year	20,623,600
By drawing upon Balances charged off the Revenues of former years	577,300
Total Provincial Expenditure as above	21,200,900

But by the improvement of their share of the Revenue they not only met the whole of their expenditure out of their current year's Revenue, but were able to lay by a small amount of Rx. 35,665. In other words, their account stood thus:—

	Rx.
Total Provincial Expenditure (slightly less than estimated)	21,112,381
Provincial Revenues, Rx. 524,446 better than estimated	21,148,046

And the general Revenue Account therefore, instead of having to be relieved by the charge of Rx. 577,300 to past accumulations, had to be charged first with the whole of the expenditure, and then with the write-off of the further addition of Rx. 35,665 to these accumulations.

8. The two matters that require explanation are therefore the better Revenue in India of Rx. 1,255,911, and the excess Expenditure in India of Rx. 445,526.

PRINCIPAL REVENUE HEADS.

9. Of the excess of Revenue the explanation is that the Revenue of the month of March 1887 was altogether exceptional.

The Estimate of our principal Revenues which was published on March 26th, 1887, was as usual a statement of eleven months' actuals (April to February), and an estimate for the remaining month of March. There are difficulties in estimating for the month of March which I shall afterwards explain; and the Revenue of March 1887 certainly altogether exceeded our anticipations. The consequence was that in publishing, one month after the Budget Statement, the usual monthly statement of accounts (*Gazette of India* for April 30th, 1887), we shewed

the following large excesses of Revenue over the Revised Estimate. I append, for purposes of comparison, the actual figures as now made up:—

(In thousands of Rx.)	Budget State- ment of March 26th, 1887.	Monthly State- ment of April 26th, 1887.	Actuals as now made up.
Land Revenue	23,170	23,610	23,653
Opium	8,900	8,950	8,943
Salt	6,540	6,660	6,658
Stamps	3,720	3,750	3,751
Excise	4,270	4,370	4,375
Provincial Rates	2,940	3,010	3,000
	<u>49,540</u>	<u>50,350</u>	<u>50,380</u>

The unusually high receipts of March, therefore, under the six principal Revenue heads, account for Rx. 810,000 of the improvement of Revenue. The greater part of this is under Land Revenue, where the Receipts were Rx. 440,000 more than estimated. It may be noted that in the two months of March and April we collect more than Rx. 6,000,000 out of the year's Revenue of Rx. 23,000,000; and a more or less favourable season, or a more or less active collection, may well make the portion of Revenue which comes within March vary by half a million. The last two years have been exceptionally favourable, for, whereas the collections of March had never before exceeded Rx. 4,360,000, they came up to Rx. 4,730,000 in 1885-86: and in the next year—that now under discussion—they exceeded Rx. 5,000,000. In the same way the collections under Excise were also nearly Rx. 40,000 higher than those of any previous March.

Besides this, Rx. 810,000 under the principal heads of Revenue, the Railway receipts shewed an improvement of Rx. 210,000; and this improvement is also due to the active traffic which developed itself in the last month or two of the year.

ARMY EXPENDITURE AND SPECIAL DEFENCE WORKS.

10. The improvement in the Revenue figures calls for no further remark. We turn now to the excess expenditure in India of Rx. 445,526.

This is for the most part under two heads, namely—

	Revised Estimate.	Accounts.	Excess.
	Rx.	Rx.	Rx.
Special Defence Works	(Charged to Loan Funds)	123,110	123,110
Army Expenditure	14,068,700	14,020,516	551,816

11. The first of these charges refers to a programme of Military Works for the defence of our Harbours and of our Frontiers, which was alluded to in paragraph 24 of the Financial Statement for 1886-87. The Secretary of State, at first, following the example of the fortifications scheme of Lord Palmerston, directed this expenditure to be shewn outside the Revenue Account. But the ground on which this policy was adopted in England, namely, the practical certainty that the amount which has been procured in the first instance by loan, will be paid off out of the surpluses of future years, unfortunately does not apply to our existing financial circumstances. The Secretary of State, accordingly, as was explained in the Financial Statement made to Parliament last September,* has revised

* Now, these special defence works consist of frontier forts and harbour defences. They are most essential to the safety of India, and the Government are obliged to push them on with the utmost possible expedition. But as these works are not productive works, it is contrary to the principles on which Indian finance is conducted that the charge should be otherwise than one against Revenue, and there is no doubt that if there is Revenue, and if the Revenue will bear such charges, they ought to be charged against Revenue. No one can have any desire that extra taxes should be placed upon the people of India for the purpose of meeting charges of this kind, and the Secretary of State has no intention of suggesting to the Government of India that any such extra taxes should be imposed. As regards the charge for 1887, the Committee will remember that the surplus which I was able to announce in 1886-87 would be large enough to bear the charge in 1886-87 for these special defence works; and, therefore, it is the intention, if the anticipation be realized of the Secretary of State, to pay for the special defence works out of the surplus of 1886-87.

this decision; and while he agrees with the Government of India in thinking that for expenditure of the kind, we ought not to have recourse to any increase of taxation, he considers that the actual state of our finances is more plainly set forth by an account, which charges this expenditure against Revenue even at the risk of shewing a deficit, than by one which might delude us into thinking we had a surplus of Revenue, by leaving out of the reckoning this heavy, though temporary, unproductive expenditure.

12. As regards the Army Expenditure, it was again, as in the case of the Revenue, in the Accounts of the month of March, that our Estimates were overpassed. The statement of account published on 26th April 1887, to which I have already referred, shewed that for Military expenditure there had been an issue of Rx. 13,000,000 from the treasuries, as against Rx. 12,700,000, the estimate we had made a month earlier. This excess expenditure was practically entirely in connexion with the operations in Burma, and mostly arose out of heavy claims presented and paid during March, after the date of the information on which the Estimates were based. The Final excess, it will be seen, is still larger than the Rx. 300,000 then shewn.

13. These figures, therefore, dispose of the Revenue Account of 1886-87. The Revised Estimate anticipated an equilibrium of Expenditure and Revenue. In the end we gained by an excess of Revenue, which, after deduction of the Provincial share, gave the Imperial Accounts an improvement of Rx. 731,465; but as we had against this an excess of Imperial expenditure of Rx. 445,526 (including special defences now first brought within the Account), and also an excess in the charge for Exchange, the surplus of Rx. 500 taken in the Revised Estimates was increased only to Rx. 178,427.

14. The Capital Expenditure upon Railways and Productive Irrigation Works fell slightly short of the anticipations of the Revised Estimates, namely—

	Revised Estimate.	Accounts.
	Rx.	Rx.
Railways	5,170,500	5,123,105
Irrigation	631,000	547,379

Section III.—Estimates, 1887-88 and 1888-89.

15. In the statement of the financial position which I made on January 27th, 1888, I presented an abstract of our account in a form which I thought suitable for the explanations I had then to give. I showed that the position in the Budget Estimate of 1887-88 was a position of practical equilibrium. I showed that we had to face a loss of Opium Revenue of Rx. 300,000, and a falling off of Railway Revenue by Rx. 400,000; that the charge for Exchange had increased by Rx. 720,000; and that we proposed to meet these by enhancing the Salt Duty (Rx. 1,725,000), by a duty on Petroleum (Rx. 65,000, since raised to Rx. 100,000), and by minor measures in Burma (Rx. 100,000).

The result, I then estimated, would be to improve our financial position from equilibrium to a surplus of Rx. 470,000; or more accurately, from a surplus of Rx. 17,000 to one of Rx. 487,000.

16. I reproduce below the same form of abstract account which I then made up, repeating in the first column the figures which I then gave as those of the Budget Estimates of 1887-88, and shewing in the second column the same figures as they would stand after the losses and gains just summarized. As I have, for present purposes, no object in displaying the Exchange charge separately, I have distributed it in the second column over the six heads which are affected by it. This second column, therefore, shews the general financial posi-

tion as it was left after the measures which were then explained and which have now, except as regards excise in Upper Burma, been brought into operation:—

(In Thousands of Rs.)	Budget, 1887-88.	New Finan- cial Position, 27th January 1888.	Revised, 1887-88.	Budget, 1888-89.

Expenditure on Special Defences (f)	464	750	569	1,121

(a) Imperial Marine, which was included under this head in the statement of January 27th, is now separately shown below.

(b) Excluding the amount charged upon accumulated Provincial Balances brought forward from former years.

(c) Increased revenue as above explained.

(d) Diminished revenue as above explained.

(e) The excess of the figures of the second column, over those of the first column, is the amount of the charge for exchange.

(f) Includes Exchange.

17. I have added in this abstract, in the same form and in parallel columns, the Revised Estimates for 1887-88 and the Budget Estimate for 1888-89. The former should differ from our standard statement of January 27th last (*i.e.*, the second column of figures) only by such special receipts and charges as we may consider peculiar to the year itself, in the sense in which it may be said that the figures of any particular year necessarily differ, more or less, from what may be considered the general average financial position for that year. The Budget figures of 1888-89 should differ from the same standard, in this respect that, of the progressive revenues, we have one year's additional advance, and that of so much of our expenditure as is progressive, we have also one year's additions.

BASIS OF REVISED ESTIMATES.

18. Before I proceed to explain these special features, I think it well to shew exactly to what extent we can depend upon our Revised Estimates as representing the probable actual outturn of the accounts.

The date upon which our Estimates are presented to the public is practically determined by the provisions of Section 53 of the Act of 1858 "for the better government of India." This section prescribes that "the Secretary of State * * shall, within the first fourteen days * * * after the first day of May in every year, lay before the Houses of Parliament an account for the financial year preceding that last completed * * together with the latest estimate of the same for the last financial year."

Strictly speaking, the "latest Estimate" here referred to is one which we now prepare, about the beginning of December, on the basis of six months' completed accounts; but our methods of account are now so much more perfect than in 1858, and communication with England so much more punctual, that it is out of the question that we should present to Parliament in May, an estimate founded on facts of no later date than the previous September.

We have, therefore, for many years past, arranged the preparation of our "Revised Estimate," so that it may be the "latest Estimate" presented to Parliament in the first fortnight of May; and this practically means that the Estimate must be completed some time in March.

19. By March 20th we have collected the preliminary accounts of revenue and expenditure for February, of which the leading figures, compiled from returns furnished by each of the 200 treasuries at which revenue is received and money issued for expenditure, are published every month in the Gazette. Thus, at the time of the issue of the Revised Estimates, we know, in very considerable detail, the receipts and expenditure of eleven months of the year; there remain only one month's actual transactions to be estimated.

20. Unfortunately this one month of March is by far the most difficult of estimate of any in the year. To the difficulty of estimating the receipts under Land Revenue, I have alluded in paragraph 9, and the same thing occurs under other heads. Provincial rates are collected with Land Revenue, and there is the same uncertainty in their case, as in the case of Land Revenue, how much will come in in March and how much in April. We are in the heart of the Rice-export season, and an early or a late season makes a great difference in the distribution between the current and the next financial year, of the Rx. 700,000 which the duty each season brings into our treasury. Railways, of which the gross earnings average over Rx. 1,500,000 a month, are at their busiest time, and all Public Works expenditure is in its most active phase.

It is thus evident that a very full knowledge of the transactions of eleven months is not in itself an adequate equipment for making the Revised Estimate for the whole year. In practice, we make a moderate estimate only for the month of March, and as the actuals of that month are apt to be better than our Estimate, the result—as in the case of the Estimate of the year 1886-87—usually is that the accounts of each year give better results than the Revised Estimates.

21. The final results are known to us within moderate limits of error before the end of April (see paragraph 9 above); and if our Revised Estimates could only be put off for one month later, and be closed on April 20th, instead of March 20th, we could present the account of the year with some assurance of its accuracy in all its main features. But as already explained, the terms of the Act of Parliament practically forbid this course, and require us to close our estimates while the uncertainty of the month of March still hangs over us.

GENERAL COMPARISON OF REVISED WITH BUDGET.

22. The Revised Estimates for 1887-88 work out, it will be seen, to a deficit of Rx. 2,447,800, without reckoning the expenditure upon Special Defences, which, in the Budget Account, was charged to Loan. This is worse than the Budget Estimate by Rx. 2,464,500.

23. The main differences we may account for at once under three heads—

First, the sterling charges for interest on debt have increased from £2,630,100 Budget, to £3,365,700 Revised, an increase which costs us, including Exchange, Rx. 1,059,000. This charge is really outside any consideration of our financial position, as it arises entirely through a special operation, which throws upon us the payment, within one year, of five quarters' interest upon forty-eight millions sterling of debt.

Secondly, the Burma Military charges have—as I intimated in my Statement of 27th January—largely exceeded the Budget Estimate. The excess, as will be seen from the Abstract Statement above given, is put down at Rx. 830,000, and will be explained in greater detail in the Section relating to Army charges.

Thirdly, there is the great loss by the fall in Exchange, which I explained, on 27th January, to amount to about Rx. 710,000 upon expenditure included in the Budget.

24. These three items, therefore, account for a deterioration in our accounts of Rx. 2,599,000; so that, apart from these three causes, we have, on the whole, an improvement over Budget by Rx. 135,000.

This, as usual, is the balance of several losses and several gains. On our principal Revenue accounts, it will be seen, if reference be made to the statement in paragraph 16, we have received Rx. 54,556,000, against an estimate of Rx. 54,127,000, as the gain under Salt, Excise, Stamps, and other heads has more than covered the loss of Rx. 349,000 under Opium. Salt has given us Rx. 119,000 (as we have probably lost as much during February and March, by the temporary disturbance of trade, as we have gained by the enhancement of duty). Excise and Stamps contribute Rx. 409,000, and Customs have been very productive, giving a return of Rx. 114,000, in excess of Budget.

The Railway account is worse than Budget by Rx. 302,000, for both the net earnings have fallen off by Rx. 78,000, and the charges against them have increased, quite apart from any question of exchange, from Rx. 10,854,000 to Rx. 11,078,000.

On the other hand, there have been savings or excess receipts, under several of the heads which, in the abstract statement, we have grouped as Expenditure heads. Among these we may note particularly an increase of Telegraph receipts of Rx. 131,000, which must for the most part be put down as a set off against the excess of expenditure in Upper Burma, where the Telegraph charges of Public Departments are very high.

The enumeration of other smaller differences may be summed up in saying that, while we have found it necessary, during the course of the year, to make additional grants for expenditure in Upper Burma, for Irrigation, for Army charges, and for Political Expenditure, and in a few other matters, we have, on the whole, obtained, under other heads, sufficient savings to meet the charges so involved.

GENERAL REMARKS ON BUDGET ESTIMATES FOR 1888-89.

25. The Budget Estimates will be best explained by comparing the figures with the standard financial position as explained on 27th January—that is, by a few words of remark in comparison of the second and fourth columns of the statement in paragraph 16.

26. The first question we have to settle, in casting up the Budget figures, is the rate of exchange at which they are to be taken. That rate has been singularly steady throughout 1887-88,—rarely less than 16½d., and rarely higher than 17d. It is certain that, upon Council Drawings of 1887-88, the exchange will be

very close to 16'9d., or, putting it in the way that more nearly explains its effect upon our accounts, the Exchange charge will be as nearly as possible Rx. 42 per £100. The rate has dropped for the moment since the beginning of March; but the drop seems to be, partly at least, connected with the heavy drawings of the last month or two, and as drawings will be on a smaller scale in 1888-89, we may reasonably hope to realize, on the whole, a rate equal to that of 1887-88. We have, therefore, reckoned the Exchange in the Budget Estimates at Rx. 42 for every £100.

The comparison of the second and fourth columns is, therefore, not affected by any difference in the rate of exchange.

27. The result, it will be seen, works out to a surplus only a little different from that which we anticipated; that is, to put matters from the point of view stated in paragraph 17, the one year's increase of revenue nearly covers the one year's increase of expenditure. In one respect, the year 1888-89 falls a little short of the standard we have established, for we do not, in that year, fully come up to our new standard of enhanced salt revenue. In Opium, too, we anticipate a smaller standard of revenue than in January last; but the revenue under Excise and Stamps and other heads is already sufficiently far advanced, beyond our standard, to cover these deficiencies and give us, on the whole, an improvement of Rx. 495,000, under our principal Revenue Heads.

28. In the Railway Account, the estimates are moderately taken. We estimate for better earnings, but the charges against them equally advance, and we have a net excess outgoing of Rx. 2,115,000 against Rx. 2,252,000 of our standard account.

29. With the exception of the Army charges, the Expenditure heads are estimated at amounts not greatly differing from the standard of expenditure, for which we explained in January that we had to provide. The increase of Civil Expenditure is, on the whole, only one per cent. The heads of Post Office, Telegraph, and Mint, we are warranted, by the figures of the current year, in putting down at a considerably lower figure of net charge than the Budget Estimates of 1887-88. The grants for Imperial Civil and Military Works have been cut down, as far as possible, to meet the existing financial necessities. Provincial Civil Works shew an increase, the necessary result, under the provincial system, of the share of increase of revenue which falls within their account.

30. The main increase under the Expenditure heads, comes under the head of Army, where, without reckoning the extra expenditure in Upper Burma, the net outgoings are estimated to increase from Rx. 17,763,000 to Rx. 18,223,000. This increase of expenditure cannot at present be avoided; it is a matter in which, for the time, financial considerations must of necessity yield to the more pressing requirements of the military position. The estimates of extra Military expenditure in Burma are placed at a much lower figure than the actual charges incurred in 1887-88. Certain special causes of increased expenditure, which were present in 1887-88, are not likely to repeat themselves in 1888-89, and measures are being taken to reduce the scale of expenditure on the force serving in Upper Burma.

31. Having completed this more general review, I pass on to an examination of the main heads of Revenue and Expenditure set forth in the statement in paragraph 16 above.

LAND REVENUE.

32. The figures of Land Revenue shew considerable irregularity when they are made up by the financial year, as will easily be understood from the circumstances stated in paragraph 9. But if the accounts are made up by the 12

months ending September, so as to close at a time when the collections of one season are for the most part finished and those of the next not yet begun, the figures present a more regular appearance and shew a steady advance of revenue year by year.

Land Revenue during the twelve months ending September 30th.

(In thousands of Rs.)	1881.	1882.	1883.	1884.	1885.	1886.	1887.

TOTAL	21,476	21,617	21,657	21,972	21,951	22,210	22,510
See Note	665	694	677	676	734	811	880

The figures in the lowest line are the alienated Land Revenue of Bombay, which, in the system of accounts of that province, are added on the Revenue side, and charged again as expenditure under Assignments, Land Revenue, and Police. The amounts are neglected in the statement itself.

It will be remembered that a portion of the total receipts of Land Revenue is in the accounts shewn under the separate head of Irrigation.

33. Although the growth of revenue shown in the above figures has been very steady, it can hardly, from a financial point of view, be said to be satisfactory in amount. It has been less than one per cent. a year, and is on the whole a poor return for the money which Government has spent, in the form of railways and of canals, in improving its estate.

But the fact is that the period covered by the above statement represents, in a general way, the close of the 30 years' settlements in several of the provinces, and the Government is only now beginning to reap its share in the advance of the past two or three decades. Settlement operations are at present being carried on on a more extensive scale than at any previous time, and we have every reason to expect a handsome increase of revenue under this head.

NEW SETTLEMENT SYSTEM.

34. During the last few years (and in a great measure in preparation for this re-settlement of revenue) a very great improvement has taken place in Northern India in the administration of this important head of revenue and in the means adopted by the Government to assess and settle from time to time that share of the produce of the land which has in all ages been the main source of the revenue of the sovereign powers in India.

As no systematic review has recently been published of the position and prospects of this our most important head of revenue, I propose to take up the subject in some detail, both from an administrative and from a financial point of view, the materials having been supplied to me by Sir Edward Buck, the Revenue Secretary to the Government of India, to whom personally is due by far the largest share of the credit of the improvements effected.

35. The system of land-assessment has hitherto, in every Province, involved the complete survey, field by field, of every village—an operation

which was rendered necessary by the absence of correct maps at the commencement of the 30-year period. The object of the system now introduced is to preserve, and to correct up to date, the records upon which the surveys and settlements are based, so that the re-settlements, when they fall due, may be made upon existing records, and may not require an elaborate investigation *de novo*. The maps which have been provided by the great cadastral survey which has now almost drawn to an end, are in future to be corrected up to date from year to year by permanent establishments in which the patwārís or village accountants occupy the most important place. In the same way the settlements now being completed have involved a complete revision of all records-of-rights including details of the occupancy of every field, and these records, like the maps, are in future to be maintained from year to year by the permanent establishments. The assessment included also the valuation of the soil and productive powers of every field; but the valuation made during the past 30 years will in future revisions of settlement be accepted without material alteration. Three important elements of expenditure have thus been eliminated from future settlement operations, *viz.*, the cost of periodical field surveys, of revisions of records-of-right, and of soil valuations. The introduction of the new system is made possible both by the more complete maps and records which have been supplied by the operations of the past 30 years, and by the creation of Agricultural Departments which are permanent Departments of Survey and Settlement.

36. An examination of the cost under the old and new systems has recently been made in pursuance of the enquiries of the Finance Committee with the object of ascertaining the financial effect of the new arrangements and the probable cost of future settlement operations. This investigation is not complete, but it points to a maximum expenditure, in future, of ₹100 a square mile, including the cost of additional establishment, and in some Provinces to a considerably lower figure. The comparative results are shown in the following table, in which a maximum rate of ₹100 is applied to all provinces:—

PROVINCE (EXCLUDING ABBAS).	Rate per square mile under the old system at rates recently prevailing.	Average expenditure per annum at rates in preceding column.	Average expenditure per annum at the maximum rate of ₹100 per square mile.
	₹	Rx.	Rx.
North-Western Provinces and Oudh	350	115,000	30,000
Punjab	200	50,000	25,000
Central Provinces	220	35,000	15,000
Bengal	350	17,500	5,000
Madras	440	70,000	15,000
Bombay	260	65,000	25,000
TOTAL	303	352,500	116,000

showing an ultimate annual saving of Rx. 237,500.

The above table is based on an estimate of the maximum cost which may be incurred in the revision of assessments when the new arrangements have been completely established. In the meantime some saving has been already made by their partial introduction and by measures which have recently been taken to accelerate the current revisions of settlement. Under the programmes which have been arranged in recent conferences with the local authorities, there has been effected a saving either in the expenditure on survey and settlement, or in the more punctual recovery of increments of new revenue, which, in three Provinces—the Central Provinces, Punjab, and Madras—is estimated at a gross amount of Rx. 2,000,000 during the next ten years, or an average of Rx. 200,000 a year during the next decade. In these and other Provinces the new increments of Land

Revenue to which the Government is entitled will henceforth be assessed and collected up to date, while hitherto they have in many cases come into force only several years after the date of the expiry of the old settlement.

37. The general growth of the Land Revenue is exhibited in the following table:—

Table showing growth of Land Revenue (including Permanently-settled Tracts).

(The figures are thousands of Rx.)	Receipts, 1856-57.	Receipts, 1870-71.	Average annual growth (14 years).	Percentage of increase (14 years).	Receipts, 1886-87.	Average annual growth since 1856-57 (30 years).	Percentage of increase (30 years).	Receipts, 1890-91 (rough estimates).	Average annual growth since 1870-71 (20 years).	Percentage of increase (20 years).
North-Western Provinces	3,920	4,130	15	5	4,390	16	12	4,560	21	10

Bengal	3,540	3,760	16	6	3,740	7	6	3,800	2	1
Madras	3,800	4,400	43	16	4,860	35	28	4,900	25	11
Bombay(a)	2,150	2,950	57	37	3,370	41	56	3,450	25	17
Assam	80	210	10	162	400	11	400	420	10	100
Lower Burma	410	600	14	46	1,220	27	197	1,230	31	105
Minor Provinces	20	20	—	—	120	3	500	120	5	500
	17,300	19,960	190	15	22,280	166	29	22,810	142	14

(a) Excluding Alienations.

The figures show actual collections both of Land Revenue and of miscellaneous items classed as Land Revenue, *e.g.*, sale-proceeds of waste-lands; water-rates in Madras; nominal revenue assessment on lands assigned for service in Bombay; capitation-tax and receipts from fisheries in Burma and Assam.

38. Three periods are taken, *viz*:—(1) the first 14 years after the mutiny, during which the growth was at the rate of Rx. 190,000 a year; (2) a period of thirty years from the mutiny to the present time, during which the growth was at the rate of Rx. 166,000 a year; (3) a period of twenty years (partly estimated) from 1870-71 to 1890-91, during which the growth is at the rate of Rx. 142,000 a year.

39. It will not fail to be seen that, while the fourteen years preceding 1870-71 shewed an annual increase of Rx. 190,000, the rate of increase in the twenty succeeding years has averaged only three-fourths of this. The reasons for this are, that the first period was, in many parts of India—Oudh and Orissa for example—a period of active re-assessment and settlement, and that, therefore, during the second there was less of the growth of revenue which comes in from settlement operations; that a large accession of land revenue occurred after the mutiny in consequence of confiscations; and finally, that there was, between 1860 and 1870, a rapid increase in the cultivated area of the provinces of Bombay and Madras, in which the system of land-settlement is such that newly-tilled land comes under annual assessment, and in which the demand for cotton during the American war gave a powerful impulse to cultivation. On the other hand, a corresponding check to cultivation occurred in the same Provinces during the last of the three periods in consequence of the drought of 1877-78.

40. Notwithstanding these causes of exceptional growth in the beginning of the post-mutiny period, it may reasonably be expected that the capital outlay which the Government has recently devoted to irrigation and railways will, dur-

ing the next few years, bring to it a larger return from the land, by reason of the great improvement of its produce, both in quantity and value, by the agency of canals and the opening-out of communications. In these accessions to the landed income of the State strict regard will be had to the principles which have invariably been followed by the Government of India in the assessment of the land, its guiding policy having always been the lenient consideration of the proprietary classes. During 30 years of peace and progress, the rentals of tenants have, through the cultivation of new fields or the imposition of new rents by landlords, been continually expanding, and, in some of the most fertile areas of India, the landlords themselves have, without the intervention of the Government, materially enhanced the rent paid to them, while at the same time that proportion of it paid by them to the State has been continuously reduced to lower and more definite limits. In the same way, a lenient consideration is extended to the agricultural community in Provinces where the cultivators or cultivating proprietors are assessed by the State itself, so that in these also the percentage of produce paid as land revenue has been constantly decreased.

The growth of land revenue, therefore, which is to be anticipated will be a growth due to that peace and prosperity which directly spring from a lenient and careful administration rather than to any direct action of the Government in the direction of raising rentals.

A brief review of the position in each Province will now be given.

REVIEW BY PROVINCES.

41. *North-Western Provinces.*—The old system comes to a final end within the next two years. The greater part of the Province is held by tenants on small holdings of a few acres paying rent to landlords who are charged with a payment of 50 per cent. of their assets to Government. The advanced condition of the Province led the Secretary of State to enquire, so long ago as 1863, whether a permanent settlement could not be introduced; but a final consideration of the subject between 1882 and 1884 ended in the adoption of the system already described, under which annually revised maps and records are made the basis of assessment.

The rate of growth of land revenue in the North-Western Provinces since the mutiny year has, however, been moderate. In the first 14 years it was only 5 per cent. (say '35 per cent. per annum), but it has in the current period of 20 years risen to 10 per cent. or '5 per cent. per annum. There was in the North-Western Provinces less room for extension of cultivation than in most parts of India. Lying mainly in the fertile alluvial plain between the Himalayas and the high-lands of Central India, the Province attracted a large population at an early historical period, and it was at the period of the mutiny highly assessed. But the large amount of State capital spent since that time in the form of railways and canals, and the contemporaneous rise of prices has given a fresh impulse to agricultural wealth, and the province is now in many districts as lightly, as it was formerly heavily, assessed. A considerable amount of relief was given at the commencement of the 30-years period of settlement now expiring, by the reduction of the standard of the State demand from 66 per cent. of assets to 50 per cent.—a change which was, however, somewhat counter-balanced by the high valuation of assets made under the rules which governed the operations of the Settlement Officers. The relief is now made complete by the elimination of soil valuation from the assessment system which, except in cases of suspected fraud, requires that the recorded assets should be accepted as a basis of assessment. Rentals are in many districts still growing at a rate of about 1 per cent. per annum, and in certain tracts the growth is likely to be so great that even under the lenient system now adopted, some difficulty may be anticipated in taking the Government quota in full at the next settlement

from the landlords, on account of the large and sudden increase which would be involved in such an assessment.

42. *Oudh*, with the exception of a closely populated tract between Lucknow and Benares, came under much later development than the North-Western Provinces. Its revenues were not, until after the mutiny, brought under the effective administration of the British Government, who applied to it the same system of settlement as that which prevailed in the North-Western Provinces. The tenants of Oudh have less positive rights than those of the adjacent Province, as in the latter the greater number are more securely protected by statutory rights against unlimited enhancement of rent. There is, therefore, a prospect of a larger growth of rental, and also of revenue, in Oudh than in the North-Western Provinces. The land is rich, the climate favourable, and although since 1860 the extension of cultivation has been very large, considerable areas still remain to be brought under the plough. Competition for the land is likely to increase, and with it the enhancement of the rents by the landlords, who have in Oudh practically a free hand. The development of the Province under British rule has been very great, and is still, with the extension of railways, progressing at a rapid rate. The Province will come under reassessment, on the new or economical system, between 1892 and 1906.

43. In the *Punjab* there is a large proportion of dry sandy soil which is only capable of development under the influence of irrigation. Subsoil water is generally too far from the surface for wells, and the growth of revenue depends mainly on the expenditure of State Capital on canals. The revenue-payers are for the most part cultivating proprietors paying direct to Government, no part of the produce being intercepted by middlemen. A large amount of State capital has been in recent years invested in the Province in railways and canals. Under these circumstances the growth of the land revenue, which has since the mutiny been slow, should now progress at a rapid rate.

The revision of settlement has, under the old system, involved, as in the North-Western Provinces, a high rate of expenditure and protracted operations, but only a very few districts now remain to be completed under that system, and measures have recently been taken to expedite their assessment. The whole Province will then come under the operation of the new rules which require the settlement to be based on annual maps and records.

44. The *Central Provinces* have shown a very small development of land revenue since the mutiny. They have been to a great extent cut off from the railway system and have at the same time been lightly assessed. The revision of settlement takes place during the current decade commencing with the first year of the present Provincial Contract, 1887-88, and it is estimated, after nine years, to yield an increase of Rx. 180,000. Owing to the backward state of the Province, the low rates now paid to Government, and the new development of the railway system which is taking place, it has been determined to make the new settlements for terms varying between 12 and 20 years, so that the reassessment of the Province will recommence shortly after the termination of the existing revision.

The revision of settlement is being made at present partly on the old and partly on the new system, but at a low cost not exceeding Rs 100 a square mile. The same necessity for a complete series of maps and records has existed in this as in other Provinces, but owing to the circumstance that the revision of annual records was commenced, with the creation of the Agricultural Department, five years before the old settlements began to expire, there has been more time than elsewhere to utilize the village and district establishments in the work of preparing for settlement. Arrangements were made under which a large number of parties of the Survey of India have covered the surface of the Provinces with a

network of triangulation available both for topographical and revenue purposes. These are filled in by the village officers under the supervision of the local Revenue officers, and they provide sufficiently good maps as a basis for future revisions of assessment. The revision of the record is also primarily effected by the permanent establishments, leaving only the valuation of soils and general supervision to be effected by a special staff. At the close of the present revision, 9 or 10 years hence, the new system will be introduced and the cost be brought considerably below the new maximum of Rs 100 a square mile.

The land is held, as in the North-Western Provinces and Oudh, by cultivators of small holdings paying rent to proprietors from whom the Government takes revenue. But whereas in those Provinces the landlords have the power, which is freely used, of raising rents contemporaneously with increase of competition and rise of prices, they have no such power in the Central Provinces. The growth of rent and, therefore, of revenue entirely depends, except in land newly taken into cultivation, on the periodical assessments of rent made by the Government at the time of settlement. The existing rents are, in most parts of the province, an unusually small fraction of the total value of the produce; while, in consequence of the rising prices due to the extension of the railway system, the disproportion is continuously becoming greater. The area of culturable land still to be brought under the plough is exceptionally large. The province is one, therefore, from which a material growth of land-revenue may be looked for.

45. Thus far the provinces dealt with are those popularly known as the "temporarily-settled zemindari" or "landlord" provinces. I will next refer to *Bengal*, which is recognised generally as a "permanently-settled landlord province." But there are in Bengal not less than about 14,000 square miles which belong to the temporarily-settled landlord class and of which the old settlements will shortly fall in. In respect of this tract preparations are now being made for punctual assessment on much the same plan as in the Central Provinces, and at equally moderate rates of cost, by the Agricultural Department of the Province.

The area in question comprises large tracts in Orissa and Chittagong, and several Government estates. It will hereafter come entirely under the new system. An increment of land revenue of 20 per cent. would in this area be equivalent to a fixed addition of 10 lakhs a year to the annual demand.

46. The Province of *Madras* must be divided into two sections—the permanently-settled zemindari or landlord area, and the temporarily-settled ryotwari or tenant-proprietor area. The first is about 48,000 square miles and the second about 93,000 square miles, or roughly one-third and two-thirds respectively. The settlement on the old system, which required a complete series of field maps and a valuation of soils, is now drawing to a close and is being hastened by assistance lent to the local Survey Department by the Government of India. In a few years the whole Province will, in accordance with the intention which for some time has been declared by the Madras Government, be permanently relieved of special Settlement and Survey establishments.

The growth of land revenue in the tenant-proprietor tracts takes place in two different directions. There is the periodical growth due to the increase of rent-rates at the end of every 30 years period, and the annual growth due to the gradual increase of the area brought under cultivation. For in Madras all tenant-proprietor waste land has an annual rate attached to it at the time of assessment which is applied and collected whenever the land is occupied. The periodical growth (that is, the increase of rates between the last settlement and the one now being completed) is roughly estimated at from 5 to 7 per cent. and the annual increment due to increased cultivation at Rs. 10,000 per annum. The

rate of increase under this latter head will necessarily fall off as less land becomes available.

47. In *Bombay* the same general conditions prevail as in the ryotwari or tenant-proprietor area of Madras. The growth rate, however, is not checked by the presence of permanently-settled land, and has, as in the temporarily-settled section of Madras, a double growth, the one being due to the periodical increase of rent-rates every 30 years, and the other to the annual occupation of fresh land at the revenue-rates which were attached to it at settlement.

The whole Province has in recent years undergone a thorough and searching revision of assessment which is now drawing to a close. This revision has been in the hands of a separate Survey Department which will within five or six years be gradually broken up and absorbed in the new establishments, and the Province will then come permanently under the new system. It may be noticed here that both in the Madras and Bombay Presidencies the holdings or small farms of tenant-proprietors have had their boundaries fixed once and for ever by the Survey Department, and that instead of, as in other Provinces, the map requiring annual revision in order to keep it in accord with changing boundaries, it is here necessary to maintain the boundaries in accordance with the map as originally made. This duty, as well as that of the maintenance of the statistical record, is on the close of settlement operations in each district made over to the Agricultural Department.

The growth of land revenue has been more satisfactory in Bombay than in any Province. It began in a marked degree with the impetus given to cotton production at the time of the American War, and has been continued under the influence of rising prices, extended cultivation (and in Sind, extended irrigation), supplemented by a careful system of assessment.

48. In *Assam* the very backward state of the Province and the absence of communication with the seaboard in the years immediately succeeding the mutiny, have made the growth of revenue in the later years appear to be exceptionally rapid. A part of the Province (about 9,000 square miles) is, however, under the permanent settlement system of Bengal and the growth of revenue depends on the remaining area which is temporarily settled, chiefly with tenant-proprietors, at rates which are practically fixed, as there is hardly any competition for land on account of the great extent of waste area which can be taken up. The most fully-occupied portion has been revised on the system employed in other temporarily-settled Provinces, and this revision is nearly completed. The remainder will probably be surveyed and settled on a cheaper system under the direction of the Agricultural Department, and the whole Province will thereafter come under the new arrangements. As in Bombay and Madras, there is an annual growth (estimated at from Rx. 8,000 to Rx. 10,000 per annum) which is almost solely due to new occupation, as there is here no periodical growth due to increase of rates.

49. *Lower Burma* has been undergoing for some years a regular revision of settlement, of which about one-fifth, or nearly 10,000 square miles, is completed. Each district, when it leaves the settlement officer's hands, is made over to the permanent care of the Agricultural Department, which will henceforward be responsible for maintaining the maps and records. The land is held by tenant-proprietors, and there is again in this province a double growth due to annual increase of occupation and to periodical increase of rates. The annual assessments are complicated by the release of all fallow land from payment of any but a nominal revenue, but there is a steady extension of cultivation which, supplemented by the effect of a careful survey and assessment, has resulted in a growth of from two to three lakhs a year on a comparatively small total revenue. Lower Burma is practically a large rice field formed by the alluvial deltas of

the river systems, and at present it yields only 1 per cent. of other produce. About 37,000 square miles, or 84 per cent. of its cultivable area, are still uncultivated, and there is room for further growth both by extension of cultivation and by the improvement of the agricultural system through the introduction of other crops. The soil is rich.

50. *Upper Burma* is composed of high-lands, the agricultural value of which is under examination. The land revenue is, like that of all border Provinces on first occupation, initially small; but there is an equal promise of the same steady growth in the future which has taken place elsewhere.

51. The increase of revenue in minor Provinces under the direct control of the Government of India is mainly due to the re-assessment of the little district of Ajmir and the addition of Quetta.

OPIUM.

52. The following are the statistics of opium for a few years past:—

(Thousands of Rx)	1881-82.	1882-83.	1883-84.	1884-85.	1885-86.	1886-87.	1887-88, Revised
REVENUE—							
Bengal sales	7,465	6,801	6,804	6,052	6,296	6,147	6,034
Bombay duty	2,185	2,396	2,564	2,538	2,449	2,584	2,297
Excise and Miscellaneous	212	214	245	226	197	213	213
TOTAL	9,862	9,500	9,557	8,816	8,942	8,943	8,544
EXPENDITURE—							
Cultivation and Manufacture in Bengal	1,931	2,156	1,722	2,828	2,914	2,593	2,373
Agency establishments and other expenditure	127	127	133	139	144	136	139
TOTAL	2,058	2,283	1,855	2,967	3,058	2,729	2,512
STATISTICS—							
Price in Bengal Rupees	1,324	1,222	1,250	1,296	1,235	1,123	1,059
Chests paid duty in Bombay	31,196	36,327	38,586	39,039	37,677	39,745	35,374

53. During this period there has been a steady downward tendency in prices in Calcutta, the exception in 1884-85 being due to the fact that in that year the number of chests offered for sale was much smaller than it had been for several years before, or has been since. The price during 1886-87 fell from ₹1,180 in the beginning of the year to ₹1,098 at the end of it, the fall being due in a large measure to the operation of the additional Article of the Chefoo Convention, which came into force on February 1st, 1887, and added to the burden which the opium had to bear at the Chinese end of its voyage.

The same influence continued to operate in 1887-88, for the price gradually ran down to ₹1,029 in September. Since that date, however, there has been a recovery, the price having risen to ₹1,067 in February, though it dropped again to ₹1,042 in March. This gives an average of ₹1,059 for the whole year. For next year we take what we hope is a moderate estimate, reckoning the selling price no higher than the March figure of ₹1,042, and assuming for the present that there will be no alteration in the number of chests brought to sale. This gives us for the Budget Estimate of Bengal sales, Rx. 5,939,000.

54. The expenditure upon the production of Bengal opium is a very variable quantity, and depends very largely upon the season. We have lately had seasons which are almost too favourable from a financial point of view, for, beyond the necessity of our maintaining a sufficient reserve against bad seasons, it is not to our advantage to produce more chests of opium than we can well dispose of. In 1882-83 the production was as low as 38,214 chests, but in the three succeeding years we have got 65,993, 64,930, and 64,500. The year 1887-88 is estimated to produce 58,814, which must also be taken as a fairly good season, and it has

cost us only Rx. 6,600 more than the Budget Estimate of Rx. 2,500,000. For next year we take a good average and put down the cost at Rx. 2,555,000.

55. The Revenue from Bombay opium is not so directly affected as that of Bengal by the additional burden of taxation on the China side. Since June 28th, 1882, the duty has been Rs 650 per chest, and the amount of export has been very steady. The high figures of 1886-87 are no doubt due to the rush at the end of that year to get chests landed before the Chinese duty of 110 taels came into force; for it was followed by a considerable lull in the beginning of the year 1887-88. The export, however, has been more active during the later months of 1887-88, and reckoning up to March 3, the number of chests that had passed the scales was only $64\frac{1}{2}$ less than the amount in 1885-86. But about that date a portion of the Malwa crop was severely damaged by a storm, and the merchants immediately held back their opium in expectation of higher prices, so that during the week ending March 10th only 80 chests came forward against an average expectation of 1,000. Later accounts are more favourable; but, on the whole, we estimate for a somewhat lower duty than that of 1885-86.

SALT REVENUE.

56. The following may be taken as a statement of the average supply of salt in India :—

	Maunds.
Northern India salt sources (mainly the Sambhar Lake and the Mayo Salt Mines)	7,200,000
Bengal—Imported by sea	10,300,000
Madras—Local manufacture, all along the Coast	7,800,000
Bombay—Local manufacture, chiefly near the Rann of Cutch	6,300,000
	<u>31,600,000</u>
Burma—Mainly imported by sea	1,600,000
TOTAL	<u>33,400,000</u>

57. Before 19th January 1888 the rates of duty were Rs 2 in Continental India, and annas 3 in Burma, and on that date they were raised to Rs 2-8 and Rs 1 respectively. At these rates the Salt Revenue would stand as follows :—

	Before January 19th. Rx.	After January 19th. Rx.
Duty in Continental India	6,320,000	7,900,000
Duty in Burma	30,000	160,000
Other receipts	300,000	300,000
TOTAL	<u>6,650,000</u>	<u>8,360,000</u>

The actual Salt Revenue of 1886-87 was Rx. 6,657,600, and, as I mentioned in my Statement of 27th January, the consumption of the current year was only slightly in advance of that of 1886-87.

58. There are two reasons why we cannot expect to gain, at once, the higher standard of Revenue above noted as that corresponding to the higher rate of duty. In the first place, by the operation of Section 37 of the Sea Customs Act, all salt which was at sea and as yet unlanded, will continue to pay the lower rate of duty. This would cost us in Bengal, at the ordinary rate of importation, the amount of the enhanced duty on about 2,000,000 maunds in 1887-88, and 500,000 maunds in 1888-89, say Rx. 100,000 in 1887-88 and Rx. 25,000 in 1888-89. Besides this, stocks will for some time be allowed to run down, and the higher-taxed salt will have to wait for a little till the lower-taxed salt, now in stock, has passed into consumption; the deliveries of the month of February have, for this

reason, been unusually low. Taking these circumstances into consideration, we have estimated to obtain a revenue of only Rx. 6,723,100 in 1887-88 and Rx. 8,122,500 in 1888-89. For the full measure of the enhanced revenue, we shall have to wait till 1889-90.

EFFECT OF ENHANCED DUTY.

59. The following statement gives the retail prices of Salt in the different provinces of Bengal at the end of the two fortnights preceding and the two fortnights succeeding the increase of the duty :—

	2nd half of December 1887.	1st half of January 1888.	2nd half of January 1888.	1st half of February 1888.	2nd half of February 1888.
	Rupees per maund.				
Central Provinces	3'80	3'83	4'38	4'40	4'44
Burma	1'71	1'74	1'93	2'0	2'09
Assam	4'23	4'20	4'68	4'65	4'78
Bengal [West]	3'15	3'17	3'61	3'61	4'09
„ [Central]	3'42	3'47	4'08	4'17	4'41
„ [East]	3'60	3'60	4'02	4'09	4'40
„ [Behar]	3'37	3'38	3'89	3'95	4'20
„ [Orissa]	3'19	3'19	4'21	4'10	4'18
North-Western Provinces	3'30	3'41	3'62	3'69	3'76
Oudh	3'33	3'62	3'47	3'68	3'73
Punjab	2'82	2'82	3'11	3'22	3'27
Madras	2'89	2'92	3'27	3'33	3'38
Bombay	3'13	3'19	3'55	3'54	3'47
Sindh	2'78	2'85	3'38	3'30	3'39
Berar	3'67	3'60	4'05	4'30	4'18

60. Comparing the prices of the 1st half of January with those of the second half of February, it appears that in the Central Provinces, Assam, Sind, and Berar, the increase varied from 0'51 to 0'58 of a rupee. In Bengal it was considerably more, varying from about 13 annas to nearly a rupee. In the other Provinces the increase was less than half a rupee. The average increase of retail price for all India was 0'55 of a rupee, or about 8 annas and 9 pie, being a little more than the increase in the rate of duty.

61. It is not possible to state exactly what is the average annual rate of consumption of salt in any particular province, and it is certain that the consumption varies very much. The average rate of consumption for all India is a little under 10½ lb a head of the population. At the rate of half an ounce a day the average consumption would be 11½ 6oz. Assuming for the purpose of the moment that it is as much as 12½ lb, it may be taken that a man with a wife and three children will consume 42½ lb in the year between them. Let their consumption be taken at 50½ lb. At the present average price of, say, Rs 3-14-1 a maund the salt of the family will cost about two rupees and six annas in the year. This is about 16½ per cent. in excess of the cost before the duty was raised, so that the man's contribution to the salt-duty may be taken as having been raised from about two rupees to two rupees six annas nine pies a year.

I do not enter into the question, on which there is much diversity of opinion, as to the manner in which the actual incidence on individuals, which I here state only in averages, is affected by the social customs of the people.

STAMPS AND EXCISE.

62. The statistics of Stamps and Excise Revenue may be given in a single statement. They are both regularly progressive, and it may be said that almost without exception the revenue of each province under each of these heads is, in each year, more or less in advance of what it was the year before. For this

reason it is not necessary to do more than give the figures of the first and last of the years under review :—

(Thousands of Rs.)	STAMPS.		EXCISE.	
	1880-81.	1886-87.	1880-81.	1886-87.
India	27	42	22	73
Central Provinces	113	147	186	257
Burma	78	89+3*	218	247+7*
Assam	62	74	196	220
Bengal	1,139	1,346	855	1,013
North-Western Provinces	536	637	369	578
Punjab	327	352	111	137
Madras	547	582	628	917
Bombay	422	479	550	926
TOTAL	3,251	3,751	3,135	4,375

* Upper Burma.

63. As regards the Stamp revenue little remark is required. Of the whole amount about 70 per cent. represents the income from Court-fees, and may be taken as the revenue side of the account to which the expenditure on Civil and Criminal Courts (under Law and Justice) and on Revenue Courts (under Land Revenue) is charged. The practice of levying fees by stamps has, during the last few years, been extended to some small items which formerly came in as Cash Receipts under the heads above quoted, and a small part of the increase shewn in the above figures does not represent new revenue.

64. As regards Excise, it will be seen that it is in Madras and Bombay that the revenue administration has been most successful, as these two Provinces, with 31 and 16½ millions of inhabitants, respectively, produce a revenue nearly as large as that of Bengal with 69 millions. In fact, in both these Provinces, a very remarkable progress has been made. The whole system of distillation has been more thoroughly brought under control, and stricter and more methodical preventive measures have enabled the Government to greatly enhance the rate of duty; for the question of the rate of duty which it is possible to levy in India, is simply the question of the prevention of illicit distillation. In Bengal, also, the subject of excise has received very special attention at the hands of the Government, and it is likely that the measures which are now being adopted, on the basis of the Report of the Excise Commission of 1883, will shew, in the immediate future, a development of Excise Revenue, not dissimilar to that which has been witnessed in Bombay and Madras. The first effect was an increase of expenditure, which has risen from Rx. 28,900 in 1884-85, to Rx. 42,000 in 1887-88, and will probably continue to increase. The Revenue, by the same measures, fell from Rx. 1,005,200 in 1884-85, to Rx. 958,500 in 1885-86, but it has now advanced on a sounder basis, and it is expected that Rx. 1,097,500 will be received in 1887-88.

ALLEGED INCREASE OF DRUNKENNESS.

65. The advance of Excise Revenue in India has attracted considerable attention in England, having been erroneously accepted as evidence of the increase of drinking habits in India. The Government of India took a recent opportunity of sending to England a report containing very full information of what was actually being done in each of the Provinces of India. This paper, which was afterwards printed as House-of-Commons Paper No. 269 of 1887, explained the restrictive system which was everywhere adopted, and showed that the improvement in Revenue arose from severer taxation, and more complete preven-

tion. I copy the following paragraphs from the covering despatch No. 166, dated the 25th June 1887, with which the report was sent, the Congress referred to being the British and Colonial Temperance Congress, which had addressed the Secretary of State on the subject :—

* * * * *

6. The information, therefore, which has reached the Congress on this subject is entirely erroneous. The Governments in India are not set in the midst of an abstemious people from whom they can realise no Excise Revenue, unless they place in their way temptations to drinking which would not otherwise exist. On the contrary, it is only by strong preventive establishments that illicit distillation can be prevented. The great increase in the Revenue to which the Congress allude does not mark the extension of drinking habits, but is the result of a great and general increase in the rate of tax which it would have been entirely impossible to realise but for the great improvement in preventive measures which has accompanied it. In fact the ability of the Excise Department to prevent illicit distillation is the only limit which is imposed in practice to increase in the rate of taxation.

7. The Congress are also misinformed in connecting this increased revenue with "the system by which the right to license outstills is farmed to the highest bidder." In scantily-inhabited tracts, and in places which border upon Native States, a system of this kind is employed as providing the only means by which a tax of any kind can be levied upon the consumption of spirits; these are places where the Government has no choice between untaxed distillation and trade and the system of farm to which the Congress allude. But outside these very narrow limits the system may be described as obsolete. The object of the Excise Department is to tax every gallon of spirits, first, by a fixed still-head duty, which is regulated at the discretion of the Government; and secondly, by a license fee for retail sale, which is usually determined by competition for the privilege of sale.

* * * * *

9. Before passing on to give actual statistics of the consumption, it must be remembered with what large tracts of country and with what a large population we are dealing. Judged by a European standard, the people of India are a remarkably abstemious people. Drunkenness in the English sense of the term hardly exists in India. Writers whose comparisons are based on Oriental experience describe as drunkenness and as spread of misery and ruin a condition of things which, if it existed in England, would be regarded almost as a millennium of temperance. The average consumption in India is only a bottle or a bottle and a half of spirits a year for every adult male, and in some provinces is even less than that. It may be conceded that, however small the rate of consumption, any increase of it is equally to be deprecated; but at the same time in dealing with subjects such as the present it should be borne in mind that such terms as "drunkenness," "drinking classes," and "spread of drinking," when used by natives of India or in connection with Indian Administration, bear a meaning wholly different from that which they convey to a mind familiar only with the English aspects of the temperance question.

* * * * *

16. In short the Temperance Congress, starting from the erroneous assumption that liquor traffic and liquor consumption are unnatural in India and would not exist but for the state of things created by the British Administration, have formed the conclusion that the mere orders of the Government are sufficient to confine the consumption within any desired limit, and that the Government is responsible for not drawing that limit much closer. The real problem, it will be seen, is much more difficult. There is a point at which restrictions on consumption are inevitably followed by illicit distillation,—a point which varies in every region, according to the habits of the people, the sparseness of population, and the nature of the country and its productions. The papers now forwarded to Your Lordship amply shew that the object which the various Governments have in view is the adaptation of the various methods of Excise Administration to the different conditions which present themselves and the imposition of as great restriction as circumstances in each case permit. In our opinion the papers are a record of success in the solution of this difficult problem.

66. It remains to say that after considering the advice of the Local Govern-

ments in each case, we have taken the following estimates of the Stamps and Excise Revenue :—

	Revised, 1887-88.	Budget, 1888-89.
Stamps	3,848,100	3,854,400
Excise	4,503,100	4,609,500

INCOME TAX.

67. The year 1886-87 was the first year of the Income Tax in its present form, and the opportunity may be taken to give an account of the first year's administration and its results.

68. The gross collections amounted to Rx. 1,354,735, and the net collections (deducting Refunds—Rx. 27,067—and charges for Collection—Rx. 50,157), to Rx. 1,277,511. The net revenue is compared Province by Province with that derived from the License Tax in 1885-86, in the Table below :—

	License Tax Collections, 1885-86.	Income Tax Collections, 1886-87.	Percentage of total Collections	Increase of Income Tax over License Tax.
	Rx.	Rx.		Rx.
India	106	122,406	9½	122,300
Central Provinces	22,656	39,836	3	17,180
Burma	16	...	16
Assam	5	19,905	1½	19,900
Bengal	139,167	333,627	26	194,460
North-Western Provinces and Oudh	112,954	213,639	17	100,685
Punjab	35,747	105,652	8	69,905
Madras	41,851	138,674	11	96,823
Bombay	120,314	303,756	24	183,442
TOTAL	472,800	1,277,511	100	804,711

The collections under India include the general collections in Ajmere and Coorg, and the assessments on salaries of Officers serving immediately under the Government of India and in Political employ, and of Military and Public Works Officers throughout India; and also a large amount of taxation on Interest on Securities.

69. Bengal and Bombay together have furnished about half of the total revenue; the towns of Calcutta and Bombay of course contribute largely to this result; the proportion which the gross collections in these towns bore to the total collections (excluding the tax on salaries of Government servants) in those Presidencies is indicated below :—

Bengal.	Calcutta.	Percentage of Calcutta on Bengal.	Bombay Presidency.	Bombay City.	Percentage of City on Presidency.
Rx.	Rx.		Rx.	Rx.	
338,468	170,588	50.4	257,500	140,652	54.6

The collections from these two cities, therefore, form more than one-fourth of the whole collections in India.

In Madras City the collections amounted to three lakhs.

The North-Western Provinces and Oudh produce a larger amount than any other Province, if the Presidency Towns be excluded.

70. The incidence of the tax in the various Provinces, and in Calcutta, Bombay, and Madras is shown below, the proportions being calculated with reference to the final demand :—

	Number of population to each person assessed.	Number of population to each rupee of tax.	Incidence of tax on each person assessed.
Central Provinces	1,136	39	R 29
Assam	811	50	29
Bengal—			
Calcutta	37	44	82
Elsewhere	853	39	22
North-Western Provinces	602	21	28
Oudh	866	35	24
Punjab	555	25	22
Madras—			
Madras City	80	13	62
Elsewhere	655	28	23
Bombay—			
Bombay City	37	55	68
Elsewhere	311	13	23

71. Comparing the Presidency Towns, the proportion of assesseees to the general population is the same in Calcutta and Bombay ; but the average tax paid by each assessee is considerably higher in Calcutta than in Bombay ; the Madras average tax is not far below that paid in Bombay.

Leaving out the Presidency Towns, the variations in the incidence of the tax on each assessee are inconsiderable, but the proportion which the taxable population bears to the whole varies very largely. Bombay appears to be by far the richest of the Provinces, one in 311 being taxed, whereas in the mofussil portions of Bengal only one in 853 is liable to taxation ; in the Orissa Division the proportion falls as low as one in 1,466, and in the Patna and Chota Nagpore Divisions the proportion is one in 1,012 and one in 1,129 respectively. In the Bombay Presidency the Ratnagiri District has only one in 1,179 of the population taxed ; the next lowest proportion being one in 656 in the Thana District. The Central Provinces naturally come out with the smallest proportion of taxable incomes, though curiously the incidence of the tax on the individual tax-payer is highest there, and in some Municipalities the incidence is very high indeed. The Punjab and the North-Western Provinces stand next to Bombay, though far behind it. These results must not be pressed too far ; as some portion of the difference is due to variations in the proportion that the Agricultural population bears to the whole ; and again, some portion may be due to variations in the method of assessment.

72. The following Table distributes the actual collections* between the various parts of the Schedule of Act II of 1886 :—

	Rx.	Percentage of the whole.
Part I.—Salaries	418,074	30.4
" II.—Companies	74,619	5.4
" III.—Interest	73,617	5.3
" IV.—Other Sources	808,831	58.9
	<u>1,375,141</u>	<u>100.0</u>

* The figures in the succeeding tables do not work up to those of the Finance and Revenue Accounts, as they are taken from the Administration Reports, and include in some cases collections made after the close of the Financial year.

The tax on salaries consists for the most part of that levied from Government servants, the amount being made up as follows :—

	Rx.	Per-centage.	Number of Assesseees.	Incidence of tax per Assessee.
				R
Government Servants	300,307	72	66,400	5
Servants of Local Authorities	12,246	3	5,010	24
Private Servants	105,521	25	30,636	34
	<u>418,074</u>	<u>100</u>	<u>102,046</u>	<u>...</u>

The Companies taxed numbered 774; thus paying an average of about R964 each.

Under the head of Interest the information as to the number of assesseees is defective; in many cases the number taxed has not been given.

73. Under Other Sources of Income it is a matter of difficulty to distribute the taxation under any general heads; it seems best to give the figures for some of the principal Professions and Trades, the rest being lumped together—

	Number of Assesseees.	Amount of Collections. Rx.
House Proprietors	8,249	40,495
Ship or Boatowners	2,500	4,201
Professions—		
Legal Practitioners	8,568	42,500
Medical Practitioners	1,700	5,395
Brokers	4,198	17,213
Bankers	9,270	43,852
Agents	2,038	17,784
Other Professions	14,955	35,717
Manufacturers	17,499	39,551
Merchants—		
Agricultural Produce	15,704	28,592
General	14,626	80,580
Piece-goods	17,188	43,703
Grain	15,457	31,959
Money-lenders	98,768	241,255
Others	8,114	27,500
Traders—		
Food	11,666	18,205
Spirits and drugs	4,476	9,096
Metals	3,227	6,982
Others	36,488	74,251
TOTAL	<u>294,691</u>	<u>808,831</u>

The money-lenders furnish just about one-third of the assesseees, and pay about 30 per cent. of the tax in this Part; they pay about R24 each; and by far the largest proportion (88,777 out of 98,768) are assessed at incomes of under R2,000 a year.

The highest rates of tax are paid by the following classes :—

	Tax per Assessee.
	R
Agents	87
General Merchants	55
Legal Practitioners	50

The tax under Part IV as a whole falls on the assesseees at the rate of R27 each; and of the total number of assesseees 264,715, or very nearly 90 per cent., are assessed on incomes of R2,000 and under.

74. The assessments under Part IV were those which were most difficult, and regarding which objections were chiefly raised. Eleven per cent. of the

original assesseees were on objection absolved from taxation, while the amount of the assessment was reduced on the whole by 19 per cent. These results may be regarded as satisfactory, considering that they represent the first series of assessments to a new tax; in Madras it is stated that there was a tendency to assess lightly, and the same appears to be the case with regard to Bengal and Oudh. The general impression derived from the reports of the Local Governments is that considerable success has been obtained in the endeavours made to render the tax as palatable as possible. The Government of Bengal says—

“The unpopularity of a direct tax may be greatly enhanced by injudicious administration; but the Lieutenant-Governor is glad to be able to record his belief that in the present year the dislike to the tax has not been seriously aggravated by errors in its working,”

and this expresses the view generally of the other Governments.

75. Classifying the assesseees of all kinds according to their rates of income, it appears that 90 per cent. had incomes of under ₹2,000, and that this class paid nearly 50 lakhs,* or only about 38 per cent. of the total collections. The incomes of from ₹500 to ₹750 numbered 51 per cent. of the whole body of assesseees, but produced only 14 per cent. of the revenue; and the corresponding percentages for the next lowest class with incomes not exceeding ₹1,000 were 13 and 6 respectively.

Only 6,929 persons were taxed on incomes exceeding ₹10,000, of whom 3,350 (or nearly half) were Government servants.

Only 388 persons were assessed at incomes exceeding half a lakh, and of this number 102 were assessed at incomes over a lakh. These 102 incomes paid Rx. 91,837, or about 7 per cent. of the whole collections; they included 37 Companies paying Rx. 63,901. Forty-eight of the 102 were taxed in Bengal, and 29 in the Bombay Presidency.

FORESTS.

76. Under ‘Other principal revenue heads’ is included the Forest Revenue, under which, at present, we get a revenue of Rx. 1,150,000 by an outlay of about Rx. 750,000, or 68 per cent. on income. The percentage in the State Forests of Prussia, in which country Forestry has reached an advanced stage, is very nearly the same, being 62 per cent. on a revenue of about 2½ millions. The percentage in India is gradually improving. Both in India and in Prussia the income is considerably diminished by the large amount of forest produce which has to be given free to local right-holders.

77. Still the present occupation of the Forest Department consists more in building up a most valuable property for the future than in realizing a revenue in the present. In Burma the teak forests furnish a handsome revenue; the Sub-Himalayan forests, from which large supplies are brought down for the consumption of Northern India, and the Sunderbans near Calcutta, are also revenue-producing areas. The Bombay forests are also productive in teak. But hardly anywhere is the expenditure less than 50 per cent. of the Revenue, and in many places it is much higher. The work of the Department is at present, in fact, rather conservation and development than production of revenue. Centuries of neglect and denudation have to be remedied by systematic reservation, planting, and exploitation, and the return which the Department at present gives to Government is in the rapidly increasing value of the Government forests, rather than in the revenue immediately brought into the Gov-

* In these calculations as to classification, interest on securities is omitted from consideration, as in most cases the distribution of this by classes is not shown.

ernment treasury. The net revenue, however, is satisfactorily progressing, having, during twenty years, increased from Rx. 130,000 to Rx. 400,000.

RAILWAY FINANCE.

78. Railways form a very important part of our revenue and expenditure, and it may be well to exhibit, in a comparative statement, the general effect of the Railway Revenue Account upon our financial position. The arrangement of our accounts, following, as it does, the somewhat complicated differences in the relations of Government to the different Railways, does not very clearly set forth the purely financial part of their history. But the following abstract of the transactions of ten years, made up from the accounts, and working up to the same net result, will render the position clearer. I may also refer to the detailed statement of capital, earnings, and working expenses, shewn in Appendices C. and E. of this statement.

(In thousands of Rx.)	1879-80.	1880-81.	1881-82.	1882-83.	1883-84.	1884-85.	1885-86.	1886-87.	1887-88. Revised.	1888-89. Budget.

Net Result—Deficit	1,570	1,044	286	1,306	305	1,052	733	1,188	2,154	2,115

(a) The payment to the East Indian Railway Company is included in this line; but in our regular accounts, it is charged under working expenses. The figures in this statement work out to the same net result as the accounts, but for reconciliation of details some further explanations would be required.

79. During the first few years of the period included in this statement, the construction of railways on the Guaranteed system had practically closed; the main exception being the expenditure in completion of the Oudh and Rohilkund Railway. The sterling account of interest, therefore, which represents this part of the capital, rises only from £4,737,000 in the first year to £4,827,000 in the sixth year. The construction of State Railways was actively proceeding, and was adding to the Indian Interest-account very regularly about Rx. 200,000 every year.

Throughout this period, that is, for the first six years included in the above statement, the advance of the net earnings was about equal to the advance of charges for interest on capital. During the five years, 1880-81 to 1884-85, the total amount of net earnings was Rx. 37,645,000, and the total amount of interest charge (including exchange) was nearly the same, Rx. 37,689,000; in fact, in bad revenue years the net earnings fell short of the

interest by half a million, and in good revenue years they exceeded it by nearly half a million.

80. It has to be remembered, however, that a considerable deduction has to be made from the earnings before they are available for Railway charges. The contracts with the Companies give them a share of the earnings (somewhat miscalled a share of surplus profits, for it may and does accrue when there are no real profits at all), which amounts on the whole, at the present standard of Revenue, to about Rx. 700,000; and other charges, varying from about Rx. 150,000 to Rx. 200,000, have to be borne for Government establishments connected with Companies' Railways, for the purchase of land for these railways, and for Railway Surveys and other miscellaneous expenditure. When, therefore, the net Railway earnings are equivalent to the burden of interest on capital, the result to Government is that, on the whole Railway Revenue account, the Government suffers a loss of Rx. 850,000 to Rx. 900,000. During the five years period, just mentioned, the loss was rather less, and averaged about Rx. 799,000.

From the statement given above, it will be seen that during the more recent years, that is, since 1885, this loss has been greatly increasing; and in the Revised and the Budget Estimate it is placed at about Rx. 2,150,000.

81. It is not the earnings that have failed us, except in this temporary sense that they reached a specially high figure in 1885-86 and 1886-87; and have now fallen to a more normal figure. For this normal figure still shows, on the whole, a fair rate of increase—Rx. 7,000,000 was the average standard of earnings about 1881; in 1884, it stood at Rx. 8,000,000, and it is now Rx. 9,000,000. This must be regarded as very satisfactory, especially when we consider that the construction of State Railways, during the past three or four years, has almost left the purely commercial lines, and been limited to Famine lines, such as Assam-Bihar, Bellary-Kistna, and Cuddapah-Nellore, or to Quasi-military lines, such as the Sind-Sagar Railway, the lines in Biluchistan, and I may add the Mandalay extension, though this partakes also of a commercial character.

82. The cause of the deterioration will be found in the figures which show the interest paid in England. From these it will be seen that the increase of interest paid in England, and especially of exchange, has run away with much more than the improvement in the net earnings. This will be a little clearer if we shew the figures in two classes—

	1884-85.	1885-86.	1886-87.	1887-88.	1888-89.
New Subsidised Companies—					
Interest : : : : }	(a) 118	171	312	437	620
Exchange : : : : }		54	117	183	200
Older Companies—					
Interest : : : : }	4,827	4,896	4,972	4,963	4,995
Exchange : : : : }	1,173	1,541	1,870	2,085	2,098

(a) Paid in India.

The Companies included in the first set of these figures are the Southern Mahratta, the Bengal-Nagpur, and the Indian Midland; all these lines are still in active construction, and the capital on which interest is being paid is as yet hardly earning any money. It is, therefore, for the present almost a dead weight upon our Railway finance, although after a year or two, it ought to cease to be so. The amount of this dead weight of unproductive capital is as follows:—

Total interest charge as above.	118	225	429	620	880
Less Earnings	22	128	166	234
Net .	118	203	301	454	646

Of unproductive capital there has always been a certain amount outstanding ; but while our construction was confined to State Railways proper, the amount was limited to the outstandings under this head alone. Of recent years we have added to our State Railway construction, the construction by the Companies just mentioned, and until the lines of these Companies are fairly in working order, we have these special additions to the amount of unproductive Capital.

83. Under the second head, that of the older Companies, the new burden is mainly that of Exchange. The Exchange during the five years above detailed has been, for every £100, Rx. 24·3, Rx. 31·5, Rx. 37·6, Rx. 42 and Rx. 42 ; and this, for a sterling charge of £4,900,000, involves an increase of Exchange charge from Rx. 1,190,000 to Rx. 2,060,000 or nearly Rx. 220,000 a year for four years. During the period of five years preceding 1885-86, to which I referred in paragraph 79, the improvement of the rate of earnings was sufficient to cover the enhancement of the Exchange charge, but then that enhancement was only Rx. 220,000 for the whole period. Since 1885-86, however, the fall of the rupee has gone on at too rapid a rate and the increase of earnings has quite failed to make up for it.

84. The result of these considerations is to shew that at the present juncture we are at an unfavourable period in our Railway finance. Our State Railway construction is, perforce, running in a line from which little commercial earning can be expected ; we are burdened with the interest on the heavy capital of three large Railway Companies, which is not yet productive ; and we have suffered very greatly by the rapidity of the fall in the value of silver. The second of these causes is one from which we will certainly recover in a short period ; and we shall be very unfortunate if the third continues to add to our burdens in the same ratio as in the immediate past. Meantime the earnings taken by themselves shew fairly steady progress, and we may, therefore, reasonably look for early relief from a very large part of the present burden of Rx. 2,150,000, imposed upon us by our Railway accounts.

INTEREST ON DEBT.

85. The following figures shew, in thousands of £ the amount of sterling debt of the Government at the end of each year :—

1881-82.	1882-83.	1883-84.	1884-85.	1885-86.	1886-87.	1887-88.
68,142	68,586	68,109	69,271	73,807	84,228	84,228

But 10,152 of the first figure and 18,514 of the last is held on Railway account, and merely represents the part of the Capital account of Railways purchased by Government. The real increase of sterling debt during this period is therefore £7,724,000.

The interest payments shew this distribution between the Railway account and the account of ordinary debt, the total amount paid being as follows :—

(Thousands of £.)	1881-82.	1882-83.	1883-84.	1884-85.	1885-86.	1886-87.	1887-88, Revised.	1888-89, Budget.
Ordinary account . . .	2,457	2,458	2,418	2,578	2,420	2,556	3,300	2,584
Railway account . . .	353	348	312	353	366	566	552	549

The figures of 1884-85 were increased above the average by a heavy payment of £184,000 on account of discount on a new loan raised at three per cent. in that year. With this exception the interest charge was almost constant from 1881-82 till 1885-86, but in the year after that it rose by about £170,000.

86. A very great increase above the average payments will be observed in the amount of interest paid in 1887-88, the explanation of which is as follows :—

On April 19th, 1887, the Secretary of State notified his intention to discharge, on October 10th, 1888, the 4 per cent. sterling stock (over £53,000,000)

repayable on that date, and offered to the holders terms of conversion into $3\frac{1}{2}$ per cent. stock. The terms of conversion involved anticipation payments of 10 shillings per cent. interest otherwise falling due in 1888-89. But, moreover, as the interest upon the new stock was to run quarterly, whereas that on the old stock was payable half-yearly only (April to October), the operation brings forward, to January 1888 (*i.e.*, the year 1887-88), one quarter's interest or 17s. 6d. per cent., which would otherwise be payable only in April 1888 (*i.e.*, the year 1888-89).

The offer was accepted by the holders of about £48,200,000 of stock, and thus the excess payments of interest which fell within the year came to £663,000, besides commission and other exceptional charges. This £663,000 is not, properly speaking, an excess payment, but it is rather a redistribution of existing charges, which we would have had in any case to meet, and which appears in our accounts in this peculiar manner by reason of the fact that our year of account closes during the interval by which the payment is brought forward. The charges in question were not provided in the Budget Estimates, as it was necessary to avoid risking the success of such an important operation, by advertising it prematurely; and the payment not being a real excess of charge, was easily met without any new arrangements in respect of ways and means. A similar, though not nearly so large, excess charge occurs in 1888-89 in respect of the remaining £5,000,000 of the Loan, and by reason of it, and of the further commission and other charges, we get very little apparent benefit from the reduction of interest in the Budget Estimates for 1888-89. But from 1889-90 we get a benefit of $\frac{1}{2}$ per cent. interest upon £53,262,000, that is, a reduction of charge amounting to £266,310 sterling a year.

87. The interest account in India is a little more complicated. The total amount of debt stands as follows:—

(Thousands of Rx.)	1881-82.	1882-83.	1883-84.	1884-85.	1885-86.	1886-87.	1887-88, Revised.
Ordinary Debt	88,653	90,689	93,191	93,184	92,704	92,654	98,088
Special Loans	4,952	1,953	1,809	1,799	1,782	1,782	1,782
Service Funds, &c.	899	951	1,000	1,056	1,082	1,137	1,184
Savings Banks	3,366	3,744	4,017	4,722	5,116	5,836	6,711
TOTAL	97,870	97,337	100,017	100,761	100,684	101,409	107,765

A large amount of the above debt represents the capital outlay upon Railways and Irrigation works, and another portion of it represents moneys lent at interest to Municipalities and Local Bodies, and in some cases to Native Chiefs. Six-and-a-quarter crores (6,250) of it are the investment of the Currency Department. The account of interest, therefore, shows considerable recoveries on these accounts, and stands as follows:—

(Thousands of Rx.)	1881-82.	1882-83.	1883-84.	1884-85.	1885-86.	1886-87.	1887-88, Revised.	1888-89, Budget.
Charged to Interest on debt	1,827	1,719	1,517	1,371	1,137	737	739	824
Recovered	840	670	820	668	687	614	655	642
NET BURDEN	987	1,049	697	703	450	123	84	182

These figures are somewhat remarkable. It must be remembered that the expenditure on State Railways is partly in sterling and partly in rupees; but the transfer from Debt Account to Capital Account is made upon the Rupee Account only. We have, therefore, written off the account of debt, each year, a

good deal more than the debt we have raised, and our Rupee debt has been gradually nearly all transferred to the Capital Account of the Railway and Irrigation works.

88. The following figures shew the portion of the interest payments which has, each year, been charged to the account of Railways and Irrigation, and which is, of course, in addition to the above stated charges—

(Thousands of Rx.)	1881-82.	1882-83.	1883-84.	1884-85.	1885-86.	1886-87.	1887-88.	1888-89.
Railways	1,462	1,621	1,785	1,959	2,182	2,423	2,587	2,706
Irrigation	742	816	895	932	965	993	1,019	1,047
TOTAL	2,204	2,437	2,680	2,891	3,147	3,416	3,606	3,753

These will be dealt with under the Heads of Railways and Irrigation.

89. The total of the Burden of Debt may be shewn by adding together the figures in paragraphs 85 and 87.

(Thousands of Rx.)	1881-82.	1882-83.	1883-84.	1884-85.	1885-86.	1886-87.	1887-88.	1888-89.
India	987	1,049	697	703	450	123	84	182
England	2,457	2,458	2,418	2,578	2,420	2,556)	2,584
Exchange	507	564	552	626	762	977	(a)	1,086
TOTAL	3,951	4,071	3,667	3,907	3,632	3,656	...	3,852

(a) Omitted, being irregular as above explained.

CIVIL EXPENDITURE.

90. The Civil Expenditure, which is put down in the standard account in paragraph 16 at Rx. 22,021,000, is composed of the following items:—

	Standard of 1887-88. Rx.	Revised, 1887-88. Rx.	Budget, 1888-89. Rx.
REFUNDS AND ASSIGNMENTS OF REVENUE .	1,570	1,681	1,689
REVENUE DEPARTMENTS—			
Land Revenue (including District administration)	3,669	3,519	3,684
Forest Expenditure	738	763	771
Other Revenue Departments—India	1,075	1,057	1,073
England £	68	56	65
Exchange	29	23	27
CIVIL DEPARTMENTS (net)—			
Administration—India	1,372	1,394	1,387
England £	247	269	251
Exchange	104	113	105
Law and Justice (including Jails)	2,924	2,859	2,951
Police	3,392	3,396	3,454
Marine—Provincial	22	10	43
Education	1,121	1,069	1,130
Medical	747	705	728
Political	633	691	715
Other Departments	541	527	525
MISCELLANEOUS—(Net)			
Territorial and Political Pensions	677	609	571
Non-effective charges—India	458	467	492
England £	1,729	1,714	1,737
Exchange	726	720	730
Stationery, Printing, and Miscellaneous (net)	179	—83	163
TOTAL	22,021	21,559	22,291

(In the above statement, the sterling figures are shewn separately in the only cases in which they are of any importance. Exchange adds about 12, 8, 12, and 55 under Poli-

tical, Other Departments, Territorial Pensions, and Miscellaneous, respectively; in other cases, it only alters the unit figure by 1 at the most.

91. The *Land Revenue* Expenditure during the last few years has been as follows (in thousands of Rx.):—

1881-82.	1882-83.	1883-84.	1884-85.	1885-86.	1886-87.	1887-88, Revised.
3,004	3,043	3,329	3,363	3,414	3,464	3,519

The increase in 1883-84 is due to the assumption by the Government of about Rx. 300,000 of expenditure on patwaris (village accountants) in the North-Western Provinces and Oudh, by the abolition of the special cess from which they had till then been paid. During the last three years the expenditure has been increasing, owing to the progress of settlement work of which a full account has been given above. In 1887-88, although the Budget Estimate was for Rx. 3,668,000, the actual probable expenditure is Rx. 3,519,000 only, the difference arising from various savings on the estimated expenditure, the largest of which arises from the Madras Government not having brought into operation, during the year, the reorganisation of Subordinate establishments which is referred to in para. 132.

The Budget Estimate for 1888-89 is placed at Rx. 3,684,100, very slightly in advance of the Budget Estimate for 1887-88.

92. The charges under *Administration* in India have slowly increased from Rx. 1,291,000 in 1880-81 to about Rx. 1,392,000 in 1886-87, and just more than that in 1887-88. The increase has been general, that is, every Provincial Government contributes its share towards it. I do not think anything need be said about it, except that the amount of work of administration, which the expenditure represents, has certainly increased at a very much greater rate than the expenditure itself.

The Budget Estimate for 1887-88 was somewhat short of the actual existing standard of expenditure, and it is accordingly slightly exceeded in the Revised. The Budget Estimate for 1888-89 is for nearly the same amount as has been spent during the last two years.

The English expenditure has been practically steady at a little under £250,000.

93. Like the expenditure on Administration, that under *Law and Justice* has also steadily, but more rapidly, increased. The net figures stood at Rx. 2,562,000 in 1880-81, and about the same in 1881-82; but by 1886-87 they had risen to Rx. 2,809,000. It is Civil Justice that requires more and more provision being made for its demands, but as the increase of stamp revenue (mainly court-fees) is at least equal to the increase on the expenditure side, the expansion of the expenditure is hardly subject for objection. The net expenditure of 1887-88 is now put down at Rx. 2,859,000 against a Budget Estimate of Rx. 2,924,000, savings on the original estimate having occurred in nearly all the provinces. The Budget of 1888-89 is Rx. 2,951,000, being a slight advance over that for 1887-88.

94. The net charges on account of *Police* have been as follows (in thousands of Rx.):—

1880-81.	1881-82.	1882-83.	1883-84.	1884-85.	1885-86.	1886-87.	1887-88, Revised.
2,285	2,305	2,415	2,449	2,513	2,532	2,969	3,396

The increase which took place here in the years preceding 1885-86 represents for the most part the effect of the policy announced in 1882-83. In paragraph 65 of the Financial Statement for that year it was said that—

“Boards and Committees for the administration of certain Local Funds already exist in most parts of India. We now wish to widen the sphere of action hitherto assigned to

these Bodies. The Provincial Governments have therefore been invited to hand over to them such items of revenue and expenditure as may appear to be most suited to give them a real interest in the administration of the resources at their command, and on the other hand, to take over as a provincial charge some items of expenditure, such as police, over which Local Bodies cannot exercise any real control."

It was mainly medical and educational expenditure, which, in accordance with this policy, the Municipalities were expected to extend, in lieu of the police charges of which they were relieved. The increase of police expenditure therefore represents the charges formerly incurred by Municipalities, but of which they have now been in a great measure relieved.

95. The great expansion of police charges in the last two years is almost entirely in Burma. Burma Police expenditure in 1885-86 stood at Rx. 237,000 (net); in 1887-88, it stands at Rx. 1,031,700. Practically the whole of this increase represents the quasi-military force which has been recruited in India for service in Burma, and which will be necessary to bridge over the interval between the first military occupation of the country and its final settlement. The present high scale of expenditure is likely to last for two or three years, but after that we hope for rapid reduction of it.

96. The Provincial Portion of the *Marine Expenditure* consists of—

(1) The Pilotage service in Calcutta, of which the receipts exceed by Rx. 15,000 the portion of the charges that is brought to account under this head.

(2) Expenditure on Ports, Rivers, Light-houses, and river steamers which comes to about Rx. 40,000.

The net charge is therefore about Rx. 25,000.

97. *Educational Expenditure* has increased rather rapidly. The net outlay (deducting fees and other receipts) was Rx. 829,000 in 1880-81, but it has increased at the rate of between Rx. 40,000 and Rx. 50,000 a year, and in 1886-87, it stood at Rx. 1,097,000. Every province in India had its share in this increase. For 1887-88, as above shewn, Rx. 1,121,000 was estimated, but 1,069,000 only is likely to be spent, the reduction of provincial resources having compelled a slight retrograde movement. For 1888-89 the grants have again been increased, and the estimate stands at Rx. 1,130,000.

It should be noted that these figures do not shew the full measure of the increase of public expenditure on education in India, for Municipalities are also considerably increasing their expenditure on this head, and Municipal expenditure is not included in the Government accounts. It is part of the educational policy of the Local Governments to hand over schools, hitherto maintained from Government or from Local Funds, to the care of Municipalities, and every school so handed over disappears from our accounts of educational expenditure, though it remains, it is to be hoped, at least as efficient as before.

98. The net *Medical charges* have slightly increased from 1880-81 till 1884-85, having been Rx. 625,000 in the former year and Rx. 690,000 in the latter; but at this last figure they remained almost unchanged.

It should be remembered, however, that some part of the charges against this head have been passing into Municipal Accounts, and the diminution caused by this is probably the reason of the stationary nature of the charge during these years. The charges have now somewhat advanced, namely, to 705,000 (Revised, 1887-88) and 728,000 (Budget, 1888-89). Part of this increase arises in Upper Burma, but part of it is attributable to safe estimating, as this is one of the heads in which there is always a considerable saving on Budget.

99. The next head in the abstract represents the *Political charges*, and here there is unavoidably a very heavy increase during recent years. The increase arises almost entirely in connexion with our North-West Frontier. In 1879-80 and

1880-81, the standard of expenditure was about Rx. 450,000 (including the English charges of £10,000 and £15,000, as Indian contribution towards the cost of establishments in Persia and China respectively). But the subsidy of the Amir of Afghanistan, and the heavy charges for Afghan refugees, raised the standard of charge to Rx. 631,000 in the Estimates for 1887-88, and that will be considerably exceeded in the actuals by reason of the Boundary Delimitation and other special charges. The Estimate for next year again shows an advance (the greater portion of which is due to charges in connexion with Ayub Khan) and stands at Rx. 714,600.

100. On the remaining heads in the abstract I have little remark to make. Under Territorial and Political Pensions, we shall probably be relieved of at least Rx. 60,000 of charges by the death of the Ex-king of Oudh. The non-effective charges (leave allowances and pensions) are a very heavy burden, and must remain so in a country of which the public service is largely filled from foreign sources. The charge is necessarily every year mounting up, but it represents the fulfilment of positive obligations, and is not subject, except in a remote sense, to financial management. The Revised Estimate for the last group of Miscellaneous charges shews a considerable saving on the Budget Estimate.

POST OFFICE, TELEGRAPH, AND MINT.

101. The full account of the Rx. 248,000, put down in paragraph 16 as the net charge of these three quasi-commercial Departments, is as follows (in thousands) :—

		Revenue (+) and Expenditure (—).		
		India (Rx.)	England (£)	Exchange.
Post Office	.	1,216—1,212	—111	—46
Telegraph	{ Revenue Account	689—500	7—47	—17
	{ Capital Account	—123	—90	—38
Mint	.	170—79	—5	—2
TOTAL		2,015—1,914	7—253	—103
		+ 101	—246	

The English charges of the Post Office have for some years been very steady. More than half of them represent the payment, under Postal arrangements, to the Imperial Treasury, a payment which the new postal contract reduces from £66,000 in 1887-88 to £50,000 in 1888-89. The remainder represents stores.

Excluding consideration of this payment the purely Indian transactions which, in 1881-82 and 1882-83, shewed a loss of about Rx. 100,000, shew, in the Revised Estimates of 1887-88, a loss of Rx. 11,000 only, and in the Budget Estimates of 1888-89 a gain of Rx. 19,000.

To make a full account in the commercial sense, we would have to add charges for public works, for stationery, and for pensions and the like, but then we would also have to take into account the fact that the Post Office performs services for the district post in respect of which Government gets a revenue under Provincial Rates of nearly Rx. 100,000, and does all the work of the Postal Savings Banks without any credit in its account to represent its value.

102. Under *Telegraphs*, the Revenue account has, for a long time, paid a handsome surplus. This surplus, after taking into account a small charge for exchange, was, for the three last completed years, Rx. 129,000, Rx. 79,000, and Rx. 174,000.

The above standard gives us a net revenue of Rx. 72,000 after reckoning the exchange on the English charges.

The net Revenue is now estimated at Rx. 210,200 for 1887-88 and at Rx. 120,500 for 1888-89 (these figures including charges for exchange), the improvement being largely in Government Telegrams from Burma.

103. The *Mint* receipts have been a little better than the standard shewn in paragraph 16, as the importations were somewhat above average. The excess expenditure, however, has taken away all this advantage; it must be remembered that in 1887-88, the Mint had to incur the charges involved in coining over three crores of Gwalior bullion without getting the usual receipt of seignorage.

The figures taken for next year's Estimates differ very slightly from the Budget Estimates of 1887-88.

IMPERIAL MARINE.

104. The charges under this head are in two portions :

- (1) The expenditure connected with the Imperial Marine in India, which is normally about Rx. 120,000 or Rx. 130,000 net ;
- (2) In England Admiralty charges, and Marine stores, which on the average is about £150,000.

Latterly, however, the expenditure has reached a much higher figure, operations in Burma have necessitated heavy charges for transport, and a considerable patrolling service has also been required for the Burma rivers, so that Rx. 321,600 was spent in 1886-87, and Rx. 234,600 are likely to be spent in 1887-88, under the first of these heads. The purchase of torpedo vessels and of Marine stores in connexion with the special defences was shewn under this head in the Budget Estimates of 1887-88, which accordingly stood at £326,700. These are now, however, removed to the special head of "Special Defences" and the Revised Estimates shew £148,300 only.

The Estimates for 1888-89 are Rx. 253,600 in India for the first head, and £92,000 in England.

IRRIGATION.

105. The following table shows the state of the account of *Major Works*—that is, of those works of which the construction is charged outside the Revenue Account, or to the Protective grant, and which are, in the Revenue Account, charged with the interest payable on the cost of construction :—

	1881-82.	1882-83.	1883-84.	1884-85.	1885-86.	1886-87.	1887-88, Revised.	1888-89, Budget.
Direct Revenue . . .	866	931	937	1,075	865	910	975	1,014
Land Revenue . . .	491	469	534	466	562	597	578	591
TOTAL . . .	1,357	1,400	1,471	1,541	1,427	1,507	1,553	1,605
Maintenance . . .	456	502	515	571	593	627	682	671
Net Revenue . . .	901	898	956	970	834	880	871	934
Interest Charge . . .	803	816	894	932	965	992	1,019	1,047
Surplus . . .	98	52	62	38	—131	—112	—148	—113

A full account of the details of these figures will be found in Appendix F. They shew that the break-down of Revenue, which took place in 1885-86, occurred on the Ganges and Lower Ganges Canals, and that a heavy loss took place also on the Western Jumna Canal. In the last case, it was merely a rever-

sion from the excessively high standard of Revenue of the preceding two years, the receipts from this Canal being greatly influenced by the variations of season, as a year of good rainfall at once shews itself in a falling-off in the revenue. In the case of the Lower Ganges Canal, the break-down was caused by the destruction by floods of an aqueduct not far from the head of the Canal. Till this costly work is restored, the revenue will remain unduly low; the work of restoration is being actively carried on, but it will cost over Rx. 442,000, and will add Rx. 17,700 for all time to the account of interest.

106. From the details to which I have referred, it will be seen that the productive power of the Canals varies in a remarkable manner. The Lower Ganges Canal, even in its present crippled condition, pays a net revenue of Rx. 41,859 on a Capital Expenditure of Rx. 2,925,000, and the Godavari Delta System gives a revenue of Rx. 133,197 on a Capital Account of Rx. 1,065,535. On the other hand, the two canals which we have taken over from Companies do not even pay the charges of their maintenance, the return from them being as follows:—

	Capital Account.	Net loss, 1887-88.
Orissa (including the Midnapore and Tidal) Canals	3,315,022	35,000
Karnul Canal	2,165,546	6,384

107. In the *Minor Works* classed under Irrigation, both Capital Expenditure and Maintenance are charged in the Revenue Account, but except in Madras, there are now few large items of expenditure remaining under this head. The works consist chiefly of—

- Embankments in the deltas of Bengal and Madras.
- Inundation Canals in Punjab and Sind.
- Navigation Canals and Rivers in Bengal.
- Tanks in Madras.

It is only under this last head that any immediate increase of expenditure may be expected. The land revenue of Madras is largely dependent upon irrigation from tanks, which are scattered all over the country and have come down from ancient times. The Government of Madras has, for some years, had it in contemplation to undertake systematic measures for the improvement and restoration of these works, and the investigations and plans being now sufficiently far advanced, it proposes to lay out, for some years at least, Rx. 50,000 or Rx. 60,000 upon them. The first year of the outlay is 1888-89, and the Madras Government promises an ample return in the form of improved Land Revenue.

The estimates under this head are as follow:—

	Bengal.	Punjab.	Madras.	Bombay.	Other Provinces.	Total.
1886-87. { Receipts	86	18	10	15	20	149
{ Expenditure	124	64	272	161	70	691
1887-88, { Receipts	93	19	9	15	18	154
Revised. { Expenditure	170	72	263	176	102	783
1888-89, { Receipts	92	18	10	15	19	154
Budget. { Expenditure	182	70	330	173	110	865

108. The estimates are, therefore, for net expenditure:—

1887-88 Major Works	148	Minor Works	629	Total	777
1888-89 Major Works	113	Minor Works	711	Total	824

CIVIL AND MILITARY WORKS. IMPERIAL.

109. Since 1880-81 it has been the practice of the Government of India to set aside an annual sum of Rx. 1,000,000 for Military Works, which include Forti-

fications and Military Roads, as well as accommodation for troops. The expenditure on Civil Works is mostly in the hands of Local Governments, and comes within the Provincial account, so that the Imperial portion—that is, the Expenditure on the Imperial Departments throughout India, and in the smaller provinces under the direct administration of the Government of India,—amounted to only about Rx. 400,000, unless special works were being undertaken. Accordingly, in the two years 1884-85 and 1885-86, the expenditure in India was—

	1884-85. Rx.	1885-86. Rx.
Military Works	943,344	960,415
Civil Works	465,169	350,452

Besides which about £70,000 are spent in England upon furlough and leave allowances of Public Works Officers of all branches, and Cooper's Hill College, besides a small amount for stores.

110. But since these years we have two sets of new and heavy charges added to the old standard. In the first place, about Rx. 200,000 a year are being set aside for the construction of a scheme of frontier roads, in the Punjab and Beluchistan, and in the second place, we have to fit out the new province of Upper Burma with new roads, and with the buildings required both for the Military forces there stationed and for purposes connected with civil administration. The two heads, therefore, shew a rapid increase of expenditure over the standard of 1884-85 and 1885-86, and the figures for the present three years are as follow :—

	1886-87. Rx.	1887-88, Revised. Rx.	1888-89, Budget. Rx.
India—			
Military Works—India	985,063	960,200	965,300
Upper Burma	73,950	312,500	190,000
Civil Works—Ordinary	1292,042	347,200	306,900
Upper Burma	171,550	320,000	318,300
Frontier Roads	151,580	231,300	177,800
England	87,989	102,000	103,200
Exchange	33,089	42,800	43,400
TOTAL	1,794,763	2,316,000	2,104,900
Deduct Receipts	228,632*	85,400	82,300
Net Expenditure	1,566,131	2,230,600	2,022,600

* Includes Rx. 130,000 recovered from the Maharaja Sindia on account of Morar Cantonment and Gwalior Fort.

111. The roads, both in Upper Burma and on the Frontier, are at present being constructed by the Civil Works Department, and the ordinary Civil Works Grants are now being cut down to their lowest limit, in order to provide money for these new charges. Only Rx. 121,430 is allowed for ordinary "original works" in India in 1888-89, one of the large items being a charge of Rx. 15,500 for a new light-house for Oyster Island on the Burma coast.

PROVINCIAL.

112. The Provincial portion of this head represents the charges for roads and buildings all over India, and includes the portion that is met out of cesses upon land. This latter portion may be reckoned at Rx. 1,500,000 excluding the portion which the Governments of Bengal and the North-Western Provinces may be taken as spending out of the local rates which are credited in their provincial account.

113. The Local Governments vary their Public Works Expenditure to a great extent according to the surplus of Funds which the Provincial Contracts leave in their hands; so that no particular year's expenditure can be taken as the necessary standard. The following figures compare their expenditure in 1887-88 and 1888-89 with the amount of expenditure which, on the Finance Committee's report, was fixed as a convenient minimum.

	Minimum. Rx.	1887-88, Revised. Rx.	1888-89, Budget. Rx.
Central Provinces	120,000	134,000	163,000
Burma	122,000	121,000	117,000
Assam	50,000	57,000	61,000
Bengal	310,000	283,000	403,000
North-Western Provinces .	275,000	301,000	275,000
Punjab	230,000	256,000	253,000
Madras	200,000	201,000	236,000
Bombay	293,000	420,000	437,000
TOTAL	1,600,000	1,773,000	1,945,000

The excess charges of Rx. 345,000 are for the most part met by drawing upon accumulated balances, of which a considerable amount, as will be explained in the section relating to Provincial Finance, is at present at the disposal of Provincial Governments. The whole account of the figure which is shewn in the statement on paragraph 16 is thus made up:—

(Thousands of Rx.)	1886-87.	1887-88, Revised.	1888-89, Budget.
Civil Works—Provincial . .	1,942	1,773	1,945
Local	1,425	1,511	1,543
TOTAL	3,407	3,284	3,488
Deduct Receipts	499	481	473
Net Expenditure	2,908	2,803	3,015
Deduct portion charged against accumulated Balances	—28 (a)	484
Net Estimate	2,831	2,531

(a) This 28 (Rx. 27,700) turns out to be an addition and not a deduction; that is, the whole amount expended is charged to the year, and a further amount of Rx. 27,700 is charged off and laid by, to be spent hereafter, see paragraph 7.

MILITARY EXPENDITURE.

114. The following are the statistics during the past few years:—

(In thousands of Rx.)	1883-84.	1884-85.	1885-86.	1886-87.	1887-88, Budget.	1887-88, Revised.	1888-89, Budget.
ORDINARY ACCOUNT—							
India	11,003	11,190	11,640	12,188	12,440	12,593	12,931
England	3,966	3,907	3,630	3,513	3,748	3,758	3,727
Exchange	905	949	1,143	1,321	1,302	1,579	1,565
Total	15,874	16,046	16,413	17,022	17,580	17,930	18,223
Extraordinary Account—							
Afghanistan—net	103	2,115
Egypt—net	52
Burma—net	605	1,518	720	1,550	824
Arrear charges	1,230(a)
Total	17,156	16,149	19,134	18,540	18,300	19,480	19,047

(a) Payment of a million sterling to the English Exchequer.

115. The period included in the above figures is that during which the measures recently taken for the increase of the strength of the Army have been in operation.

The total cost of this increase of the Army may be stated, upon a comparison of Budget Estimates, as follows—

Budget for 1884-85	11,190,000
Budget for 1887-88	12,440,000
						Difference	<u>1,250,000</u>

The standard of Expenditure before that increase may be seen from the figures of 1883-84 and 1884-85.

The details of the increase work up to a larger amount, and are, in a general way, as follow:—

1. Augmentation—							
British Troops (10,600)	603,000
Native Troops (19,000)	521,300
2. Increased privileges and pay—							
British Troops (mostly exchange)	273,900
Native Troops (mostly good conduct pay and hutting money)	73,300
Volunteers and Pensioners	17,600
3. Malt liquor purchased in India instead of in England	224,400
4. Remounts from Australia (increase)	31,400
5. Better Pension Rules	10,000
						TOTAL	<u>1,754,900</u>

The excess of this amount over the Rx. 1,250,000 may be described as due in about equal parts to economies introduced under other heads of the Accounts, and to the fact that the intended measures have not as yet reached their full development. It was stated last year that out of Rx. 657,000 of this expenditure, still remaining to be undertaken on April 1st, 1887-88, Rx. 345,000 had been entered in the Estimates of 1887-88, and Rx. 312,000, therefore, still remained to be undertaken after the close of that year.

116. For 1887-88 the Budget Estimate of Expenditure on the Army in India stood at—

Ordinary Account; net	12,440,000
Burma Account	720,000
						TOTAL	<u>13,160,000</u>

as the figures now stand they are—

Ordinary Account; net	12,593,000
Burma Account	1,550,000
						TOTAL	<u>14,143,000</u>

The increase under the first head may be described as mainly due to the following causes: (1) special purchases of transport which were made during the cold weather; (2) the augmentation made in the establishment of British Troops having been effected somewhat more quickly than anticipated; and (3) the expedition undertaken at the end of the year in the Sikkim territory.

117. As regards Burma, the estimates provided for only Rx. 720,000 of expenditure, but before many months had passed, it became obvious that the original intentions of Government as to withdrawing the forces could not be carried

out, and that it would be necessary to continue operations upon a larger scale than the Estimates provided for. An additional grant of Rx. 280,000 was made for this purpose, and a further amount of Rx. 150,000 was given for payment of gratuity to the troops engaged in Burma, which together made up the addition of Rx. 430,000, which was announced in September last to the House of Commons as having been made to the Estimates of Military expenditure.

Later in the year the state of Burma rendered it advisable to take some active measures for a display of force near the Shan territory and for operating with small columns in other directions. It was estimated that Rx. 200,000 would be further required for this purpose; but the latest information indicates that another Rx. 200,000 may be necessary. These additions, it will be found, bring the Burma account up to the figure shown in the Revised Estimates.

118. The Budget Estimates of 1883-89 provide for a still further increase under the ordinary head; which is mainly due to the completion of the augmentation of the army, but partly also to the commencement of the issue of new arms; an operation in respect of which some heavy expenditure will have to be incurred in the near future.

SPECIAL DEFENCES.

119. It will be seen that the Budget Estimates for 1888-89 provide for a very large amount of expenditure under the new head of "Special Defences." The Estimates for 1887-88 provided for only Rx. 474,600, but the Secretary of State, in a Despatch received in May last, urged more speedy progress in the works contemplated under this head. More elaborate arrangements were, therefore, made for this expenditure, and additional grants being given for it, the expenditure has amounted to Rx. 487,100 in India, besides £57,600 in England. This English expenditure, which is mostly for armaments and torpedo-vessels, would have stood at a higher figure, but for delays which will have the effect of postponing to 1888-89, part of the expenditure originally estimated to come into 1887-88. The English expenditure of 1888-89, accordingly, stands at the high figure of £437,700 sterling, and we have granted Rx. 500,000 for expenditure in India.

120. I may refer to the quotation, under paragraph 11, from the speech of the Under-Secretary of State, in which he explains why this expenditure is shown within the Revenue Account, instead of, as was at first intended, under the category of Capital Expenditure. The whole amount of the expenditure is at present reckoned at about £930,000 in England, and Rx. 1,650,000 in India, but these figures cannot be put forward but as very rough estimates, and it is possible that the present programme may be extended.

Section IV.—General Financial Position.

121. Having concluded these observations upon the several divisions of our Revenue and Expenditure, I would make some remarks upon our general financial position, but that no one can be more conscious than myself how difficult it is, in Indian Finance, to look very far beyond the present. Our finance is a strange blending of elements which we can regard with a feeling of certainty and confidence, and of large outlying uncertainties over which we have no control. If we look at those heads of Revenue and Expenditure which depend upon our own administration, we have every reason to be satisfied. Land Revenue, Salt, Stamps, Excise, Customs,—all of these are elastic and progressive. Post Office, Telegraph, and Forests, all of which may be regarded as *quasi*-commercial departments, are more remunerative every year. Civil and Public Works expenditure are well under control. Railways afford a certain and an advancing income, and the only difficulty connected, from a financial point of view, with the account of their revenues, is the vastness of the transactions, which is such that

five per cent. increase or decrease in their earnings may make a difference of a million, each way, in our accounts.

122. These are the elements of satisfaction and of comparative certainty. On the other side, we have $8\frac{1}{2}$ millions of our revenue,—namely, the Opium Revenue—liable to be adversely affected, and at the present moment adversely affected, by the policy of China, and the increasing competition of other nations to supply the Chinese demand. We are obliged, by our military position, to take a share in the policy of armament which, willingly or unwillingly, the great European nations have been driven to adopt. And finally, and more directly affecting us, is the uncertainty of silver. The fall in its value seems to be temporarily arrested, but no one can say for how long we shall have a respite from the progressive increase of our burdens which this fall has hitherto imposed upon us. The chances of famine, too, are to be regarded, though it is certain that, through the extension of Railways, a new famine will be combated with very much smaller outlay of money than any former one.

123. The question of Indian Finance is, therefore, the question whether, in the face of all these uncertainties, our margin is sufficiently large. And in talking of this margin, I do not refer simply to the surplus of Rx. 423,000 which our Budget account shews, before the expenditure on Special Defence works is charged against it. When we write of the margin we hold against special uncertainties and special expenditure, we must not reckon merely that portion of the margin which remains to us after much of the special expenditure alluded to is charged against it.

For example, we have, at present, the special burden of the Upper Burma account which, for 1888-89, stands as follows:—

Rx.		Rx.	
Revenues	547,000	Civil Expenditure :—	
		Police	732,000
		Other Departments	339,000
		Military Works	190,000
		Civil Works	314,000
		Irrigation	23,000
		Army Special Expenditure	824,000
		TOTAL	2,422,000

shewing a net charge of about Rx. 1,879,000, all of which is within our revenue account. So also, we are charging to Revenue about Rx. 178,000 for Military roads on the North-Western Frontier.

Reckoning these, in the sense in which we are at present discussing the financial position, to be charges against our “margin,” we might write the Budget Estimates thus, somewhat re-arranging the totals of the statement under paragraph 16:

Rx.		Rx.	
Ordinary net revenues, excluding Upper Burma	53,550,000	Ordinary net expenditure, excluding the above	51,074,000
Upper Burma	547,000	Upper Burma	2,422,000
		Frontier Roads	178,000
		Special Defences	1,121,000
			3,721,000
TOTAL	54,097,000		54,795,000
		Deficit including Special Defences	698,000

124. If, therefore, we look only at ordinary items, we have a margin of Revenue of Rx. 2,476,000, the excess of Rx. 53,550,000 over Rx. 51,074,000. This margin is what we have to oppose to what, in European continental practice, would be called the “*Budget Extraordinaire*,” namely, the special burdens and risks of Famine and Exchange, of defence of our frontiers

and coasts, and of the conquest and settlement of our new province. In the present year, the charges of our "*Budget Extraordinaire*" are specially heavy, and (without reckoning any part of the account of Railway construction on our North-West Frontier) they absorb not only all our margin, but Rx. 698,000 in addition. The security of our present financial position depends upon our estimate of how far we may consider that, though these special burdens cost us net Rx. 3,174,000 in the particular year 1888-89, it is sufficient, on an average of years, to provide only Rx. 2,476,000 for them. The present scale of expenditure in Upper Burma and on Special Defences is practically certain of early reduction; but although it is possible that Famine charges and Exchange may add to our expenditure as much as we are in other directions relieved of, we have adopted a high standard in measuring our financial obligations, and can point with some confidence to the recuperative power shewn by our revenues, and to the fact that their natural increase, much more than any special measures of taxation, has hitherto enabled us to meet the ever-growing burdens which recent years have forced upon us.

Section V.—Provincial Finance.

125. It may be convenient in this place to enter upon a short review of the state of Provincial Finances. The new contracts with the Provincial Governments have now been in operation for one year, and the state of their Accounts and Estimates, after the close of the first year's transactions, shews very fairly how the new contracts may be expected to operate during their five years' currency. It will be borne in mind that the operation of the Provincial Contracts upon the general account is this; their Revenue and Expenditure is brought to account in the same way as general Revenue and Expenditure; but the amount by which their expenditure in any year falls short of their revenue is at once charged off the general revenue account as if it had been spent, and remains at their credit for expenditure in a subsequent year.

REVIEW BY PROVINCES.

126. *Central Provinces*.—(Disposable Revenue, about Rx. 700,000.) The Chief Commissioner will have, on March 31st, an excess of Revenue of about Rx. 180,200 to his credit, his fixed minimum being Rx. 80,000. The scale of expenditure appears to be within the means of the current Revenue, and the Chief Commissioner is proposing to expend a considerable portion of his accumulated balances upon Public Works. As a present excess in this class of expenditure can be discontinued as soon as necessary, the position of Central Provinces finance may be described as safe, but requiring careful management.

127. *Burma*.—(Disposable Revenue, from Rx. 1,250,000 to Rx. 1,300,000.) The minimum balance in this province is Rx. 60,000, so that a considerable part of the existing balance (Rx. 116,400 upon March 31st, 1888) may be described as available for expenditure. The Police expenditure is a heavy weight upon Provincial finances. A considerable improvement in Railway receipts has added to the balance at credit during 1887-88; but in the estimates of 1888-89 the increase of Police and other charges absorbs this improvement of Revenue. The balance at credit is meantime maintained, and the position is therefore a safe one.

128. *Assam*.—(Disposable Revenue, about Rx. 490,000.) With an economical measure of Public Works expenditure the Chief Commissioner's means are sufficient for the demands upon him.

129. *Bengal*.—(Disposable Revenue, about Rx. 4,800,000.) The contract made last year imposed upon the Government of Bengal the necessity of very careful management, if not of positive economies. The Budget estimates for 1887-88 not only opened with a balance below the prescribed minimum (Rx. 200,000), but proposed still further to trench upon it. Careful finance and prosperous revenues have largely restored its position. The revenue under Stamps (of

which three-quarters goes to the Provincial share) continues to show considerable elasticity, and Excise has also so greatly improved that the Provincial Government, on its one-quarter share, has gained an advantage of nearly Rx. 24,000. Bengal Railways have, during 1887-88, contributed an unexpectedly large revenue.

The result of these improvements, and of enforced economies on the expenditure side, is that the financial position of Bengal is, for the time, completely re-established, and it enters upon the year 1888-89 with a balance of Rx. 150,000 to the good, in excess of the minimum it is obliged to keep in hand. According to the Budget Estimates for 1888-89 this balance will be reduced, during the year, by grants made to Local Funds in aid of Local Expenditure.

130. *North-Western Provinces*.—(Disposable Revenue, about Rx. 3,200,000.) The year 1886-87, the last of the old contract, was a very prosperous year for the North-Western Provinces account, and they found their account close with a balance of Rx. 433,800, while they had estimated for Rx. 296,400 only. The account is at present, and has for two or three years been, seriously affected by a failure of Irrigation Revenue, caused by the break-down of the Nadrai Aqueduct. The loss due to this cause is partly made up for by a special temporary grant from Imperial Revenues, but even including this special grant, the revenue received by the Provincial account has been, in 1887-88, about Rx. 35,000 worse than anticipated. On the other hand, there has been a fair improvement under the Principal Revenue heads; though not enough to make up for the loss under Irrigation.

The North-Western Provinces Government has, in 1887-88, spent a part of its excess balances in Railway construction and in increasing the grants to Local Funds, a kind of expenditure which, within certain limits, can be reduced when necessary. It proposes to continue the same policy in 1888-89; and for that year its estimates are safe. But after 1888-89 its present scale of expenditure is dependent upon its receiving improvements in its revenue. If its Irrigation Revenue is restored within a year or two, it will be in easy circumstances; but apart from this consideration, it is, on its present scale of expenditure, making full use of its assigned revenues.

131. *Punjab*.—(Disposable Revenue, Rx. 1,580,000.) The account at present shews only a small scale of improvement of Revenue, and the Revenue is only enough to meet the expenditure. There is at present a small excess in the balance, which is Rx. 70,000 in excess of the fixed minimum, and this for the present affords a small margin on which to work. As Land Revenue Settlement is going on actively in the province, and as the Punjab gets 40 per cent. of any increase of Land Revenue, it is not unlikely that it may find, in increases of Land Revenue, a means of more easily meeting the demands for expenditure that are made upon it.

132. *Madras*.—(Disposable Revenue, Rx. 2,700,000.) The contract with the Government of Madras was based upon a moderate estimate of Land Revenue, as the Land Revenue of that province is much more liable to be affected by vicissitude of seasons than that of any other part of India. The season 1887-88 has been and promises to be favourable, and Madras has secured under this head a considerable advance of Revenue. Stamps and Excise Revenue have also advanced, and under these three heads and Assessed Taxes (which appear to have been estimated too moderately) the Provincial Revenues of Madras have been, in 1887-88, about Rx. 109,000 in excess of the estimate at which they were assigned. But part of this improvement may, as just stated, disappear in a bad season, by short collections of Land Revenue.

The very favourable year 1886-87, combined with economical management of its finances, left Madras with the very high balance of Rx. 433,700 with which to commence the new quinquennial period. It has taken advantage of

this high balance to seek a long postponed reform, in the reorganization of its Subordinate Revenue Service, which will involve an annual expenditure of Rx. 50,000 ; but will ultimately, it is not unlikely, result in an improvement of Revenue.

Only a moderate extension of expenditure having been incurred in 1887-88, the year will finish with a balance of about Rx. 58,500 in excess of the amount in hand in the beginning of the year ; but as in 1888-89 the Madras Government will have to meet the expenditure upon improved establishments already mentioned, and proposes also to enhance its grants for Public Works and for Irrigation, the balance is estimated to be somewhat reduced by the year's operations. It will still, however, stand at the very high figure of Rx. 455,300 (the minimum being Rx. 200,000), and this margin affords ample security both for continuing the higher scale of expenditure now entered upon, and against the chances of a bad Land Revenue year.

133. *Bombay*.—(Disposable Revenue, Rx. 2,900,000.*) The contract made with Bombay in 1882 was a very favourable one, and became still more favourable through the large increases of revenue which accrued in that wealthy Presidency. The result was that, notwithstanding considerable increases of expenditure under Education and other heads, the account of the Provincial Government closed at the end of 1886-87 with the very high balance of Rx. 548,900. This high balance the Government of Bombay are utilizing for Public Works Expenditure, and having, during the two years 1887-88 and 1888-89, increased by Rx. 128,000 and Rx. 145,000 respectively the rate of expenditure (Rx. 293,000) which was fixed, after the Finance Committee's investigations, as the necessary minimum, they will, it is estimated, reduce the balance, by the end of 1888-89, to Rx. 318,200, still considerably in excess of the fixed minimum of Rx. 200,000.

Apart from the high balance which is thus being disposed of, the Revenues have also considerably increased. Land Revenue steadily advances, Stamps and Excise show considerable increase, and Assessed Taxes have also produced a higher income than anticipated. The Revenue Account of the Provincial Government stands, on the whole, at nearly Rx. 80,000 higher than it did a year ago. Part of this improvement in its resources the Provincial Government has assigned for increases in its expenditure, but the financial position is, on the whole, extremely flourishing.

134. There is therefore none of the Provincial Governments which has not revenue enough for its present scale of expenditure, or rather, which has incurred any permanent obligations as to expenditure, which are beyond the scale of its revenue. Moreover, all the principal ones have balances which they are seeking the means of profitably expending. Their position is in curious contrast with that of the Imperial Government. But though the Imperial Government may for the time envy the Provincial Governments in their possession of assured revenues and high balances, it should be borne in mind that these ample revenues have been created by the provincial system, and would not have existed but for the assignment to the Provincial Governments of their share in the improvement of them.

Section VI.—Capital Expenditure of Government.

135. It will be appropriate in this place to give some account of the Capital Expenditure on construction of Railways and Irrigation Works, which, in the Statements of expenditure, are shown "under the line," that is, as carried on out of funds supplied by borrowing.

* The adjustment of alienated Land Revenue being omitted from both sides.

The Budget and Revised Estimates for 1887-88 compare as follows :—

	1887-88.		1888-89.
	Budget.	Revised.	Budget.
	Rx.	Rx.	Rx.
<i>State Railways—</i>			
India	2,435,900	2,145,600	2,062,800
England	1,355,000	1,140,000	973,000
Exchange	503,300	478,800	408,700
<i>Irrigation—</i>			
India	700,000	592,900	600,000
England	7,000	...
Exchange	2,900	...
TOTAL	4,994,200	4,367,200	4,044,500
Deduct refund by the Bengal-Nagpore Company	1,390,400	...
NET	4,994,200	2,976,800	4,044,500

From these figures it will be seen that the programme of expenditure laid down for 1887-88 has been fairly adhered to, though the large refund from the Bengal-Nagpore Company, on their taking over the Nagpore-Chhattisgarh Line, alters largely the total appearing under the head of Capital Outlay.

136. The following are the main items included in the Railway figures :—

RAILWAYS.	Revised Estimate, 1887-88. Rx.	Budget Estimate, 1888-89. Rx.
<i>Open Lines—</i>		
Rajputana-Malwa	170,900	—11,000
Eastern Bengal	243,500	22,300
North-Western	780,500	111,000
Cuddapah-Nellore	85,679	7,700
<i>Lines under Construction—</i>		
Toung-hoo-Mandalay	1,053,800	738,200
Assam-Bihar	229,750	308,000
Bellary-Kistna	405,000	25,000
Bezavada-Hyderabad Frontier	115,400	52,000
Sind-Pishin	201,050	301,560
Chaman Extension	138,800	536,600
Bolan (High Level line)	194,730	64,500
Frontier Reserve Stores	42,652	—12,400
Chenab Bridge	10,600	181,000
Sind-Sagar (Western Section)	237,050	250,500
Sutlej Bridge	77,170	20,000
Sealkote-Jummoo	32,500
Metre gauge, Rolling-Stock, Plant, and Permanent-way material to be taken over by Government from the Bengal-Nagpur Railway, on completion of conversion to standard gauge.	...	200,000

Rajputana-Malwa.—There has been a large accumulation of stores during 1887-88, chiefly of coal and other supplies from England, which will, it is expected, be utilised during 1888-89. The greater portion of the charge to Capital in 1887-88 is due to this cause. The balance of the expenditure was chiefly incurred on land and additional Rolling-Stock found necessary.

Eastern Bengal.—The bulk of the expenditure during 1887-88 has been incurred in providing additional Rolling-Stock and Steamers, which the increasing traffic has rendered necessary, in completing the Kidderpore dock line, doubling the Chitpore line, re-modelling the Chitpore yard, and constructing the Chitpore over-bridge, all required for working the growing traffic. In 1888-89, the proposed expenditure is chiefly to provide additional waterway to make the line safe against floods and some additional stock. Additions to workshops and offices are also contemplated.

North-Western.—The expenditure during 1887-88 is chiefly on additional stock for the North-Western system and improving the gradients on the Punjab Northern Section. The estimate also includes the cost of a large quantity of permanent way material for renewals received from England too late in the year to be laid before the 31st March. This material will be issued to Revenue in 1888-89, and the credit has been provided for in the Budget Estimate. The expenditure proposed for 1888-89 is chiefly on the improvement of gradients on the Punjab Northern Section, the Sukkur Bridge, and on additional sidings, crossing stations, and watering arrangements to bring the line up to the standard required to meet the traffic that will pass over this line in the event of military operations beyond the frontier.

Cuddapah-Nellore.—The funds allotted are required to complete the works on this line.

Toung-hoo-Mandalay and Assam-Bihar.—The funds allotted will practically complete these lines by the close of 1888-89.

Bellary-Kistna.—This line has been transferred to the Southern Mahratta Railway Company as from 1st January 1888. Under the terms of the transfer the State has to bear all expenditure incurred up to the 31st December 1887, and all liabilities outstanding on that date. Provision has been made accordingly in the estimates.

Bezwada-Hyderabad Frontier.—The funds allotted will complete this line.

Sind-Pishin.—The grants provide for the completion, by the close of 1888-89, of all works now considered necessary.

Chaman Extension.—Provision has been made for this work being vigorously pushed on during 1888-89. The bulk of the expenditure in 1888-89 will be incurred on the tunnel.

Bolan (High Level line).—Funds have been allotted to admit of the completion, during the coming year, of the section at present sanctioned.

Frontier Reserve Stores.—The estimates provide for the supply and collection of the material which Government has decided to retain as a reserve. The credit in 1888-89 is due to the issue of stores to the Chaman Extension.

Chenab Bridge at Ramawalla.—Only preliminary operations have been carried out during 1887-88, but the Budget of 1888-89 provides for work being vigorously pushed on.

Sind-Sagar (Western Section).—The grants will practically complete this line. The expenditure proposed for 1888-89 is chiefly in equipping the line with Rolling-Stock.

Sutlej Bridge (Ferozepore).—The grants provide for the completion of the Bridge. Some further expenditure on training works may hereafter be found necessary.

Sealkote-Jummoo.—The grant for 1888-89 provides for the completion of the section of this line which lies in British territory. That within Jummoo territory will be constructed, at the same time, by the Durbar.

Bengal-Nagpore.—Under the terms of the contract with the Bengal-Nagpore Railway Company, the State is bound to take over, from the Company, the metre gauge stock, plant, and materials of the Nagpore-Raj Nandgaon Section (formerly known as the Nagpore-Chattisgarh State Railway) on the completion of the conversion of that section from metre to broad gauge. The value of the material is estimated at Rx. 200,000. This material will be utilized or disposed of hereafter as opportunity offers.

137. Among the Irrigation grants, the only large works are the Nadrai Aqueduct upon the Lower Ganges Canal (see paragraph 105), which, it is hoped to complete by October 1889, the completion of the Orissa Canals, and of the Kistna Delta System, and the Periar Project in Madras. This last is a project for conveying eastward, into the Madura District, a stream which at present flows westward, and it includes a tunnel through the hills which at present form the watershed. The remaining works are mostly developments of existing irrigation systems.

Section VII.—Ways and Means—Home Treasury.

138. The Secretary of State's estimates of the transactions at the Home Treasury for 1887-88 were as follows:—

	Budget.	Revised.
	£	£
NET RECEIPTS.		
Council Bills	16,250,000	15,250,000
Receipts from Railway Companies for Capital Expenditure	3,772,800	7,166,700 (a)
Deposits and Advances	5,900	— 900
Add Opening Balance	2,077,100	3,280,800
TOTAL	22 105,800	25,696,600
NET OUTGOINGS.		
Excess of Expenditure over Revenue	14,632,100	15,216,200
Capital Expenditure of Government in England	1,421,300	1,147,000
Issues to Railway Companies for expenditure	2,755,800	2,718,600
On account of Remittances from India	1,125,300	1,000,500
Add Closing Balance	2,171,300	5,614,300
TOTAL	22,105 800	25,696,600

AIDED RAILWAY COMPANIES.

139. The Secretary of State's operations are at present greatly influenced by the transactions arising in connection with the Railway Companies. During the year 1887-88, it will be seen that the receipts of capital subscribed by them were greatly in excess of the original estimates. This was mainly under the following heads:—

	Original Estimate.	Revised Estimate.
Indian Midland	105,000	1,093,500
Southern Mahratta	300,000	1,133,250
Bengal-Nagpore	1,000,000	2,338,400
Bengal Central	250,000
	1,405,000	4,815,150
EXCESS		3,410,150

(a) £2,000,000 of the amount shewn in the Budget Estimate was received between the settlement of those Estimates and March 31st 1887 and therefore came into the accounts of 1886-87. The amount, however, is included here for purposes of comparison as if it had come in after March 31st, the opening balance being altered correspondingly.

These great differences partly arose out of new arrangements entered into after the Budget Estimates were compiled; and partly from the fact that the Companies arrange their raising of Capital more with reference to the state of the Money Market than with reference to their immediate prospects of expenditure.

The present condition of the operations of these Companies is as follows:—

140. The *Indian Midland Company* had paid up £2,896,500, and spent Rx. 2,270,000 by the end of 1886-87; an operation which, at the Contract rate of Exchange, leaves them with a balance to credit of Rx. 1,350,000. The funds which the Company estimate they will require for their expenditure are as follows:—

	In England. £	In India. Rx.
1887-88	898,400	1,393,700
1888-89	635,000	1,500,000

and as they estimate to raise a little over £1,000,000 in each year, they will considerably overspend their Capital.

141. A great part of the extra Capital of the *Southern Mahratta Railway* has been raised in connection with the recent transfer to them of the Bellary-Kistna Railway. They do not pay up any of the Capital already spent by Government, but they undertake to complete the line, and they have raised the Capital necessary to do so.

Their estimates of expenditure, including the Mysore Railway, are—

	In England. £	In India. Rx.
1887-88	203,200	790,000
1888-89	241,000	958,800

and they propose to raise £500,000 in 1888-89.

142. The *Bengal-Nagpur Railway Company* was formed towards the end of 1886-87, the initial Capital being £3,000,000. Of this amount they paid to Government about Rx. 1,390,000 for the existing Chhattisgarh State line and work done on the extension of it, and they have been actively spending money on construction during the last half of 1887-88. They will have paid up about £4,000,000 of Capital by the end of 1887-88, and of this Rx. 2,800,000 will have been spent, including the above Rx. 1,390,000.

Their estimates of expenditure are—

	England. £	India. Rx.
1887-88	593,000	1,965,500
1888-89	871,000	1,500,000

These will only a little more than exhaust the Capital at their credit on 31st March 1888. They propose, however, to raise a further amount of capital of about £1,032,700.

143. The Secretary of State, having to make payments of over £1,500,000 during the first week of April, requires to finish the financial year with a Cash Balance of at least £2,000,000. This, it will be seen, was the result aimed at in the Budget Estimates, but the receipts of Railway Capital altogether altered the position in this respect, and the Secretary of State, notwithstanding the reduction from £16,250,000 to £15,250,000 of his demands in the shape of Council Bills will end the year with a Cash Balance of about £3,500,000 in excess of the required amount. This excess, which is ordinarily lent at interest in the London Market, represents funds which will be drawn upon in 1888-89 by the Railway Companies in England and in India for their Capital outlay.

COUNCIL BILLS.

144. The following is the Secretary of State's Budget Estimate of Ways and Means for 1888-89, made up in the same form as above, the transactions

being, as before, necessarily governed by the estimates of receipts and payments on account of the Railway Companies :—

NET RECEIPTS.		£
Council Bills	.	14,000,000
Receipts from Railway Companies for Capital Expenditure	.	2,653,800
Deposits and Advances	.	4,500
Add Opening Balance	.	5,614,300
TOTAL	.	22,272,600
NET OUTGOINGS.		
Excess of Expenditure over Revenue	.	15,028,700
Capital Expenditure of Government in England	.	973,000
Issues to Railway Companies for Expenditure	.	2,901,300
On account of Remittances from India	.	1,091,200
Add Closing Balance	.	2,278,400
TOTAL	.	22,272,600

145. It will be observed that the Secretary of State proposes to draw £14,000,000 of Council Bills during the year, and does not propose to raise any new funds by sterling loans. It will be fully understood that in stating these as the present intentions of the Secretary of State, no sort of pledge is given that he will adhere to the programme thus explained, and he remains absolutely at liberty to raise money either by bills or by loans, from time to time, as he deems expedient.

There will be two operations on the money market, namely, the settlement of the remainder of the 4 per cent. sterling stock (about five millions), and the purchase of the Oudh and Rohilkhand Railway under the terms of its contract (an operation of over ten millions), but these transactions do not enter the above account.

Section VIII.—Ways and Means—India, 1887-88.

146. The following figures compare the Budget Estimate of Ways and Means of 1887-88 with the Revised Estimates :—

	Budget.	Revised.
NET RECEIPTS.		
1. Excess of Revenue in India over the Expenditure charged against it	Rx. 20,083,600	Rx. 18,590,300
2. Public Loan	2,000,000	1,934,000
3. Loan from the Gwalior State	3,500,000	3,500,000
4. Increase of Unfunded Debt—mostly Savings Bank Deposits	713,100	922,100
5. <i>For Remittance to Secretary of State</i>	1,032,000	982,300
Add Opening Balance	13,016,600	13,195,800
	<u>40,345,300</u>	<u>39,124,500</u>
NET OUTGOINGS.		
6. Expenditure charged to Provincial Balances	759,600	27,700
7. Capital Expenditure of Government in India	3,519,600	1,348,100
8. Loans to Municipalities, &c. (chiefly the Calcutta and Bombay Dock Loans)	677,200	422,500
9. Other Items (a)	325,400	344,700
10. <i>Issues on Capital Account to Railway Companies, against receipts in England</i>	1,673,200	3,165,000
11. Council Bills. <i>Sterling Account</i>	16,250,000	14,691,100
12. Do. <i>Exchange</i>	6,035,600	6,137,100
Add Closing Balance	11,104,700	13,733,100
	<u>40,345,300</u>	<u>39,124,500</u>

The transactions recorded in italics are connected with, and explained by, the corresponding figures of the Secretary of State's account in England. The others are purely Indian transactions.

(a) The explanation of this is omitted, as it would be of a highly technical character. It arises to a very large extent out of the exchange entries that are necessary in charging off exchange upon the English expenditure and in connection with Railway Companies and other Remittance accounts.

147. The first entry shews the result of the falling off in Opium and Railway Revenue, and of the excess of Military expenditure in Burma, and the transfer to expenditure of the Special Defences charges, which, in the Budget, were taken under Head 7. The remaining accounts on the Receipt side shew little variation from estimate.

148. On the outgoing side, the main departures from estimate are explained by the alterations which have been explained in dealing with Railway Companies' transactions. The figures may be explained thus—

	Capital Expenditure.	Railway Companies.	Council Bills.
Budget Estimate	3,519,600	1,673,200	16,250,000
Transfer of Special Defence Works to Revenue Account	—383,700
Bengal-Nagpur Company's Purchase of existing Railway	—1,390,400	+ 1,390,400	...
Bengal-Nagpur Company's further transactions	+ 575,100	...
Reduction of Drawings by one million	—1,000,000
Further reduction of demand by cessation of Telegraphic Drawings, about	—550,000
Result	1,745,500	3,638,700	14,700,000
Compare actual outturn of Revised Estimates	1,348,100	3,165,000	14,691,100

149. The loans were, as usual, estimated to be sufficient to carry us over the low period of Balances—November and December—with a Cash Balance of about Rx. 8,000,000. The Secretary of State's drawings, during the first four months of the year, were very considerable, £6,090,729—Rx. 8,649,500 having been allotted during that time, and Rx. 7,820,300 having been paid in India. The rate of both allotments and payments fell off during the next four months, the total, up to the end of November, being Rx. 13,432,300 allotted, and Rx. 12,277,800 paid in India. The payments thus fell short of the drawings by Rx. 1,154,500, a circumstance due for the most part to the fact that the proportion of Telegraphic Drawings greatly fell off.

We were meantime receiving the proceeds of the two Loans indicated as Nos. 2 and 3 in the above statement of account, the receipts being in the first case completed in September, and in the second, in the beginning of November.

The Balances therefore were unusually easy, and never fell below Rx. 10,000,000.

RUPEE LOAN OF 1887-88.

150. The public Loan of 200 lakhs was issued upon July 5th, and tenders were received upon August 2nd. The total amount tendered was Rx. 4,538,580, of which the following were accepted :—

	Rx.
At minimum accepted rate of R97-4 (52 per cent.)	235,800
Above said rate	1,764,200
	<u>2,000,000</u>

The actual receipts being Rx. 1,948,511, or an average rate of R97-6-10 per R100.

GWALIOR LOAN.

151. Of the Gwalior Loan the terms were arranged with the Council of Regency as follows :—

- (1) The amount received, which was mostly in Gwalior and Chandori Rupees, to be credited at their bullion equivalent—R1 for every

165 grains pure silver—without deduction of seignorage or melting charges.

- (2) The amount to bear interest at 4 per cent. per annum, payable half-yearly.
- (3) The loan to be repaid in annual instalments of 12 lakhs each, commencing when the present Maharaja is invested with full powers of administration.

A small portion of the loan was received in Government rupees at the Agra Treasury, but the rest was brought down to the Calcutta Mint in four successive remittances. So uniform did the Mint find the standard of the coinage to be, that it was found possible so to alligate the numbers of Gwalior Rupees (which are above British Indian standard) and of Chandori Rupees (which are below it), that silver of rupee standard was produced with a single melting; and after the whole operation was over, the amount received in remittance was found to fall short of the bullion required for the standard outturn in Government Rupees by ₹5,967 only.

The settlement of the interest account up to date was made on February 1st, 1888, by a payment to the Council of Regency of about Rx. 75,000, and Rx. 70,000 (seven lakhs) will be paid every 1st February and 1st August hereafter.

152. It seems desirable to take this opportunity of explaining how this loan affects the finances of the Gwalior State. The revenue of that State has for a long time largely exceeded the expenditure, and in fact it is this excess which is represented in the silver which the late Maharaja Sindia left hoarded in his palaces. The present Council of Regency have entered upon an enlightened policy of administration, which will involve considerable additions to the expenditure of the State; but their reforms would certainly border upon recklessness if there were any chance of their immediately not only absorbing the whole of the present surplus of Revenue, but also trenching upon the accumulations of the past. In investing these accumulations in a loan to the Government of India, the Council of Regency, therefore, have not given up, out of their possession, a single rupee which there was any chance of their being able to devote to the benefit of the Gwalior State itself. The interests of expenditure being already amply secured by the existing surplus of Revenue, the Council had before them the choice between leaving the hoards lying absolutely unproductive in the palaces or fort of Gwalior, and lending them, so as to produce a still further surplus of Revenue, of several lakhs a year. There can be no doubt which of these two courses will add most to the wealth and prosperity of the State, and to the means at the disposal of the Maharaja's Government. The conditions which the Council have made for the repayment of the amount, ensure the return of the money to the Treasury of the State long before there can be any claim upon it on account of local needs; and meantime the local revenues will have received a handsome addition from the interest arising out of the investment.

INDIAN SAVINGS BANKS.

153. Our borrowing transactions at present obtain no inconsiderable supplement from the operations of the Savings Banks and allied institutions.

The Indian Savings Banks date from 1833, when they were opened in the Presidency towns of Calcutta, Madras, and Bombay. The Madras and Bombay Banks gradually extended their operations into the interior of their respective Presidencies through the agency of the various Government treasuries. The Calcutta Bank did not achieve similar results, and accordingly in 1870 arrangements were made for establishing District Savings Banks at the District Treasuries in the Bengal Presidency and in Burma and Berar. A further development of

the system occurred in 1882, when Post Office Savings Banks were introduced. These have rapidly advanced in public estimation and have now superseded the older institutions, so far as the District Treasuries are concerned. There now exist, therefore, outside the three Presidency towns only the Postal Banks. In 1886 these began to receive and repay deposits at rural Post Offices, thereby carrying encouragements to thrift into tracts of country where these had never been known before.

While the wants of the general public were being provided for in this way, the Government opened in 1859 Military Banks for its European non-commissioned officers and soldiers, and in 1879 Provident Institutions for the employés of State Railways. In 1884 the Civil Engineers' Provident Fund was commenced, and it has since been opened to officers of the Telegraph Department.

The following figures shew the progress of these Banks since the mutiny of 1857:

YEARS.	Total Deposits.	Total Withdrawals.	Total Balances.
	Rx.	Rx.	Rx.
1857-58	228,400	159,700	389,800
1860-61	327,600	311,900	623,700
1865-66	380,400	362,700	633,800
1870-71	674,100	605,100	1,150,000
1875-76	737,500	653,400	1,895,500
1880-81	2,044,800	1,114,000	3,213,700
1885-86	3,772,200	3,378,100	5,081,200
1886-87	5,330,700	4,616,400	5,795,500
1887-88 Revised Estimate	4,440,400	3,570,800	6,665,100
1888-89 Budget Estimate	4,949,300	4,162,900	7,451,500

To the figures thus estimated, we have to add the probable transactions of the Uncovenanted Service Funds and a few smaller amounts, and these give us the net receipts shewn under "Unfunded Debt" in our statements.

CALCUTTA AND BOMBAY DOCKS.

154. The eighth item in the above list of transactions refers to the arrangement under which the Government are finding funds for the Kidderpore Dock works at Calcutta, and the extension of Docks at Bombay. The former of these projects was estimated to cost, when complete, Rx. 2,750,000, and the latter, Rx. 940,000; but the Port Trustees not being able to obtain money in the Indian money market on sufficiently favourable terms, an arrangement was made whereby the Government raises the money for them and advances it on condition of receiving the same rate of interest which it has to pay (a little over four per cent.), and of having an additional one per cent. put aside as a sinking fund in repayment.

The advances made by Government to the Port Trustees of Calcutta and of Bombay, on account of their Dock-works, have been as follows:—

Advances.	Calcutta. Rx.	Bombay. Rx.
Till end of 1886-87	560,500	511,800
In 1887-88 (a)	300,000	300,000
TOTAL	860,500	811,800

In 1888-89 the Trustees will, it is estimated, require funds as follows:—

	Calcutta. Rx.	Bombay. Rx.
1888-89	449,000	75,000

(a) Partly estimate.

Section IX.—Ways and Means—India, 1888-89.

155. It remains to estimate for the Ways and Means of 1888-89. We have already dealt with the separate items which enter into this estimate,—the excess of revenue over expenditure in India, the provision required for capital expenditure, of Government, of Railway Companies, and of the Port Trusts of Calcutta and Bombay, the demands of the Secretary of State on account of Council drawings.

NECESSARY CASH BALANCES.

156. It is necessary to explain in a few words the principle which regulates our calculation of Ways and Means in India. Our receipts of Revenue, and some of our other transactions, are very unevenly distributed through the year. The four months, January to April, embrace a very heavy revenue period, during which, notwithstanding heavy payments of Council Bills, our Cash Balances continually increase; and during May and June the revenue is still good enough to maintain the high figure. But during the next five months, and especially August, September, and October, the Revenue receipts fall far short of the demands on the treasuries, and the balances run down quickly, even when we are receiving the proceeds of a loan. December is the month during which the balances are ordinarily at their lowest point.

Now, many years of experiment have shown us that the amount below which we may not suffer our balances to fall is 800 lakhs (Rx. 8,000,000). Our daily transactions average about 50 lakhs (Rx. 500,000) of receipts and the same amount of outgoings, and we have to provide for them at somewhat over 200 treasuries, and about four times that number of sub-treasuries. There is no system of Treasury Bills as in England, and little borrowable capital, to carry us over a temporary deficit—we have to keep our own money ready to meet the demands upon us.

Our Ways and Means Estimates are therefore so regulated that we may be sure of having, in the months of November and December, the necessary minimum of 800 lakhs. A slackness of Council-bill drawings, or other causes, may result in our tiding over the low period with ease, and with a margin over the fixed minimum; but we cannot afford in any case to go below it.

PROPOSED RUPEE LOAN.

157. We estimate that we will require a loan of Rx. 3,000,000 to carry us over the year, but, as in the case of the English Account, no pledge can be given either as to the amount of the loan, or the time when it will be issued, or the conditions which will attach to it.

158. The estimate accordingly, made up in the same form as in paragraph 146, stands as follows:—

NET RECEIPTS.	
Excess of Revenue in India over the Expenditure charged against it	20,642,800
Public Loan	3,000,000
Increase of Unfunded Debt—mostly Savings Bank Deposits	845,300
For Remittance to Secretary of State	1,020,700
Add Opening Balance	13,733,100
	<hr/>
	39,241,900
NET OUTGOINGS.	
Expenditure charged to Provincial Balances	483,600
Capital Expenditure of Government in India	2,662,800
Loans to Municipalities, &c. (chiefly the Calcutta and Bombay Dock Loans)	486,800
Other items	472,500
Issues on Capital Account to Railway Companies, against receipts in England	2,895,900
Council Bills—Sterling Account	14,548,500(a)
„ Exchange (at Rx. 42 per £100)	6,110,400
Add Closing Balance	11,581,400
	<hr/>
	39,241,900

(a) Allowing for an excess of payments against the deficiency in 1887-88.

It will be seen that, in addition to the ordinary capital expenditure of the Government of India we have unusually heavy payments for loan works and to Railway Companies. We begin the year with a strong balance, and estimate to finish it with a sufficient one.

Section X.—Summary.

159. I summarise the various points in this Financial Statement as follows :—

- (a) The accounts of 1886-87 close with a surplus of Rx. 178,427, even after charging off the Special Defence Works. The Revenue was much better than the Revised Estimates, and the excess amply covered an excess of Army expenditure, besides meeting the charges for Special Defence Works.
- (b) The Revised Estimates of 1887-88 shew a deficit of Rx. 2,447,800, to which must be added the charges of Rx. 568,900 for Special Defence Works. This depreciation is mainly due to an exceptional charge of Rx. 1,059,000 arising in connexion with the conversion of the 4 per cent. Sterling Loan into $3\frac{1}{2}$ per cent.; to further fall of silver and consequent increase of exchange charges by about Rx. 710,000; and to heavy Military expenditure, Rx. 830,000, in excess of Budget Estimate, in Upper Burma. The losses of Opium and of Railway Revenue have been made up for by improving revenue under other heads, and saving in expenditure.
- (c) The Budget Estimates for 1888-89 shew a financial position closely approximating to that explained on 27th January. The surplus in the Estimates, apart from the Special Defence expenditure, is Rx. 423,000. As compared with the Statement of January 27th, there is considerable increase in the expenditure on the Army, but the improvements in revenue are sufficient to make up for it. Upper Burma continues to require high expenditure, both under Police and under Army.

The Special Defences expenditure, however, is to be vigorously pushed on, and anticipated charges of Rx. 1,121,000 under this head (about Rx. 370,000 more than was put down on January 27th as the annual demand) convert the surplus of Rx. 423,000 into a deficit of Rx. 698,000.

- (d) For Capital Expenditure on Railways and Irrigation, Rx. 4,367,200 will be spent in 1887-88, and Rx. 4,044,500 is provided for 1888-89. The largest items are the Mandalay Railway and the Railways on the North-Western Frontier.

The Bengal-Nagpur, the Indian Midland, and the Southern Mahratta Railway Companies have, during 1887-88, extended their arrangements with the Secretary of State, and are all engaged in active Railway construction.

- (e) The Secretary of State proposes to draw, during 1888-89, for £14,000,000 of Council Bills. He does not propose to raise any sterling loan.
- (f) The Government of India propose to raise a Rupee Loan of Rx. 3,000,000, of which Rx. 524,000 is required for the Dock Works at Calcutta and Bombay.

J. WESTLAND.

March 26, 1888.

Summary of Financial Statement, 1888-89.

The Financial Statement for 1888-89 is published in the form of a Minute by Mr. Westland.

It first briefly refers to the causes which obliged the Government, in January last, to seek an improvement of revenue of nearly Rx. 2,000,000, and to the financial discussions which then took place in the Council.

It announces the result of the accounts of 1886-87 to be a surplus of Rx. 178,427, after charging off Rx. 325,626 on account of Special Defence works. The differences from the Revised Estimates were explained to Parliament on September 9th last, and they had already been, for the most part, published in India in April.

The Revised Estimates for 1887-88 shew a deficit of Rx. 2,448,000, without counting Special Defences expenditure amounting to Rx. 569,000. This result is worse than Budget by Rx. 2,464,000. Of this amount, Rx. 1,059,000 arise out of the charge for anticipated interest which was explained by Sir J. Gorst to arise out of the conversion of 4 per cent. Sterling Stock. Rx. 830,000 are caused by excess of Army charges in Upper Burma, and Rx. 710,000 by fall of exchange to about 16'9 pence. The fall of opium revenue is made up for by improvements in other principal Revenue heads, and the loss under Railways by savings in expenditure and by better receipts under various heads. It is explained that the Revised Estimates are based upon the actual transactions of eleven months and a moderate estimate for the month of March. But the transactions of the month of March are on such a large scale, that they afford room for very considerable variations, which cannot be completely known till about April 20th.

The Budget Estimates (which are made up at the same rate of exchange, namely, 16'9 pence) shew almost the same result as was anticipated in the Estimate of the financial position presented to the Council on January 27th, namely, a surplus of Rx. 423,000. The Revenues, as shown in the Estimates, shew one year's advance over the standard then based on the Estimates of 1887-88; but this advance is absorbed by the continued additions to Army expenditure arising out of the augmentation of the forces. Rx. 824,000 is provided for extra Military expenditure on account of Burma.

Against the surplus of Rx. 423,000 is to be taken the expenditure on Special Defences, which are this year to be pushed on with great vigour, and will involve expenditure of Rx. 1,121,000, half of which is in England; so that, including these charges, there is a deficit of Rx. 698,000.

Mr. Westland goes on to review in some detail the state of the Revenue and Expenditure under each of the main heads, giving an account, among other things, of the progress of Land Revenue, the administration of Excise Revenue, the first year's operations of the Income Tax, the condition of Railway Finance, and the burden of debt.

His summing up is as follows:—

“Our finance is a strange blending of elements which we can regard with a feeling of certainty and confidence, and of large outlying uncertainties over which we have no control. If we look at those heads of Revenue and Expenditure which depend upon our own administration, we have every reason to be satisfied. Land Revenue, Salt, Stamps, Excise, Customs,—all of these are elastic and progressive. Post Office, Telegraph, and Forest, all of which may be regarded as *quasi*-commercial Departments, are more remunerative every year. Civil and Public Works expenditure are well under control. Railways afford a

certain and an advancing income, and the only difficulty connected, from a financial point of view, with the account of their revenues, is the vastness of the transactions, which is such that five per cent. increase or decrease in their earnings may make a difference of a million, each way, in our accounts.

"These are the elements of satisfaction and of comparative certainty. On the other side, we have $8\frac{1}{2}$ millions of our revenue,—namely, the Opium Revenue—liable to be adversely affected, and at the present moment adversely affected, by the policy of China, and the increasing competition of other nations to supply the Chinese demand. We are obliged, by our military position, to take a share in the policy of armament which, willingly or unwillingly, the great European nations have been driven to adopt. And finally, and more directly affecting us, is the uncertainty of silver. The fall in its value seems to be temporarily arrested, but no one can say for how long we shall have a respite from the progressive increase of our burdens which this fall has hitherto imposed upon us. The chances of famine, too, are to be regarded, though it is certain that, through the extension of Railways, a new famine will be combated with very much smaller outlay of money than any former one.

"The question of Indian Finance is, therefore, the question whether, in the face of all these uncertainties, our margin is sufficiently large. The security of our present financial position depends upon our estimate of how far we may consider that, though these special burdens cost us net Rx. 3,174,000 in the particular year 1888-89, it is sufficient, on an average of years, to provide only Rx. 2,476,000 for them. The present scale of expenditure in Upper Burma and on Special Defences is practically certain of early reduction; but although it is possible that Famine charges and Exchange may add to our expenditure as much as we are in other directions relieved of, we have adopted a high standard in measuring our financial obligations, and can point with some confidence to the recuperative power shewn by our revenues, and to the fact that their natural increase, much more than any special measures of taxation, has hitherto enabled us to meet the ever-growing burdens which recent years have forced upon us."

The state of Provincial Finance is then reviewed and summed up as follows:—

"There is therefore none of the Provincial Governments which has not revenue enough for its present scale of expenditure, or rather, which has incurred any permanent obligations as to expenditure, which are beyond the scale of its revenue. Moreover, all the principal ones have balances which they are seeking the means of profitably expending. Their position is in curious contrast with that of the Imperial Government. But though the Imperial Government may for the time envy the Provincial Governments in their possession of assured revenues and high balances, it should be borne in mind that these ample revenues have been created by the provincial system, and would not have existed but for the assignment to the Provincial Governments of their share in the improvement of them."

Some details are then given as to the progress in the construction of Railways, both by the Government directly and by the Indian Midland, the Bengal-Nagpur, and the Southern Mahratta Companies. Altogether more than eight millions sterling will be spent in England and India on Railway Capital Account during 1888-89.

It is announced, with the usual reserve, that the Secretary of State proposes to raise fourteen millions sterling by Council Bills, and that the Government in India will raise a rupee loan of three crores, of which half a crore is required for the Calcutta and Bombay Dock-works.

PART IV.

Acts of the Governor General's Council assented to by the Governor General.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 23rd March, 1888, and is hereby promulgated for general information :—

ACT NO. VI OF 1888. X

An Act to amend the law relating to Imprisonment for Debt.

WHEREAS it is expedient to amend the law relating to imprisonment for debt; It is hereby enacted as follows :—

Title, commencement and extent. 1. (1) This Act may be called the Debtors Act, 1888; and

(2) It shall come into force at once.

(3) The several portions thereof have the same local extent as the enactments to which they respectively relate.

2. After section 245 of the Code of Civil Procedure the following sections shall be inserted, namely :—

“245A. Notwithstanding anything in the last foregoing section or in any other section of this Code, the Court shall not order the arrest or imprisonment of a woman in execution of a decree for money.

“245B. (1) Notwithstanding anything in section 245 or in any other section of this Code, when an application is for the execution of a decree for money by the arrest and imprisonment of a judgment-debtor who is liable to be arrested in pursuance of the application, the Court may, instead of issuing a warrant for his arrest, issue a notice calling upon him to appear before the Court on a day to be specified in the notice and show cause why he should not be committed to jail in execution of the decree.

“(2) If appearance is not made in obedience to the notice, the Court shall, if the decree-holder so requires, issue a warrant for the arrest of the judgment-debtor.”

3. In section 250 of the said Code, between the word “shall” and the word “issue”, the following shall be inserted, namely :—

“subject to the provisions of sections 245A and 245B,”.

Addition of new section after section 337 of the Code.

4. After section 337 of the said Code the following shall be inserted, namely :—

“337A. (1) When a judgment-debtor appears before the Court in obedience to a notice issued under section 245B, or is brought before the Court after being arrested in execution of a decree for money, and it appears to the Court that the judgment-debtor is unable from poverty or other sufficient cause to pay the amount of the decree or, if that amount is payable by instalments, the amount of any instalment thereof, the Court may, upon such

terms, if any, as it thinks fit, make an order disallowing the application for his arrest and imprisonment, or directing his release, as the case may be.

"(2) Before making an order under sub-section (1), the Court may take into consideration any allegation of the decreeholder touching any of the following matters, namely:—

- (a) the decree being for a sum for which the judgment-debtor was bound as a trustee or as acting in any other fiduciary capacity to account;
- (b) the transfer, concealment or removal by the judgment-debtor of any part of his property after the date of the institution of the suit in which the decree was made, or the commission by him after that date of any other act of bad faith in relation to his property, with the object or effect of obstructing or delaying the decreeholder in the execution of the decree;
- (c) any undue or unreasonable preference given by the judgment-debtor to any of his other creditors;
- (d) his refusal or neglect to pay the amount of the decree or some part thereof when he has or since the date of the decree has had the means of paying it;
- (e) the likelihood of his absconding or leaving the jurisdiction of the Court with the object or effect mentioned in clause (b) of this sub-section.

"(3) While any of the matters mentioned in sub-section (2) are being considered, the Court may in its discretion order the judgment-debtor to be imprisoned, or leave him in the custody of an officer of the Court, or release him on his furnishing sufficient security for his appearance on the requisition of the Court.

"(4) A judgment-debtor released under this section may be re-arrested.

"(5) If the Court does not make such an order as is mentioned in sub-section (1), it shall cause the judgment-debtor to be arrested if he has not already been arrested and, subject to the other provisions of this Code, commit him to jail."

5. To section 380 of the said Code the following shall be added, namely:—

"On the application of any defendant in a suit for money in which the plaintiff is a woman the Court may at any stage of the suit make a like order if it is satisfied that such plaintiff does not possess any sufficient immoveable property within British India independent of the property in suit."

6. In section 640 of the said Code, after the words "from arrest in execution of civil process" the words "in any case in which the arrest of women is not prohibited by this Code" shall be added.

7. In section 642 of the said Code, for the words and figures "except as provided in sections 256 and 643" the following shall be substituted, namely:—

"except as provided in section 337A, sub-section (5), and sections 256 and 643,".

8. After section 652 of the said Code the following shall be added, namely:—

"653. (1) At any time after a warrant of arrest has been issued under this Code, the Court may cancel it on the ground of the serious illness of the person against whom the warrant was issued.

"(2) When a judgment-debtor has been arrested under this Code the Court may release him if in its opinion he is not in a fit state of health to undergo imprisonment.

"(3) When a judgment-debtor has been committed to jail, he may be released therefrom—

(a) by the Local Government, on the ground of his suffering from any infectious or contagious disease, or

(b) by the committing Court, or any Court to which that Court is subordinate, on the ground of his suffering from any serious illness.

"(4) A judgment-debtor released under this section may be re-arrested, but the period of his imprisonment shall not in the aggregate exceed that prescribed in section 342 or section 481, as the case may be."

9. The last sixteen words of section 8 of the Married Women's Property Act, 1874, and the whole III of section 31 of the Ajmere Courts Regulation, 1877, are hereby repealed.

10. (1) For the first fifty-five words of section 48 of the Act of the Government of Fort St. George in Council, No. VIII of 1865, the following shall be substituted, namely:—

"No person shall be imprisoned as a defaulter for a longer period than six months whatever the amount of the arrears may be, nor for a longer period than six weeks if the arrears do not exceed fifty rupees."

(2) For the proviso to section 163 of the North-Western Provinces Rent Act, 1881, the following shall be substituted, namely:—

"Provided that the time for which a debtor may be confined in execution of a decree under this Act shall not exceed six weeks when the amount decreed (exclusive of costs) does not exceed fifty rupees, or six months in any other case."

S. HARVEY JAMES,

Secretary to the Government of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 23rd March, 1888, and is hereby promulgated for general information :—

✱ ACT NO. VII OF 1888. ✱

An Act to amend the Code of Civil Procedure, the Indian Registration Act, 1877, and the Indian Limitation Act, 1877.

182. WHEREAS it is expedient to amend the Code
17. of Civil Procedure, the Indian Registration Act, 1877, and the Indian Limitation Act, 1877; It is hereby enacted as follows :—

1. (1) This Act may be called the Civil Procedure Code Amendment Act, 1888; and

(2) It shall come into force on the first day of July, 1888.

2. (1) In this Act, unless there is something repugnant in the subject or context, "section" means a section, "schedule" a schedule, and "Chapter" a Chapter, of the Code of Civil Procedure.

(2) Any reference in any enactment heretofore passed or hereafter to be passed to any Act amended by this Act shall, so far as may be, be read as if made to that Act as so amended.

3. The following shall be inserted after section 4, namely :—

4 A. (1) Where any Revenue Courts are governed by the provisions of the Code of Civil Procedure in those matters of procedure upon which any special enactment applicable to them is silent, the Local Government, with the previous sanction of the Governor General in Council, may, by notification in the official Gazette, declare that any portions of those provisions shall not apply to those Courts, or shall only apply to them with such modifications as the Local Government, with the sanction aforesaid, may prescribe.

(2) 'Revenue Court' in sub-section (1) means a Court having jurisdiction under any local law to entertain suits relating to the rent,

revenue or profits of land used for agricultural purposes, but does not include a Civil Court having original jurisdiction under this Code to try such suits as being suits of a civil nature of which its cognizance is not barred by any enactment for the time being in force."

4. The second paragraph of section 8 is hereby repealed.

5. To section 14 the following shall be added, namely :—

"Where a suit is instituted in British India on the judgment of any foreign Court in Asia or Africa except a Court of Record established by Letters Patent of Her Majesty or any predecessor of Her Majesty or a Supreme Consular Court established by an Order of Her Majesty in Council, the Court in which the suit is instituted shall not be precluded from inquiry into the merits of the case in which the judgment was passed."

6. The following shall be inserted after section 16, namely :—

16A. (1) When it is alleged to be uncertain within the local limits of the jurisdiction of which of two or more Courts any immovable property is situate, any one of those Courts may, if satisfied that there is ground for the alleged uncertainty, record a statement to that effect and thereupon proceed to entertain and dispose of any suit relating to that property, and its decree in the suit shall have the same effect as if the property were situate within the local limits of its jurisdiction :

"Provided that the suit is one with respect to which the Court is competent as regards the nature and value of the suit to exercise jurisdiction.

(2) Where a statement has not been recorded under sub-section (1), and an objection is taken before an appellate or revisional Court that a decree or order in a suit relating to such property was made by a Court not having jurisdiction where the property is situate, the appellate or revisional Court shall not allow the objection if in its opinion there was, at the time of the institution of the suit, any reasonable ground for uncertainty as to the Court having jurisdiction with respect thereto."

7. In section 17, after Explanation II, the following shall be inserted, namely :—

“EXPLANATION III.—In suits arising out of contract, the cause of action arises within the meaning of this section at any of the following places, namely :—

- (i) the place where the contract was made ;
- (ii) the place where the contract was to be performed or performance thereof completed ;
- (iii) the place where in performance of the contract any money to which the suit relates was expressly or impliedly payable.”

8. In section 27 there shall be inserted after the words “the Court may” the words “at any stage of the suit”, and after the words “any other person or persons” the words “with his or their consent”.

Substitution of new section for section 53. 9. For section 53 the following shall be substituted, namely :—

When plaint may be rejected, returned for amendment or amended. “53. The plaint may, at the discretion of the Court,—

(a) at, or at any time before, the settlement of issues be rejected if it does not disclose a cause of action ;

(b) at, or at any time before, the settlement of issues be returned for amendment within a time to be fixed by the Court, and upon such terms as to the payment of costs occasioned by such amendment as the Court thinks fit, if it—

(i) is not signed and verified as hereinbefore required,

(ii) does not state correctly and without prolixity the several particulars hereinbefore required, or contains particulars other than those so required,

(iii) is wrongly framed by reason of nonjoinder or misjoinder of parties, or joins causes of action which ought not to be joined in the same suit, or

(iv) is not framed in accordance with the provisions of section 42 ;

(c) at any time before judgment be amended by the Court upon such terms as to the payment of costs as the Court thinks fit :

“Provided that a plaint shall not be amended either by the party to whom it is returned for amendment, or by the Court, so as to convert a suit of one character into a suit of another and inconsistent character.

“When a plaint is amended under this section the amendment shall be attested by the signature of the Judge.”

Substitution of new section for section 72. 10. For section 72 the following shall be substituted, namely :—

“72. (1) If the defendant resides within the jurisdiction of the Court in which the suit is instituted, or has an agent resident within that jurisdiction who is empowered to accept the service of the sum-

mons, the summons shall ordinarily be delivered or sent to the proper officer to be served by him or one of his subordinates.

“(2) The proper officer may be an officer of another Court than that in which the suit is instituted, and, where he is such an officer, the summons may, subject to any rules which the High Court may make in this behalf, be sent to him by post or in such other manner as the Court may direct.”

II. In section 82, for the first twenty words the following shall be substituted, namely :—

“When a summons is returned under section 80, the Court shall if the return under that section has not been verified by the affidavit of the serving-officer, and may if it has been so verified, examine the serving-officer on oath, or cause him to be so examined by another Court, touching his proceedings”.

Substitution of new section for section 90. 12. For section 90 the following shall be substituted, namely :—

“90. If there is a British Resident or Agent, or a Superintendent appointed by the British Government, or a Court established or continued by the authority of the Governor General in Council, in or for the territory in which the defendant resides, the summons may be sent to such Resident, Agent, Superintendent or Court, by post or otherwise, for the purpose of being served upon the defendant ; and, if the Resident, Agent or Superintendent or the Judge of the Court returns the summons with an endorsement under his hand that the summons has been served on the defendant in manner hereinbefore directed, such endorsement shall be evidence of the service.”

Substitution of new sections for sections 141 and 142. 13. For sections 141 and 142 the following shall be substituted, namely :—

“141. (1) Subject to the provisions of the next following sub-section, there shall be endorsed on every document which has been admitted in evidence in the suit the following particulars, namely :—

- (a) the number and title of the suit,
- (b) the name of the person producing the document,
- (c) the date on which it was produced, and
- (d) a statement of its having been so admitted,

and the endorsement shall be signed by the Judge.

“(2) If a document so admitted is an entry in a book, account or record and a copy thereof has been substituted for the original under the next following section, the particulars aforesaid shall be endorsed on the copy and the endorsement thereon shall be signed by the Judge.

“141A. (1) If a document admitted in evidence in the suit is an entry in a shop-book or other account in current use, the party on whose behalf the account is produced may furnish a copy of the entry.

“(2) If such a document is an entry in a public record produced from a public office or by a public officer, or an entry in a book or account belonging to a person other than a

party on whose behalf the book or account is produced, the Court may require a copy of the entry to be furnished—

(i) where the record, book or account is produced on behalf of a party, then by that party, or

(ii) where the record, book or account is produced in obedience to an order of the Court acting of its own motion, then by either or any party.

“(3) When a copy of an entry is furnished under the foregoing provisions of this section, the Court shall, after causing the copy to be examined, compared and attested in manner mentioned in section 62, mark the entry and cause the book, account or record in which it occurs to be returned to the person producing it.

“142. When a document relied on as evidence

Endorsements on documents rejected as inadmissible in evidence. by either party is considered by the Court to be inadmissible in evidence, there shall be endorsed thereon the particulars mentioned in clauses (a), (b) and (c) of section 141, sub-section (1), and a statement of its having been rejected, and the endorsement shall be signed by the Judge.

“142A. (1) Every document which has been admitted in evidence, or a copy thereof where a copy has been substituted for the original under section 141A, shall form part of the record of the suit.

“(2) Documents not admitted in evidence shall not form part of the record and shall be returned to the parties respectively producing them.”

14. In section 143, for the words and figures “sections 62, 141 and 142” there shall be substituted the following, namely:—

“section 62, section 141A, sub-section (3), or section 142A, sub-section (2).”

15. In section 159 the words “or sent” shall be inserted after the word “delivered”.

16. In section 168, for the words “shall examine the serving-officer on oath” the following shall be substituted, namely:—“shall if the certificate of the serving-officer has not been verified by affidavit, and may if it has been so verified, examine the serving-officer on oath, or cause him to be so examined by another Court.”

17. The following shall be inserted after section 185, namely:—

“185A. (1) The Local Government may, by notification in the official Gazette, direct, with respect to any Judge specified in the notification, or falling under a description set forth therein, that

evidence in cases in which an appeal is allowed shall, instead of being taken down in the manner prescribed in the foregoing sections, be taken down by him with his own hand in the English language.

“(2) Where a Judge is prevented by any sufficient reason from complying with a direction under sub-section (1), he shall record the reason and cause the evidence to be taken down in writing from his dictation in open Court.

“(3) Evidence taken down under sub-section (1) or sub-section (2) shall be in the form mentioned in section 182, and be read over and signed, and, as occasion may require, interpreted and corrected, as if it were evidence taken down under that section.

“(4) The Local Government may, by notification in the official Gazette, revoke or vary a direction notified under sub-section (1).”

Addition to section 18. For section 191 the following shall be substituted, namely:—

“191. (1) Where the Judge taking down any evidence, or causing any evidence taken down by another Judge, memorandum to be made, under this Chapter, is prevented by death, transfer or other cause from concluding the trial of the suit, any successor to such Judge may deal with such evidence or memorandum as if he himself had taken it down or caused it to be made, and proceed with the suit from the stage at which his predecessor left it.

“(2) The provisions of sub-section (1) shall apply, so far as they can be made applicable, to a suit transferred under section 25:

“Provided that a Court transferring a suit under that section may, if it thinks fit, direct that the Court to which the suit is transferred shall recall all or any of the witnesses who have been examined and take their evidence afresh.”

19. To section 193 the following shall be added, namely:—

“A Court continuing a suit under section 191 may recall and re-examine a witness who has departed in accordance with section 173.”

20. (1) In section 209, for the first thirteen words the words “When a decree is for the payment of money” shall be substituted.

(2) To the same section the following shall be added, namely:—

“Where such a decree is silent with respect to the payment of further interest on such aggregate sum as aforesaid from the date of the decree to the date of payment or other earlier date, the Court shall be deemed to have refused such interest, and a separate suit therefor shall not lie.”

21. (1) In section 216, for the first twenty-four words the following shall be substituted, namely :—

"If the defendant has been allowed a set-off against the claim of the plaintiff, "

(2) To the same section the following shall be added, namely :—

"The provisions of this section shall apply whether the set-off is admissible under section 111 or otherwise."

22. In section 223, for the words "in a case cognizable by a Court of Small Causes" the following shall be substituted, namely :—

"in a suit of which the value as set forth in the plaint did not exceed two thousand rupees and which, as regards its subject-matter, is not excepted by the law for the time being in force from the cognizance of either a Presidency or a Provincial Court of Small Causes "

23. In section 229, after the word "established" the words "or continued" shall be inserted.

24. After section 229 the following shall be inserted, namely :—

"229A. So much of the foregoing sections of this Chapter as empowers a Court to send a decree for execution to another Court shall be construed as empowering a Court in British India to send a decree for execution to any Court established or continued by the authority of the Governor General in Council in the territories of any Foreign Prince or State to which the Governor General in Council has, by notification in the Gazette of India, declared this section to apply."

25. The last paragraph of section 230 is hereby repealed.

26. (1) In section 244, for clause (c) the following shall be substituted, namely :—

"(c) any other questions arising between the parties to the suit in which the decree was passed, or their representatives, and relating to the execution, discharge or satisfaction of the decree or to the stay of execution thereof."

(2) To the same section the following shall be added, namely :—

"If a question arises as to who is the representative of a party for the purposes of this section, the Court may either stay execution of the decree until the question has been determined by a separate suit or itself determine the question by an order under this section."

27. For the last paragraph of section 258 the following shall be substituted, namely :—

"Unless such a payment or adjustment has been certified as aforesaid, it shall not be recognized as a payment or adjustment of the decree by any Court executing the decree."

28. (1) In the first proviso to section 266, clause (a), the words "and bedding" shall be inserted after the word "apparel".

(2) In the same proviso, clause (b), after the word "cattle" the words "and seed-grain" shall be inserted.

(3) In the same proviso, for clause (h) the following shall be substituted, namely :—

"(h) the salary of a public officer or of any servant of a Railway Company or local authority to the extent of—

(i) the whole of the salary where the salary does not exceed twenty rupees monthly ;

(ii) twenty rupees monthly where the salary exceeds twenty rupees and does not exceed forty rupees monthly ; and

(iii) one moiety of the salary in any other case."

(4) To the same proviso, after clause (l), the following shall be added, namely :—

"(m) any allowance declared by any law passed under the Indian Councils Act, 1861, by a Governor or a Lieutenant-Governor in Council to be exempt from liability to attachment or sale in execution of a decree ;

"(n) where the judgment-debtor is a person liable for the payment of land-revenue, any moveable property which under any law applicable to him is exempt from sale for the recovery of an arrear of such revenue."

(5) In the Explanation to the same proviso, for the word and letter "and (j)" the letters and word "(j) and (m)" shall be substituted.

29. In section 289 the words "on the spot where the property is attached" are hereby repealed.

30. To section 320 the following shall be added, namely :—

"Rules under this section may confer upon the Collector or any gazetted subordinate of the Collector all or any of the powers which the Court might exercise in the execution of the decree if the execution thereof had not been transferred to the Collector, including the powers of the Court under sections 294 and 312, and

may provide for orders passed by the Collector or any gazetted subordinate of the Collector, or orders passed on appeal with respect to such orders, being subject to appeal to and revision by superior Revenue-authorities as nearly as may be as the orders passed by the Court, or orders passed on appeal with respect to such orders, would be subject to appeal to and revision by appellate or revisional Courts under this Code or other law for the time being in force if the decree had not been transferred to the Collector.

"A power conferred by the rules upon the Collector or any gazetted subordinate of the Collector, or upon any appellate or revisional authority, shall not be exerciseable by the Court or by any Court in exercise of any appellate or revisional jurisdiction which it has with respect to decrees or orders of the Court.

"In executing a decree transferred to the Collector under this section, the Collector and his subordinates shall be deemed to be acting judicially within the meaning of Act No. XVIII of 1850 (*an Act for the protection of Judicial Officers*).

31. (r) In section 349, for the words "is under arrest" the words "is in custody under the foregoing provisions of this Code" shall be substituted.

(2) In section 354, between the word "and" and the words "shall operate" the words "every order under that section appointing a Receiver" shall be inserted.

(3) For the second paragraph of section 360 the following shall be substituted, namely:—

"A Court so invested may entertain an application under section 344 by any person who has been arrested or imprisoned, or against whose property an order of attachment has been made, in execution of a decree for money passed by that Court."

(4) At the end of Chapter XX the following shall be inserted, namely:—

"360A. Nothing in this Chapter shall apply to any Court having jurisdiction within the limits of the town of Calcutta, Madras or Bombay."

32. (r) For sections 363 and 364 the following shall be substituted, namely:—

"363. If there are more plaintiffs than one, and any of them dies, and if the right to sue does not survive to the surviving plaintiff or plaintiffs alone, and the legal representative of the deceased plaintiff jointly, the Court may cause the legal representative, if any, of the deceased plaintiff to be made a party, and shall thereupon cause an entry to that effect to be made on the record and proceed with the suit."

(2) For section 365 the following shall be substituted, namely:—

"365. In case of the death of a sole plaintiff or sole surviving plaintiff, the legal representative of the deceased may, where the right to sue survives, apply to the Court to have his name entered on the record in place of the deceased plaintiff, and the Court shall thereupon enter his name and proceed with the suit."

(3) To section 368 the following shall be added, namely:—

"The legal representative of a deceased defendant may apply to have himself made a defendant in place of the deceased defendant, and the provisions of this section, so far as they are applicable, shall apply to the application and to the proceedings and consequences ensuing thereon."

(4) After section 372 the following shall be added, namely:—

"372A. The provisions of section 5 of the Indian Limitation Act, 1877, applicable to appeals shall apply to applications under sections 365, 368 and 371."

33. To section 381 the following shall be added, namely:—

"or show good cause why such time should be extended, in which case the Court may extend it."

"Where a suit is dismissed under this section, the plaintiff may apply for an order to set the dismissal aside, and, if it is proved to the satisfaction of the Court that he was prevented by any sufficient cause from furnishing the security within the time allowed, the Court shall set aside the dismissal upon such terms as to security, costs or otherwise as it thinks fit, and shall appoint a day for proceeding with the suit."

"The dismissal shall not be set aside unless the plaintiff has served the defendant with notice in writing of his application."

"The provisions of the Indian Limitation Act, xv 1877, with respect to an application under section 103, and of this Code with respect to an appeal from an order rejecting such an application, shall apply, so far as they can be made applicable, to an application under this section for an order to set aside the dismissal of a suit, and to an appeal from an order rejecting such an application, respectively."

34. In section 386, for the words "or to any pleader of a High Court whom the Court issuing the commission thinks fit to appoint" the following shall be substituted, namely:—

"or to any pleader or other person whom the

Court issuing the commission may, subject to any rules of the High Court in this behalf, think fit to appoint."

35. In section 419, after the words "Government Pleader in any Court" the words "or such other person as the Local Government may for any Court appoint in this behalf" shall be inserted.

36. In section 424, after the words "intending plaintiff" the words "and the relief which he claims" shall be inserted.

37. (1) In section 432, after the words "British India" the following shall be inserted, namely:—

"or at the request of any person competent in the opinion of the Government to act on behalf of such Prince or Chief,".

(2) To the same section the following shall be added, namely:—

"An appointment under this section may be made for the purpose of a specified suit or of several specified suits, or for the purpose of all such suits as it may from time to time be necessary to prosecute or defend on behalf of the Prince or Chief.

"A person appointed under this section may authorise or appoint persons to make and do appearances, applications and acts in any such suit or suits as if he were himself a party to the suit or suits."

38. For section 433 the following shall be substituted, namely:—

"433. (1) Any such Prince or Chief, and any ambassador or envoy of a Foreign State, may, with the consent of the Governor General in Council, certified by the signature of one of the Secretaries to the Government of India (but not without such consent), be sued in any competent Court.

(2) Such consent may be given with respect to a specified suit or to several specified suits, or with respect to all suits of any specified class or classes, and may specify, in the case of any suit or class of suits, the Court in which the Prince, Chief, ambassador or envoy may be sued; but it shall not be given unless the Prince, Chief, ambassador or envoy—

(a) has instituted a suit in the Court against the person desiring to sue him, or

(b) by himself or another trades within the local limits of the jurisdiction of the Court, or

(c) is in possession of immoveable property situate within those limits and is to be sued with reference to such possession or for money charged on that property.

(3) No such Prince, Chief, ambassador or envoy shall be arrested under this Code, and,

except with the consent of the Governor General in Council certified as aforesaid, no decree shall be executed against the property of any such Prince, Chief, ambassador or envoy.

(4) The Governor General in Council may, by notification in the Gazette of India, authorise a Local Government and any Secretary to that Government to exercise, with respect to any Prince, Chief, ambassador or envoy named in the notification, the functions assigned by the foregoing sub-sections to the Governor General in Council and a Secretary to the Government of India, respectively.

(5) A person may, as a tenant of immoveable property, sue, without such consent as is mentioned in this section, a Prince, Chief, ambassador or envoy from whom he holds or claims to hold the property."

39. (1) Section 434 shall become section 229B, and any reference made before the commencement of this Act in any notification or other document to section 434 shall be read as a reference to section 229B.

(2) In section 229B, the words "or continued" shall be inserted after the word "established".

Insertion of new section 434.

40. After section 433 the following section shall be inserted, namely:—

Style of Princes and Chiefs as parties to suits.

"434. A Sovereign Prince or ruling Chief may sue, and shall be sued, in the name of his State:

"Provided that in giving the consent referred to in the last foregoing section the Governor General in Council or Local Government, as the case may be, may direct that any such Prince or Chief shall be sued in the name of an agent or in any other name."

41. To section 464 the following shall be prefixed, namely:—

"Nothing in this Chapter applies to a Sovereign Prince or ruling Chief suing or being sued in the name of his State or being sued, by direction of the Governor General in Council or a Local Government, in the name of an agent or in any other name, and".

42. In section 503, clause (d), the words "as the Court thinks fit" shall be inserted after the words "by way of remuneration".

43. In section 504, for the words "the Court may appoint the Collector" the words "the Court may, with the consent of the Collector, appoint him" shall be substituted.

44. In section 539, for the words "having a direct interest" the words "having an interest" shall be substituted.

Addition to section 540. 45. To section 540 the following shall be added, namely :—

"An appeal may lie under this section from an original decree passed *ex parte*."

Addition to section 549. 46. To section 549 the following shall be added, namely :—

"If such security be furnished, any costs for which a surety may have rendered himself liable may be recovered from him in execution of the decree of the Appellate Court in the same manner as if he were the appellant."

Substitution of new section for section 551. 47. (1) For section 551 the following shall be substituted, namely :—

"551. (1) The Appellate Court, if it thinks fit, may, after fixing a day for hearing the appellant or his pleader and hearing him accordingly if he appears on that day, dismiss the appeal without sending notice of the appeal to the Court against whose decree the appeal is made and without serving notice on the respondent or his pleader.

"(2) If on the day fixed under sub-section (1) or any other day to which the hearing may be adjourned the appellant does not attend in person or by his pleader, the appeal shall be dismissed for default.

"(3) The dismissal of an appeal under this section shall be notified to the Court against whose decree the appeal is made."

(2) For the first paragraph of section 552 the following shall be substituted, namely :—

"Unless the Appellate Court dismisses the appeal under the last foregoing section, it shall fix a day for hearing the appeal."

(3) In section 558 the words and figures "section 551, sub-section (2)," shall be inserted before the word and figures "section 556".

Amendment of, and addition to, section 561. 48. (1) For the proviso to the first paragraph of section 561 the following shall be substituted, namely :—

"Provided he has filed the objection in the Appellate Court within one month from the date of the service on him or his pleader under section 553 of notice of the day fixed for hearing the appeal, or within such further time as the Appellate Court may see fit to allow."

(2) To the same section the following shall be added, namely :—

"Unless the respondent files with the objection a written acknowledgment from the appellant or his pleader of having received a copy thereof, the Appellate Court shall cause such a copy to be served, as soon as may be after

the filing of the objection, on the appellant or his pleader, at the expense of the respondent.

"The provisions of Chapter XLIV shall, so far as they can be made applicable, apply to an objection under this section."

Amendment of section 562. 49. (1) In section 562 the words "so as to exclude any evidence of fact which appears to the Appellate Court essential to the determination of the rights of the parties" are hereby repealed.

(2) In the same section, for the word "investigate" the word "determine" shall be substituted.

Repeal of section 563. 50. Section 563 is hereby repealed.

Amendment of word "may" shall be substituted. 51. In section 565, for the word "shall" the word "may" shall be substituted.

Amendment of section 566. 52. (1) In section 566 the words "and the evidence upon the record is not sufficient to enable the Appellate Court to determine such issue or question" are hereby repealed.

(2) In the same section, between the words "the Appellate Court may" and the words "frame issues" the words "if necessary" shall be inserted.

Amendment of section 582. 53. (1) In section 582, for the words "the words 'plaintiff,' 'defendant' and 'suit' shall be held to include an appellant, a respondent and an appeal, respectively," the following shall be substituted, namely :—

"the word 'plaintiff' shall be held to include a plaintiff-appellant or defendant-appellant, the word 'defendant' a plaintiff-respondent or defendant-respondent, and the word 'suit' an appeal".

(2) In the same section, the words and figures "including those of section 372A," shall be inserted after the words "The provisions hereinbefore contained".

Addition to section 584. 54. To section 584 the following shall be added, namely :—

"An appeal may lie under this section from an appellate decree passed *ex parte*."

Amendment of section 588. 55. (1) In section 588, clause (1), for the word "or" the word "for" shall be substituted.

(2) In the same section, clause (16), for the words "the first paragraph of" the words "and orders under" shall be substituted.

Repeal of part of section 589. 56. The first paragraph of section 589, and the word "other" in the second paragraph of that section, are hereby repealed.

Repeal of section 599 and part of section 601. 57. Section 599, and in section 601 the words "within thirty days from the date of the order", are hereby repealed.

58. After the second paragraph of section 610

Addition to section 610. the following shall be inserted, namely:—

"In so far as the order awards costs to the respondent, it may be executed against a surety therefor, to the extent to which he has rendered himself liable, in the same manner as it may be executed against the appellant :

"Provided that such notice in writing as the Court in each case thinks sufficient has been given to the surety."

Addition to section 620. 59. To section 626 the following proviso shall be added, namely:—

"and

"(c) an application made under section 624 to the Judge who delivered the judgment may, if that Judge has ordered notice to issue under proviso (a) to this section, be disposed of by his successor."

Addition of new sections after section 646.

60. After section 646 the following shall be inserted, namely:—

646A. (1) If at any time before judgment a Court in which a suit has been instituted doubts whether the suit is cognizable by a Court of Small Causes or is not so cognizable, it may submit the record to the High Court with a statement of its reasons for the doubt as to the nature of the suit.

"(2) On receiving the record and statement the High Court may order the Court either to proceed with the suit or to return the plaint for presentation in such other Court as it may in its order declare to be competent to take cognizance of the suit.

646B. (1) If it appears to a District Court that a Court subordinate thereto has, by reason of erroneously holding a suit to be cognizable by a Court of Small Causes or not to be so cognizable, failed to exercise a jurisdiction vested in it by law, or exercised a jurisdiction not so vested, the District Court may, and, if required by a party, shall, submit the record to the High Court with a statement of its reasons for considering the opinion of the subordinate Court with respect to the nature of the suit to be erroneous.

"(2) On receiving the record and statement, the High Court may pass such order in the case as it thinks fit.

"(3) With respect to any proceeding subsequent to decree in any case submitted to the High Court under this section, the High Court may make such order as in the circumstances appears to it to be just and proper.

"(4) A Court subordinate to a District Court shall comply with any requisition which the

District Court may make for any record or information for the purposes of this section."

61. (1) For the third paragraph of section 64 Amendment of, and addition to, section 648. the following shall be substituted:—

"and the Court making an arrest under the section shall send the person arrested to the Court by which the warrant of arrest was issued, unless he shows cause to the satisfaction of the former Court why he should not be sent to the latter Court, or unless he furnishes sufficient security for his appearance before the latter Court or (where the case is one under Chapter XXXIV) for satisfying any decree that may be passed against him by that Court, in either of which cases the Court making the arrest shall release him."

(2) To section 648 the following shall be added, namely:—

"Where a person to be arrested or moveable property to be attached under this section is within the local limits of the ordinary original civil jurisdiction of the High Court of Judicature at Fort William in Bengal or at Madras or Bombay or of the Court of the Recorder of Rangoon, the copy of the warrant of arrest or of the order of attachment, and the probable amount of the costs of the arrest or attachment, shall be sent to the Court of Small Causes of Calcutta, Madras Bombay or Rangoon, as the case may be, and that Court, on receipt of the copy and amount shall proceed as if it were the District Court."

62. In section 650A, the words "or continued" shall be inserted after the word "established".

Addition to section 652. 63. To section 652 the following shall be added namely:—

"A High Court not established under the Statute 24 & 25 Victoria, chapter 104 (*an Act for establishing High Courts of Judicature in India*) may, from time to time, with the previous sanction of the Local Government, make, with respect to any matter other than procedure, any rule which any High Court so established might under section 15 of that Statute make with respect to any such matter for any part of the territories under its jurisdiction which is not included within the limits of a presidency-town. Rules so made shall be published in the same manner, and shall thereupon have the same force, as rules made and published under this section for the regulation of matters connected with procedure."

64. In form No. 137 of the fourth schedule the words "bound by the decree" shall be inserted after the words "remove any person".

65. (1) After clause (n) of section 17 of the Indian Registration Act, 1877, as amended by the Indian Registration Act, 1877.

1886, the following clause shall be added, namely:—

“(o) a certificate of sale granted to the purchaser of any property sold by public auction by a Civil or Revenue officer.”

(2) In the second paragraph of section 50 of the same Act, for the word and letter “and (u)” the letters and word “(n) and (o)” shall be substituted.

(3) The Indian Registration Act, 1877, shall be construed as if the amendments made in it by this section had been made therein by Act XII of 1879 (*an Act to amend the Code of Civil Procedure, the Registration Act, 1877, and the Limitation Act, 1877*):

Provided that nothing in this sub-section shall be deemed to affect a decree or order made by any Court before the commencement of this Act.

66. (1) No. 161 of the second schedule to the Indian Limitation Act, 1877, shall be transposed and become No. 173A, and the entry against it in the second column of that schedule shall be “Ditto”, signifying ninety days.

(2) Nos. 171, 171A and 171B of the same schedule are hereby repealed.

(3) For No. 171C of the same schedule the following shall be substituted, namely:—

Description of Application.	Period of Limitation.	Time from which period begins to run.
171. Under section 371 of the Code of Civil Procedure, or under that section and section 582 of the same Code, for an order to set aside an order for abatement or dismissal.	Sixty days.	The date of the order for abatement or dismissal.

(4) After No. 175 of the same schedule the following shall be inserted, namely:—

Description of Application.	Period of Limitation.	Time from which period begins to run.
175A. Under section 365 of the Code of Civil Procedure by the legal representative of a deceased plaintiff, or under that section and section 582 of the same Code by the legal representative of a deceased plaintiff-appellant or defendant-appellant.	Six months	The date of the death of the deceased plaintiff or of the deceased plaintiff-appellant or defendant-appellant.
175B. Under section 366 of the Code of Civil Procedure by a defendant, or under that section and section 582 of the same Code by a plaintiff-respondent or defendant-respondent.	Ditto	The date of the death of the deceased plaintiff or of the deceased defendant-appellant or plaintiff-appellant.
175C. Under section 368 of the Code of Civil Procedure to have the legal representative of a deceased defendant made a defendant, or under that section and section 582 of the same Code to have the legal representative of a deceased plaintiff-respondent or defendant-respondent made a plaintiff-respondent or defendant-respondent.	Ditto	The date of the death of the deceased defendant or of the deceased plaintiff-respondent or defendant-respondent.

PART VI.

Debates of the Legislative Council of His Excellency the Governor General.

GOVERNMENT OF INDIA.
LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR
GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING
LAWS AND REGULATIONS UNDER THE PROVISIONS OF
THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House on Friday, the 16th March, 1888.

PRESENT:

His Excellency the Viceroy and Governor General of India, K.P., G.C.B.,
G.C.M.G., G.M.S.I., G.M.I.E., P.C., *presiding*.
His Honour the Lieutenant-Governor of Bengal, K.C.S.I., C.I.E.
The Hon'ble Lieutenant-General G. T. Chesney, R.E., C.B., C.S.I., C.I.E.
The Hon'ble A. R. Scoble, Q.C.
The Hon'ble Sir C. U. Aitchison, K.C.S.I., C.I.E., LL.D., D.O.L.
The Hon'ble Sir C. A. Elliott, K.C.S.I.
The Hon'ble J. Westland.
The Hon'ble Rana Sir Shankar Bakhsh Singh Bahadur, K.C.I.E.
The Hon'ble Syud Ameer Hossein, C.I.E.
The Hon'ble Rájá Peári Mohan Mukerji, C.S.I.
The Hon'ble W. S. Whiteside.
The Hon'ble J. W. Quinton, C.S.I.
The Hon'ble R. Steel.
The Hon'ble F. M. Halliday.
The Hon'ble Sir Pasupati Ananda Gajapati Razu, K.C.I.E., Maharaja of
Vizianagram.

INVENTIONS AND DESIGNS BILL.

The Hon'ble MR. SCOBLE moved that the Report of the Select Committee on the Bill to consolidate and amend the law relating to the Protection of Inventions and Designs be taken into consideration. He said:—

"Since I presented the Report of the Select Committee on this Bill four weeks ago, I have had very few communications regarding it. Some suggestions have been made to which I will briefly refer.

"The first relates to the time given to foreign inventors within which to apply for an exclusive privilege for their inventions in British India. In the Bill this is fixed at one year from the date of the grant of the patent elsewhere than in the United Kingdom. It is urged that two and a half or three years should be allowed : but the Select Committee was distinctly of opinion that, in the public interest, one year was a reasonable time to grant for such applications, and I have therefore been unable to accept this suggestion. On the same ground I propose to retain the provision that when a patent expires in the country of its origin it shall also expire in India. Where the public interest and the interest of the inventor are in conflict, the former must prevail : and there seems no good reason why patents which have expired elsewhere should be kept alive to the disadvantage of the people of this country.

"It has also been urged that section 30, which allows 'any person' to apply to a High Court to quash an exclusive privilege upon certain specified grounds, ought to be limited to those classes of persons who are entitled to petition the Courts in England for revocation of patents under section 26 of 46 & 47 Vic., c. 57, that is to say, the Advocate General or any one authorised by him, or any person alleging that the patent was obtained in fraud of his rights, or that he was the true inventor, or that he had manufactured, used or sold the invention before the date of the patent. This point had not escaped the notice of the Select Committee, who preferred not to cut down the larger words of the Act of 1859, but to impose the condition that when an exclusive privilege is thus attacked the Court may require the attacking party to give security for costs, and in this way to put a check on vexatious litigation.

"I have therefore no amendments to propose in the Bill."

The Motion was put and agreed to.

The Hon'ble MR. SCOBLE also moved that the Bill, as amended, be passed.

The Motion was put and agreed to.

MEASURES OF LENGTH BILL.

The Hon'ble MR. SCOBLE also moved for leave to introduce a Bill to declare the imperial standard yard for the United Kingdom to be the legal standard measure of length in British India. He said :—

"This Bill has its origin in five communications from the Bengal, Madras, Bombay, Rangoon and Karáchi Chambers of Commerce, asking that the English standard yard may be declared by law to be the standard measure of length for British India.

"The Bengal and Rangoon Chambers base their request on the general ground that it is anomalous that there should be no legal standard of length in this country while there is one in the United Kingdom, and that the absence of such a standard causes, in their opinion, 'difficulties in the working of the piece-goods trade of the country.' The Karáchi Chamber's representation is in similar general terms, their main ground being that 'in the working of the piece-goods trade of this country a standard of length is essentially necessary for the protection and convenience of the same.' But the Bombay and Madras Chambers go more into particulars, and urge the fixing of a legal standard of length on the ground that, under the existing law, the marking of false lengths on cloth goods is not punishable, and ought to be made so.

"Without entering upon the question whether the existing law is sufficient to deal with cases of cheating by false measurement, I think it must be admitted to be desirable that some standard measure of length should be adopted, and that, by the adoption of such a standard, fraud will be at all events rendered more difficult than it is at present. This is not the first time that the question has been considered by your Lordship's Council. In 1870, Colonel Strachey introduced a Bill to regulate the weights and measures of British India, and described its object to be 'to adopt for India for the first time some fixed standard of

quantity where none had hitherto existed, and to place once for all on a definite basis the multitude of transactions of trade and commerce which till now had been left to be settled too often in a manner that placed the buyer at the complete mercy of the seller and gave the most objectionable openings to fraudulent dealings.' Unfortunately, as I think, the French metre was adopted in Act XI of 1870 as the unit for measures of length; but this Act was disallowed by the Secretary of State, and Act XXXI of 1871, which took its place, relates only to measures of weight and capacity.

"On looking through the report of the Committee which was appointed in 1868 to revise the system of weights and measures for British India, and which report was the basis of the legislation of 1870, I find it stated, 'with reference to measures of length, the English yard, foot and inch appear to be now used generally throughout British India;' and again 'in linear measure the Department of Public Works has done much to introduce our scale. The English yard has partially superseded the ever varying *gas* of the Native dynasties throughout India. In all parts of the country people now use the English foot and inch, and hawkers sell their cloth by the English yard.' It is probable that, in the twenty years which have elapsed since these observations were written, English measures of length have become even more widely used, and that the statement of the Bombay Chamber of Commerce may be accepted that 'the English yard, with its subdivision of feet and inches, is now so generally known and used throughout the country that it forms by far the most convenient length for adoption.'

"The object of the Bill which I ask leave to introduce is to give a settled legal meaning to the words which denote these measures, and thus pave the way for future legislation on the lines of the Merchandise Marks Act, which came into force in England last year, and the main provisions of which appear to be quite as much needed in this country as at home."

The Hon'ble MR. STEEL said:—"The proposed legislation will be welcomed by the mercantile community. The Bill which the hon'ble member proposes to introduce is a small measure, but it is a necessary preliminary to further legislation. There is a general consensus of opinion that it will be soon desirable to legislate in India on the same lines as the Merchandise Marks Bill recently passed in England; but as that measure is of an extremely complicated character, and has already developed certain faults which will require amendment, there is a general agreement that it is not desirable to initiate hasty legislation in India. When full experience has been gained of the working of the English Act, and when it is decided to follow it here, the prior establishment of the standard measure will be found to have facilitated such legislation."

The Hon'ble RAJA PEARI MOHAN MUKERJI said:—"When the Government of Bengal a few months ago invited public opinion on the desirability of having a law for defining a standard unit of measure, it was apprehended in certain quarters that the intention of the Government was to supersede all local measures of length by a uniform measure throughout British India. The observations made by the Hon'ble the Law Member will remove that apprehension. The object of the Bill which he wishes to introduce is very different from what was at that time apprehended. Different provincial Acts defined the unit of measure which should obtain in the presidency-towns of Calcutta, Madras and Bombay, but there was absolutely no law whatever declaring what was the unit of measure outside the limits of the presidency-towns. It is to fill the void in the Statute-book that I think the present measure is intended. Perhaps, looking to the discussions which took place in 1864, and to which the learned Law Member has referred, it would have been more desirable if the unit of the French metre had been adopted. But for the present at least we must, I think, be content with the standard measure which obtains in the United Kingdom."

The Motion was put and agreed to.

The Hon'ble MR. SCOBLE also introduced the Bill.

The Hon'ble MR. SCOBLE also moved that the Bill and Statement of Objects and Reasons be published in the Gazette of India in English, and in

the local official Gazettes in English and in such other languages as the Local Governments think fit.

The Motion was put and agreed to.

The Council adjourned to Friday, the 23rd March, 1888.

SUPPLEMENT TO
The Gazette of India.

No. 12.} CALCUTTA, SATURDAY, MARCH 24, 1888.

OFFICIAL PAPERS.

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.

Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending March 14th, 1888.

The unsettled weather, which prevailed at the close of last week over certain parts of the country, continued on the 8th when rain was reported from nearly all the stations in the Central Provinces as well as from Hazaribagh, Galle, Cochin, Belgaum, Sutna and Secunderabad. The barometer had fallen everywhere—rapidly over Northern India and moderately to briskly elsewhere. Barometric readings were uniform and relatively high over the Peninsula, Guzerat and Sind, but to the northward of those regions pressure decreased and reached its lowest point at Roorkee. The hottest part of the Indian region was the Eastern Peninsula, where Thyetmio reported a maximum temperature of 102°. The report of the 9th showed that pressure was still giving way, and that, consequent on the fall continuing greatest in the north, the barometric difference between the north and south had increased. The weather had improved over the Central Provinces, but had become more unsettled in Bengal and Assam, where rain had fallen at most stations. Rain had also occurred at Vizagapatam and Diamond Island. The Eastern Peninsula remained the hottest part of the Indian region, but the highest temperature recorded was only 99°. On the 10th a small but rather deep depression appeared over the west of the Punjab, with its centre near Dera Ismail Khan. At the same time a slight depression had also been developed in Western Bengal, with its centre near Hazaribagh. These two depressions had occasioned a further moderate to rapid fall of pressure over Northern India, while over Southern India, though the barometer there also was falling, the change had been relatively small, hence the barometric difference between north and south had still further increased and gradients over North-Western India were abnormally steep for the season. Around the Punjab depression, though

there was a strongly marked cyclonic circulation of the winds, there was fairly bright and fine weather, but in the neighbourhood of the much slighter Bengal depression, probably owing to the source from which the winds were derived, the skies were cloudy to overcast and rain had fallen. Temperature had decreased suddenly and largely in East Bengal and Assam, the change amounting to 12° at Dacca, to 7° at Silchar and to 5° at Thyetmio, Chittagong and Dhubri. In consequence of this fall in Eastern India, the Burmese Peninsula was no longer the seat of the highest temperature, which had been transferred to the opposite side of India to Sind, where Jacobabad reported a maximum of 102° , Hyderabad of 100° , and Deesa of 99° . On the 11th there was comparatively little change shown in the general distribution of pressure. The Bengal depression had developed slightly, while that in the Punjab had on the contrary become somewhat diffused. With these exceptions there was but little alteration. Rain had generally ceased in Bengal though strong southerly winds from the Bay still fed into the depression over Chutia Nagpur. Some rain had fallen at Murree and Ranikhet, but as was the case on the 10th the weather in the neighbourhood of the Punjab depression was generally fair. The Lower Indus Valley remained the hottest part of India, a maximum of $102^{\circ}5$ being reported from Jacobabad and of $100^{\circ}2$ from Hyderabad. The chart of the 12th showed that the depression over Chutia Nagpur had to a certain extent coalesced with the low-pressure area in the North-West, so that in addition to the depression near Lahore an arm of relatively low readings extended from Rajputana and the south-east of the Punjab south-eastward as far as Hazaribagh. To the south of this band the winds were generally westerly; to the east, southerly, and to the north easterly. One effect of this change in the distribution was that apparently the moist air from the Bay penetrated directly into Upper India and as a consequence the skies over Northern India were more cloudy and rain more general. From Assam and East Bengal rain was also reported, the amount received at Dacca being as much as $2\frac{1}{4}$ inches. At the head of the Bay the wind was very strong. With the advance of moister winds into Northern India and the increase of cloud, temperature fell briskly, and the hottest region deserted Sind and retreated southward to the Bombay Deccan where Sholapur reported a maximum of 101° . On the 13th an important change was shown; the band of low pressures had moved bodily southward and extended from Sind east-south-eastward almost as far as the Carnatic, while at the same time relatively high pressures were established along the line of the hills. In consequence the flow of moist air from the Bay into Upper India was encouraged and rain fell at the great majority of the stations lying to the northward of the band of low pressure. The heaviest fall was again at Dacca. The region of greatest heat had again moved southward and was shown over Madras, where Cuddapah reported a maximum of 101° and Kurnool a maximum of 100° . The chart of the 14th showed that the distribution of pressure had again changed, the area of lowest readings lying over West Bengal and the east of the Central Provinces, while a large high-pressure area overlay the west and south of the Peninsula and the south of the Bay. Accompanying the depression over Bengal were strong southerly winds which brought up much moisture from the Bay and as a consequence very cloudy weather prevailed over Bengal and rain had fallen very generally. Nearly 1 inch of rain fell at Berhampore and over half an inch at Dacca, Silchar and Purneah.

Pressure.— Compared with the normal of the month, the mean pressure of the past week has exceeded the average in Burma, the greater part of Bengal and Assam, Ceylon, Malabar, Bombay, the Central Provinces and Madras, but has been in defect over Upper India from Behar to Peshawar and over Central India, Sind and Rajputana. The greatest deficiency was in the west of the Punjab and was largely attributable to the rather deep depression which appeared near Dera-Ismail Khan on the 10th.

Temperature.— The weather has been warmer than usual on the plains of Upper India and in Sind, but elsewhere the mean temperature of the week has been below the monthly average. The deficiency was greatest in Bengal where the mean temperature of Dacca, Berhampore and Dhubri was about 6° below the normal.

Humidity.—The air was generally rather damp except in Burma, and in parts of the Punjab and the west coast.

Rain.—Has fallen during the week in all Provinces except Sind and Rajputana, but, except in Northern India and the Central Provinces, the amounts were not large. In Bengal and Assam 12 out of the 16 reporting stations received rain, the amount averaging $1\frac{1}{4}$ inch to each station.

The concluding table gives the total rainfall of the past week according to provinces :—

DIVISIONS.	Number of stations.	Total rainfall.
Burma	1	0.16
Bengal and Assam	12	15.01
North-Western Provinces and Oudh	7	3.18
Punjab	5	1.83
Hill Stations	6	4.34
Ceylon	1	0.53
Malabar Coast	3	1.13
Bombay	3	0.06
Berars and Central Provinces	8	1.78
Guzerat and Central India	1	0.08
Sind—Rajputana	0	0
Madras	3	0.45

W. L. DALLAS,

Asstt. Meteorological Reporter to the Govt. of India.

Simla, 16th March, 1888.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the State of the Season and Prospects of the Crops.

Madras.—*For week ending 17th March 1888.*—Slight rain in eight districts, Rainfall to date generally sufficient but more wanted in parts of Vizagapatam, Bellary, Madura, Tinnevely, Coimbatore and Salem. Crops generally good but very slightly damaged here and there by disease or want of rain; wet crops under rain-fed tanks in parts of Bellary and Madura have withered owing to deficient water-supply. Pasture generally sufficient but scanty in Malabar and parts of Anantapur and Madura and decreasing in Vizagapatam and parts of Coimbatore and Salem. No material fluctuations in prices. General prospects favourable.

Bombay.—*For week ending 21st March 1888.*—Rain in parts of Sind and Poona, beneficial to late crops in Shikarpur; prospects of wheat crop in one taluka of Upper Sind Frontier injured by closing of the Sukkur Canal. Cotton crop in Broach damaged, standing crops otherwise good. Cotton picking continues in parts of Gujarat, Kathiawar, Bijapur and Dharwar. Harvesting of late crops in progress generally; land being prepared for next season's crops in Hyderabad, Shikarpur, Poona, Satara, Bijapur, Belgaum, Dharwar, Ratnagiri, Kanara and Kathiawar; probable outturn of cotton in Broach $8\frac{1}{4}$ annas, of cotton and wheat in Kaira 10 annas and of late crops in general 9 annas on an average in Panch Mahals, 10 to 12 annas in Ratnagiri, and 8 to 10 annas in Baroda.

Bengal.—*For week ending 20th March 1888.*—Rain throughout North and East Bengal, in greater part of South-West Bengal and North Behar, and

in the Sonthal Pergunnahs and Cuttack districts. *Rabi* harvest in progress and yield on the whole promising. Opium collection satisfactory and almost completed. Sugarcane has been a good crop generally. Rain has been very favourable to the cultivation of early rice and jute. Spring rice doing well. Indigo prospects good throughout Behar and in Bankoora, Nuddea and Jessore. *Mahua* crop in Chota Nagpore and Sonthal Pergunnahs promises well. Abundant mango crop expected, though in some places the blossoms have been injured by rain and high wind. No material change in the price of rice during the last fortnight. The price of Indian-corn in Darjeeling has gone up considerably owing to demands for the Sikkim Field Force. Reports have been received from Pooree indicating the existence of some scarcity in parts of the Chilka Tract and Khoorda; relief works may be found necessary, but further information awaited.

N.-W. Provinces and Oudh.—*For week ending 21st March 1888.*—Slight rain and hail in several districts. Heat is increasing. *Rabi* harvest every where satisfactory. Opium collection good. Prices of grains are falling. The condition of cattle is generally good.

Punjab.—*For week ending 21st March 1888.*—Rain has fallen in some districts. Prices are generally stationary, though falling slightly in three districts. *Kharif* ploughings and sugarcane and cotton sowings in progress. *Rabi* prospects are generally reported good. The *barani* crops suffered slightly for want of rain in Amritsar. Crops seriously injured by hail in Daska and Sialkote tahsils; east wind has also slightly injured the gram crop in Umballa. Stock cattle are reported healthy. Prospects of fodder are improving, but it is still scarce in some districts. Poppy crops average, they are slightly injured by hail in Sialkote.

Central Provinces.—*For week ending 21st March 1888.*—Weather seasonable; slight rain in Seoni. Harvesting of winter crops continues. Prospects favourable. Sugarcane being planted. Prices falling.

Burma.—*For week ending 17th March 1888.*—Slight rain has fallen in Mergui, Bhamo, Shwebo, Sagaing, Pagan and Myadaung districts. Reports regarding dry weather crops continue satisfactory. Estimated outturn of crops remains unchanged except in Mandalay where it has risen from 12 to 16 annas. Price of paddy has risen in Rangoon, Hanthawaddy, Prome, Henzada, Thayetmyo, Moulmein and Amherst districts of Lower Burma, and in Shwebo, Myingyan, Minbu and lower Chindwin districts of Upper Burma; prices stationary elsewhere.

Assam.—*For the week ending 21st March 1888.*—Weather warm. Rain has done much good. Crushing of sugarcane still continues in parts. Early rice is being sown. Tea plucking begun.

Mysore and Coorg.—*For week ending 21st March 1888.*—Some rain in the civil and military station of Bangalore and in the Kolar District, elsewhere no rain. Standing crops in good condition except in one taluk of the Tumkur district where the paddy crop is suffering from want of water. Outturn of harvests fair. Condition of stock cattle generally good. Prices slightly risen in the Bangalore district and fallen in the Chittaldroog district.

In Coorg there is no crop.

Berar and Hyderabad.—*For week ending 21st March 1888.*—Weather hot and cloudy. Harvesting of *rabi* crops completed and threshing in progress. Outturn of *rabi* crops is expected to be good. Fields are being prepared for next *kharif* crop except in Amraoti district. Agricultural stock is in good condition and fodder sufficient. No noticeable change in the prices of food grains.

Hyderabad had no rain during the week. Agricultural prospects continue fair. Prices stationary.

Central India.—*For week ending 21st March 1888.*—Agricultural operations completed in Gwalior, started in Goona, and in progress elsewhere. Standing crops fairly good. No change in probable outturn of harvest and condition of

crops, agricultural stock, pasturage or fodder, or prices of food grains since last report. No change in prospects of opium crop.

Rajputana.—*For week ending 21st March 1888.*—Some rain fell in Shapura, Bhurtpore, Ulwar and Bikaner. Agricultural operations satisfactory. Standing crops good. Crop prospects and agricultural stock good. Slight damage by hailstorm and blight in Merwara and Ulwar. Pasturage or fodder sufficient generally. Prices falling at places; steady at others. Opium slightly injured in a few places.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.
HOME DEPARTMENT.

ARRANGEMENTS MADE BY MESSRS. THOMAS COOK AND SON FOR FACILITATING
THE MOVEMENTS OF PILGRIMS FROM INDIA TO THE HEDJAZ AND BACK.

The following is published for general information :—

No. P.-277—2, dated Bombay, the 27th February 1888.

From—Messrs. THOMAS COOK AND SON,
To—The Secretary to the Government of India, Home Department.

I beg to inform you that after last season's experience we have decided that, in order to successfully carry out the requirements of the Government of India in the facilitating of the movement of pilgrims, it is necessary for us to charter steamers in order to have them as far as possible under our own control.

2. We have therefore arranged during the coming season to charter and despatch four steamers from Bombay to Jeddah and two from Jeddah to Bombay.

3. The departures from Bombay will take place on or about the following dates, *vis.* :—

April 15th, June 20th, July 3rd and 15th.

4. The steamer in April will enable those who wish to avoid the monsoon weather, and to spend the month of Ramzan in the Hedjaz.

Trusting that these arrangements will be satisfactory to the Government.

APPROPRIATION REPORT ON THE ACCOUNTS OF 1886-87.

GENERAL REVIEW.

1. Before proceeding to give the usual detailed explanations it seems desirable to state briefly the principal circumstances which influenced the financial proceedings of the Government of India during the year under review. In 1885-86 the complications on the North-Western Frontier had led the Government to decide upon a permanent increase in its military strength, and upon the construction of a system of strategic railways and military frontier works at a large outlay, which would not lead to additional revenue but rather add permanently to the expenditure of the country a considerable sum on account of interest. The rate of exchange, too, which had remained pretty steady for some years, had fallen more than a penny during 1885-86, and had enhanced the charges under that head by more than a million. Upper Burma had been annexed, and the work of restoring order in the country and administering its affairs was attended with considerable expense. The extra outlay on these accounts was estimated in the budget of 1886-87 at nearly 2 millions and a half, and in order to provide for this excess the Government decided (1) to impose the Income Tax, (2) to transfer the outlay on Frontier Railways from Revenue to Capital Expenditure, and (3) to enlarge the Imperial revenues by a special contribution of 400,0 from the Provincial Governments, the balance being expected from improvement in the other revenues of the Imperial Government. With these arrangements it was expected that the year 1886-87 would close with a surplus of 182,2. It was soon discovered, however, that these expectations were not likely to be realized, since the state of affairs in Upper Burma needed the maintenance of a larger force at a greater expenditure than had been anticipated, and the rate of exchange experienced a further fall of more than a half-penny. Accordingly the Revised Estimate of 1886-87 had to provide for an excess expenditure of 1,334,6 as compared with the budget, and in order to meet this new condition of affairs the Government decided, for the reasons stated in paragraphs 68 to 75 of the Financial Statement of 1887-88, to suspend the Famine Insurance grant temporarily. The assistance so obtained, together with various improvements which had developed chiefly under the Railway Revenue account, promised to bring in all the funds required and leave at the end of the year a small surplus of 5. The accounts now show a surplus of 178,4 owing to the revenue being greater than the revised estimate by 741,0 and the expenditure by 563,1. The excess in expenditure lies mainly in Army charges, and in special defence works now paid from revenue for the first time. Of the improvement in revenue 395,4 occurs in the principal heads of Revenue, 50,5 in Post Office Telegraph and Mint, 189,2 in the Railway account, 40,1 in Irrigation, and 74,7 in Army receipts.

2. During the year under Review some minor changes have been introduced in the classification of civil receipts and expenditure. In the Military Department the pensions to Europeans are separated from the pensions to Natives of India. In the Public Works Department, the special defence charges are for the first time debited to revenue, but under a special heading.

3. Little change has been made in the form of this review. Last year the civil revenue and expenditure were stated in detail of minor heads, and the arrangement was found to be satisfactory as it brought to light various points, which would probably have been overlooked in a less minute examination.

The same system has been followed this year, and in the army division a statement has been added of the additional expenditure incurred on account of Burma. In the Public Works section of the account the differences under each head have been tabulated.

4. The following Summary gives the results to be reviewed in this report, and the details will be found in the Statements on pages 126 to 137. Throughout the report the figures are tens of rupees (Rx. 1 = Rs. 10), with the last two figures cut off for the sake of shortness, thus, 149,7 reads one hundred and forty-nine thousand seven hundred tens of rupees:—

5. The general remarks that I have to offer, before proceeding to details, are grouped under two heads, *vis.*, comparison between 1885-86 and 1886-87, and comparison between Budget Estimates and Accounts of the last-named year.

Comparison with the year 1885-86.

6. The comparison in respect of revenues is as follows :—

REVENUES.	1885-86.	1886-87.	Difference, 1886-87 greater (+) or less (-).
Principal Heads of Revenue	52,442,3	54,482,1	+ 2,039,8
Interest	699,0	670,5	— 28,5
Post Office, Telegraph and Mint	1,965,8	2,027,5	+ 61,7

Army Services	963,9	985,0	+ 21,1
	<u>74,464,2</u>	<u>77,337,1</u>	<u>+ 2,872,9</u>

7. Under *Principal Heads of Revenue* the largest difference is in Assessed Taxes, which presents an excess of 851,7 accruing from the Income Tax. Next in order of amount is the Land Revenue which was better than 1885-86 by 463,3 owing mainly to improved collections in Lower Burma and the revision of assessments in some parts of India. Salt yielded 312,5 and Excise 223,1 more than the previous year. The excess in Salt has been produced by a larger demand for the produce of the Punjab mines on the opening of the broad gauge line of Railway from Mulukwal to Khewra, and to larger receipts at the Sambhar lake on the recommencement of work which had been stopped for a great part of the previous year. The improvement in *Post Office, Telegraph and Mint* may be attributed partly to the ordinary expansion of the Post Office and Telegraph Departments and especially to the increased revenue from Government messages in the latter from the annexation of Upper Burma. The decrease under *Miscellaneous* has arisen from the loss by exchange in the repayment of the Stock Receipt Loan of 1854. The larger revenue from *Railways* is due to the addition of new lines in the Southern Mahratta and Burma systems, to the development of traffic on the older ones and to the receipts of the S. P. and D. line being shown gross on its purchase by Government. The head *Buildings and Roads* includes 150,0 received in connection with the rendition of Gwalior Fort and Morar Cantonment to His Highness the Maharajah Scindia.

8. The comparison of the Expenditure side is as follows —

	1885-86.	1886-87.	Difference, 1886-87 greater (+) or less (-).
Principal Heads of Revenue	9,805,3	9,746,2	— 59,1
Interest	4,330,8	4,310,4	— 20,4
Post Office, Telegraph and Mint	2,293,0	2,145,3	— 147,7
Civil Departments	12,243,7	12,698,5	+ 454,8
Miscellaneous	4,634,6	4,701,1	+ 66,5
Famine	1,500,0	309,0	— 1,191,0
Construction of Railways	632,0	183,1	— 448,9
Railways	14,415,8	15,666,4	+ 1,250,6
Irrigation	2,303,7	2,310,7	+ 7,0
Buildings and Roads	4,485,3	5,201,7	+ 716,4
Army Services	20,097,8	19,525,0	— 572,8
Special Defence Work	325,6	+ 325,6
	<u>76,742,0</u>	<u>77,123,0</u>	<u>+ 381,0</u>

9. The principal differences in this group are savings under *Post Office, Telegraph and Mint*, and under *Famine, Construction of Railways* and *Army*

Services, while there has been excess expenditure in *Civil Departments*, *Railways*, *Buildings and Roads* and *Special Defence Works*. The saving in *Post Office*, *Telegraph and Mint* is due to diminished expenditure in the two last named departments, in *Famine* to reduced grants for Protective Works and to withdrawal of the assignment for reduction of debt, in *Construction of Railways* to withdrawal of allotment for Frontier Railways, and in *Army Services* to the special charges incurred in 1885-86 on the North-West Frontier. The excess expenditure under *Civil Departments* is connected with the operations in Burma, under *Miscellaneous* with the loss by exchange on repayment of the Transfer Loan of 1854, under *Railways* with increased charges for interest, annuities and working expenses consequent on the purchase of the Sind, Punjab and Delhi line by the Government, and the receipt of large sums from Railway Companies, in *Buildings and Roads* with the restriction of expenditure on Public Works in 1885-86 owing to the Financial pressure.

Comparison of Accounts with Budget Estimates, 1886-87.

10. The following figures exhibit the differences in the net accounts:—

	Better.	Worse.
A Principal Heads of Revenue	486,0	...
B Interest	33,8
C Post Office, Telegraph, and Mint	195,6	...
D Civil Administration	315,8
E Miscellaneous	232,7	...
F Famine	1,052,3	...
G Construction of Railways	73,9
H Railways	533,1	...
J Irrigation	77,3	...
K Buildings and Roads	295,1	...
L Army Services	1,115,7
L L Special Defence Works	325,6
	<hr/> 2,872,1	<hr/> 1,864,8
Combined Surplus, Imperial and Provincial .	<hr/> 1,007,3	<hr/> ...

11. There was a serious falling off in the price of the Bengal Opium, but the deficiency was to some extent made good by larger receipts from the duty on the Malwa drug. On the other hand there was a great improvement in Land Revenue, Salt and Excise. The special arrangement for famine insurance was revised as explained in paragraphs 68 to 75 of the Financial Statement for 1887-88, resulting in a saving of 1,052,3. The improvement under Railways was due to a development of traffic on some of the lines, especially the G. I. P. The cost of Special Defence Works was in the budget treated as expenditure not charged to Revenue, but is now paid from revenue. The last point requiring notice in this comparison is the army expenditure on account of Burma which has exceeded the Budget provision by 1,217,8.

12. The budget estimated for an excess expenditure of 793,2 on the whole account, but this included charges amounting to 975,4 out of past accumulations of Provincial and Local balances, thereby making a surplus in the Imperial account of 975,4—793,2 or 182,2.* The accounts, however, show a surplus of 178,4 in the Imperial account, and an increase in the Provincial and Local balances of 35,7 instead of a decrease of 975,4 as estimated. The net Imperial expenditure has therefore exceeded the estimate by 182,2—178,4 or 3,8, while

the Provincial and Local balances show an improvement over the estimate of 975,4 + 35,7 or 1,011,1. The details of these differences are given below, the sign + meaning better and — worse than estimate.

	REVENUE SIDE.			EXPENDITURE SIDE.		
	Imperial.	Provincial.	TOTAL.	Imperial.	Provincial.	TOTAL.
Principal Heads of Revenue	- 132,1	+ 689,1	+ 557,0	+ 63,0	- 134,0	- 71,0
Interest	+ 22,7	+ 3,6	+ 26,3	- 60,3	+ 2	- 60,1
Post Office, Telegraph and Mint	+ 114,3	- 9	+ 113,4	+ 80,3	+ 1,9	+ 82,2
Civil Departments	+ 14,1	+ 13,7	+ 27,8	- 441,6	+ 98,0	- 343,6
Miscellaneous	+ 55,2	+ 30,0	+ 85,2	+ 124,8	+ 22,7	+ 147,5
Famine	+ 1,052,3	...	+ 1,052,3
Constructions of Railways	- 73,9	- 73,9
Railways	+ 436,8	+ 66,0	+ 502,8	- 4,6	+ 34,9	+ 30,3
Irrigation	+ 19,3	+ 15,8	+ 35,1	+ 4,7	+ 37,5	+ 42,2
Buildings and Roads	+ 3,9	+ 43,6	+ 47,5	+ 84,7	+ 162,9	+ 247,6
Army	+ 143,3	...	+ 143,3	- 1,259,0	...	- 1,259,0
Special Defence Works	- 325,6	...	- 325,6
TOTAL	+ 677,5	+ 860,9	+ 1,538,4	- 681,3	+ 150,2	- 531,1
TOTAL BOTH SIDES	- 3,8	+ 1,011,1	+ 1,007,3

13. The improvement in the Provincial Section occurs chiefly in the Principal heads of revenue and in the expenditure of the Civil Departments and under Buildings and Roads. The notable items making up the difference in the Imperial section are as follows:—

IMPERIAL.	Better.	Worse.
Opium Revenue (net)	363,2
Salt Revenue (net)	273,6	...
Telegraph (net)	175,3	...
Famine Insurance	1,052,3	...
Savings under Superannuation	73,1	...
Loss by Exchange	111,4	...
Burma—		
Police	219,0
Marine	144,4
Military	1,217,8
Other Military Expenditure (net) excluding exchange	191,0	...
Guaranteed Railways (net) (excluding exchange on English expenditure shown below)	396,7	...
State Railways (net) do. do.	265,7	...
Saving under Military Works	93,6	...
Special Defence Works	270,3
Exchange on English expenditure	551,7
Minor improvements under other heads	129,9	...
	2,762,6	2,766,4
Net worse	3,8

Section A.—PRINCIPAL HEADS OF REVENUE.

1885-86. Accounts.		Budget.	1886-87. Revised.	Accounts.
52,442,3	RECEIPTS	53,945,1	53,665,7	54,482,1

14. The principal features of this group may be summarised as follows. *Land Revenue* is better than 1885-86 and the Budget by 463,3 and 295,4, respectively, owing largely to increased collections in Lower Burma and to new and revised settlements in some parts of India. *Opium* is better than 1885-86 by 5 only notwithstanding the sale of 4,506 more chests in Bengal and is worse than Budget by 284,6. There was a serious fall in the price of Bengal opium, but the deficiency on this account was to some extent made good by larger receipts from the duty on the Malwa drug. *Salt* also shews an improvement of 312,5 and 265,1, produced by large demands on the Punjab mines, consequent on the completion of the broad-gauge Railway from Mulukwal to Khewra, to large receipts at Sambhar on the recommencement of works which had been stopped for a great part of the previous year, and to general activity in the salt trade. *Excise* shews 223,1 more than 1885-86 and 240,4 more than Budget, but part of this is nominal and arises from changes in the method of making up the account. There was increased consumption in Bengal and Bombay. Under *Assessed Taxes* a large excess occurs (851,7) over the previous year as the result of the Income Tax, but the actual realizations fell short of the Budget by 103,4. A full explanation of these and the other minor changes will be found in the following paragraphs.

I.—Land Revenue.

Section A.—PRINCIPAL HEADS OF REVENUE—continued.

15. In the *ordinary land revenue* there was a shrinkage in India as compared with 1885-86, owing to the low rates prevailing in Quetta, where the revenue is mostly realised in kind, but the result is better than was expected in the estimate, which provided for large remissions on coffee lands in Coorg. The price of coffee, however, having improved, remissions were not required to the extent anticipated. The large collections in the Central Provinces are due to the revised settlements in the Raepur and Sambalpur Districts, and the recovery of arrears. In Lower Burma the revenue came in freely as the country began to quiet down after the disturbances of 1885-86. The improvement in Assam is attributed to extension of cultivation, progressive rates on waste lands, and greater punctuality in realising the demand. In Bengal and the North-Western Provinces a special effort was made towards the end of 1886-87 for the collection of all demands within the year. In the Punjab there is a difference of 4.8 only between the forecast and the actuals shewing that the former was carefully framed. In Madras the revenue in 1885-86 included a large amount of arrears. In 1886-87 the collections exceeded the estimate in consequence, partly of the augmented demand, and partly from the vigour with which the recoveries were pushed. Some of the Madras districts had an exceptionally favourable season, but this was counterbalanced in other parts of the presidency. In Tanjore, however, large remissions that were granted in the previous year, were disallowed and collected in 1886-87. The large receipts in Bombay have accrued from enhanced rates of assessments, from the extension of cultivation in two districts, from new settlements in Hyderabad, and from the unexpected recovery in Broach, at the end of March, of a large amount which was not expected to be realised until 1887-88. The increase would have been more prominent, but, owing to a change of classification, certain sums which were treated as ordinary revenue in the estimate have appeared as miscellaneous revenue in the accounts.

16. As regards the other headings, the difference between estimate and actuals in the Bombay revenue from *rent of resumed lands*, is due to the former being based on the old survey rates, while the collections proceeded on the new scale. The Burma estimate for the *capitation tax* was too sanguine. The Bengal receipts from *sales of waste lands, &c.*, were augmented by large proceeds from leases in the Sunderbuns and from the redemption of land tax in the 24-Pergunnahs. The Bombay receipts include the sale-proceeds of a portion of the Imperial Mody Bay estate, which had accumulated with the Bombay Port Trust. It was not provided for in the budget. The improvement in *fisheries and other miscellaneous revenue* is due in India to the Quetta Assigned Revenue which is improving, in Burma to the restoration of order in the country, in Assam to the opening out of new fisheries and to the yield from elephants and coal royalties, in Madras to the inclusion of certain local fund revenue and of the chank fishery, and in Bombay to local receipts and to the change of classification noticed above in the last paragraph. On the other hand there was a decline in Bengal, owing to the order for the recovery of copying fees in stamps not having been taken into consideration when the budget was framed. The Punjab estimate was high. As regards *Upper Burma* receipts, the unsettled state of the country prevented cultivation, and the expected revenue was not received.

17. The principle on which the land revenue is divided between the Imperial and Provincial Governments has been explained in previous reports, and hence it will be sufficient on this occasion to give only the following statements, which show how the results in 1886-87 have been worked out. It should be noticed that owing to the Financial pressure the Imperial share of the revenue was increased, by special contributions of 120,0 20,0 60,0 and 200,0 from the Central Provinces, Assam, Madras and Bombay respectively.

A—Transactions affecting the distribution of Land Revenue in 1886-87.

PROVINCE.	Capital outlay from Provincial Revenues.	Contributions Imperial and Provincial.	SPECIAL ADJUSTMENTS BETWEEN IMPERIAL AND PROVINCIAL.			Inter-provincial adjustments.	Total Net credits (+) or debits (—) to Provincial.

(a) On account of Upper Burma Land Revenue.

1885-86, Accounts.	II.—Opium.	Budget.	1886-87, Revised.	Accounts.
6,296.0	Bengal sale of Opium	6,667.0	6,147.0	6,147.0
2,449.0	Bombay Opium Pass fees	2,346.8	2,544.3	2,583.4
	Excise Opium—			
2	India	1	2	2
21.9	Central Provinces	22.0	21.9	21.5
27.6	Burma	27.6	32.0	33.3
42.0	Assam	43.1	42.5	42.0
53.9	Bengal	53.5	55.0	55.2
42.5	North-Western Provinces	43.2	44.0	43.7
...	Punjab	11.6	2.9	3.2
9.4	Miscellaneous	19.7	9.1	13.5
8,942.5	TOTAL	9,227.6	8,898.9	8,943.0

18. The Bengal actuals with 54,750 chests sold at an average of 1,123 do not compare favourably with the Budget, which looked for 55,500 chests and an average of 1,200 per chest, but they come very close to the revised estimate, which was framed at a time when most of the circumstances affecting the actuals were ascertainable.

19. On the other hand the increased realization in Bombay, on account of pass fees, was brought about by a desire to anticipate the "likin" tax which the Chefoo Convention makes leviable with the import duty, and also by the reported failure of the China crop. It is chiefly due to this that the total opium revenue corresponds closely with the actual figures of 1885-86, in spite of the falling off in Bengal.

20. The excise opium in Burma shews an increase as compared with the original estimate in consequence of greater competition for the Licenses at Akyab and Mergui, and of increased sales of the drug owing to the influx of a large number of camp followers and others attending the Military Force in Burma. In Bengal and the North-Western Provinces the increased receipts are due to general larger consumption of the drug. In the Punjab the original estimate of 11,6 was calculated on a probable consumption of 400 mds. at 7-4 per seer, but the Revenue authorities subsequently reduced the figure to 100 mds. and the actuals bear out the revised estimate very closely. The following table shews the sales and produce in Bengal and the exports from Bombay:—

Year.	Bengal.					Bombay.		
	Balance in stock on 1st April. Chests.	Produce of season. Chests.	Chests sold.	Average price per chest. R	Total price.	Chests.	Rate.	Amount.
1876-77	50,504	68,051	47,240	1,270	6,000.0	49,136	600	2,948.2
1877-78	71,315	67,167	49,500	1,266	6,269.3	45,830	600	2,749.8

21. The increase under this head as compared with last year's actuals shews a growing revenue, and India and Bengal are its chief contributors. In India, the completion of the broadgauge line of Railway from Mulukwal to Khewra, coupled with the lowering of the rates of Rail freight on Rock Salt, created a considerable demand on the Punjab mines for that commodity. The Kohat Salt also was in greater request, but these improvements were counterbalanced to some extent, by the unfavourable season at the Sultanpore Salt sources.

22. The large excess over estimates in the Central Provinces is due to increased sales of Baragora salt, and in Burma and Bengal to larger importations arising from a return of activity in the Salt trade. The large variations in Madras, both under "Sale of Government Salt," and "Excise on local manufacture" are attributable, in some measure, to the transfer from the Bengal accounts of the transactions in Orissa, but more particularly to the gradual substitution of the excise duty for the Government monopoly, which has the effect of decreasing both sides of the account by about three annas (the cost price) for every maund of the monopoly supply supplanted by the excise.

23. The decrease in Bombay, as compared with the actuals of 1885-86, is owing to the cessation of the extraordinary demand for the Baragora salt, which arose from the stoppage of Sambhar Lake produce in that year. On the other hand, the increased exports to the Madras Coasts and to Calcutta have led to the improvement over the Budget and Revised Estimates.

24. The increase under this head, as compared both with the estimates and the actuals of 1885-86, confirms the growing tendency of the revenue from this source.

25. The improvement in India is mainly due to larger sales of stamps in the newly settled districts of Beluchistan. In the Central Provinces the excess is attributed to the failure of the kharif crops resulting in the renewal of bonds from the ryots, as also to the progress of Railway works, leading to larger sales of Receipt Stamps.

26. The disturbed state of some of the districts in Lower Burma seriously interfered with business, and accounts for the falling off in that Province. The Upper Burma reports shew, that owing to unavoidable delay in establishing Civil Courts, the receipts provided for in the Budget and Revised, were not fully realized.

27. Assam also shews a falling off chiefly in the Sylhet district. It is attributed to the impoverished condition of the people consequent on the floods and three bad years in succession. There was also a decrease in the number of civil suits in some districts.

28. In Bengal increased litigation consequent upon the introduction of the Bengal Tenancy Act is still in operation, but the orders of Government to collect copying-fees in stamps accounts for the bulk of the excess in this Province. The improved receipts in the North-Western Provinces under "Court-fee Stamps" and "Commercial and other Stamps," are due to the ordinary expansion of the revenue and to increased litigation.

29. In the Punjab there was a general improvement under all the heads, but an unfavourable agricultural season led to renewal of bonds from the ryots to the money-lenders, followed by a special increase under Court-fee Stamps.

30. The falling off in Madras from the exceptional amount of last year was anticipated in the Budget and revised estimates, and is not attributable to any special cause. In Bombay the improvement is due partly to the extension of Railway lines leading to numerous conveyances from the owners of lands to the Railway authorities, and partly to the establishment of an additional Court in the Kaira and Panchmahal Districts, but more generally to the increasing prosperity of the people. Under Court-fee Stamps there is an exceptional receipt of 8,3, the value of stamp-duty on the probate in a single estate.

31. The receipts from "*License and Distillery fees and duties for the sale of liquors and drugs*" shew an increase in every province, over both the actuals of last year and the Budget Estimate, and Bengal, the North-Western Provinces and Madras have contributed the largest shares to the improvement. It is due in India to increased consumption of Arrack in the Mysore assigned tract, and to the payment by the Mysore Durbar of 3,0 towards share of toddy revenue of the assigned tract from 1884-85 to 1886-87, which was not anticipated in the Budget. There are also larger collections in the newly settled district of Beluchistan. In the Central Provinces and Assam better prices were obtained for licenses. In Burma certain changes were introduced in respect of the Excise revenue which is now credited in full to this head, the share due to excluded Local Funds being transferred to them by charge *per contra* under Refunds. There has also been a change in the system of granting licenses. The selling price of distillery liquors was also reduced, and this led to increased consumption of duty-paid liquor. In Bengal the improvement is due to increasing consumption, which was temporarily checked in 1885-86, owing to a bad agricultural season, and in the North-Western Provinces to general improvement and partly to the abolition of the excise monopoly at Cawnpore and Allahabad. In Madras the extension of the free supply system and other administrative changes, together with the transfer to this head of the duty on country spirits excised at import rates, from the head "*Customs*," caused the large receipts in that presidency, but these were partly counterbalanced by the transfer to "*Customs*" of the duty on Colombo arrack and by the abolition of the arrack monopoly. In Bombay the improvement is due to large removals of country liquors to supply the workmen employed on the construction of the Southern Mahratta Railway, to large consumption of Uran Mowra spirit and to an increase in tree-tapping license fees and still head duty recoverable on toddy spirit. Under *Opium*, Burma, Bengal and Bombay report increased sales, and Madras diminished imports from Indore in consequence of the large stock at the beginning of the year. The falling off under "*Other Receipts*" as compared with the actuals of last year occurs chiefly in Bombay, and is due to the fact that the contributions towards the cost of Abkari Police, included in the accounts of 1885-86, have this year been shewn under "*Police*." The unsettled state of the country accounts for the disparity between the actuals and the estimate in *Upper Burma*.

32. The fluctuations in India, Assam and Bengal do not call for remark. The smaller receipts in the Central Provinces are due to advance collections having been made in 1885-86 as explained in last year's report. The rates in Burma have kept pace with the increased collections under "I, Land Revenue," during the pacification of the country. In the North-Western Provinces the larger yield from "Local Rate Fund" and "Acreage Cess Fund," is due to new assessments sanctioned by the Board of Revenue, chiefly in the district of Jaunpore. In the Punjab, the increase is due partly to realisation of arrears and partly to the establishment of Patwari Funds in connection with new

Section A.—PRINCIPAL HEADS OF REVENUE—continued.

settlements. In Madras, there was a prosperous agricultural season, and the collections were larger than was expected in the Budget. The enhanced rates in Bombay are due to new settlements in Hyderabad and to extension of cultivation. In the Bombay Budget the Sind Village cess was entered under "Land Revenue".

	Accounts		581.2	315.5	125.7	223.9	1,245.3

33. *Import duties.*—The increase in Burma is due to large collection of duty on arms imported by the missionaries for the protection of the Karens, as well as to large clearances of liquor from bond in anticipation of the new rates of duty introduced by the tariff of 1887. The improvement in Bengal is the result of a better import trade. In Madras, the transfer to this head of the duty realised on Colombo arrack, from the head "V Excise," explains the excess. The increase in Bombay is due partly to expansion of trade, and in a small measure to the change noticed above in the rates of duty on liquors.

34. *Export duties.*—The collections fell off both in Burma and Bengal in consequence of a decline in the shipments of rice, brought about by the prevalence of low prices in Europe, but the falling off was not so great as was provided for in the Budget. On the other hand a revival of the coast trade led to larger shipments of rice to Karikal, Ceylon and other places, and produced the improvement noticeable in Madras and Bombay.

VIII.—Assessed Taxes.

1885-86. Accounts.		Budget.	1886-87. Revised.	Accounts.
I	India	274.2	197.0	124.2
23.2	Central Provinces	38.4	38.4	40.3
...	Assam	18.0	19.0	20.5
153.4	Bengal	360.0	361.4	364.5
119.3	N.-W. Provinces and Oudh	205.0	220.0	222.0
38.0	Punjab	90.0	93.9	112.4
43.4	Madras	130.0	123.4	154.3
125.6	Bombay	342.5	295.0	316.5
503.0	TOTAL	1,458.1	1,348.1	1,354.7

35. This being the first year of the Income Tax it was difficult to frame a correct estimate of the proceeds. The result shews that the India and Bombay estimates were too high and the others too low. In Madras and Bombay the tax was realized on the surplus profits of the Guaranteed lines and not on the net traffic receipts as was anticipated in the budget.

36. The fluctuations in India and Assam are normal and do not require special notice. The reduced receipts in the Central Provinces are attributed to a smaller supply of sleepers to the Nagpur-Chattisgarh State Railway than was contemplated in the Budget, and to increased activity in the working of private forests. Burma also compares very unfavourably with the Budget and the revised estimates for the year, and the decrease is chiefly in Upper Burma, where the disturbed state of the country interfered with work in the forests. Bengal reports that owing to reduced sales of depôt timber, the Budget was not reached, but the old stock of sleepers having been transferred to the State Railway department; and a good demand having arisen for firewood and charcoal, the collections exceeded last year's revenue. It may be added that the scarcity of sound timber near market centres in Darjeeling produced large arrivals from Nepal and Bhootan. The North-Western Provinces shew an improvement due to arrear collections on account of previous years, to large supplies of sleepers to the Rajputana-Malwa Railway, and to increased manufacture of catechu. The Punjab revenue was benefited by the extension of the sleeper trade, by stronger demand for depôt timber and fuel and by increased grazing dues. In Madras the estimates, both original and revised, were not reached, and the failure is due to abatement in the demand for sal sleepers in Ganjam, temporary depression of sales in Godavari, and to diminished transactions in teak and blackwood in the Nilgiris. Bombay actuals shew an increase over the original estimate, although they fall short of the figures of 1885-86, which was an exceptional year. The improvement as regards the Budget is due to increased demand for sleepers for the Southern Mahratta Railway and for fuel in Sind by the North-Western Railway. The difference from the figures of last year, on the other hand, is the result of lower prices for myrabolams, and of a decrease in grazing and grass fodder receipts consequent on the abolition of the grazing fee in some places.

Upper Burma Receipts {	Revised	4	4
	Accounts	4	4
TOTAL . . .	Accounts . 1885-86 .	1.4	7.3	2.4	3.4	109.4	35.0	17.8	92.7	38.6	306.0
	Budget . . .	1.4	7.3	2.8	3.3	121.0	34.5	17.7	82.5	39.3	309.8
	Revised . . .	1.5	7.6	2.8	3.8	105.0	34.0	18.4	87.0	37.8	297.9
	Accounts . . .	1.6	7.8	2.9	3.6	103.8	34.5	19.3	87.2	38.4	298.1

37. The figures under India, Central Provinces, Burma, and North-Western Provinces do not shew any great fluctuations that call for notice.

38. The registration fees in Bengal went up steadily till 1885-86 and the Budget was based upon the increase of that year. In 1886-87 it was noticed that the expansion had received a check and the revised estimate was accordingly lowered, but even this forecast has not been reached in the actuals. Punjab shews an advance, and it is stated to be due to an unfavourable agricultural season which led to a larger number of documents being presented for compulsory registration.

39. The increased revenue in Madras, as compared with the original Budget, is mainly due to the introduction of a revised scale of fees in May 1884, the effects of which upon the revenue are still in operation. The result, however, does not compare so favourably with the actuals of 1885-86, but those receipts were augmented by the registration of a large number of joint-stock companies.

40. Bombay follows the actuals of last year closely in spite of the reduced rate of copying fees introduced in September 1886, which was estimated to involve a loss of 1.5, but this was compensated by an increased number of registrations chiefly in the Deccan.

689,6	GRAND TOTAL	712,0	690,9	695,4

41. The realisations are satisfactory, and the actuals follow the estimates very closely except in Bombay, where there is a fall under "*Tributes and Contributions*" in consequence of the Junaghur tribute of 2,3 which was taken under this head in the Estimate, having been transferred to the Kathiawar Police Funds in connection with the scheme for the abolition of the Gaikwar's contingent. The Police funds are excluded local funds. The deficiency in Upper Burma is attributable to the expected tribute from the Shan States not having been finally determined or realised.

Section A.—DIRECT DEMANDS ON THE REVENUE.

1885-86. Accounts.	Budget.	1886-87. Revised.	Accounts.
9,805,3	9,675,2	9,786,0	9,746,2

42. The following are the more important events which have influenced the payments comprised in this group. The rise in *Assignments and Compensations* is due to arrangements made with the Meywar State, to receive the Postal collections of the British Government in that territory as payment of its salt compensation, which has resulted in an advance payment in 1886-87. In Bombay the alienated revenue in certain districts is now adjusted at new survey rates, thus causing an excess charge in this head and a corresponding excess credit in Land Revenue. The saving in *Land Revenue* occurs in the estimate for Upper Burma and in a large over-estimate in Bengal. The difference under *opium* is caused by the crop in Bengal being much smaller than in 1885-86 though larger than anticipated in the Budget. The *salt* expenditure was largely increased in Bombay partly for arrear charges in consequence of demands for Baragora salt from the North-Western Provinces, owing to a temporary stoppage of the production at Sambhar Lake. Under *Provincial Rates* a change has been made in showing the cost of collecting the Public Works cess in Bengal. The augmented expenditure on account of *Assessed Taxes* is due to the introduction of the Income Tax.

Section A.—DIRECT DEMANDS ON THE REVENUE—continued.

43. The fluctuating character of *Refunds* and its liability to be affected by changes in administrative measures have been explained in previous reports. The following are the chief features in the accounts of 1886-87. The Bombay actuals include 2,5 on account of an "Inam village" resumed in 1858-59 and now restored. Assessed Taxes shew an increase of 13,9, and it has occurred chiefly in Madras, where a refund of 8,3 had to be made to the Madras and South Indian Railway Companies on account of Income Tax, levied on the net profits, which the subsequent rulings of Government exempted from assessment, as they were not in excess of the guaranteed interest. "Other Revenue Refunds" shews a large increase in Burma, where the portion of "Excise Revenue" due to Local Funds was paid to them and charged to this head. The excess in Bombay is also due to large Excise refunds, not contemplated in the Budget.

1,396.5	TOTAL	1,301.0	1,372.5	1,446.9

44. The excess against Meywar is a payment in advance consequent upon an arrange-
ment by which the collections of the British Post Offices in that State are taken over by
the Durbar instead of being conveyed to the nearest British treasuries. The amounts pay-
able to Joudhpore and Jeypore were not drawn during the year. The sum paid to Bhutan
includes the subsidy for 1885-86 and 1886-87. The transfer of some pensions from Gwalior
to the Agra Treasury explains the increase in the North-Western Provinces. In the
Punjab the saving is ascribed to lapses of pensions.

45. In Bombay the distinction between the first two heads, "Pensions in lieu of resumed
lands" and "Inamdars and other grantees," was not sufficiently observed, and hence the
discrepancy in them between the estimate and accounts is partly nominal. Allowing for
this, the real amount requiring explanation is a large excess under "Inamdars and other
grantees" which arises from the alienated revenue in certain districts in Sind having been
adjusted at new survey rates. This adjustment has caused an increase in the revenue
head, 1—Land Revenue. Under the last two heads, there was a large saving chiefly in com-
pensations payable in Portuguese India, but on the other hand there was an excess of 3.5
in the Excise compensations. The large difference under these heads between the actuals
of 1885-86 and 1886-87 is due to an exceptional payment in the former year of three years'
compensation allowed by the mixed commission to owners of salt pans in Portuguese India.

46. There has been an addition to the *charges of District Administration* in India, the Central Provinces and in the North-Western Provinces and Oudh in consequence of the transfer to this heading of Putwari expenditure which was entered in the India Estimates under 18, General Administration, and in the other provinces under Land Revenue, but in the minor head, allowances to district and village offices. Assam shews an excess over 1885-86, but this is met by a saving under commission on collections due to the gradual extension of the Tehsildari in place of the Mouzadari system. There is also an excess in Bengal owing to a change of classification by which certain charges of Wards' Estates are brought into this account from 18, General Administration. The Punjab estimate made too large a provision for the Kanungo scheme which is being gradually introduced into that Province. The savings in Madras and Bombay were effected by the absence of highly paid officers on leave out of India, and by short payments on account of travelling and other allowances. Under *Survey and Settlements* 2,5 provided for the Coorg Survey was not required, as the work is carried out by the Mysore Revenue Survey Party. In the Central Provinces and Burma, operations were not carried out to the extent intended, and in the last named province the office of Settlement Secretary was abolished. The Assam, Bengal, North-Western Provinces and Punjab Estimates were too high. The large expenditure in Madras is attributable to the Survey in Tanjore and Wynaad Taluk being accelerated and to the revised demarcation in South Arcot. The excess in Bombay is connected with the erection of boundary marks in Sind. The heading *Land Records and Agriculture* is the outcome of a change in classification, and includes items that formerly passed under various other heads, and the comparison with 1885-86, and the budget, cannot therefore be made this year. As regards *management of Government estates* the large expenditure in Bengal in 1886-87, as compared with the previous year, is due to charges for collecting the revenue, but on the other hand, the amount estimated for outlay on improvements was not all utilised within the year. *Commission on Collections* was high in Burma as the result of improved revenue collections. The head *Allowances to district and village officers* has been largely affected by the transfers to District Administration as noticed above, and to assignments and compensations where there has been a corresponding increase. The Punjab outlay was greater in 1886-87 than in 1885-86, principally because the Putwari fees were funded in several districts. The apparent saving in Bombay comes from the pay of village officers in Sind having been classified under Police. The differences under *Upper Burma charges* are due to the failure of revenue and consequent non-payment of commission. In England no fresh pay-

Section A.—DIRECT DEMANDS ON THE REVENUE—continued.

ments were made for law charges in connection with appeals from India, but on the other hand, a claim that was expected to fall into the accounts of 1885-86 was not presented tile 1886-87.

4.—Opium.

1885-86. Accounts.		Budget.	1886-87. Revised.	Accounts.

47. The expenditure on Opium depends mainly upon the quantity produced, as it consists chiefly of payments to cultivators for the crude drug, and manufacturing charges. In the Behar Agency the crop was larger than in 1885-86 though it fell short of the Budget. The great increase has been in Benares, and hence in spite of savings in the grant for purchasing Malwa Opium, in establishments and other charges, the expenditure exceeded the estimate under “payments to cultivators and manufacturing charges” by 124,6. The Bombay figures do not call for notice.

48. In India the chief reduction is under “Establishment and Contingencies” at Sambhar where the commission was small in consequence of a falling off in collections, and under “Purchase and Freight,” from the closing of the Lala Musa Depôt. A smaller quantity of salt was also manufactured at Sambhar and the Punjab mines, than anticipated. In Bengal

Section A.—DIRECT DEMANDS ON THE REVENUE—*continued.*

the transfer to Madras of the management of the Orissa Salt sources, as noticed under the revenue head, explains the decrease in establishment and contingencies. This transfer has added to the Expenditure in Madras, which, in 1886-87, included also a special payment of 10,1 to the Kundapur licensees for the suppression of salt manufacture. In Madras moreover the difference between the budget and accounts arises from a change in the treatment of the salt and excise establishments. The charge for Purchase and Freight is gradually decreasing as the excise system is substituted for the Government monopoly. The large increase in Bombay under "Purchase and Freight," includes arrears of 1885-86, to meet the increased demands of Baragora Salt from the North-Western Provinces, owing to a temporary stoppage of the production at Sambhar Lake.

3	Exchange	1	1
124.4	TOTAL	105.8	117.6	116.7

Section A.—DIRECT DEMANDS ON THE REVENUE—continued.

50. The saving in Burma is due to the abolition of the office of Commissioner of Excise during a portion of the year and to less payments for rewards and contingencies. In Assam also the saving is due to the abolition of the Excise Establishment in Sylhet. In Bengal the administrative changes resulting from the recommendations of the Excise Commission have cost less money than was estimated. The saving of 8,0 in the Punjab is due to the grant for the salary of a Commissioner of Excise, provided for in the Budget, not having been utilised. In Madras the Budget under Salt comprised the combined establishment of the Commissioner of Salt and Excise Revenues, as explained in last year's report, and hence the omission of the figures in the Budget column here. In accordance with subsequent orders, the excise portion has been deducted in the revised and actuals from the total of the Salt head and shewn under 7—Excise.

8.—Provincial Rates.

1885-86. Accounts.								Budget.	1886-87. Revised.	Accounts.
ESTABLISHMENT AND OTHER CHARGES—										
3,7	Burma	4,3	4,4	5,1
5	Assam	5	5	4
20,7	Bengal	19,0	19,0	22,6
6	N.-W. Provinces and Oudh	7	7	6
16,0	Punjab	16,6	16,8	17,2
5,6	Bombay	5,5	5,6	5,2
47,1	TOTAL							46,6	47,0	51,1

51. The increase in Burma and the Punjab is due to larger cost of collecting the increased revenue from Rates and Cesses. The small decrease in Assam is attributed to the extension of the Tehsildari system. The rise in Bengal is due to a change of system in dealing with the cost of collecting the Public Works Cess in sixteen districts of that Province. Previous to October 1886 the amount used to be charged to contributions from Provincial to Local, but these contributions having ceased, it is now debited to this head, and a separate adjustment made with the Local Funds concerned. In Bombay the apparent saving is due to the transfer of refunds (which were debited to this head in 1885-86), to the proper head of charge "Refunds and Drawbacks."

9.—Customs.

		Burma.	Bengal.	Madras.	Bombay.	Total.
Charges at the Principal Ports of Rangoon, Calcutta, Madras, Bombay.	Accounts . . 1885-86 . .	9,9	45,0	6,4	30,8	92,1

	Revised . . .	17,3	51,0	16,4	48,7	133,4
	Accounts . . 1886-87 . .	17,1	51,4	17,6	49,7	135,8

52. In Bengal the Budget was insufficient and was corrected in the Revised estimate. The increase over the actuals of 1885-86 is due to the construction of four new boats and to temporary establishments. The slight increase in Madras is caused by the transfer to this head, with effect from 1st April 1886, of the charges for Petty Construction and Repairs, which were shewn under "Buildings and Roads, Civil Works" in 1885-86. The results in Bombay closely approach the original Budget, the excess over the actuals of the preceding year being due to the enhanced salary drawn by the Collector, Presidency Division, who acted in a higher grade, and to the construction of a steam launch for the Collector of Customs, Karachi.

Section A.—DIRECT DEMANDS ON THE REVENUE—continued.

10.—Assessed Taxes.

1885-86. Accounts.		Budget.	1886-87. Revised.	Accounts.
...	India	1	1
...	Central Provinces	3.	2	1
...	Assam	5	7	5
9,1	Bengal	36.5	28,0	27,0
6	N.-W. Provinces and Oudh	2,5	5,0	3,9
1	Punjab	2,5	3,5	3,4
7	Madras	8,0	6,8	6,2
2,0	Bombay	8,4	8,4	8,9
12,5	TOTAL	58,7	52,7	50,1

53. The figures of 1885-86 represent charges on account of License Tax only, and they do not, therefore, bear any comparison with the results of the year under report. The estimates for 1886-87 were necessarily rough, as there was not sufficient information available at the time for a more accurate forecast of the expenditure needed to administer the Income Tax.

54. The increased expenditure in India as compared with the actuals of 1885-86 occurs in Coorg and Ajmere. In Coorg it is due to more active work in timber and extension of plantation, and in Ajmere to enhanced charges for protection of firewood and charcoal from fire.

Section A.—DIRECT DEMANDS ON THE REVENUE—continued.

These charges were provided for in the estimates. The savings in the Central Provinces are the consequence of reduced charges for feed and keep of live stock. There are savings also in the salaries of gazetted officers. In Lower Burma (Pegu Circle) timber operations were limited, resulting in a saving of 6,0, and some survey work was postponed, for which 4,0 was provided in the Budget. The saving in the Upper country is mainly due to the unsettled state of affairs preventing the forests from being properly conserved, and thus leading to a curtailment of the expenditure. The Bengal Budget was rather high and savings have accrued in the pay of temporary establishments, feed and keep of cattle, and purchase of stores. Certain sanctioned works in Palamow and Singbhoom were not carried out, but for all that the actuals are in excess of the figures of 1885-86, partly by reason of a larger number of officers being on duty during the year, and in a larger measure to increased felling operations for supplying sleepers to the State Railways. The greater economy in the North-Western Provinces than was contemplated in the estimates, is due to the absence of the Conservator, Central Circle, whose *locum tenens* drew a smaller salary, as well as to the stoppage of scantling operations. Greater activity in the demand for sleepers led to the excess in the Punjab over the estimate, and the actual of the past year. In Madras considerable progress is being made in felling operations and the accounts of 1886-87 include a special payment of 7,5 on the revision of the Tekadi lease in South Coimbatore. The Bombay excess is mainly due to increase cuttings to meet the requirement of the Southern Mahratta Railway, and to large supplies of fuel to the North-Western Railway, as noticed under the revenue head.

55. The decrease in Bengal is due to the transfer of Land Registration charges, provided under this head in the Budget, to "3—Land Revenue." The saving under Superintendence in the North-Western Provinces and Oudh has accrued from the grant for office furniture having been used to a very small extent.

Section B.—INTEREST.

1885-86. Accounts.		Budget.	1886-87. Revised.	Accounts.
699,0	RECEIPTS	644,2	680,9	670,5

56. The receipts are less than 1885-86 owing mainly to the extinction of the debt connected with the Mysore Railway, and to postponement of the date on which interest is recoverable in respect of the Madras Harbour Works.

	Accounts . 1886-87 .	41.4	15.5	56.9		670.5

57. The two prominent points here are the small amount of interest realised on loans to Native States and private individuals, as shown in the statement given below, and on the overdrawn capital of Guaranteed Railways. The decline under the former head occurs in Madras, where the arrangement with the Southern Mahratta Railway Company in respect of the Mysore Railway has extinguished the debt due by the State, and the passing of the Madras Act II of 1886 has made the interest due on the Madras Harbour works payable annually on the 1st April, instead of half-yearly as was the case before. The interest on overdrawn capital of Railway Companies is always an uncertain quantity, but this year the budget expectations have been realised fairly well. As regards the English figures, the issue of six millions stock during the year greatly increased the cash balance which was abnormally large during a great part of the year. This increases the investment on which interest was received, and the rate of interest obtainable in the latter part of the year was also unusually high.

58. The balances under Loans to Municipalities, &c., have in the last six years stood as follows :—

	31st March 1882.	31st March 1883.	31st March 1884.	31st March 1885.	31st March 1886.	31st March 1887.

<u>4,100,0</u>	NET IN INDIA AND ENGLAND	<u>+9,415,4</u>	<u>+10,530,2</u>	<u>+10,520,1*</u>

* The above amounts are exclusive of -82,0, comprising 74,9 charged to Railways on account of Sinking Funds of East Indian, Eastern Bengal and Sind, Punjab and Delhi Railways and 7,1 to Discount Sinking Fund.

60. The 1,208,9 entered under India as debt incurred includes the loan of 1,200,0 raised during the year for the construction of the Calcutta and Bombay docks, and 8,9 obtained by the sale of stock notes; of the debt discharged 1,145,3 belongs to the transfer loan of 1854, which was discharged during the year in England, but the payments have been brought to account in this country, as the loan is held in the Indian register; of the balance of 47,0, 36,6 consists of Nagpur-Raipur Railway Debentures discharged, 2,3 of Government Promissory Notes discharged under special orders, 1,8 payments on account of loans which have ceased to bear interest, and 6,3 of stock notes held by certain Postmasters for sale, but returned, as they could not be disposed of.

61. As regards the English figures, the debt at 3½ per cent. was incurred for the redemption of East Indian and Sind, Punjab and Delhi Railway annuities. Under the 3 per cent. debt the Budget provided the sum required to be raised during the year by issue of Stock. The Revised and Accounts show the nominal amount of the stock issued. This issue was made at an average price of £87 4s. 2d. per cent. and yielded 5,207,5. The arrangements for dealing with the discount were explained in para. 67 of last year's report. The debt discharged represents (409,7) debentures of the Eastern Bengal Railway due 12th July 1886 and (1,0) the East Indian Railway Debentures which had remained unclaimed since 1871.

Section B.—INTEREST—continued.

13.—Interest on Ordinary Debt.

62. The usual statement analysing this charge is as follows:—

1885-86.		DEBT IN INDIA ON 31ST MARCH 1886.				1886-87.	
Accounts.	Rate.	Principal.	Interest.	Budget.	Revised.	Accounts.	
1,069,3	4½	23,290,8	1,048,0	1,049,9	1,041,0	1,044,9	
2,726,0	4	67,759,3	2,710,4	2,755,6	2,704,3	2,725,0	
1,5	3½	53,3	1,9	1,9	1,9	9	
7,2	Provincial	179,3	7,4	7,4	7,4	7,6	
7,1	Stock Notes	153,9	6,2	6,3	6,2	6,8	
3,811,1		TOTAL	91,436,6	3,773,9	3,821,1	3,760,8	3,785,2
6		Interest on Loans in course of discharge		1,2	5	7	
- 1,3		Discount on new Loans and Miscellaneous		...	27,7	5,5	
3,810,4		TOTAL INTEREST PAID IN INDIA		3,822,3	3,789,0	3,791,4	
2,795,1	England			3,120,9	3,163,2	3,163,0	
879,8	Exchange			1,040,3	1,174,9	1,189,5	
7,485,3		GRAND TOTAL, INTEREST		7,983,5	8,127,1	8,143,9	

DIVIDED INTO—

3,857,2	Interest on Ordinary Debt	3,886,1	3,943,6	3,949,0
3,628,1	Interest on Debt for Railways and Irrigation Works	4,097,4	4,183,5	4,194,9

63. As regards India, a full year's interest appears to have been drawn, but the Budget provided also for an arrear payment of 30,0 which has not been claimed. The payments were greater in 1885-86 than in 1886-87, but this was caused partly by the large transfer from the London to the India registers and the settlement with the Madras Civil Fund, as explained in the last year's report. The 5,5 under discount on new loans is composed of the following amounts:—

Discount on the loan of 1,200,0 raised during the year	27,7
Deduct—Discount charged to the Calcutta and Bombay Port Trusts to whom advances were made on the condition that they received the money at the rate at which it was raised	24,6

Expenses attending the discharge of the Nagpur-Raipur Railway debentures	3,1
	2,4

Net charged under Discount . 5,5

64. In England the arrangements for exchanging portions of the Sind, Punjab and Delhi Railway annuity, for India 3½ per cent. stock, had not been completed when the Budget was framed, and the charges could not be accurately divided between this head and annuities. The result shews that the estimate for interest was short by 42,1, while that for "annuities" was 48,1 too high. The large payments in 1886-87, compared with the previous year, represent interest on the new stock issued mentioned above.

	Accounts .	2	1	3		361.4

65. The interest on *Special Loans* is gradually diminishing, as the stipends payable in connection with the old Oudh Loans are commuted by the pensioners. The details of the interest on *Treasury Notes and Service Funds* are given below. The payments in 1885-86 were heavy in consequence of the Madras Civil Fund having been taken over by Government, which involved a settlement of accounts up to date. The charge for 1886-87 was well estimated, and the same may be said of the *Savings Bank Deposits*. The amount 2,3, which appears against Punjab under *Miscellaneous*, is the correction of a wrong credit under interest in 1883-84 and 1884-85.

Details of Interest on Treasury Notes and Service Funds.

-189,5	POST OFFICE (NET)	-196,9	-184,7	-196,0
-244,3	TELEGRAPH (NET)	-204,0	-86,6	-21,7
<u>+106,7</u>	MINT (NET)	<u>+87,5</u>	<u>+76,2</u>	<u>+99,9</u>

66. The *Post Office* worked up to the Estimate of the year. The *Telegraph Department* did better than the Estimate, having shewn a deficit of 21,7 only instead of 204,0 as was expected. This was accomplished partly by increased receipts and partly by curtailment of expenditure. The *Mint* result is also satisfactory and has been obtained by reduced expenditure.

XIII.—Post Office.

<u>1,113,1</u>	GRAND TOTAL	<u>1,157,1</u>	<u>1,166,3</u>	<u>1,154,3</u>

67. Taking the total revenue, the accounts work up closely to the budget and show a satisfactory improvement over the previous year. As regards details it became the rule in 1885-86 to use stamps instead of money for *parcel and other postage* and for commission on *money orders*. This rule is still maintained in respect of the former head and explains the deficiency in it as compared with 1885-86, but in the case of *money orders*, it was abrogated in March 1886 and hence the *money order receipts* in 1886-87 are larger than in 1885-86. These changes increased the *sale of postage stamps*, but it has since diminished to the extent in which the money order receipts that were formerly obtained in stamps are now realised in cash. The large *payments to English and other Post Offices* in 1885-86, included arrears that were liquidated in that year, while in 1886-87 they were specially small in consequence of credit having been given to India for

Section C.—POST OFFICE, TELEGRAPH, AND MINT—*continued.*

various sums due to her. The *mail cart* and *bullock train* collections depend upon the traffic and are subject to unavoidable fluctuations. The increase in *other receipts* as compared with the budget consists of a large number of small items.

Indian Telegraph Department.

68. Compared with the actuals of 1885-86 the improvement of 85,1 in the actuals of 1886-87 is due to an increase in the number of Government messages, chiefly in connection with Burma, and the general expansion of the Department. In 1886-87 the Secretariat offices of the Government of India ceased paying, by stamps, for their messages, thus reducing the revenue under Sale of Stamps, and increasing it under Receipts by book-transfer.

Section C.—POST OFFICE, TELEGRAPH, AND MINT—continued.

69. The increase over the Budget Estimate of the year is owing to the estimate having been framed on the supposition that the Upper Burma revenue would diminish, whereas it greatly increased owing to the extraordinary amount of State messages.

70. The excess over the Revised Estimate is attributed mainly to the increased transmission of State messages connected with the settlement of Burma, and to the credit to Government of certain forfeited security deposits and other receipts previously held in suspense.

Indo-European Telegraph Department.

71. The receipts fell short of those in 1885-86 owing chiefly to the return of the Afghan Boundary Commission and to interruptions on the Persian line in January and February 1886 which reduced the realizations during 1886-87.

72. In the Budget Estimate the diminution of revenue expected to follow the return to India of the Boundary Commission was overestimated.

73. The improvement shown by a comparison of the actuals with the Revised Estimate is owing to a reduction in the tariff for messages to India and the Far East.

Exchange.

74. The exchange, which on this side of the accounts relates to the Indo-European Telegraph only, has been steadily increasing, partly on account of larger receipts and partly on account of the fall in the rate of exchange.

XV.—Mint.

75. The uncertain character of this head, consequent on its dependence on the course of trade, has been explained in previous reports. The estimate of Seignorage duty on silver was based on an average importation which was not reached by the actuals, and hence the falling off in revenue. On the other hand, the absorption of 128,5 of copper coin as compared with 38,5 the quantity which passed into circulation in 1885-86—yielded a profit which was about sufficient to cover the loss on silver, and the net result of the year's operation shews a close approach to the Budget figures. The importation of silver in recent years has been as follows. The seignorage is 2,1 per cent. on bullion received from the Public:—

	Net Importation.	Silver Coinage.	Seignorage.
1879-80	7,869,7	10,257,0	212,0

76. There were small savings under *Chief Office, Calcutta*, but they were more than counterbalanced by an increase of 6 in the Comptroller's Establishment sanctioned during the year, and of 1,0 in Tour charges, due to the deputation to Simla of clerks from the Offices of the Comptroller and the Inspector General, Railway Mail Service. The charge for *Presidency and District Offices* shews a small increase in salaries consequent on the absence of officers on privilege leave, and in establishment consequent on new appointments sanctioned during the year, but on the other hand the amount reserved for expenditure under the Director General's orders was used to a small extent only. The increase in *other charges* occurs chiefly in travelling expenses. The charges for *conveyance of mails* is regulated largely by the traffic and the accounts have followed the budget closely so far as the totals are concerned, but there are differences in the component items. The head *road establishment* now includes amounts which were formerly taken as *mail cart establishment* and has caused the actuals of those heads to differ from the budget. The excess in Bullock Train charges has occurred in contingencies. In the mail cart charges, some reductions were effected amounting to 1,1 in the lines from Belgaum to Dharwar and Hublee to Haveri consequent no doubt on the further opening of the Southern Mahratta Railway. Under Railway charges a saving of 3,4 is reported in the conveyance of banghy parcels. The increase under *other charges* after Discount on Sale of Postage Stamps occurs in printing at private presses (1,7), construction and repair of Post offices (5), compensation for loss of insured parcels (4), awards against the Guarantee Fund (1,8) and Loss by Exchange on Continental money orders (2,9). This loss by exchange was not provided for in the estimate.

77. As regards *District Post Charges*, India reports that a considerable saving was effected during the year 1886-87 in the establishment of Postal Sowars in the Bolan. In Burma the subsidies for conveyance of mails on the Irrawaddy were reduced, and the district postal service was not extended so much as the budget anticipated. There has been nothing special in the other provinces.

Section C.—POST OFFICE, TELEGRAPH, AND MINT—continued.

78. The excess over the budget in the English expenditure for stores is due to larger indents having been sent from this country than were expected when the budget was framed.

Indian Telegraphs—Imperial.

79. The actuals both in India and England fell short by 36,0 of the preceding year, owing chiefly to more than the average quantity of stores having been obtained in 1885-86 to

Section C.—POST OFFICE, TELEGRAPH, AND MINT—concluded.

replenish articles used during the Afghan Expedition. The reduction due to this cause was 75,2, but there was an increase of 44,3 under maintenance and working, owing to heavy outlay in Burma, increase in salaries, and expansion in the number of offices.

80. On account of anticipated increase in the number of combined Post and Telegraph offices and provision for increased pay to certain classes of officers, the Budget Estimate was passed for 58,2 more than was actually spent.

81. The decrease brought out by a comparison with the Revised Estimate is attributed to works not having been advanced or new offices opened to the extent anticipated.

Provincial.

82. The differences and the amounts themselves are unimportant.

Indo-European Telegraph.

83. The decrease of 80,1 is almost entirely due to the figures of the preceding year including the cost of the third Bushire Cable.

84. The Budget provided for the normal outlay, but not for the maintenance of the Teheran-Meshed telegraph line, provision for which was made in the Revised Estimate. The actuals fell short of both Budget and Revised Estimates owing to an underestimate of the issues of stores.

Exchange.

85. The exchange was smaller than in 1885-86 owing to the abnormally heavy outlay in England in that year for the Jask-Bushire Cable. The decrease brought out by comparison with the Budget and Revised Estimates is owing to diminution in expenditure mainly in payments for stores.

17.—Mint.

1885-86. Accounts.		Budget.	1886-87. Revised.	Accounts.

7,0	„ Exchange	2,3	2,7	2,5
117,6	GRAND TOTAL	93,6	80,2	80,5

86. The saving under "Loss of weight in coinage" is due to a smaller outturn of work in silver, as explained under Revenue. The actuals in Bombay include a special payment of 1,2 to the Portuguese Government on account of seignorage duty, under the monetary convention sanctioned in the orders of Government No. 422, dated 27th January 1887. The budget for other charges in Calcutta included 6,2 on account of purchase of copper by the Mint Master, but the amount was subsequently transferred to its proper head and adjusted through the "Copper coinage account" subordinate to "Deposit and Advances."

Section D.—RECEIPTS BY CIVIL DEPARTMENTS.

1885-86. Accounts.		Budget.	1886-87. Revised.	Accounts.
1,427,4	Receipts	1,433,8	1,454,2	1,461,6

87. Various minor changes have occurred in this section of the account. The head *Law and Justice* has been divided into two parts, shewing respectively the receipts pertaining to *Courts of Law* and to *Fails*. Under *Police* the sums recovered from the guaranteed Railways, and in some cases from Municipalities are now subtracted from the expenditure instead of appearing as distinct credits. In *Education* several institutions have been made over to the management of Municipalities and other local bodies. These changes have affected the accounts, but the differences are composed of small items which are explained in the following paragraphs:—

88. The falling off in India is due to smaller receipts on account of "Sale proceeds of unclaimed and escheated property" from the Administrator General than expected in the Budget. The figures in the "Central Provinces" correspond closely with the Budget and do not call for explanation. Burma shews a small decrease under "General Fees, Fines, &c.," owing to interference with trade, caused by the unsettled state of some of the districts. The fluctuations in Assam and Bengal are made up of small differences which occur principally in the receipts on account of "Fines and Forfeitures" of the Magisterial

Section D.—RECEIPTS BY CIVIL DEPARTMENTS—*continued.*

Courts. In the North-Western Provinces and Oudh, the decrease as compared with the actuals of 1885-86, under "Sale proceeds of unclaimed and escheated property," comes from inclusion in the last named year of a special escheat as noticed in last year's report. The receipts on account of "Court fees, Fines, &c.," on the other hand, shew an increase in consequence of larger collections of "Distainers' Fees" and "Recoveries on account of pauper suits," while "other receipts" were augmented on account of the large number of candidates that were admitted during the year to the Pleadership Examination. Punjab shews an improvement, and it occurs chiefly under "General Fees, Fines, &c.," on account of larger receipts of Magisterial fines. In Madras the short receipts under "Sale proceeds of unclaimed and escheated property" were covered by the excess under "General Fees, Fines, &c.," from larger receipts on account of Magisterial fines. In Bombay the Budget estimate was low and the actuals bear out the revised figures, which were based on the actuals of ten months. The increase occurs chiefly under "General Fees, Fines, and Forfeitures."

	Accounts .	36.7	36.6	19.5	7.3	74.5	49.9	28.2	15.5	20.2	288.4

89. "Convict receipts at Port Blair and Nicobars" in India were small as compared with revised estimate, which was raised in expectation of recoveries from Native States, that were not eventually realized. The increase in the Central Provinces, as compared with the Budget, is due to an extension of manufacturing operations during the year, and larger sales of jail produce. This improvement set in after the Budget was framed, but it was provided for in the Revised Estimate. In Burma the sale of rice husk was greater than usual, owing to the increased quantity of paddy purchased for the maintenance of the large number of prisoners. In Assam the receipts on account of "Sale proceeds of jail manufactures" and "Other jail receipts" are smaller than the Budget on account of the larger number of men employed on extra-mural labour, and consequent decline of the jail manufactures. Bengal does not call for notice, but in the North-Western Provinces and Oudh the actuals exceed the Budget by 8.5 under "Hire of convicts" owing to the concentration of prison labour, and the completion of the Benares and Fatehgarh Central Prison buildings. The falling off in the Punjab is attributed to decrease in the prison population on account of Jubilee releases, and to the increasing difficulty experienced in providing intra-mural work of a remunerative character for the prisoners. In Madras jail receipts shew a steady decrease in consequence of restrictions which have been placed on jail manufactures generally. The decrease in Bombay, as compared with the actuals of 1885-86, is due to smaller receipts from hire of convicts and recoveries from Native States, partially arising from the Jubilee release of prisoners in February 1887.

90. The increased receipts in India are on account of larger recoveries for Police supplied to Railways. In the Central Provinces, the contribution from the Great Indian Peninsula Railway has been deducted from expenditure, and hence the apparent falling off as compared with the Budget and Revised. A corresponding reduction (2.5) appears under the head "20 Police. Burma shews a large excess over the Budget as well as the actuals of the year 1885-86, and it is due to the introduction of Preventive Police in the disturbed districts and the recovery of the cost from the villagers. The receipts in Assam and Bengal closely follow the estimates and do not call for explanations. In the North-Western Provinces the recovery on account of Railway Police has been deducted from the expenditure as in Central Provinces: the actuals otherwise shew a better result, due to larger receipts on account of fines on stray cattle. In the Punjab, nothing was realised under "Police supplied to Railways" owing to the transfer of the Sindh-Punjab and Delhi Railway to the State. The falling off under "Other Receipts," as compared with the actuals of 1885-86, is due to a special item representing the balances of certain local Equipment Funds having been included in the accounts of that year. Madras shews an improvement as compared with the original estimate, and the increase would have been larger were it not for the decline under "Police supplied to Municipal, &c.," caused by the postponement of the Punitive Cess in Malabar. The increase under "Fees, Fines and Forfeitures" is due to a larger number of pounds and to the recovery during the year of certain arrears on account of 1885-86. "Other Receipts" also shew an excess over the Budget in consequence of the transfer to this head from "XXXII Civil Works" of the rents of "Policemen's huts," and of a specially large credit for the value of the unserviceable arms and accoutrements returned into the Military Store Depot. The large falling off in Bombay is almost nominal as the various contributions are deducted from the expenditure as explained above.

91. The improvement in *Pilotage Receipts* is due to the transfer of the Chittagong and Balasore receipts in Bengal from the Port Funds to this head. The large proceeds of *Dockyard Services* come from more work having been performed for other Departments than was anticipated in the Budget. The *Sale-proceeds of Vessels and Stores* were also large owing to the sale of the "*May Frere*" and "*Czarevitch*," and of obsolete and surplus stores consequent on a reduction of stock in the Kidderpore Dockyard. The large difference in *Other Receipts* between 1885-86 and 1886-87 consists of special items connected with the expedition to Suakim, which passed into the accounts of the former year, as explained in the last report. In Burma, one of the steamers on the Arakan line having been under repair, earned no freight for the time, and this accounts for the Budget under this head not having been realised in that Province.

Section D.—RECEIPTS BY CIVIL DEPARTMENTS—continued.

92. Education shews an improvement of 7,6 as compared with the actuals of 1885-86, and it would have been larger were it not for the falling off in Burma, Madras and Bombay. In Burma the decline is noticeable under "Other Receipts," and is due to the abolition of the Government Book Depôt and the transfer of the Myoke and Thugyi examinations to the Educational Syndicate. The increase in the North-Western Provinces occurs chiefly under "Fees and Fines" in consequence of enhanced rates of fees introduced during the year, and under "Other Receipts" from a special credit for the sale proceeds and interest of Government Promissory Notes which were purchased many years ago out of public grants to the Muir College Fund. In the Punjab the short receipts under Fees and Fines, as compared with the Budget estimate, as also with the actuals of 1885-86, are due to the transfer of several schools to "Municipal" control and the consequent transfer of the fees to Municipal funds. The increase under "Other Receipts" covers a special item of 2,0 recovered for sale of Books; it was provided for in the Revised estimate. In Madras six high schools were transferred to Municipalities during the year and one was closed, and all the Government middle schools were made over to local bodies. Several primary schools were raised to the middle school standard, but the loss from this measure was counterbalanced by an improvement in the Local Section. The estimate of Fees Schools, Special, and Fees, Government Colleges, general, was rather low.

93. In Bombay the Budget was more than usually conjectural owing to the state of transition through which the department was passing from the transfer of certain schools to Municipalities, &c. The excess in the actuals is due to the postponement of these transfers and to a special credit given to the Book Depôt Fund in connection with the "Antwerp Exhibition."

95. In India the *Receipts on account of Public Exhibitions and Fairs* shew an apparent falling off, as the items entered under that head in the Revised Estimate were transferred to credit of "Civil Deposits" under orders of Government. The estimate under *Sale of Instruments and Stores, &c.,* was too high, as this year a change was made in the supply of maps and work done by the Surveyor General's Department, and the effect of this measure upon the accounts could not be accurately ascertained at the time.

96. In Bengal, the yield under *Cinchona Plantations* was again low, owing probably to the importation of cheap Quinine, which held the prices of the local manufacture in check. The increase under *Botanical and other Public Garden Receipts* in the North-Western Provinces and Oudh is connected with the Lucknow Horticultural, and Saharanpur Botanical Gardens, while the abatement under *Labour and Emigration* is due to a change in accounting, by which the portion of emigration fees due from Bengal is adjusted inter-pro-

Section D.—RECEIPTS BY CIVIL DEPARTMENTS—concluded.

vincially. The fluctuations in the Punjab are unimportant. The falling off in Madras is chiefly due to the low prices for Cinchona bark which ruled throughout the year. During the three years, 1884-85 to 1886-87, the quantity sold in Madras has been 1581,880, 110,800, and 85,000, respectively, and the average price 100·6, 86·2 and 77·4 per 100lb. In Bombay, the increase under *Receipts on account of Public Exhibitions, &c.*, is due to large private contributions to the Horse Show at Shikarpore.

Section D.—SALARIES AND EXPENSES OF CIVIL DEPARTMENTS.

1885-86. Accounts.		Budget.	1886-87. Revised.	Accounts
12,243,7	EXPENDITURE	12,354,9	12,650,1	12,698,5

97. This expenditure has been influenced by various minor changes as explained in the corresponding revenue head Receipts by Civil Departments. In comparing the figures of 1885-86 and 1886-87, the important differences are an excess expenditure in the last-named year of 432,4 under *Police* and 323,4 under *Marine*, arising almost entirely out of demands in Burma. On the other hand, there is a saving of 395,9 under *Political* in connection with subsidies and the charges of the Afghan Delimitation Commission. As between the Budget and the Accounts of 1886-87, the former has been exceeded by 267,2 under *Police* and 189,2 under *Marine*, and here too the principal cause is Burma.

98. Under India the excess in the actuals over the estimate for *Staff and Household* and *Secretariats* is largely due to a change in classification and in a smaller measure to increased charges for service telegrams and other contingencies which however were not so high as in the previous year. The change in classification is that, hill journey charges were formerly entered under Tour Charges and Rents, Rates and Taxes under 32 Miscellaneous, other items, whereas now they are charged against the various Departments with which they are connected. This accounts for the large saving under *Tour Charges*. The estimate under *Durbar Fund* was 5 too low. Originally the fund was fixed at 1,20 a year, but in 1884-85 the grant of 2,5, given under *Tour charges* was raised to 3,0 and transferred to the Fund. In 1886-87, 1,5, was added for furniture at Government House, thus raising the total estimate to 16,5 which was the amount spent. The head *Other Charges* in India includes in 1886-87 3,7 on account of the late Finance Committee. The wide discrepancy in the Central Provinces Budget under *General Establishment of Local Fund offices*, refers to the expenditure on account of the Putwari Fund which is now taken under Land Revenue. The amount of 26,3 for *Upper Burma* is the whole charge under this Major Head for which adequate provision could not be made at the time the Budget was framed. In Bengal and North-Western Provinces the saving in *Tour Charges* is nominal and comes from the transfer to *Secretariat* of items which belong to that minor head. The *Secretariat* charge in Madras includes the expenses of a special officer for six months to arrange the records of the Government Office. In Bombay the increase in the *Account offices* is owing to the presence of more officers than was contemplated in the Budget, to the privilege leave allowances of officers, and to a change in dealing with the charge for establishment employed on Local Fund Work. The reductions under *Allowances to Presidency Banks* are attributed mainly to the results of the new agreement; but in Madras and Bombay portions of the amounts due were not drawn in the year. The differences under *Local Fund Establishments* are due mainly to changes in accounting by which portions have been transferred to the Major Head "Land Revenue;" but in Madras and Bombay some additional establishments were entertained during the year.

Section D.—SALARIES AND EXPENSES OF CIVIL DEPTS.—*continued.*

99. There is a net decrease of 8,4 in the English Expenditure, of which 3,9 is due to the transfer to the Inland Revenue Department of the manufacture of stamps for India, and to the fact that no payment to that department was made in 1886-87. There were also savings of 2,1 in telegrams, 1,0 in management of debt, 6 in Law charges and 8 in office contingencies.

100. The decrease under Bengal *High Court* occurs in the salary of Judges, and is due to two vacancies not being filled up and also to the new Judges drawing less pay than their predecessors. These changes were only partially allowed for in the Budget. In Madras a good deal of expenditure was incurred in printing and translation for the High Court, while in Bombay a temporary additional Judge was retained under sanction of the Secretary of State. In Burma an additional Recorder was appointed during the year.

Section D.—SALARIES AND EXPENSES OF CIVIL DEPTS.—continued.

101. The increase under *Civil and Sessions Courts* in Burma and Bengal is caused by the appointment of Additional Judges. The Central Provinces estimated under this head for the full cost of the Reorganized Judicial staff, but some of the officers were deputed on settlement duty, while the charges for others were partly taken under Land Revenue.

102. The difference between the Budget and Accounts in the Central Provinces under *Criminal Courts* is partly explained by the fact that the duties of the Cantonment Magistrate at Jubbulpore are now performed by the Superintendent of Jails with an extra allowance. The excess in Burma arises from larger establishments and greater contingent expenditure. The savings under *Criminal Courts* in Bombay are attributed to a large number of absentees, while the deputation of some of the Judges of the *Small Cause Courts* on other duties, reduced the charges on that account.

103. In *Upper Burma* the variations from the Budget are ascribed to the full number of courts not having been opened in the country.

104. The English Budget provided 1,5 for the outfit allowance of three Judges, but a payment of 8 only was made to the Chief Justice. There was also a small saving under Stores.

105 The saving in *Convict charges at Port Blair* is in Commissariat stores. In the Central Provinces and Burma there was some increase to the Jail population, and consequently to the charges, counterbalanced to a certain extent by larger receipts, as explained under the head XVI.—B, Law and Justice—Jails. The estimate for *other Jail charges* in Assam was too high, while in Madras three district jails were closed during the year and the inmates transferred to Central Prisons. The Bengal estimate was excessive. In the North-Western Provinces the grant for the Meerut central prison was saved, and savings were also effected in the grant for *Raw materials*. The Punjab expenditure was affected chiefly by the release of prisoners on the occasion of Her Majesty's Jubilee, but still it was greater than the amount spent in the previous year, owing to the high prices prevailing in the province for food-grains. In Bombay, on the other hand, the price of provisions was low, and this, with various small economies, caused the saving in that presidency.

106. India shews an increase both under *District Executive Force* and *Railway Police*, on account of the entertainment of a larger force in Beluchistan. In the Central Provinces the fall under *Railway Police* is nominal, being due to the adjustment of about 2.5 recovered for Police supplied to the Great Indian Peninsula Railway Company, by deduction from the charge side instead of by a per contra credit. The great expenditure under Burma is due to the unsettled state of the country and the introduction of Police to take the place of troops. In Bengal the diminished charge for *District Police*, as compared with the Revised Estimate, is caused by transfer of the Orissa salt management to Madras. The North-Western Provinces saving of 8.2 under *District Force* has occurred partly in salaries and partly in clothing charges, and under *Railway Police* from the altered system of treating recoveries as noticed above. In the Punjab, the several actuals differ little from the previous year, but the estimates took under *Other charges*

Section D.—SALARIES AND EXPENSES OF CIVIL DEPTS.—continued.

amounts which should have been included under *District Executive Force*. Madras reports the opening of additional pounds which caused the excess under *Cattle Pounds*. The Bombay Estimate for *District Executive Force* included the grant for *Special Police* also, and hence the differences under those two heads. The increase in *Village Police* is due to the transfer of Village Cess Police in Sind from Land Revenue, and in *Railway Police* to arrear payments of the Government share of the cost of the Force employed on the Great Indian Peninsula line. The fall in *Presidency Police* is attributable to the Municipal contribution having been deducted from the gross charge.

Section D.—SALARIES AND EXPENSES OF CIVIL DEPTS.—continued.

107. The saving in *Marine Survey and Establishments* consists of the pay of the Surgeon Naturalist, which was charged against the Gilgit Mission from March to August 1886, and of some other amounts accruing from absences on leave. The expenses connected with the *Dockyards* were also less than the Estimate owing to vacancies in the establishments, and to less labour having been employed on ordinary duty than was expected. On the other hand, the heads *Salaries and Allowances* and *Marine Stores and Coal* shew an excess over the Estimate owing to several vessels having been put in commission and supplied for service in Burma. *The increase in *Pilotage and Pilot Establishments* is the result of entering in this account the charges in Chittagong and Balasore (Bengal) from the Local Port Funds. The large amount of *Other Charges* in 1886-87 is due to expenditure on account of Burma for hire of transports engaged for conveyance of troops from India, hire and purchase of steamers and launches employed on the rivers in Upper Burma, and provisions required for Marine establishments in that Province. The excess in the English expenditure is connected with the new Indian Government steamers "*Lawrence*," "*Dalhousie*," "*Musbee*" and "*Tamil*," and with an unforeseen demand for two stern-wheel steamers for Burma.

Section D.—SALARIES AND EXPENSES OF CIVIL DEPTS.—*continued.*

108. The charges under *Education* are largely affected by the general policy of Government to leave the management of schools and colleges to local bodies when possible, and by the extension of the *grant-in-aid* system and *payment by results*. In the Central Provinces the principal difference occurs under *Government Schools*, which now includes the schools maintained from district funds. The accounts of 1886-87, moreover, embrace expenditure postponed from the previous year. In Burma, the Rangoon College and High School were transferred to the Educational syndicate, and on this account there has been no charge under *Government Colleges* in that Province, and the expenditure on *Government Schools* has diminished. The syndicate receives a grant from the State, which is included in *Other Charges*, and explains the excess under that head. The syndicate was established in 1881 "for the purpose of directing and controlling the public examinations to be held under the grant-in-aid rules, and for the purpose of promoting the study of medicine, engineering, law, and the technical arts. It consists of officials, missionaries, merchants, and natives engaged or interested in educational matters." Assam reports several small savings. As regards Bengal the differences under *Government Colleges* and *Government Schools* arise from the transfer of the Bethune Girls' School in Calcutta from the latter to the former head. The other changes are not important, and the same may be said respecting the North-Western Provinces and Oudh, but there the estimate for *Government Schools* was too high. The expenditure in the Punjab was affected by a revision of certain salaries and establishments, by the cost of Putwaris Schools being defrayed from the Putwari Fund instead of as hitherto from Provincial Revenues, and by the transfer of some district schools to municipal management. The excess under *grants-in-aid* includes the Government grant to the Aitchison College Building Fund, and certain contributions made by District Boards for which the estimates did not provide. The Madras estimate for *Government Schools* was too low, while that for grants-in-aid was framed in expectation of considerable retrenchments that were not carried out. In Bombay the excess under *Government Schools* and saving under *grants-in-aid* are the result of a transfer from the latter to the former head of the contributions made to Municipalities. The provision for the Sind Arts College was not utilised, a grant-in-aid having been sanctioned instead, and some board schools were made over to Municipalities.

Section D.—SALARIES AND EXPENSES OF CIVIL DEPTS.—continued.

110. The saving in Burma under *Medical Colleges and Schools* arises from charges having been paid in other Provinces and adjusted inter-provincially. In Bengal, owing to a change in classification, charges that were entered in the Budget under *Medical establishments* were taken in the accounts under *Hospitals and Dispensaries* and a similar alteration was made in Bombay as regards the heads *Hospitals and Dispensaries* and *Grants for Medical Purposes*. The saving in Madras has accrued largely from absences on leave and also from the employment of officers in Burma.

112. Under *Survey of India* there were general savings and retrenchments in the establishments, but against this must be set a larger supply of Mathematical Instruments to Survey Parties than was anticipated in the Budget. Practically the Budget has been maintained in the actuals. The cost of the *Geological Survey* was low partly in consequence of absentees on leave, and partly from the appointments of Palæontologist and Artist not having been filled up. The excess in *Other Scientific Departments* is composed of charges for the Petroleum operations in Beluchistan not provided for in the Budget. In 1885-86 the head *Public Exhibitions and Fairs* included charges for the Indo-Colonial Exhibition, but in 1886-87 India spent about 3.6 less than was expected for the International Exhibition. No charges have appeared in 1886-87 under *Agricultural Department* as they are now taken under 3, *Land Revenue*. Bengal provided 2.5 under *Other Agricultural Charges* for a veterinary college which was not started. In Assam and in the North-Western Provinces the items formerly classified as Provincial Statistics are now taken under 3, *Land Revenue*. The excess in Madras includes charges connected with Mr. Macleane's deputation on special duty and the preparation of the Madras Manual of Administration. The Central Provinces and Bombay estimates under *Miscellaneous* included charges for the management of Local Funds, but these are now shown under 18, *General Administration*, in accordance with recent changes in classification.

Section E.—MISCELLANEOUS.

1885-86. Accounts.		Budget.	1886-87. Revised.	Accounts.
1,077,8	RECEIPTS	763,1	831,4	848,3

113. Compared with 1885-86 the receipts of 1886-87 under this group show a falling off of 229,5 which is more than accounted for by the difference under the head *Exchange*. In 1885-86 there was a net gain by exchange of 264,4 while the accounts of 1886-87 show a loss of 26,3 entered on the charge side. This difference has been mainly due to the loss incurred on the repayment of the stock receipt loan of 1854. A part of the deficiency has, however, been made up by larger receipts under *Stationery and Printing*, owing to recoveries from State Railways of the value of stationery and forms supplied to them. As between the Budget and the Accounts of 1886-87, the latter shows an improvement of 85,2, of which 25,3 occurs under *Stationery and Printing*, owing to the aforesaid recoveries from Railways not having been sufficiently provided for in the Budget; 53,3 under *Miscellaneous*, chiefly owing to receipts in Upper Burma and to some recoveries in Bombay on account of Insurance and other charges on railway stores as explained under that head.

114. Considering the nature of the receipts that come into this head, the fluctuations in the Central Provinces, Burma, Assam, Bengal, and the Punjab are not greater than might have been expected. The North-West Provinces estimate was too low. The India estimate for *appropriation from the capital of the Military Orphan Fund* and for *contributions* was high, and this was also the case in Madras as regards the *subscriptions to the Military and Medical Retiring Funds*. *Subscriptions to the Madras Civil Fund* are shewn under this head for the first time, and the decrease as compared with the estimate is due to want of information when the estimate was framed. In Bombay the chief difference is under *Subscriptions to the Military Fund*, the estimate for which wrongly contained subscriptions of officers domiciled in Europe and whose contributions are realized in England. The increased receipts under *Contributions for pensions and gratuities* are attributed to the transfer to Municipalities of a number of Local Fund Schools, the teachers of which are allowed to pay contributions for their pensions. In the English figures the excess over the Budget consists of receipts on account of the Madras Civil Fund, not anticipated when the Budget was framed.

115. The receipts from *sale of Stationery* include credits now shewn for the first time for value of Stationery and Forms supplied to State Railways, arrangements for which were made after the Bengal and Punjab Budgets had been prepared. The Revised in India was based on probable receipts from the Rajputana-Malwa Railway, but owing to the transfer of management of that line to the Bombay-Baroda Railway, the actuals fell short of the forecast.

116. The items shown under this head are so fluctuating that the variations require little explanation. The *Gain by Exchange* in India arises chiefly in connection with the coins of native mintage circulating in Central India and the Persian coins used by the Afghan Boundary Commission. The Commission was withdrawn in 1886-87, when transactions in Persian coins ceased, and this explains the falling off as compared with 1885-86

Section E.—MISCELLANEOUS—concluded.

while a decline in the rate of exchange in Hyderabad accounts for the excess in the actuals over the Budget. Under *Premium on Bills* the actuals have exceeded the Budget in India owing to a much larger amount of bills and telegraphic transfers having been issued than was anticipated. The *Unclaimed Deposits* represent the net amounts credited after deducting refunds of former lapses, and hence there is great difficulty in making an estimate of these sums. The head *Miscellaneous Fees, &c.*, in India included in 1885-86 a fine of 2.2 levied on the Zhob Kakar tribe, and in Bengal, it embraced certain fees relating to cesses which are now taken under advances. The increase under *Contributions* in the North-Western Provinces and Oudh over the Budget and the Actuals of 1885-86 consists of an arrear collection of 2.3 from the Maharaja of Benares, and in Bombay some arrears of the same kind were realised though not anticipated in the Budget. The *rents* collected in Madras in 1885-86 were unusually large owing to the high price obtained for crops grown on choultry lands; but against this excess must be set a corresponding increase in the expenditure entered as Petty Establishments under 32, *Miscellaneous*. The *Extraordinary items* credited in Bombay comprise the sale proceeds of Government Securities held by several Local Boards contrary to rule. Under *Other items* the decrease in India is due to the recoveries from Railway Companies for general supervision being no longer credited to this head, but deducted from the corresponding Railway expenditure for supervision. On the other hand, the actuals of 1886-87 include two special items of 2.0 and 2.8 respectively on account of sale proceeds of certain confiscated Government Promissory Notes, and credit taken for charges of the Afghan Boundary Commission transferred to the Military account. The excess in the Punjab arises partly from large collections of the Khybar tolls, and partly from certain district fund income not provided for in Budget. In Madras the accounts for 1886-87 include about 5.0 as income derived from service inams appertaining to vacant offices in Kurnool, which was not anticipated in the Budget, but the accounts of 1885-86 also comprised special items as explained in the report of that year. The Bombay credits comprise large recoveries on account of insurance and other charges on railway stores, and the revenue collected in Berbera, Bhular, and Zaila. Considering the circumstances of Upper Burma, it was not possible to make a close forecast of the receipts to be obtained in it. The improvement in the English receipts is derived from a recovery of 4.0 on account of Marine insurance not anticipated in Budget.

Section E.—MISCELLANEOUS.

1885-86. Accounts.		Budget.	1886-87. Revised.	Accounts.
4,634,6	EXPENDITURE	4,848,6	4,723,0	4,701,1

117 As explained under Receipts the charges of 1886-87 under this group include 26,3 on account of *loss by exchange*, whereas in the previous year there was a gain of 264,4. This accounts for a portion of the difference between the two years. The charges under *Stationery and Printing and Miscellaneous* also exceeded those of the previous year by 51,3 and 36,9 owing respectively to larger purchases of stationery in Bengal and England, and to the appointment of the Finance Committee and the Public Service Commission. Compared with the budget the accounts of 1886-87 show a saving of 114,4 under *Exchange* owing to large receipts of capital from Railway Companies. There were also small savings under *Territorial and Political Pensions* and *Furlough Allowances*.

118. The saving in Burma is due to a smaller expenditure than was expected in Upper Burma, and in Bengal to non-payment of 1,2 for the Rajah of Sikkim. The excess in the Punjab is due to new pensions, and in Madras to the payment of arrears to the son-in-law of the Rajah of Tanjore at an increased rate, and to large commutations sanctioned during the year. The reduction in Bombay and other provinces was produced by casualties among pensioners. The saving in England represents the undrawn portion of Maharajah Dhulip Singh's stipend, less 1,4 for his expenses to Aden and back.

Section E.—MISCELLANEOUS—continued.

119. As explained in former reports the charges under this section are not susceptible of a correct forecast. The decreases in the English Payments are due to the date of payment of certain allowances and pensions being changed from 25th March to 1st April thus postponing to the year 1887-88 payments which would otherwise have been made in 1886-87.

120. The difference between the two years 1885-86 and 1886-87 is mainly in Donations to Service Funds, these Institutions having been taken over by Government. Considering

Section E.—MISCELLANEOUS—continued.

the nature of the charges the Budget has been fairly well sustained, although, as was to be expected, there are considerable divergences from the amounts allotted to the several Provinces. The amount paid in 1886-87 as pensions of the Civil Funds includes 3.8 on account of the capitalised value of one pension. The decrease in England as compared with the budget is largely owing to the change in the date of payment of certain allowances and pensions from 25th March to 1st April, thus postponing to 1887-88 payments which otherwise would have been made in 1886-87.

in order partly to complete the third volume of Maclean's Manual of Administration. The Stationery supplied from Central Stores is necessarily a fluctuating quantity and cannot be accurately estimated, but Madras reports that the saving in that Presidency is largely due to the paper having been purchased at favourable rates. The small amount under other charges in Madras is the result of savings effected in the cost of Printing for the Settlement Department. The English expenditure includes some arrear payments, but for all that, it did not reach the estimate, in consequence chiefly of small indents from Bombay, where the local purchases, it will be seen, were higher than in the estimate.

264.4 Total (gain + loss—)		—137.7		—48.0	—26.3

122. The nature of the items taken under this head was described fully in last year's report, and it is not necessary to repeat the explanation here. These items depend on two factors, the first being the sterling amount of the transactions and the second the rate of exchange, and it is difficult to make an accurate forecast of either. The greater portion of this year's difference is due to the Railway Companies having made a considerable change in their programme since the budget was framed, as well as to the rate of exchange, in which there was a fall of more than a halfpenny. In 1885-86 there was a net gain on the whole of 264.4, but the accounts of 1886-87 show a net loss of 26.3. This is mainly due to a loss in the latter year of 396.6 on the repayment of the Stock receipt Loan of 1854.

123. The actuals under the first three heads agree closely with the Budget and the actuals of 1885-86. The Budget Estimate of Rewards *for destruction of wild animals* in Madras proved too high, but it was so framed because in the two previous years the scale of rewards was enhanced in certain districts, and, with the sanction of Government, the full amount was usually granted. The charge for *Special Commissions of Enquiry* has been unusually heavy in 1886-87, owing to the appointment of the Finance Committee and the Public Service Commission in India, to the deputation of the first Member of the Madras Board of Revenue on special duty to Madura, and to the appointment of the Forest Commission in Bombay. These expenses were not fully estimated except in Bombay. The discrepancy between Budget and Actuals under *Rents, Rates and Taxes* is attributable to changes of classification ordered after the Budget was framed. In Bengal a good deal which was found to belong to this head was taken in the Budget to *Other items*. The charges on account of *Upper Burma* could not be reckoned when the Budget was prepared. The head *Other items* has been largely affected by the expenditure attending the Jubilee celebration. In addition to this the India Estimate was out by 30.0, being charges of the nature of miscellaneous refunds and entered on audit under that heading. The Bengal Estimate was also out by 11.5 as explained above. The Punjab Budget took under this head the Provincial reserve of 10.0, from which exhausted grants are supplemented by Government from time to time, and the charges so covered are classified against the various accounts to which they severally appertain. The Bombay actuals for 1886-87 include a new charge of 2.5 on account of the Provincial contribution towards the maintenance of the telegraph line between Kolhapur and Rutnagiri and Pen and Alibag, 8 being the charge of the year and 1.7 arrears. The increase in the English expenditure is due to the discharge of East India Stock unclaimed since April 1874.

Section F.—FAMINE RELIEF AND INSURANCE.

1885-86. Accounts.		Budget.	1886-87. Revised.	Accounts.
1,500,0	EXPENDITURE	1,361,3	311,9	309,0

124. It has been stated in previous reports that the amount usually provided for expenditure under this head is 1,500,0. In the year 1886-87, however, the estimate was limited to 1,361,3, the difference being due, as explained in para. 40 of the Financial Statement, to a deduction on account of "the interest payable during construction to the Company which has undertaken the construction of the Indian Midland Line." In the revised estimate the grant was still further reduced, the amount passed being 311,9 only, and this is closely approached in the actual expenditure. The difference between the Budget and Revised Estimates consists mainly in the provision for the reduction of debt (749,0) having been withdrawn in the latter, for the reasons stated in paras. 68 to 75 of the Financial Statement of 1887-88. These several changes are tabulated in the following statement:—

1885-86. Accounts.		Budget.	1886-87. Revised.	Accounts.
40,7	Famine Relief	1,0	6	1,0
589,0	Construction of Protective Railways	500,0	200,0	200,0
186,8	Construction of Protective Irrigation Works	111,3	111,3	108,0
683,5	Reduction of Debt	749,0	Nil.	Nil.
1,500,0	TOTAL	1,361,3	311,9	309,0

33.—Famine Relief.

1885-86. Accounts.		Budget.	1886-87. Revised.	Accounts.
...	Central Provinces	5
12,4	Bengal
27,8	Madras	1,0	6	5
5	Bombay
40,7	TOTAL	1,0	6	1,0

125. The amount spent in the Central Provinces represents expenditure from District Funds on relief works in the Chattisgarh Division not anticipated in the Budget. The Madras expenditure in 1885-86 was on account of the Hindupur Extension Railway Works, which were undertaken to afford employment for the destitute in the Bellary and Anantapur districts. The expenditure in 1886-87 represents a write-off on account of the irrecoverable balance of advances made during the great famine of 1876-78.

34.—Construction of Protective Railways.

1885-86. Accounts.		Budget.	1886-87. Revised.	Accounts.
589,0	TOTAL	500,0	200,0	200,0

126. Charges against this head are debited in a lump sum by credit to the account 47—*State Railways—Construction*, under which head the outlay is in the first instance recorded. When dealing with the Revised Estimate of the Department for 1886-87, the Government of India decided that a sum of 200,0 should be charged to Revenue on account of Protective Railways, instead of 500,0 as provided in the Budget Estimate, and this sum was accordingly debited in the accounts of the year under review.

		ACTUALS.
		More. Less.
Actuals with	Actuals of previous year	78,8
„	Budget Estimate	3,3
„	Revised Estimate	3,3

(a) Includes £285,400, outlay from funds not classed under this special head.

127. No outlay was incurred in England under this head.

128. The Expenditure is regulated by the grants available and the works which have been sanctioned as fit to be placed under this category. The ordinary allotment was formerly 250,0; but this was reduced in the Budget and Revised Estimates to 111,3, to provide for the interest on the Capital of the Indian Midland and Nagpore-Bengal Railways. This reduction of grant accounts for the actuals of 1886-87 being 78,8 below those of 1885-86.

129. During the year the grants for the Betwa, Swat river, and Gokak canals, the Rushikulya project and the Mhasvad tank were reduced, and increased outlay on the Nira canal and a grant-in-aid to the Orissa Coast canal were sanctioned; but the total of the Revised Estimate remained the same as the Budget.

130. The expenditure was 3,3 below the estimates, owing chiefly to scarcity of labour on the Swat river and Rushikulya projects.

36.—Reduction of Debt.

RESULTS.

	ACTUALS.	
	More.	Less.
Actuals with Actuals of previous year	449,0
„ Budget Estimate	73,9	...
„ Revised Estimate	4,8

132. In 1885-86 a sum of 500,0 was provided from revenue for expenditure on Frontier Railways, and that amount was charged in the accounts under this head, by deduction from the head 47.—*State Railways—Construction*. During the year under review no allotment was provided out of revenue, the total outlay incurred on the Frontier lines being treated in the accounts as *Expenditure not charged to Revenue*. No comparison is possible between the expenditure during the two years on the other lines.

133. The excess over the Budget Estimate is due chiefly to the more extended prosecution of work on the Lucknow-Sitapur Railway in view to the early opening of the line.

Section H.—RAILWAYS.

134. The following is a general statement of the Revenue Accounts :—

	State Railways.	Guaranteed Railways.	Subsidized Companies.	Miscellaneous.	TOTAL.
1886-87.					
Gross Earnings . . .	10,829,0	7,280,5	1,6	...	18,111,1
Working Expenses . . .	4,974,0	3,633,4	8,607,4
Surplus Profits . . .	245,9	534,6	780,5
Interest . . .	3,675,6	3,721,9	7,397,5
Annuities . . .	2,308,6	2,308,6
Land and Supervision	66,2	45,2	...	111,4
Miscellaneous Railway Expenditure	94,4	94,4
TOTAL EXPENDI- TURE . . .	11,204,1	7,956,1	45,2	94,4	19,299,8
Net Gain or Loss to the Government,					
1886-87 . . .	—375,1	—675,6	—43,6	—94,4	—1,188,7
1885-86 . . .	+394,9	—983,3	—44,0	—99,3	—731,7
1884-85 . . .	+173,9	—1,043,3	—84,2	—97,6	—1,051,2
1883-84 . . .	+647,5	—996,4	—85,5	+129,4	—305,0
1882-83 . . .	+40,3	—1,053,9	—38,3	—254,0	—1,305,9

135. These figures shew that the *State Railways* did worse than last year by 770,0, and the *Guaranteed Railways* better by 307,7. These results are complicated by the transfer of the Sind, Punjab and Delhi line from the guaranteed to the State Railway head, as explained in the following paragraph, and the opening out of new lines, as in the Southern Maharatta and Burma systems. Allowing for these changes, the items which have contributed to the deficiency in State Railways are excess payments under interest and annuities in purchase of guaranteed Railways amounting to 589,3 and 353,7 respectively, and exchange 379,3. On the other hand, the gross earnings of State Railways amounted to 870,1 more than in 1885-86, the increase in working charges and surplus profits being 317,8. The other items do not call for special remark here.

Section H.—RAILWAYS EARNINGS.

1885-86. Accounts.		Budget.	1886-87. Revised.	Accounts.
13,684,1	RECEIPTS	13,975,0	14,266,9	14,477,8

136. The following sums are comprised in these receipts :—

1885-86. Accounts.		Budget.	1886-87. Revised.	Accounts.
9,958,9	State Railways (gross)	10,841,5	10,714,4	10,829,1
3,725,1	Guaranteed Railways (net)	3,133,5	3,552,5	3,647,1
1	Subsidized Companies	1,6
13,684,1		13,975,0	14,266,9	14,477,8

137. The *State Railways* show an increase of 870,1 as compared with 1885-86, but in that year credit was taken under this head for only three months' earnings of the Sind, Punjab and Delhi Railway, as it was a guaranteed line up to December 1885, when it was included in the North-Western State Railway. Allowing for this special cause of difference, there was still a substantial improvement in 1886-87, as explained in the following paragraphs, caused by the addition of new lines, as in the Southern Mahratta and Burma systems, and by development of traffic on the older ones. The transfer of the Sind, Punjab and Delhi Railway to the State lines, as noted above, has diminished the revenue from the *Guaranteed* lines, which have returned 451,0 less than in 1885-86; but in them also there has been a good development of traffic in 1886-87, as shown in paragraph .

Section H.—RAILWAYS EARNINGS—continued.

138. The increase of 3,6 compared with the Actuals of the previous year is not large, considering the magnitude of the transactions, but the fluctuations leading up to this result are important and are detailed in the above table.

139. The falling-off of 43,0 compared with the Budget, was due chiefly to a fall in the quantity of railway materials, salt and wheat carried, against which there was an increase, to some extent, in the receipts realized from additional pilgrim traffic and exceptional activity in connection with native festivals.

140. The increase of 12,0 over the Revised is attributed principally to a reduction in outstanding earnings at the close of the year.

Actuals with Actuals of previous year	.	81,5	...
" Budget Estimate	12,9
" Revised Estimate	4

141. The earnings of the year 1885-86 were abnormally low, owing to the interruption of traffic caused by the floods of September 1885, and to the active competition of the River Steamer Companies.

142. The decrease in actuals of 1886-87, as compared with the Budget Estimate, is attributed principally to the failure of a bridge near Goalundo, resulting in the loss, for a time, of freight over 43 miles of the line.

143. The Actuals agree so nearly with the Revised Estimate as to call for no remark.

144. The increase of 23,3 over the actuals of 1885-86 is attributed to development of passenger traffic generally throughout the entire system, and to a recovery on account of rolling-stock.

145. The increase of 38,3, compared with the Budget Estimate, was due to the general improvement in passenger traffic during the year.

146. The increase over the Revised Estimate is unimportant,

Section H.—RAILWAYS EARNINGS—*continued.*

147. The actuals of 1885-86 in the above table include the earnings of the Sind, Punjab and Delhi Railway for the nine months ended December 1885, amounting to 1,054,2. These earnings were credited under XXVII, Guaranteed Companies—in 1885-86, *vide* statement printed on the following page,—and have been included here in order that a fair comparison may be made of the revenue transactions of the combined undertaking for the two periods.

148. Compared with the actuals of the previous year, there is a decrease of 489,1, which is attributed to unusual traffic in 1885-86 in connection with the military preparations on the frontier and in the carriage of materials for the frontier railways, and in a great measure to the almost entire failure during 1886-87 of the usual grain export traffic from the Punjab *via* Karachi.

149. The falling off of 76,7 compared with the Budget Estimate is ascribed to high prices prevailing in the Punjab for wheat and seeds, especially in the latter part of the year, which restricted exports *via* Karachi. The decrease from this source was counter-balanced to some extent by an unexpected development of third class passenger traffic.

150. The increase of 58,3 compared with the Revised Estimate is attributed chiefly to a slight improvement in the goods traffic in the last few weeks of the year, and to a large and unexpected reduction in the balance of outstanding earnings.

Other State Railways—Imperial.

RESULTS.

					ACTUALS.	
					More.	Less.
Actuals with	Actuals of previous year	.	.	.	57,7	...
„	Budget Estimate	.	.	.	16,0	...
„	Revised Estimate	.	.	.	17,5	...

151. There is an increase of 57,7 compared with the actuals of 1885-86, due chiefly to the following railways:—

					More.	Less.
Southern Mahratta	+79,5
Mysore	+37,4
Indian Midland	+9,2
Dhond and Manmad	—67,4

152. The increased receipts realized on the Southern Mahratta Railway arise from the increased open mileage in 1886-87. The transactions of the Mysore Railway were not included in the books of the Public Works Department prior to 1886-87, and the Indian Midland Railway was opened for traffic on the 1st April 1886. The decrease on the Dhond and Manmad Railway is simply due to the *net* earnings being exhibited in the table for 1886-87, whilst gross earnings were shown in the previous year.

153. The increase of 16,0 compared with the Budget Estimate is attributed principally to the following fluctuations:—

					More.	Less.
Mysore	+37,4
Umaria Colliery	—18,1
Bellary-Kistna	—11,5
Indian Midland	+9,2

154. No provision was made in the forecasts of the Department for transactions in connection with the Mysore Railway. It was decided very recently to include these in the books of the Public Works Department. The receipts from the Umaria Colliery fell short of expectations, owing to delay in opening the railway to the coal-fields. The Bellary-Kistna Railway was not opened for traffic in 1886-87 as anticipated, whilst no provision was made in the Budget Estimate for the short length of the Indian Midland Railway opened during the year from Cawnpore to Chowra.

155. The increase in the receipts of 17,5 compared with the Revised Estimate is attributed principally to the receipts of the Mysore Railway having been included in the Public Works accounts under recent orders. This was counterbalanced to some extent by short credits on the Bengal Central Railway.

Section H.—RAILWAYS EARNINGS—continued.

Other State Railways—Provincial.

RESULTS.

		ACTUALS.	
		More.	Less.
Actuals with Actuals of previous year		138,9	...
„ Budget Estimate		65,9	...
„ Revised Estimate		21,5	...

156. The increase of 138,9 over the Actual receipts of 1885-86 is owing to improved traffic on various railways. The Burma Railway shews a considerable advance,—the result of the greater length of Railway open, and the more settled state of the country during the second half of the year under review. On the Northern Bengal Railway there was a considerable development in jute and grain traffic and an increase in the number of third class passengers. The Tirhoot line contributed a considerable increase, resulting from increased open mileage, interchange of traffic with the Bengal and North-Western Railway and enhanced rates for ferrying passengers. The Cawnpore-Achnera Railway Provincial receipts shewed a large increase, being the result chiefly of the adjustment of all outstandings in the accounts of the year on transfer of the line to the Bombay-Baroda Railway Company.

157. The increase of 65,7 over the Budget, is attributed chiefly to the following fluctuations:—

Burma	+	31,7
Northern Bengal	+	32,4
Tirhoot	+	22,4
Cawnpore-Achnera	+	26,6
Nagpur-Chhattisgarh	-	18,2
Amritsar-Pathankot	-	22,2
Dacca	-	7,0

158. The main cause of the increased traffic on the Burma, Northern Bengal, Tirhoot and Cawnpore-Achnera Railways has been explained in the preceding para. The decrease on the Nagpur-Chhattisgarh Railway is attributed to a fall in grain traffic for export, whilst that on the Dacca Railway is attributed to the goods traffic not having developed to the extent anticipated. The amount entered against the Amritsar-Pathankot Railway represents the *net receipts* of the line, which consists of a percentage on the capital cost of the line, credited by the North-Western Railway, which works the undertaking. The *gross* receipts and expenses now form a portion of the transactions of the North-Western Railway.

159. The chief cause of the increase of 21,5 over the Revised Estimate is explained as follows:—

160. On the Tirhoot Railway there was an increase in coaching traffic, owing to a rush of passengers on the occasion of a religious festival during the month of February, an extension of the open line to Nirmali, and through traffic with the adjoining Railway added to this traffic. On the Nagpur-Chhattisgarh Railway, there was an unforeseen revival of traffic in the last two months of the year, which contributed to the increased receipts. The improvement over estimate of the Burma Railway is due to movement of troops ordered to India from Upper Burma, and heavy consignments of paddy to Rangoon, not anticipated. On the Northern Bengal Railway the traffic at the close of the year was better than was expected.

WORKING EXPENSES—							
Actuals with Actuals of previous year						...	451,0
" Budget Estimate						26,9	...
" Revised Estimate						3,4	...

Gross Earnings.

161. The Sind, Punjab and Delhi Railway was purchased by Government with effect from 1st January 1886. The earnings of the line prior to that date are included under XXVI. The traffic on the other lines during 1886-87 was good, especially on the Great Indian Peninsula Railway, where an unexpected development took place under goods traffic. This explains the increased receipts compared with the Budget and Revised Estimates.

Working Expenses.

162. The decrease compared with the Actuals of the previous year is owing principally to the transfer of the Sind, Punjab and Delhi Railway to Government. Increased working expenses, due to extra traffic carried, accounts chiefly for the excess over the Budget Estimate, as also some abnormal charges incurred on the Madras Railway in connection with abandoned works on the Calicut Extension, and the value of new engines placed on the line. The excess over the Revised Estimate is small.

163. The Gross Receipts, Expenses and Net Earnings of these lines for the past six years are given in following statement :—

XXVIII.—Subsidized Companies (Repayment of Advances of Interest).

1885-86. Accounts.		Budget.	1886-87. Revised:	Accounts.
1		1,6

164. The receipts in the accounts of 1886-87 represent the difference between the net Revenue from, and the interest on the capital expended on, the Mysore Railway to be recovered from the Mysore State, and taken in reduction of advances of interest paid to the South Mahratta Railway Company, by whom the Mysore State Railway is worked. No provision was made in the estimates, as the incorporation of the transactions of this Railway in the Imperial account has only recently been ordered by the Secretary of State.

Section H.—RAILWAYS EXPENSES.

1885-86. Accounts.		Budget.	1886-87. Revised.	Accounts.
14,415,8	EXPENDITURE	15,696,7	15,700,6	15,666,4

165. These figures comprise the expenditure under the following heads:—

1885-86. Accounts.		Budget.	1886-87. Revised.	Accounts.
4,902,1	State Railways—Working Expenses	5,569,1	5,278,0	5,219,9
2,663,3	Interest on Debt	3,099,6	3,189,2	3,202,4
1,740,8	Annuities	2,301,1	2,300,8	2,308,6
257,8	Interest on Capital Deposits	412,4	471,7	473,2
476,7	Guaranteed Companies—Surplus Profit, &c.	497,5	607,0	600,8
4,231,7	Interest	3,590,9	3,709,7	3,721,9
44,1	Subsidized Companies, Land, &c.	69,5	48,0	45,2
...	Advances of Interest	36,6
99,3	Miscellaneous Railway Expenditure	120,0	96,2	94,4
14,415,8		15,696,7	15,700,6	15,666,4

166. Here there is a large excess over 1885-86, and nearly the whole of it is in *State Railways*. This is due to the purchase by Government of the Sind, Punjab and Delhi line in the last quarter of 1885-86, counterbalanced to some extent by reductions flowing out of the amalgamation of the Punjab Railways. The increase is spread over all the heads, and has been aggravated, in the case of interest and annuities, by the lower rate of exchange which prevailed in 1886-87 as compared with the previous year. The actuals of 1886-87 are less than the budget, owing to smaller renewals of permanent way on several railways, to more economical working, and to a provision of about 100,0 for Income Tax, which, under a later ruling, proved to be unnecessary. The conversion of the Sind, Punjab and Delhi line into a State undertaking has affected the expenditure on *Guaranteed Railways* as compared with 1885-86.

38.—State Railways—Working Expenses.

1885-86. Accounts.		Budget.	1886-87. Revised.	Accounts.
4,902,1	EXPENDITURE	5,569,1	5,278,0	5,219,9

167. The particulars of these charges, according to Railways, are given in page 74. The following remarks explain the discrepancies between Actuals and Estimates:—

Section H.—RAILWAYS EXPENSES—continued.

168. Compared with 1885-86, the expenditure during the year under review shows a decrease of 160,6, chiefly under the heads *Maintenance* and *Carriage and Wagon*. Under the former head the decrease is due to less renewals of permanent way, and to a special credit of 71,9 for stores issued to the Engineering Department, but not used and returned into stock. The decrease under *Carriage and Wagon* is chiefly due to less extensive renewals of Rolling Stock. The lapse of 233,3 on the Budget may be generally ascribed to the same causes, in addition to which there was no debit against a provision of 81,0 on account of Income Tax, in accordance with a late ruling. The lapse of 48,3 on the Revised Estimate is due chiefly to less renewals in the Engineering Department than anticipated and to the return to stock of a larger quantity of unused material than was anticipated.

„ Revised Estimate		9,3	...

169. The increase over the accounts of 1885-86 is owing principally to, abnormal charges during the year under review, for re-laying a portion of the line with steel rails and for the removal of the Goalundo Station. Heavy locomotive repairs were also executed during the year. The excess over the Budget of 43,3 is due chiefly to heavy renewals of *Way and Works*, to relaying a portion of the line with steel rails, and to replacement of axles. The excess of 9,3 over the Revised is attributed in a measure to the heavy outlay on the removal of the Goalundo Station buildings, and to increased cost of stationery and forms, as also to enhanced charges by the Telegraph Department, in connection with the maintenance and supervision of the Railway telegraphs.

Section H.—RAILWAYS EXPENSES—continued.

170. As regards working expenses, the decrease of 33.7 compared with the actuals of 1885-86 is owing to economical working during the year under review in the Locomotive Department. The increase against surplus profits is due to larger net receipts realized, on which surplus profits are declared.

171. The lapse of 66.0 on the Budget Estimate of working expenses is due chiefly to a provision in the Budget of 20.0 for *Income Tax*, which, under a late ruling, proved to be unnecessary to economy in the Locomotive Department, and to a decrease in renewals under *Maintenance of Way, Works and Stations*. The excess against surplus profits occurred for the reason explained in the preceding clause.

172. The lapse on the Revised Estimate is attributed to larger liabilities having remained unpaid at the close of the year than anticipated.

Actuals with Actuals of previous year	115.9
„ Budget Estimate	33.1
„ Revised Estimate	3.1

173. The actuals of 1885-86 include the working expenses, amounting to 587.1, of the Sind, Punjab and Delhi Railway for the nine months ended December 1885, for the reasons explained in connection with the earnings of the North-Western Railway for 1886-87.

174. The decrease compared with the actuals of 1885-86 is attributed to the smaller traffic worked, to decreased expenses consequent on the amalgamation of the several railways now forming the North-Western Railway, and to a special charge of 41.0 in 1885-86 on account of bonus granted to the staff of the Sind, Punjab and Delhi Railway Company.

175. The lapse of 33.1 on the Budget Estimate results from the smaller traffic worked.

176. Compared with the Revised Estimate the actuals show a lapse of 3.1, which is attributed to fluctuations in the suspense balances.

Other State Railways—Imperial.**RESULTS.**

		ACTUALS.	
		More.	Less.
Actuals with Actuals of previous year		5	...
„ Budget Estimate		1.1	...
„ Revised Estimate

177. The increase compared with the actuals of 1885-86 is 5 only, and requires no explanation, but some of the fluctuations are large, and are detailed by railways below:—

		More+	Less—
Dhond and Manmad		—	68.7
Southern Mahratta		+	43.9
Mysore		+	20.0

178. The decrease on the Dhond and Manmad Railway is due to the working expenses having been deducted from the gross receipts and the latter shown net in 1886-87. The increased expenditure on the Southern Mahratta Railway is attributed to the greater length of railway open for traffic during the year under review, whilst the Mysore Railway

Section H.—RAILWAYS EXPENSES—continued.

transactions have been brought on to the books of the Government of India for the first time in 1886-87, owing to the transfer of the line from the Mysore State to the Southern Mahratta Railway Company.

179. Compared with the Budget Estimate, there is an excess of 1,1, which is small. The principal fluctuations are as below :—

	Decrease— Increase+
Southern Mahratta	+ 5,1
Mysore	+ 20,0
Umaria Colliery	—13,3
Bellary-Kistna	—10,0

180. The increased expenses of the Southern Mahratta Railway follow generally the extra traffic hauled. The transactions of the Mysore line were brought on to the Public Works Department books for the first time in 1886-87, whilst the lapse on the Umaria Colliery is owing to the delay in opening the railway to Umaria, in consequence of which less work was done in raising coal than was expected. No portion of the Bellary-Kistna Railway was opened for traffic in 1886-87; hence the lapse of 10,0.

181. The actuals agree with the Revised Estimate.

Other State Railways—Provincial.**RESULTS.**

	ACTUALS.	
	More.	Less.
Actuals with Actuals of previous year	24,1
„ Budget Estimate	35,1
„ Revised Estimate	4,5

182. The decrease of 24,1, compared with the Actual *Working Expenses* of 1885-86, is attributed chiefly to the following fluctuations: The falling off of 14,3 on the Nagpur-Chhattisgarh Railway follows generally the decrease in receipts; but an important cause of the reduction is the transfer to Capital in 1886-87 of heavy charges for ballast, which had previously stood at the debit of *Maintenance of Way, Works and Stations*. The cause of the decrease of 26,4 on the Amritsar-Pathankot State Railway is owing to net receipts only, being now credited to the Punjab Government by the North-Western Railway, as explained in page 405, receipts. As a set-off against these reductions, there was an increase of 10,2 on the Dacca Railway owing to the extra cost of working the longer open mileage, and on the Tirhoot line there was an increase of 7,0 owing to renewals, and providing new works necessitated by the heavy floods during the year. The opening of the extension to Nirmali and the supply of stationery and forms, also entailed additional expense against Revenue.

183. The lapse of 35,1 on the Budget is explained as follows: The transfer of certain ballast charges from Revenue to Capital, and less outlay in working the smaller traffic brought to the line, accounts for a lapse of 23,6 on the Nagpur-Chhattisgarh Railway. The Amritsar-Pathankot line shows a decrease of 26,2, the reason for which has been explained above. On the Tirhoot Railway there was an increase of 8,6, due to outlay on flood works and opening of a portion of the Assam-Bihar undertaking. On the Northern Bengal Railway there was a large excess over the Budget provision for *Maintenance of Way, &c.*, which accounts for the increased outlay against this line.

184. The lapse on the Revised Estimate was 4,5 only.

Half interest on Capital spent during the year	3,6	3,5	103,5	110,6
TOTAL	223,5	84,5	2,110,0	2,418,0
Add—½ per cent. on the Holkar Loan of a crore, which bears 4½ per cent. interest	5,0	5,0
TOTAL INTEREST CHARGED	223,5	84,5	2,115,0	2,423,0

Exchange.

187. The increase compared with the actuals of the previous year and the budget estimate is owing principally to increased payments in England on account of interest on debt created in redemption of a portion of the Sind, Punjab and Delhi Railway stock, and to a further fall in Exchange. The excess over the revised estimate is 2,7 only.

Annuities and Sinking Fund.

188. The increase over the Actuals of 1885-86 is owing mainly to the payments now rendered necessary on account of the Sind, Punjab and Delhi Railway having been purchased by the State. The accounts of 1886-87 show a decrease 48,1 compared with the Budget Estimate, but when the Budget was framed, the arrangements for the exchange of portions of the Sind, Punjab and Delhi Railway annuity for India 3½ per cent. stock were not completed. The actuals are in exact accord with the Revised Estimate.

Exchange.

189. The increased charges for exchange are owing principally to annuity payments in connection with the purchase of the Sind, Punjab and Delhi Railway, and to a further fall in exchange.

Interest.

190. The increase over the actuals of the previous year is owing principally to more capital deposited with the Secretary of State, on which interest has accrued to the Companies concerned. The excess over the Budget Estimate is due chiefly to the payment to the Bengal Central Railway having been provided for under the head 40.—*Subsidised Companies*.

Exchange.

191. The increased charges for Exchange, compared with the actuals of the previous year and with the Budget Estimate, are due principally to the larger payments of interest on increased deposits of Capital, as well as to a further fall in the rate of Exchange.

The excess over the Revised Estimate is small.

Section H.—RAILWAYS EXPENSES—continued.**Surplus Profits.**

192. As regards the difference between the accounts of 1885-86 and 1866-87 it may be mentioned that in the former year no payment was made to the Sind, Punjab and Delhi Railway. The increase over the Budget Estimate of the year occurs under the Bombay, Baroda and Central India, and Great Indian Peninsula Railways, and is due to increased earnings during the second-half of 1885 and the first-half of 1886. The decrease of 5, as compared with the Revised Estimate, is small and calls for no remark.

Land and Supervision.

193. In the accounts of 1885-86, the amount recovered from companies on account of Government supervision was deducted from the charges of each administration concerned, but in 1886-87, the charges are entered gross and the recoveries deducted as a distinct item. This change in procedure explains the differences in the details of actuals during the two years. The recoveries from Companies were larger in 1886-87 than in the previous year, which chiefly accounts for the decrease in the total expenditure. There have been small savings on the Budget provision in all provinces except Madras. The only saving of any importance appears in Bombay, which is due to delay in settling claims for compensation for land. In Madras there was an excess over Budget as it was found necessary to acquire additional land during the year.

194. The differences between actuals and the Revised estimate scarcely call for notice.

195. The large decrease in 1886-87, as compared with 1885-86, is due to the cessation of payments to the Sind, Punjab and Delhi Railway Company.

196. The excess of 13,7 over the Budget Estimate is due to no provision having been made for the interest on overdrawn capital in India, although the *per contra* credit was taken under interest.

197. The small decrease on the Revised Estimate needs no explanation.

Exchange.

198. The provision for Exchange has been largely exceeded in all these cases in consequence of a fall in the rate.

199. The only difference calling for special notice is the lapse on the Budget Estimate of 24,3. This is owing chiefly to the estimated payments for land on the Bengal and North-Western Railway having been cast too high, and to a provision for land in connection with the proposed Nilgiri Railway not having been utilised.

201. The details given in the table above show the variations leading up to these net differences both under *Imperial* and *Provincial*. The only difference that appears to call for special notice is the lapse of 23,7 on the Budget Estimate under *Imperial*. This occurred chiefly because a reserve of 20,6 provided to meet unforeseen requirements was found to be in excess of the demands arising during the year, and the expenditure on the Benares-Puri Survey was over-estimated by 4,0.

J.—IRRIGATION.

Accounts.

1,588,3

REVENUE

1886-87.
Budget. Revised. Accounts.

1,621,6 1,594,8 1,656,7

202. These collections exceeded those of 1885-86 by 68,4 and the budget by 35,1. The increase of 68,4 is chiefly in the Punjab and arises from the opening of the Sirhind Canal and development of irrigation from the Bari Doab Canal, as well as to the collections of arrears of revenue in the Punjab. The improvement of 35,1 is due to the ordinary fluctuations which are inseparable from this revenue.

„ Revised Estimate	.	19,0	8,3	27,3	...

Imperial Works.

203. Except in the Punjab, the direct receipts from the irrigation works which still remain Imperial are inconsiderable. The net revenue in 1886-87 was larger than that of 1885-86 by 31,7, the increase being chiefly in the Punjab, and attributed to the opening of the Sirhind Canal and development of irrigation from the Bari Doab Canal. Madras and Bombay also show an improvement; but there has been a slight falling off in the North-Western Provinces owing to increased expenditure on maintenance and repairs of the newly opened Betwa Canal. In Bombay, the improvement was due to the recovery of balances outstanding at the end of the previous year, and in Madras, to reduction in the working expenses.

204. The Budget for 1886-87 was framed for a considerable increase in the amount of net revenue, as the Sirhind Canal had been opened, and it was expected that the Western Jumna Canal would earn the average revenue of earlier years. But heavy and timely rainfall reduced to some extent the necessity for extensive Irrigation, and the actuals fell short of the Estimate by 34,0.

205. The Revised Estimate of revenue proved an accurate forecast of the actual realizations, but the working expenses were over-estimated and the result was an increase upon the Estimate of 7,2 in the net revenue.

Provincial Works.

206. The net revenue in 1886-87 was 20,3 less than that of 1885-86, owing, not to a diminution in the total amount of gross revenue, but to an increase in the working expenses, caused by urgent repairs to the Mahanuddy weir of the Orissa canals which was damaged by a cyclone in 1886.

207. As explained in the Appropriation Report for 1885-86, the revenue of the Bengal works in that year was abnormally swelled by recovery of arrears of previous years, and the Budget Estimate for 1886-87 was therefore prepared for the normal amount of earnings. But abundant rainfall rendered canal irrigation to a great extent unnecessary, and continued repairs to the Mahanuddy weir raised the working expenses, so that the Revised Estimate of net revenue for Provincial Works was framed for a decrease of 19,9 below the Budget.

208. The actuals were, however, 27,3 better than the Revised Estimate, owing to recovery of arrears from the Sone Canals and to the Revised Estimate of the North-Western Provinces having been based on assessments which took into account possible, but as events proved, unnecessary remissions of some magnitude.

XXIX.—Major Works—Indirect Receipts.

Portion of Land Revenue due to Irrigation.

1885-86. Accounts.		Budget.	1886-87. Revised.	Accounts.
87,2	N.-W. Provinces and Oudh	87,2	87,2	87,2
41,1	Punjab	44,0	46,0	68,2
380,5	Madras	356,6	356,7	390,2
53,8	Bombay	67,9	68,4	51,9
562,6	TOTAL	555,7	558,3	597,5

Section J.—IRRIGATION—RECEIPTS—continued.

209. The Actuals of 1886-87 exceeded those of the previous year by 34,9, owing to adjustment of arrears of land revenue in the Punjab, to more lands having been brought under irrigation in Madras, and to improvement under the Sangam Anicut works.

210. As the excessive rainfall in 1886 had damaged the crops and caused extensive breaches in the irrigation canals in Madras, the Budget was prepared for a diminished revenue, the reduction in some canals being fixed at about a lakh of rupees from the actuals of 1885-86. But the floods having subsided early, a large area was brought under irrigation and the revenue exceeded the Budget Estimate by 41,8.

211. The Revised Estimate made some slight provision for the increase referred to in the preceding para., but not sufficient to lead to an expectation of an excess of 39,2 over the Estimate.

„ Revised Estimate	2,7	...

212. The Actuals of 1886-87 were 11,5 below those of 1885-86, the decrease being due to the credit in the accounts of 1885-86 of recoveries in the Midnapore district on account of zemindari embankments under the contract system. The Budget and Revised Estimates were framed for normal earnings, and the Actuals were only slightly in excess of the Estimates, the increase being derived from various unimportant sources.

„ Budget Estimate	42,9
„ Revised Estimate	37,4

Imperial Works.

216. The outlay in 1886-87 exceeded that in 1885-86 by 20,1, owing to the commencement of works in two new Provinces—Beluchistan and Upper Burma—and to a special grant being necessary for a loop to the Kashmor *bund* in Sind.

217. The Budget for 1886-87 was prepared for the normal grant for ordinary works under this head, *plus* the extra addition for tank maintenance in Madras; but for reasons given in the following para. the actual outlay fell short of the estimate by 9,2.

218. During the year grants were assigned for expenditure in Beluchistan, Upper Burma, Punjab and Sind, which raised the Revised Estimate to 21,6 more than the Budget. The Actuals, however, fell short of the Estimate by 30,8, owing to the expenditure in Bengal having been overestimated, to engineering difficulties in Beluchistan and Rajputana, and to recoveries, which were treated as reductions of expenditure, having been made from cultivators on the Sidhnai Canal earlier than was expected.

Provincial and Local Works.

219. The expenditure indicates a considerable diminution, the outlay in 1886-87 being 74,5 less than that in 1885-86. In Bengal, the transfer of irrecoverable expenditure on the Midnapore takkavi embankments from the Civil to the Public Works Department in 1885-86, increased the expenditure in that year abnormally. The more pressing requirements of Civil Works in Lower Burma, led to the decrease in the irrigation outlay under that Administration, and the reduction in Madras is due to the completion of the Red Hills Tank Restoration Works.

220. The Budget of 1886-87 was based on the outlay of the previous year, less the expenditure on the Red Hills Tank Restoration and the adjustment in Bengal mentioned above; but owing to the pressing demands for jails and other Civil works in Burma, the irrigation grant for that Administration was drawn upon, for the necessary funds, and the outlay was consequently smaller.

221. The outlay fell short of the Revised Estimate by 37,4, the lapse occurring chiefly on the Calcutta and Eastern and the Orissa Coast Canals, and being caused by dredging operations not progressing rapidly, and by an additional grant to the latter canal included in the Revised Estimate having been assigned too late in the year to be utilised.

222. The difference between 1885-86 and 1886-87 is due to the receipt in the last named year of 150,0 in connection with the restoration of the Gwalior Fort and the Morar Cantonment to His Highness the Maharajah Sindia. The excess of actuals over estimate is spread through various accounts as set forth in the following paragraphs:—

223. The Receipts under this head exceed those of 1885-86 by 147,2 which is due to the exceptional recovery in 1886-87, of 150,0 on account of the rendition of the Gwalior Fort and the Morar Cantonment to His Highness the Maharaja Sindia.

224. The Estimates have been borne out by the Actuals. The decrease under India is due to the recoveries from Military Officers on account of rents of quarters having been over-estimated in the Military Works Department.

Section K.—BUILDINGS AND ROADS—RECEIPTS—continued.

225. *Imperial.*—The small increase, in comparison with accounts of previous year, in the Imperial receipts, is mainly due to receipts under the head "Tolls and Ferries" in Upper Burma.

226. The actuals have exceeded the Budget by 1,7 owing to receipts from Public Works in charge of Civil Officers in Upper Burma.

227. The Revised Estimate has been closely approximated.

228. *Provincial.*—Important variations between the actuals of the year under review and the previous year have occurred in Bengal, North-Western Provinces and Oudh, Punjab and Bombay. In Bengal, the revenue realized by departmental officers exceeds that of 1885-86 by 15,7, owing principally to the adjustment in 1886-87 of the gross receipts derived from the Burrakur Iron Works during the years 1882-83 to 1886-87. The transactions of these works had previously been held in the deposit account. The falling off in the receipts by Civil Officers in Bengal, is due to the transfer of the management of ferries to District Boards. In the North-Western Provinces, the short receipts by departmental officers, is chiefly due to an exceptional adjustment in the accounts of 1885-86 of the value of the stock of Thomason College Press and Book Depôt and of the value of stores taken over from the Kumaon Iron Works by the Roorkee Workshops.

229. The falling off in the realizations by Civil Officers in the Punjab, is due to the transfer of ferries to Local Boards. In Bombay, the short realization by departmental officers is due to an exceptional recovery in the accounts of 1885-86, of the sale proceeds of the old Secretariat Buildings at Bombay. The short receipts in the accounts of Civil Officers is attributed to the realizations from ferry tolls having been exceptionally large in the previous year.

230. The original Estimate was reduced in preparing the Revised Estimate by 10,0, owing principally to the transfer of ferries to local management and to the unexpected recovery in 1885-86, of certain receipts which were provided for in the original estimate for 1886-87. Compared with the Revised Estimate, the actuals show an improvement of 17,6. In Bengal, the accounts exceed the Revised Estimate by 23,2, owing to the adjustment previously referred to, of the gross receipts of the Burrakur Iron Works, from 1882-83 to 1886-87. The decrease in the North-Western Provinces and Oudh, is due to the receipts from tolls and ferries under departmental officers having fallen short of expectation. In Madras, the decrease is due chiefly to a write-back to credit of Tools and Plant of an item of 4,9, representing workshop balances.

231. *Local.*—The increase of 27,5 in the actuals of 1886-87 over those of 1885-86, is due chiefly to the transfer of ferries to Local Boards in Bengal, Punjab and Bombay.

232. The Revised Estimate was placed at a higher figure than the Budget Estimate, owing to the transfer of the management of certain ferries to Local Boards. The accounts show an improvement of 19,0 over the Revised Estimate, which is mainly due to adjustments made by the Accountant General, Punjab, in consequence of Local Boards having made erroneous credits of tolls from ferries, to other heads. The increase in Madras is due to enhanced receipts from tolls and ferries.

233. *England.*—The improvement is due to an increase in the number of students of the Royal Indian Engineering College.

		Budget.	Revised.	Accounts.
4,485,3	EXPENDITURE:	5,449,3	5,342,5	5,201,7

234 The expenditure in 1885-86 was very low owing to the general curtailment of Public Works Expenditure on account of the Financial pressure. The Budget was placed too high [especially in the local portion of the expenditure under *Civil Works*.

„ Revised Estimate	1

235. The expenditure of 1885-86 was less than the average of previous years, owing to the general restriction of expenditure on Public Works in that year, hence the excess during the year under review.

236. The original Estimate of 1,155,4 was reduced to 1,130,7 owing to the following modifications :—

Re-allotment of lapse from Grant for 1885-86	+24,8
Deduct—Lapse from Grant for 1886-87	—49,5
NET	—24,7

237. Compared with the Revised Estimate the accounts show a decrease of 69,1. Under India the lapse of 26,0 is attributed to the postponement of works in Hyderabad, and to unavoidable delay in preparation of detailed estimates for works under the control of the Inspector General of Military Works. The short outlay in Upper Burma of 18,0 is due to the re-adjustment of charges by debit to other Major heads which were not foreseen when the Estimate was prepared. In Madras and Bombay, the lapses of 5,6 and 11,3, respectively, are attributed to late sanction of estimates and failure of contractors to execute work.

„	Revised Estimate

238. *Imperial.*—The accounts show an increase of 264,2 over those of 1885-86, which is due to the general restriction of expenditure on Public Works in the previous year, as well as to heavy expenditure on Frontier Roads in Biluchistan, and on roads and buildings in the newly annexed province of Upper Burma. In Bengal, the accounts of 1885-86 include an exceptional charge of 46,6 on account of the purchase of the Barakur Iron Works, and certain initial outlay in connection therewith, these sums being provided from Imperial Funds. The increase in the Punjab accounts for 1886-87 is due to larger progress on the Derajat and Dera-Ghazi-Khan-Peshin Frontier Roads. In Bombay, the increase is due to larger expenditure on Telegraph, Postal and Salt Buildings.

239. The Revised Estimate was less than the Budget Estimate by 21,4, owing principally to grants having been surrendered at the close of the year. On the Revised Estimate of 599,6 there has been an excess of 15,1, which is the result of the Upper Burma grant having been exceeded by 39,1, owing to the expenditure incurred by Civil Officers in Upper Burma having been transferred to the Public Works Department for adjustment, at the close of the year. The lapse of 15,0 on the Revised Estimate under India, is due chiefly to inability to utilize grants, owing to scarcity of labour, unexpected reduction in suspense balances, and to the grants for repairs in Biluchistan not having been fully utilized, owing to the year having been a dry one and little repair to the mud walls and roofs being required. In Bombay the lapse is due to the grant for the extension of the new Telegraph Office at the presidency not having been utilized, and to short outlay on maintenance of salt sidings at Gujarat.

240. *Provincial.*—Here again the expenditure exceeds that recorded in the accounts of 1885-86, owing to operations having been resumed on works postponed in the previous year for want of funds. In the Central Provinces, the increase is mainly due to larger outlay on the maintenance of roads. The increase in Bengal is partly due to restriction of expenditure in the previous year, and partly to the adjustment of the working expenses of the Barakur Iron Works from 1882-83 to 1886-87, which are provincial. In Madras, the increase is principally due to larger grants for expenditure on metalled and bridged roads.

Section K.—BUILDINGS AND ROADS—EXPENDITURE—continued.

241. The original estimate of 1,952,8 was increased in the Revised Estimate by 11,1, owing to additional grants having been made available during the course of the year, for expenditure on emergent works. The Revised Estimate has been exceeded by 18,6, owing principally to the final adjustment in the accounts of 1886-87, of the expenditure on the Barakur Iron Works from 1882-83 to 1886-87. The lapse of 5,5 in the Central Provinces, is due to the expenditure at the close of the year having been over-estimated. The excess of 1,3 over the grant for Lower Burma, is due to the allotment for the iron bridge over the Pegu River having been exceeded by 2,7. In Assam, the short outlay of 3,1 is due to the provision for establishment having been over-estimated. The lapses on the Revised Estimates of the North-Western Provinces and Oudh and Punjab, are attributed to inability to utilize grants, and to small savings on a number of completed works. In Bombay, the lapse on the departmental estimate, is due to difficulty in procuring labour and materials, and failure on the part of contractors to execute work. The lapse in Madras under Civil Officers, is due to the non-payment of an item of 3,5 provided for the Ootacamund Water supply project.

242. *Local.*—The restriction of expenditure in 1885-86, accounts for the increase in the accounts of 1886-87.

243. In preparing the Revised Estimate the original estimate was reduced by 88,4, principally under Civil Officers, owing to transfer of grants to other heads, and to the estimates having been generally reduced on a re-consideration of the progress of expenditure. The expenditure has fallen short of the Revised Estimate by 104,2, of which 69,1 is under Civil Officers and 35,1 under Public Works Officers.

244. The following are the principal differences:—

	Less than Revised.
Bengal (Civil Officers)	37,1
Madras (ditto)	17,2
Bombay (Departmental Officers)	13,2
Central Provinces (Civil Officers)	8,6
Punjab (Departmental Officers)	7,5
Lower Burma (ditto)	6,7
N.-W. P. and Oudh (ditto)	5,9

245. In Bengal, the short outlay is attributed to the expenditure having been over-estimated by the newly constituted District Boards. The expenditure was also over-estimated in Madras. The lapse in Bombay, is attributed to failure on the part of contractors to carry out work, want of plans and estimates, and non-payment of compensation for land. In the Central Provinces, it is due to the postponement of works by District Councils and Local Boards. The short outlay in the Punjab, is due to the abandonment of the Umballa-Pihewa Road on account of heavy charges for its maintenance, and delay in obtaining English Stores for other works. In Burma, it is chiefly due to the write-back to debit of Provincial, of expenditure on the Sattyogya Bridge. In the North-Western Provinces and Oudh, the short outlay represents unappropriated allotments by District Boards.

246. The increase of 14,2 in the English expenditure over that of the previous year is principally due to larger payments on account of furlough pay and allowances of officers of the Public Works Department. The difference of 9,9 between the Budget and Revised Estimates is attributed to increases in the payments to Military Officers on leave and in the payments on account of Assistant Engineers under training in England.

247. The actuals have closely approximated to the Revised Estimate.

L.—ARMY SERVICES.

1885-86. Accounts.		1886-87.		
		Budget.	Revised.	Accounts.
963,9	RECEIPTS . . .	841,7	910,3	985,0
20,097,8	EXPENDITURE . . .	18,266,0	19,070,6	19,525,0
19,133,9	NET . . .	17,424,3	18,160,3	18,540,0

248. In comparing the figures of the two years, 1885-86 and 1886-87, it should be remembered that there were special circumstances in both periods which affected the receipts as well as the expenditure. In 1885-86 we had the military preparations on the North-West Frontier, the Expedition to Burma, the Camp of Exercise at Delhi, the concentration of troops and camp at Rawulpindi, and the augmentation of the strength of the British and Native Armies. In 1886-87, the operations in Burma continued longer and proved more costly than was anticipated, a sum of 300,0 only having been entered on this account in the Budget, whereas the actual expenditure amounted to 1,517,8. In the revised estimate 1,160,0 were entered for Burma, and it has been exceeded to the extent of 357,8.

249. Irrespective of the extra expenditure on account of Burma, the actuals exhibit a small increase in the ordinary expenditure of 114,3 and 194,0 over the Indian portion of the budget and revised estimates respectively, *viz.* :—

	1886-87.		
	Budget Estimate.	Revised Estimate.	Accounts.
	<i>R</i>	<i>R</i>	<i>R</i>
Including Burma . . .	13,288,4	14,068,7	14,620,5
Deduct Burma . . .	300,0	1,160,0	1,517,8
Excluding Burma . . .	12,988,4	12,908,7	13,102,7
Excess actuals over budget and revised estimates excluding Burma . . .	114,3	194,0

250. The revised estimate made increased provision for two additional Goorkha battalions, for purchase of mules, for an augmented establishment of medical officers, British service, and for purchase of land. The excess expenditure over the revised estimate, apart from the Burma charges, is due to the adjustment of arrear expenditure connected with the late Camp of Exercise at Delhi and the Quetta Field Force, to increased good-conduct pay to the Native Army under more favourable rules, to higher rates for provisions for troops, especially in the Quetta district, and increased charges for barrack bedding in the Bengal Presidency.

251. The following paragraphs afford the detailed information which is usually given in these Appropriation Reports :—

18,7	Exchange	12,2	19,4	19,3
963,9	GRAND TOTAL .	841,7	910,3	985,0

252. The excess over estimate under III is due to large recoveries of hutting money advanced in Madras, to miscellaneous recoveries in Bengal and Madras, and to increased receipts from the purchase of discharge and refund of bounty money by British soldiers in the three presidencies. Under IV it is caused by larger sales than were anticipated of commissariat stores, malt liquor and rum, owing to the increased strength of troops in Burma, and by the sale of surplus cattle and gear originally purchased for the Quetta Field Force. The increases in VIII, IX, X, XIII, XIV, and XIX occur, respectively, in prison funds, medical stores for Burma, ordnance stores issued to non-military departments in Upper Burma, recoveries of table-money for messing, officers, &c., conveyed to Burma, sale-proceeds of captured property in that country, and in the receipts on account of the Indian service family pensions. The decline under V is due to small sales of cast horses and to the value of hay supplied to remount horses at the Hosar Depôt in Madras not having been credited to military receipts as before, owing to the amalgamation of the farm and the depôt accounts. The receipts under XVII, retired officers, were less than the Budget, as the full sum due from Berar for officers lent to that Province was not realized within the year.

253. As regards the English receipts, the increase occurs under the head of Indian Troop Service, and is mainly due to receipts from the Admiralty for the employment of the troop-ships on Imperial service.

17. Military Pensions, Europeans	9	...	9
TOTAL	156,5	1,323,3	38,0	1,517,8

255. It has been stated in paragraph 249 that, apart from the extra expenditure connected with Burma, there are various fluctuations in the Indian accounts of 1886-87 making a total of 194,0. The following is a summary of these fluctuations :—

256. The *Grant for Army and Garrison Staff* was partially saved on account of vacancies in certain appointments, including the Madras and Bombay Commands. Similar savings occurred in *Regimental Pay, &c.*, from the European and Native Army being short of the established strength. The *Commissariat* expenditure includes certain arrear charges connected with the late camp of exercise at Delhi and the Quetta Field Force, and some additional outlay on account of dearness of provisions. The cost of *Barrack Establishments and Supplies* was enhanced by the substitution of coir in place of straw for stuffing mattresses, and by the purchase of local supplies to a larger extent than was anticipated. The diminished charge for *Ordnance* is due to large supplies having been made to the Burma Police, credit for which has been taken by deduction from this head. The grant for *Education* was not all required owing to the abolition of the appointment of Superintendent, British Army Schools, and of the Normal School at Umballa. The head *Miscellaneous Services* includes the cost of land purchased in Bengal. The excess over estimate under *Military Pensions* to Europeans is due to larger payments than were expected to officers in India on account of the capitalised portions of their pensions.

257. As regards the expenditure in England, the budget for *Home Charges* and *Retired Pay* was too high, and for *Pay and Pension of non-effectives* too low. The decline under *Indian troop service* is mainly due to savings on the contract for new machinery for the *Malabar*, and to the postponement of some payments on that account to the year 1887-88. The head *Miscellaneous* includes a payment of 3,9 for gratuities on account of service in the expedition to Egypt in 1882, and 16,1 for the purchase of horses, the remainder of the increase having reference to allowances paid to officers studying the Russian language. The large saving of 101,8 under *Stores for India* is chiefly owing to the postponement of the purchase of new rifles provided for in the Budget under Ordnance Stores. A decrease of 12,2 for malt liquor and an increase of 60,2 for clothing form the minor variations.

SECTION LL.—SPECIAL DEFENCE WORKS.

47.—Special Defence Works.

1885-86. Accounts.		Budget.	1886-87. Revised.	Accounts.
...	EXPENDITURE	325,6

258. These charges appear under a separate group for the first time in the accounts of 1886-87. In the Budget and Revised and in the Accounts of previous years, they were shown under *Expenditure not charged to Revenue*. For the sake of comparison the estimates are placed below in juxtaposition with the actuals of 1886-87.

	Budget.	1886-87. Revised.	Accounts.
India (Inspector General, Military Works)	132,5	41,4	34,9

„ „ Revised Estimate	7,9	

259. The original allotment was reduced in the Revised Estimate by 136,5 owing to surrender of grants at the close of the year in consequence of several large projects not having been sufficiently matured.

260. The accounts of Indian expenditure have fallen short of the Revised Estimate by 7,2 which is principally due to the non-receipt of English Stores for the Karachi Harbour Defence Works, and to the inability of the Military Works Department to utilize the full amount of the grants allotted.

Section M.—PROVINCIAL ADJUSTMENT.

PROVINCIAL AND LOCAL REVENUE AS BY BUDGET	PROVINCIAL BALANCES.						
	April 1st, 1886.	March 31st, 1887.		Budget.	1886-87. Revised.	Accounts.	
15,9	11,4	11,9	India	—1,7	—9	+5	
771,2	381,2	261,7	Central Provinces	—185,3	—159,5	—119,5	
1,296,5	18,9	114,6	Burma	—20,6	+2,1	+95,7	
520,6	101,9	72,1	Assam	—50,0	—36,7	—29,8	
4,699,0	365,0	417,5	Bengal	—73,7	—82,2	+52,5	
3,790,3	460,2	450,0	North-Western Provinces	—200,3	—139,9	—10,2	
1,892,4	332,7	356,5	Punjab	—70,0	—22,4	+23,8	
3,263,1	824,9	969,0	Madras	—70,4	+52,7	+144,1	
4,038,2	886,9	765,5	Bombay	—303,4	—190,5	—121,4	
<u>20,287,2</u>	<u>3,383,1</u>	<u>3,418,8</u>	TOTAL	<u>—975,4</u>	<u>—577,3</u>	<u>+35,7</u>	

261. There is little to say regarding these figures, because full explanations have already been given in the earlier part of this report of the fluctuations of the various kinds of revenue and expenditure. These figures represent the surplus or deficit of each provincial Government in respect of the revenues and charges assigned to it, including Incorporated Local Funds. The net result to be gathered from them is, that while in the budget it was expected that this class of expenditure would exceed the revenue by 975,4, the accounts show that the revenue exceeded the expenditure by 35,7. Details explaining how these results have been produced are given below, and they show that in the Central Provinces, Assam, Punjab, and Madras, the improvement is due mainly to economy in expenditure, while in Burma, Bengal, the North-Western Provinces and Oudh, and Bombay, it has arisen from increased revenue. The provincial balance in the Central Provinces, Madras, and Bombay, is in excess of the minimum by 116,1, 233,7, and 349,0, respectively, while in Bengal, where it has been low, the amount has risen and is near the prescribed limit. In 1884-85 and 1885-86 the provincial expenditure in Burma largely exceeded the revenue, and special grants amounting to 66,6 and 77,1 were made from Imperial funds to cover the deficits. In 1886-87, however, a surplus of 71,8 has been obtained.

Section N.—EXPENDITURE NOT CHARGED TO REVENUE.

1885-86. Accounts.		Budget.	1886-87. Revised.	Accounts.
6,361,3	EXPENDITURE	10,713,0	11,022,2	10,585,0
262. The expenditure has exceeded the actuals of the previous year by 4,223,7 and has fallen short of the Budget by 128,0, the deviations under the several heads comprised in this group being as follows :—				

	Better + worse — than Accounts, 1885-86.	Better + worse — than Budget, 1886-87.
CAPITAL OUTLAY ON RAILWAYS AND IRRIGATION WORKS—		
48. State Railways	—410,3	—396,0
49 Irrigation Works	+15,1	+152,6
50 CAPITAL CHARGES INVOLVED IN REDEMPTION OF LIABILITIES	—3,828,5	—70,3

263. This group originally embraced the grant for Special Defence Works, which has now been transferred to a distinct group after L, Army Services. Another important change has been made by omitting exchange from the capital charge involved in the redemption of liabilities, as both receipts and payments occur in England, and this explains the discrepancy between the amount entered above as Budget and the corresponding figure in the Statements attached to the Financial Statement. The total outlay on State Railways in 1886-87 is actually 478,7 less than the previous year, but the actuals *under this head* show an increase of 410,3, as out of the total outlay incurred in 1885-86, 500,0 for Frontier Railways, 589,0 for Protective Railways, was provided from Revenue, whereas in 1886-87 only 200,0 have been so taken from the Protective Railway grant. In 1885-86 the expenditure was also reduced by a special refund of about 470,0 from the Indian Midland Company for outlay incurred by Government on certain lines taken over by them, but this may be set off against an increased expenditure in that year on stores which have been used only in 1886-87. The excess over the Budget under State Railways is due to outlay on the Burma and North-West Frontier Railways, including the Sutlej bridge. The saving in irrigation works has accrued from inability to spend the sanctioned grants. The large expenditure on capital charge in redemption of liabilities has reference to the Sind, Punjab and Delhi Railway annuity.

OUTLAY IN ENGLAND—		
Actuals with Actuals of previous year	466,1
„ Budget Estimate	478,9
„ Revised Estimate	22,9

Section N.—EXPENDITURE NOT CHARGED TO REVENUE—continued.

264. For the first time this year the outlay on each line includes the exchange chargeable to it, and the total addition on this account in the actuals is 496,8. For the purposes of this report it will be convenient to divide the outlay into two parts comprising respectively the expenditure in India and in England. As regards the expenditure in India the increase over the actuals of 1885-86 is owing chiefly to the vigorous prosecution of works on the Frontier Railways, including the Sutlej Bridge at Ferozepore and the Sind-Sagar Railway in view to the early completion of the several projects. It should also be noted that in 1885-86, a sum of fifty lakhs was deducted from this head and charged off to Frontier Railways under 37.—*Construction of Railways (charged against Revenue in addition to that under Famine Insurance)*. During the year under review no such allowance was provided for. Again, the charge in the previous year to 34.—*Construction of Protective Railways* by reduction from this head, was nearly thirty-nine lakhs in excess of the similar transfer in 1886-87. Against these additions may be set off a refund of about forty-seven lakhs by the Indian Midland Railway Company, credited to this head in 1885-86 on account of the Cawnpore-Kalpi and Jhansi-Manikpur Railways transferred to that undertaking.

265. The whole of the grants and outlay under Protective Railways, Frontier Railways and State Railways Capital are, as explained in last year's report, dealt with together in the above statement in the first instance. During the year under review, the total cost of Frontier lines was finally borne by this head, but 200,0 on account of Protective Railways was deducted from the total expenditure of the year and transferred to the head 34.—*Construction of Protective Railways*.

266. The Budget Estimate of 1886-87 was prepared for a total outlay of 5,227,1, made up as follows:—

Amount approved by the Secretary of State, in Finance Despatch No. 367 of the 10th December 1885	...	4,467,5
Addition approved by Finance Department on account of proposed short outlay on Special Defence Works	...	150,0
Contribution by the Government of the N.-W. P. and Oudh from surplus provincial balances, towards outlay on Railways in those Provinces, classed as <i>Productive Public Works</i>	...	16,6
Exchange on English Stores	645,0	
Deduct—Estimated Exchange on English Stores paid for in previous years, likely to be issued to Revenue in 1886-87	52,0	593,0
Total	...	5,227,1

267. This included 500,0 shewn under *Construction of Protective Railways*, originally provided from ordinary revenues.

268. The detailed distribution of the sum of 5,227,1 is given in the last page, but these arrangements were modified during the year according to the exigencies of the various undertakings. At the time the Revised Estimate was prepared, the grant for outlay stood at 5,470,4, as under—

Amount approved by the Secretary of State, in Finance Despatch No. 367, dated 10th December 1885, as above	4,467,5
Addition approved by the Finance Department on account of Estimated short outlay on Defence Works, as above	150,0
Additional grant sanctioned by Finance Department in letter No. 2469 dated 10th August 1886 (less 30,0 subsequently surrendered by the Public Works Department) for capital outlay on the Sind-Pishin State Railway, Sibi-Quetta Section	142,5
Additional grant sanctioned by the Finance Department, in letter No. 3834 of 22nd October 1886, for outlay on the Sind-Sagar State Railway, Western Section	100,0
Additional grant sanctioned by the Finance Department for outlay on the Tounghoo-Mandalay Extension	200,0
	5,060,0
Less—Outlay likely to be incurred on the railway from Bezvada to the Hyderabad Frontier during 1886-87, from funds advanced by His Highness the Nizam's Guaranteed Railway, to be refunded to that Company in 1887-88. This amount was surrendered, as it was available for other purposes	27,5
Total grant from Imperial Funds excluding Exchange	5,032,5
Add—Estimated Exchange on English outlay during 1886-87	490,0
Carried over	5,522,5

Section N.—EXPENDITURE NOT CHARGED TO REVENUE—continued.

	Brought forward	5,522,5
<i>Deduct</i> —Estimated Exchange on English stores paid for in previous years, likely to be issued to Revenue in 1886-87		34,3
Total grant from Imperial Funds (including Exchange)		5,488,2
Owing to transfer of Rolling stock and plant from the Cawnpore-Achnera Railway, the transactions of the State Railways, in the N.-W. P. and Oudh, it was estimated would result in a <i>net credit which would revert to Provincial Funds of</i>		—17,8
Leaving the balance of the Grant under this head at		5,470,4

269. The Revised Estimate was cast at 5,371,5 or 98,9 less than the grant available, as it was considered that the full amount could not be expended during the year. Of this amount, 200,0 was shewn under 34—*Construction of Protective Railways*, and the balance, 5,171,5, under the head 47—*State Railways, Construction*. The grant of 5,171,5 was distributed afresh in the Revised Estimate as will be seen from the figures in page 114, and it is necessary now to explain the difference between the Actuals and the Revised. This difference is a net saving of 25,5 in the Indian outlay is not large including exchange, and the following are more important variations comprised in it.

	ACCOUNTS, LESS THAN REVISED ESTIMATE.			ACCOUNTS, MORE THAN REVISED ESTIMATE.		
	India.	England.	Total.	India.	England.	Total.
Rajputana-Malwa	22,3	...	22,3
North-Western	32,9	—32,8	1
Sind-Pishin, Darwaza-Quetta	14,2	7	14,9
Sind-Sagar, Eastern Section	12,5	19,9	32,4
Bolan	28,2	...	28,2
Sind-Pishin, Bostan-Gulistan	20,7	—5,6	15,1

270. The lapse on the Rajputana-Malwa Railway is owing chiefly to short expenditure on various sub-heads and works, owing to the progress of outlay having been overestimated. Under Rolling Stock there was a large lapse, due to the non-receipt from England of iron-work for Carriage and Wagon Stock, and to credits realized for transfer of stock to the Bolan and Tirhoot Railways, after the Revised Estimate had been passed. The excess on the North-Western Railway represents the value of Plant and Stores taken over from the Bolan Railway under orders of Government issued after the Revised Estimate had been disposed of, and larger payments for firewood than anticipated. The credits from Revenue for stores issued for renewals also fell short of expectations. The excess on the Darwaza-Quetta Section of the Sind-Pishin State Railway is owing to store charges brought to account, which were not foreseen when the Revised Estimate was framed, and to the rates for the carriage of permanent-way over the Bolan Railway having proved higher than anticipated. The lapse on the Sind-Sagar Railway, Eastern Section, is attributed to the charge for Exchange having fallen short of expectations, and to the provision for Land and Indian outlay on Rolling Stock not having been worked up. The lapse on the Bolan Railway is the result of a revision of allocation of expenditure between the Public Works and Military Departments, under which a considerable sum was credited to the former, and the transfer to the North-Western Railway of the stores and suspense balance under orders issued by Government after the Revised Estimate had been dealt with. The excess on the Bostan-Gulistan Section of the Sind-Pishin State Railway, is attributed chiefly to the higher rates charged for carriage of permanent-way over the Bolan Railway, and to a debit made against the grant, by credit to *Deposits*, of liabilities for work done by contractors. These liabilities are being cleared off during 1887-88 by cash payments to the contractors concerned and debit to *Deposits*.

171. The diminished outlay in England is due to the demands for Railway Stores being much smaller than was indicated when the estimate was framed.

„ Revised Estimate	83,6

272. The outlay in 1886-87 was 15,1 less than that in 1885-86, as the local authorities found it impossible to utilise the grants.

273. The Budget was framed for the fixed annual grant of 700,0, but, owing to inability to spend the money, the Revised Estimate reduced the probable expenditure by 69,0, but even the reduced estimate has proved to be in excess of requirements by 83,6.

275. See paragraph 59 under B Interest on debt. In that paragraph against the India 3 per cent., the sum of ₹6,000,0 was entered, that being the amount of stock issued. Here 5,207,5 are stated as that is the actual amount received, the stock having been issued at a discount.

Section P.—UNFUNDED DEBT.

	Budget.	1886-87. Revised.	Accounts.
Special Loans	—2	—2
Treasury Notes and Service Funds, India	+ 58,4	+ 50,6	+ 55,2
Savings Bank Deposits	+ 419,8	+ 660,2	+ 720,8
	+ 478,2	+ 710,6	+ 775,8

276. The—2 under Special Loans are the Capitalized values of certain small pensions under the 1st Oudh loan. There are now very few Treasury Notes, and the Service Fund Deposits refer mainly to the Bengal and Bombay Uncovenanted Funds, whose deposits during the year amounted to 51,0 and 5,4 respectively. The Estimate of *Savings Bank Deposits* was too low. During the year under review the net deposits in Railway Banks amounted to 7,1, in the Civil Engineer's Provident Fund to 19,9, in the Military Banks to 2,3, and in the Post Office Banks about 2,000,1 including transfers from the Presidency and the late District Savings Banks.

Section Q.—DEPOSITS AND ADVANCES.

	Budget.		1886-87. Revised.		Accounts.

TOTAL		+ 733,5		+ 628,2		+ 1,305,2

277. The first two items have been explained in para. 261. The *Excluded Local Funds* are banking accounts and are not susceptible of detailed explanation. The operations of the *Political, Railway and Military Prize Funds* have turned out very much as was anticipated in the budget. The heads *Deposit, Advances and Suspense Accounts and Miscellaneous* are uncertain quantities which it is difficult to forecast. In this year they do not present any special features requiring notice. The particulars of the net credit under *Exchange on Remittance Accounts* are given below. The amount 7,3 entered against England includes an exceptional receipt, being unclaimed interest repaid by the Eastern Bengal and Sind, Punjab and Delhi Railway Companies, and by the Madras Irrigation and Canal Company, consequent on the purchase of the several undertakings by the State.

Sterling Liabilities increased.		Sterling amount.	Exchange. Cr.	Dr.
Permanent debt		4,796,4	1,803,8	
Other debt heads		7,3	2,7	
Receipts from Railway Companies to be repaid hereafter.				
<i>Guaranteed Railways</i>		517,5	194,6	
<i>Subsidized Railways</i>		1,618,6	608,7	
Payments to Railway Companies for recovery hereafter				
— <i>Guaranteed Railways</i>		—34,9		13,1
Payments to Railway Companies against Receipts from them in previous years.				
<i>Guaranteed Railways</i>		—10,8		4,1
<i>Subsidized Railways</i>		—2,774,8		1,021,8
Increase in the English cash balance		—554,2		208,4
TOTAL			2,609,8	1,247,4
Net			1,362,4	

Section R.—LOANS TO MUNICIPALITIES, NATIVE STATES, &c.

	Budget.	1886-87. Revised.	Accounts.
India	484,4—1,382,0	1,085,2—1,012,7	1,136,1—1,053,3
	—897,6	72,5	82,8

278. These figures represent transactions of great magnitude which it is difficult to estimate. The loans made amounted to 328,7 less than the estimate, and this difference is spread over all the Provinces, but is greatest in Bengal where the Calcutta Port Trust did not draw the full amount sanctioned for it. The loans repaid amounted to 651,7 more than was anticipated, and here the excess is mainly in India, Bengal and Madras. In India it represents the amount repaid by the Gwalior Durbar after the death of His Highness the Maharajah, in Bengal, large instalments on account of the Hughly Bridge, and in Madras, the sum realised from the Southern Mahratta Railway Company in respect of the Mysore line, by which the debt of that State was liquidated.

	Amount advanced.	Amount repaid.
Loans to Native States	16,0	907,3

Section S.—CAPITAL OF RAILWAY COMPANIES—continued.

279. The whole of these are net amounts. The Indian figures represent the difference between the advances taken by the Railway Companies and the credits given to them chiefly on account of stores used. The English figures represent the capital deposited by the companies with the Secretary of State less payments made therefrom. These amounts are subject to large fluctuations, and in the present year the accounts have turned out better than the estimate by 2,477,6. Of this sum 279,6 is better in the Indian account of guaranteed companies, about half being due to smaller advances and the rest to larger credits for Revenue stores. The difference is spread over all the Companies and does not call for special notice. 358,0 is worse than the estimate in the Indian account of subsidized Companies, the Southern Mahratta Company having drawn 885,1 more than was anticipated largely on account of the Mysore line, while the Indian Midland took 524,2 less as the works were not carried out to the extent expected. The difference of 2,556,0 in the English account is made up of the following amounts. The arrangements with the Bengal-Nagpur Railway Company were only concluded in February 1887, while the diminished payments in discharge of debentures is attributable to the renewal of certain debentures of the Great Indian Peninsula Railway :—

Excess received on account of Subscribed Capital from—

Bengal-Nagpur Railway Company	1,655,7
Indian Midland Railway Company	122,4
Southern Mahratta Railway Company	205,3
Great Indian Peninsula Railway Company	174,3
South Indian Railway Company	47,0

Section T.—REMITTANCES.

	Budget.	1886-87. Revised.	Accounts.
Money Order (net)	+ 19,8
Other Local Remittances (net)	+ 9,9	+ 11,2
Other Departmental Accounts (net)	—9,1	+ 5	—12,2
Accounts between Civil and other Departments (net)—			
Post Office	—14,8
Telegraph	+ 3
Marine	+ 4,6
Military	+ 95,3
Public Works	+ 1,045,3	+ 113,2
Remittance Account between England and India (net)	—126,3	+ 22,6	+ 19,1
TOTAL	—135,4	+ 1,078,3	+ 236,5

280. The use of money orders is steadily increasing as shewn by the figures entered below and the small credit under the head represents unpaid orders at the close of the year. The figures under Accounts between Civil and other Departments and under Remittance account between England and India are satisfactory and shew that the outstandings are well looked after.

		Issued.	Paid.
1883-84	} Money order transactions {	7,313,4	7,289,0
1884-85		8,192,8	8,197,0
1885-86		9,312,4	9,298,4
1886-87		10,538,9	10,519,1

Section U.—SECRETARY OF STATE'S BILLS.

	Budget.	1886-87. Revised.	Accounts
Drawings	13,331,4	12,000,0	12,136,3
Payments	13,331,4	11,948,1	12,177,7

281. The following bills were drawn during the year by the Secretary of State :—

		£	Rx.	Rate in Pence.
On account of allotments in April 1886		1,179,1	1,585,0	17'85
" " May " 		158,8	217,0	17'81
" " June " 		409,4	562,4	17'73
" " July " 		471,9	671,4	17'54
" " August " 		1,201,7	1,766,8	17'09
" " September " 		1,274,0	1,811,2	17'03
" " October " 		672,7	929,9	17'07
" " November " 		786,2	1,060,1	17'16
" " December " 		1,355,5	1,836,3	17'26
" " January 1887		1,761,4	2,347,7	17'39
" " February " 		1,127,5	1,511,3	17'45
" " March " 		1,738,1	2,401,2	17'44
		<u>12,136,3</u>	<u>16,700,3</u>	<u>17'54</u>

282. During the year the demand for bills and transfers was less than had been expected, and as money in excess of the estimate was obtained from the Railway Companies, the sale was not pressed.

283. The payment account of the year may be stated as follows :—

	£	Rx.
Bills of 1885-86 outstanding on 1st April 1886	312,7	418,0
Bills drawn in 1886-87 as entered above	<u>12,136,3</u>	<u>16,700,3</u>
Total bills for payment	12,449,0	17,118,3
Bills paid in 1886-87	<u>12,177,7</u>	<u>16,738,3</u>
Bills outstanding on 1st April 1887	<u>271,3</u>	<u>380,0</u>

Section V.—CASH BALANCE.

	Budget.	1886-87. Revised.	Accounts.
Balance on 1st April 1886	17,179,9	17,481,1	17,481,1
Balance on 31st March 1887	<u>13,081,2</u>	<u>15,093,7</u>	<u>18,476,6</u>
Increase (+) or decrease (—) of balance on 31st March 1887	<u>—4,098,7</u>	<u>—2,387,4</u>	<u>+995,5</u>

284. This difference between the estimate and the accounts is distributed between India and England in the following proportions :—

	Budget.	1886-87. Revised.	Accounts.
India	—1,784,5	+262,1	+441,3
England	<u>—2,314,2</u>	<u>—2,649,5</u>	<u>+554'2</u>
TOTAL	<u>—4,098,7</u>	<u>—2,387,4</u>	<u>+995,5</u>

SANITARY.

The 21st March, 1888.

No. 106.—The following Ordinance passed by the Legislature at

Mauritius last year on the subject of quarantine is published for general information :—

ORDINANCE No. 6 OF 1887.

An Ordinance enacted by His Honour the Officer Administering the Government of Mauritius with the advice and consent of the Council of Government thereof to consolidate and amend the laws relating to Quarantine.

I assent.

6th September 1887.

F. FLEMING.

Whereas it is expedient to consolidate and amend the laws relating to Quarantine.

Be it therefore enacted by His Honour the Officer Administering the Government with the advice and consent of the Council of Government as follows :—

CHAPTER I.

PRELIMINARY.

Short Title.

1. This Ordinance may be cited as the Quarantine Ordinance 1887.

2. In this Ordinance and Regulations made under this Ordinance, if not inconsistent with the context, the following words and expressions have the meanings hereinafter assigned to them.

Interpretation of words.

“The Board” means the General Board of Health.

“Master” means the Master or other person for the time being in command of a Vessel.

“Contagious” or “Infectious Disease” shall mean and include Cholera, Yellow Fever, Plague, Typhus, Small Pox and any other disease declared by Regulations to be a contagious or infectious disease.

“Infected place” and “infected Vessel” mean a place or vessel where a contagious or infectious disease prevails or prevailed at the time referred to in the context.

“Superintendent” means any person in charge of a Quarantine Station.

“Immigrant” means any Indian labourer immigrating into this Colony and any child or female arriving with such immigrant and for whose introduction passage money has been or may be paid by the Government or any employer.

“Regulations” mean the Regulations made by the Board.

“Prescribed” means prescribed by this Ordinance or Regulations.

3. The Board may from time to time make such Regulations (not contrary to the provisions of this Ordinance) as they may deem necessary for preventing the introduction of contagious or infectious disease into this colony, the control and management of Quarantine Stations, the prevention of illegal communications with or escapes from stations and vessels in quarantine, the prevention or mitigation of disease at stations, supplies to persons placed there and the rates payable for such supplies, communications with and from stations and vessels in quarantine, defining the limits of the Roadstead and Quarantine grounds and such other Regulations as may be necessary to carry out the provisions of this Ordinance. The Board may from time to time repeal or amend any such regulations.

(2) Such Regulations may provide for the imposition of a fine not exceeding Rs. 500 or Imprisonment not exceeding 3 months for any breach or contravention thereof.

(3) Such regulations shall in all other respects be deemed and dealt with as regulations made by the Board under Ordinance 8 of 1874. Provided that whenever the Governor in Executive Council shall consider it necessary that any such regulations be put in force immediately he may order such regulations to be published in the Government Gazette, and on such publication such regulations shall be and remain in force so long as they are not disallowed by the Council of Government.

4. The Board shall appoint yearly a Quarantine Committee composed of the President, Vice President, two or more members of the Board, and the Mayor of Port Louis.

The Committee (three of whom shall be a quorum) shall, subject to the instructions of the Board, have all the powers (except that of making regulations) and shall discharge all the duties of the Board with regard to quarantine. All proceedings and orders of the Committee shall be deemed proceedings and orders of the Board.

Until a new Committee is appointed by the Board, the Quarantine Committee appointed under Ordinance No. 14 of 1880 shall be deemed the Quarantine Committee under this Ordinance.

5. All proceedings and orders of the Board or Committee shall be immediately reported to the Governor and shall be subject to his approval and may be amended or disallowed by him.

Proceedings and orders to be reported to the Governor.

In all provisions of this Ordinance subsequent to this Article (except provisions referring to regulations to be made by the Board) when the Board is referred to, the word Board will be deemed to include the Quarantine Committee.

6. The Chief Medical Officer is charged with the execution of this Ordinance and of any measures ordered for the execution thereof, and shall issue to every Local Sanitary Authority, Sanitary Inspector, and other officers of the Board, and to any Health Officer, any orders and instructions that may be necessary to carry out the provisions of the Ordinance and any decision of the Board after it has been approved by the Governor.

Execution of the Ordinance.

CHAPTER II.

RULES TO BE OBSERVED ON ARRIVAL OF VESSELS.

7. If a vessel arriving at Mauritius shall, before being admitted to pratique, enter any harbour thereof, the master or owner shall be liable to a fine not exceeding Rs. 2,000.

Vessel not to enter Harbour before Pratique.

And any person who shall leave such vessel previous to such Pratique, except to go into Quarantine as herein provided, shall be liable to a fine not exceeding Rs. 500 and imprisonment not exceeding six months.

8. On the arrival of any vessel at Mauritius, no persons whatever, except Pilots, the Superintendent, the Health Officer and the master of the Lightship at the Bell Buoy or other officers authorized by Regulations, shall go within 100 metres of such vessel until the Pilot shall have brought her into Harbour. And in no case whatever shall any person, other than the officers referred to, and crews of their respective boats come into actual contact with the vessel until she has been admitted to pratique. Any person transgressing either of these provisions shall be liable to a fine not exceeding Rs. 500 and to imprisonment not exceeding two months. The boat or boats which may have been used for such unlawful purpose may be forfeited.

Vessel not to be approached.

9. When any vessel shall come to Mauritius, any person who before such vessel shall have entered any harbour thereof shall approach within 100 metres of such vessel, and who shall within 21 days thereafter land upon or come within low water mark of the shore of any part of the Island, or enter any harbour, creek or river thereof, shall be liable to a fine not exceeding Rs. 500 and Imprisonment not exceeding three months.

Penalty imposed on persons coming to the colony after having been within 100 metres of Vessel.

Provided that these provisions shall not extend to any of the officers referred to in article 8, or the crews of their respective boats approaching such vessel in conformity with this Ordinance and Regulations, or to any person who shall have approached such vessel after pratique shall have been obtained therefor.

10. When any vessel shall come to Mauritius, any person who, having been on board thereof or of any boat belonging thereto, before pratique is obtained, shall within 21 days, land on any part of the Island, or enter any harbour, creek or river, or approach by sea within low water mark of any part of the shore of the said Island, except for the purpose of going into Quarantine, shall be liable to a fine not exceeding Rs. 500 or Imprisonment not exceeding three months.

Penalty on persons coming from vessel before pratique.

11. Whenever any person shall, in contravention of the provisions hereinbefore contained, enter any harbour, creek or river, or approach by sea within low water mark of any part of the Island, it shall be lawful for any Constable, or Officer of Police, or any Officer of the Board, or of the Harbour Department without warrant, to apprehend such person, and any boat or other conveyance on or in which he may be, and all articles which may be in his possession at the time, and to detain him and them, at a safe distance from any other person whatever until it shall be ascertained whether quarantine therefor shall be required.

Police and Officers of Harbour Department to seize in case of contravention.

12. Any Officer making any seizure in terms of the preceding article, shall, as soon as may be thereafter, inform the Chief Medical Officer, in order that immediate steps may be taken for having such person and any boat or conveyance or other articles aforesaid put in Quarantine or dealt with otherwise according to Law. The Board may order such person to be placed in a Quarantine station to be dealt with as in Chapter V. provided. And such Officer and all persons in the boat with him at the time, shall abstain from any communication with any person on shore for such period thereafter as may be ordered by the Board.

Such officer to detain person, &c., as soon as may be thereafter, inform the Chief Medical Officer.

13. The Pilot shall approach the vessel to windward, within speaking distance and shall not go alongside or on board unless he shall believe that the vessel is free from infectious or contagious disease. As soon as convenient after his arrival alongside or going on board, he shall deliver to the Master a copy of Schedule A, and he shall put to the master the questions contained in a printed form, conformably to Schedule B, with copies of which Schedules, every Pilot shall be bound to provide himself at the Port Office and the master shall, without delay, write upon the said form the Answers to the said questions and shall return the same so completed to the Pilot.

Any Pilot omitting or dispensing with these formalities shall be liable to a fine not exceeding Rs. 2,000, and to imprisonment for a period not exceeding four months.

14. The Health Officer who shall be accompanied by a Port Officer shall approach the vessel on the windward side and within speaking distance. He shall go on board if he thinks himself warranted so to do from the information obtained by him from the Pilot, Master or any person on board, and as soon as possible after arriving on board he shall require and obtain from the Pilot the answers furnished by the Master as above provided.

15. The Health Officer and Superintendent after going on board, shall inspect the Immigrants and any person on board whom they may have reason to believe is affected with a contagious disease, and they may call for and examine the ship's books and papers.

Any person impeding the Health Officer or Superintendent in such inspection or refusing to produce the ship's books and papers in his custody, shall be liable to a fine not exceeding Rs. 500.

16. If the Health Officer shall arrive alongside of a vessel before the arrival of a Pilot on board, he may require from the master all the necessary information, and upon being satisfied of the sanitary condition of the vessel and persons therein, he may go on board without waiting for the arrival of the Pilot.

17. Whenever the Health Officer, either from stress of weather, or from any circumstance of "Force Majeure" shall be prevented from going alongside of the vessel, and when the answers of the Master as above provided shall satisfy the Pilot that there is no contagious or infectious disease on board, the Pilot may, upon his own responsibility, bring the vessel to anchor in the Harbour, but communication with such vessel shall not be allowed until she shall have been admitted to pratique by the Health Officer as hereinafter provided.

18. All Masters of vessels having sailed from an infected place, or having communicated otherwise than by signal with any infected vessel or place who shall fail to make a true declaration thereof to the Pilot, Health Officer or Superintendent who shall come alongside or on board such vessel, shall be liable to a fine of not less than Rs. 200 and not exceeding Rs. 2,000.

If the Master who fails to make such declaration knew that the place from which he sailed was an infected place or that his vessel communicated with an infected vessel, he shall be liable to the penalties provided in the next article.

19. All Masters and Surgeons of vessels who knowing that a contagious or infectious disease exists or existed on board during the voyage, shall fail to make a true declaration thereof to the Pilot, Health Officer or Superintendent, or who shall employ any means for concealing from the inspection of the Health Officer or Superintendent, any individual afflicted with a contagious or infectious disease shall be liable to a fine not less than Rs. 400 nor more than Rs. 2,000 and to imprisonment for not less than three months nor more than one year.

20. Every Surgeon of a vessel, convicted of having concealed from the Master the existence of any contagious or infectious disease in any one or more of the persons on board, and every Health Officer or Superintendent or Pilot convicted of having through connivance with the Master or Surgeon of the Vessel, or otherwise knowingly allowed the introduction into any port in Mauritius of any vessel having a contagious or infectious disease on board, shall be liable to the penalties mentioned in the preceding article.

21. The Master and all persons on board of any vessel arriving off Mauritius or Flat Island, are bound to answer the questions and inquiries which may be made to them by the Health Officer, Superintendent or Pilot, respectively, and every person who shall neglect or refuse to answer or shall answer falsely or evasively shall be liable to a fine not exceeding Rs. 2,000.

22. If the Health Officer shall determine that the vessel does not require to perform quarantine he shall admit her immediately to pratique, and the Pilot may bring her to anchor in the harbour, and whenever pratique shall have been granted, communication with the vessel shall be permitted, and the same shall be announced by means of a red flag hoisted at the fore, which flag shall, if required, be furnished by the Port Officer for that purpose.

23. If the Master in answer to the questions hereinbefore provided, report to the Pilot, or if the Health Officer shall after investigation believe, that a contagious or infectious disease exists on board, or existed on board within 21 days previously, or that the vessel did, within the said period communicate (otherwise than by signal) with any infected vessel or place, the Pilot, or if the Pilot is not on board, the Health Officer shall immediately put the vessel in temporary quarantine.

24. If the Master shall fail to produce to the Health Officer a certificate commonly called a Bill of Health from the competent authorities of the place from which the vessel arrives, and of any place at which the vessel touched on her voyage (duly signed by the British Consul if there is a resident British Consul at any of the places referred to) to the effect that neither cholera, small pox, plague, nor any epidemic contagious or infectious disease prevailed in any degree at any of the places referred to, the Health Officer shall put the vessel in temporary quarantine.

25. If in any case it appears to the Health Officer after investigation that the vessel arrives from an infected place, or that the vessel has during her voyage communicated otherwise than by signal with an infected place or vessel, or if the vessel arrives with immigrants, or if in any case the Health Officer shall consider that it is necessary that the vessel should not be immediately admitted to pratique, the Health Officer shall put the vessel in temporary quarantine.

26. Whenever a vessel is put in temporary quarantine as above indicated, the Health Officer or the Pilot shall order a Yellow Flag to be hoisted at the Fore, and the vessel shall thereupon be deemed a vessel in quarantine, until admitted to pratique by order of the Governor.

The Health Officer shall forthwith report to the Chief Medical Officer his reasons for imposing such temporary quarantine.

The Chief Medical Officer shall lay the report as speedily as possible before the Board, and the Board shall consider such Report and all the circumstances of the case, and shall decide whether pratique is to be granted or whether the vessel must remain in quarantine, or be otherwise dealt with as hereafter provided.

CHAPTER III.

POWERS OF BOARD AS TO QUARANTINE AND OTHER MEASURES.

27. When a contagious or infectious disease exists or existed on board a vessel within 21 days from her arrival, the Board may order the vessel to perform quarantine for the time prescribed with reference to the disease with which the vessel is infected.

28. When a vessel has within 21 days before her arrival communicated otherwise than by signal with any infected vessel or place, the Board may order the vessel to perform quarantine for such a number of days as when added to the time which has elapsed since the vessel communicated with such infected place or vessel, will not exceed the time prescribed for quarantine with regard to the disease with which the vessel may be supposed to be infected.

29. When a vessel arrives without a Bill of Health as in article 24 mentioned the Board may order the vessel to perform quarantine for such a number of days as when added to the time which has elapsed since the vessel's departure from the port or place which she left without such Bill, will not exceed 21 days.

Quarantine for 48 hours may be ordered in any case.

30. The Board may in any case order that a vessel shall perform quarantine for any period not exceeding 48 hours from the day of arrival.

31. When a vessel arrives with Immigrants, the Board may order that the vessel shall remain in quarantine until the clothes of the passengers and crew have been washed, the vessel fumigated and such other sanitary measures as the Board shall direct, have been carried out.

When a vessel arrives with passengers from any port in India, Ceylon, the Straits Settlements, Java or China within twenty-one days from her departure from any such port and without a duly qualified Medical Practitioner on board, the Board

may if it is thought advisable order the passengers to be put in quarantine for any time not exceeding twenty-one days from the departure of the vessel from such port.

32. In cases coming under Articles 27 and 28, the Board may further order that before the vessel is admitted to pratique, the said vessel shall be fumigated and disinfected in such manner as the Board shall direct, and that articles or goods likely to introduce into the colony the disease with which the vessel is infected shall not be landed until such articles or goods have been disinfected.

The Board shall by Regulations specify and declare the articles and goods which are likely to introduce into the colony a contagious or infectious disease.

Except such goods as may be specified in any such Regulations, cargo shall not be liable to be disinfected under this article.

The Board may make a similar order in any case when a contagious or infectious disease has existed on board a vessel during her voyage to Mauritius or when a vessel arrives from an infected place.

33. It shall be the duty of the Board from time to time to make Regulations defining and prescribing the measures to be adopted for the disinfection of any vessel or articles on board any vessel in the cases in which disinfection of a vessel or articles on board may be ordered under this Ordinance.

34. Such Sanitary measures as may be ordered by the Board under the preceding articles, with regard to the fumigation or disinfection of the vessel, or articles or goods on board, shall be carried out at the risk of the owners thereof; and the Board or the Government shall not be liable for any damage done to or suffered by such vessel, or articles or goods on board in consequence of the execution of such measures.

Provided the Government will be liable for damage done to or suffered by any article or goods in consequence of the disinfection in case the vessel arrives from a place which was not an infected place at the time of the departure of such vessel.

Provided that nothing herein contained shall affect the liability of the Board for any damage done by its officers or servants in any case in which, by the Laws of the Colony, the Board would be liable for such damage.

CHAPTER IV.

QUARANTINE STATIONS.

35. There shall be set apart and appropriated for the Island of Mauritius two permanent Quarantine Stations: one of which shall be Flat Island, and shall, except as herein-after provided, be appropriated to Persons undergoing quarantine for Cholera and the other of which shall be on Cannoniers' Point on the Island of Mauritius, and shall be used for persons undergoing quarantine for any disease or diseases except Cholera.

36. The Quarantine Station at Flat Island shall embrace the whole of that Island, with the sea surrounding it to the distance of 200 metres from the shore at low water; and whenever the said Station is in quarantine, such quarantine shall extend to Gabriel Island with the sea surrounding it to the said distance, and the sea between the said two Islands.

37. The Quarantine Station at Cannoniers' Point shall include the portion of ground bounded as follows: On the North-East and South-East by a double line of stockade, on the North-West and South-West by the sea, together with the sea surrounding the said piece of ground to the distance of 200 metres from the shore at low water.

Provided that the boundaries above mentioned may be amended or extended by regulation.

38. There shall also be at Cannoniers' Point a portion of ground extending 200 metres on the landward side of the stockade before mentioned, which shall be termed the neutral ground attached to the Lazaret, and shall be used for such purposes as shall be prescribed. And such portion of ground shall be marked off on the landward side in such manner as the Board shall determine by regulation.

39. It shall be in the power of the Governor in Executive Council, whenever he shall think necessary, to set apart and appropriate, either temporarily or permanently, as a Quarantine Station or Stations, any hulk or any portion or portions of land upon the sea coast of Mauritius or its Dependencies, and the sea surrounding or adjoining the same to such distance as he may determine together with such buildings and outhouses as shall be required for the said purpose, and also to appoint such

persons as he may deem proper to the charge of such Quarantine Station or Stations, and to declare that the same shall be subject to all or any provisions of this Ordinance, and Regulations :—provided that no part of the mainland of Mauritius shall, at any time, be so appropriated as a Quarantine Station for Cholera, and also provided that the exercise of the said powers shall be published by Proclamation in the Government Gazette.

40. It shall be in the power of the Governor, by Proclamation, to appropriate, for such time as he shall appoint, the Quarantine Station at Flat Island for the performance of quarantine for any other disease besides Cholera. Provided that such Quarantine shall not be performed at such Station while the same is used for Quarantine for Cholera.

41. There shall be attached to each of the permanent Quarantine Stations before specified, a Superintendent who under the directions of the Chief Medical Officer shall have the sole superintendence of all the persons forming the Quarantine Establishment to which he is attached, and of all the persons who may be in Quarantine there, all of whom are hereby bound to obey all lawful Orders issued by such Superintendent.

CHAPTER V.

PROVISIONS AS TO VESSELS AND STATIONS IN QUARANTINE.

42. Whenever a vessel and any persons on board of a vessel shall be ordered to perform quarantine, the Chief Medical Officer may make such order as the circumstances of the case may require as to the place where and manner in which quarantine shall be performed by such vessel or persons, or as to the Quarantine Station in which such persons are to be placed.

43. (1) All persons placed in Quarantine Stations, and all vessels in Quarantine shall, perform and remain in Quarantine for the periods following :

10. For Cholera, 21 days :

20. For Small Pox, 21 days :

30. For Typhus, Yellow Fever, or other Contagious or Infectious disease, 15 days or such other period not exceeding 21 days as may be ordered by the Board.

(2) When Quarantine is ordered under Article 27, because a contagious or infectious disease exists or existed on board a vessel, the number of days prescribed applicable to such disease, shall be calculated from the date of the death, or perfect recovery (or in case of small pox), perfect desquamation and recovery of the person last affected.

(3) When Quarantine is ordered under Article 28, the number of days applicable to the disease with which the vessel is supposed to be infected shall be calculated from the date of the vessel sailing from an infected place, or communicating with an infected place or vessel.

(4) If any fresh case of contagious or infectious disease shall occur either at the Quarantine Station or on board the vessel in quarantine, the number of days prescribed for quarantine with regard to such disease, shall be calculated from the death, perfect recovery or desquamation of the person affected or from the landing of such person at a Quarantine Station, as the case may be.

44. Whenever any vessel shall be ordered to perform Quarantine, the Master shall cause a yellow flag (which, if required, shall be furnished by the Harbour Master) to be kept hoisted at the fore the whole time during which such Quarantine shall continue. The display of such Flag shall be deemed sufficient notice that such vessel, and the sea surrounding the same to the distance of 200 metres, is in Quarantine.

The Master shall without delay cause his ship to proceed to that part of the Roadstead which the Harbour Master shall point out as a Quarantine ground, and the vessel shall there remain or shall change her anchorage to other parts of the Roadstead as the Harbour Master shall order.

And any vessel which shall be in Quarantine at the Roadstead in consequence of inability to proceed to the proper Quarantine Station, or to land her immigrants or passengers there, shall leave the said anchorage and proceed to the said Station whenever the Harbour Master shall order the same to be done.

45. Every vessel performing Quarantine shall, during the whole continuance of such Quarantine, be guarded by two or more Guards, who shall remain on board, and by one or more Guard Boats to be furnished by the Harbour Master.

The Master shall provide each Guard on board with sufficient room for his bed or hammock and shall victual the said Guard. In consideration of which the Master shall be entitled to receive from Government an allowance of one Rupee per day for each Guard.

46. Every vessel in Quarantine shall be under the direction of the Harbour Master, and all persons on board such vessel and guard boats shall be bound to obey all lawful orders issued by the Harbour Master.

The master or any person refusing or neglecting to obey any such order shall be liable to a fine not exceeding Rs. 500, and imprisonment not exceeding three months.

47. All persons belonging to the Pilot's Boat and to that of the Health Officer, or Superintendent, respectively, who shall have been on board of the vessel, either before or at the time when the Quarantine Flag was hoisted, shall be bound to remain there or return thither, as the case may be, under the Penalties set forth in Article 51 hereof. Such persons may further be dealt with as provided in Article 52.

The Health Officer, or Superintendent, Pilot and such of the crews of their boats as may have been taken on board by the master, to assist in the service of the Vessel, shall be entitled to a proportionate indemnity for which the Master and Owners of the vessel shall be held jointly and severally responsible, and which, when the parties shall not come to an amicable understanding regarding it, shall be fixed by the District Court summarily and without appeal.

48. Whenever a Station shall be in Quarantine, the same shall be notified by one or more yellow Flags, hoisted at conspicuous places in such Station, which Flags shall be kept constantly flying during such Quarantine. And the display of such Flags shall be deemed sufficient notice to all persons that such Station is in Quarantine.

49. Whoever shall have communicated with a vessel not admitted to pratique, or with a vessel or station in quarantine shall be bound to remain on or return to such vessel or station as the case may be, and to remain in such vessel or station during the whole period for which the vessel or station be in quarantine.

In case of refusal or resistance, the person offending may, upon an order from any one of the Judges of the Supreme Court or from any District Magistrate, be arrested and placed in such Vessel or Station.

Provided that any guard witnessing such communication may without warrant apprehend the person offending and place him in such Vessel or Station.

50. Any person who shall, with intention of escaping from Quarantine, leave a station or a vessel when such station or vessel is in Quarantine, shall be liable to imprisonment not exceeding six months and to a fine not exceeding Rs. 500.

Any such person may be seized and brought back by force to such station or vessel, and if necessary to prevent the escape may be fired on.

51. After the yellow flag has been hoisted in any vessel or station, and so long as the same shall remain hoisted, any person who shall quit such vessel or station and communicate with any person out of the same, and every person who shall communicate with such vessel or station, as well as all persons who shall have aided or facilitated any such communication, shall be liable to a fine not exceeding Rs. 500 and imprisonment not exceeding 6 months.

Provided that the penalties herein enacted shall not apply to communications made in conformity with Regulations.

52. A Vessel or Station in Quarantine shall not be approached except in the manner and under the conditions prescribed :

Any person approaching within 200 metres of a vessel or of the limits of a Station in Quarantine in breach of or without having complied with Regulations, and not withdrawing when ordered to do so, shall be liable to imprisonment not exceeding six months and a fine not exceeding Rs. 500.

Any such person may be seized and placed in the Station or Vessel in Quarantine.

53. In case any person through ignorance, stress of weather or any accident shall land upon any part of a Station in Quarantine, or shall go on board any vessel in Quarantine, such person shall be detained in Quarantine for such period as shall be fixed by the Board.

54. A vessel ordered to perform Quarantine may when there is no contagious or infectious disease on board be allowed to come within the Harbour for the purpose of coaling or discharging and shipping provisions or cargo. Provided that :

(1) Such vessel shall not be allowed to come within a straight line supposed to be drawn from the Flagstaff on Fort George to the Flagstaff on Fort William.

(2) Such vessel shall be moored at such place as shall be pointed out by the Harbour Master and round such vessel buoys shall be anchored at not less than 100 metres from the vessel, and ropes shall be attached to the buoys so as to form a complete boundary encircling the vessel. Any person wilfully penetrating within such ropes shall be liable to imprisonment not exceeding 6 months and to a fine not exceeding Rs. 500. Provided that the above penalties shall not apply to communications with a vessel in Quarantine made in conformity with the Regulations.

55. Every person placed in a Quarantine Station shall be supplied by the Government of the Colony with food and with Hospital dietary and treatment, and every such person shall be bound to pay therefor at such rate as may be prescribed.

Every husband shall be liable jointly with his wife for the payment of such supplies made to her, and every father or guardian shall be liable for the payment of such supplies made to his children being minors or wards.

Masters and Owners of vessels shall be liable for payment of such supplies made to their crews.

Provided that it shall be in the power of the Governor to remit in whole or in part the amount for which any person is liable under this article; in case it shall be made to appear to his satisfaction that the said person has not the means to pay the whole or part of the sum due by him.

CHAPTER VI.

MISCELLANEOUS PROVISIONS.

56. The provisions of Part IV of Ordinance No. 8 of 1874 with regard to obstructing Officers of the Board, and with regard to actions brought against such Officers, shall apply in case any person is obstructed in the execution of this Ordinance, or in case such person is sued for or on account of any thing done by him in execution of this Ordinance.

57. Vessels arriving off Grand Port or any other Harbour or Roadstead of Mauritius may be admitted to Pratique by the Health Officer named by the Governor for that purpose.

The Health Officer so named, shall have and exercise the same duties and powers as given to and imposed upon the Health Officer by this Ordinance.

58. The penalties provided in this Ordinance, in regard to communication with vessels in Quarantine shall not apply to the case of a person who shall embark in any vessel in Quarantine for the purpose of being a passenger therein, or one of the Officers or crew thereof and who shall either remain in the said vessel until her departure from the Colony, or shall return to the Colony after such vessel shall have received pratique.

Every person who shall embark in any vessel for any of the purposes mentioned in this Article, shall, in relation to such embarkation, be bound to conform to and obey all directions and orders which he shall receive from the Harbour Master in regard thereto, otherwise he shall be liable to the penalties provided by this Ordinance for unlawful communication with a vessel in Quarantine.

59. For the purposes of this Ordinance the harbour of Port Louis shall be deemed to extend from the shore seawards as far as a straight line supposed to be drawn from the Flagstaff on Fort George to the Bell-Buoy, and from the Bell-Buoy to the Flagstaff on Fort William, and shall include Barkly Island. The limits of the other harbours may be fixed or amended from time to time by Regulation.

60. The Government shall have a privilege on all goods belonging to a person placed in a Quarantine Station to secure payment of the sum due to Government for the maintenance of such person or that of other persons for whom he may be or may have rendered himself liable.

Such goods may be kept and detained at the Customs House, and in default of payment within eight days from the termination of Quarantine, the Collector of Customs may cause them to be sold by auction.

Provided that the balance of the sale price, if any, after deductions of the claim of Government and costs, shall be paid to the owner of the goods.

61. All offences under this Ordinance shall be deemed to be for all purposes within the summary jurisdiction of the District Magistrate.

The Magistrate may on conviction of any offender award any one of, or all the penalties provided for the offence, but he shall not have power in any case to inflict a fine exceeding Rs. 1,000.

Provided that the value of any article forfeited shall not be deemed part of the fine.

When the maximum penalty provided for an offence exceeds the maximum penalty which the District Magistrate has power to inflict, the prosecution may take place before the Bench of Magistrates in the manner and under the conditions provided in Ordinance 3 of 1883.

62. All offences may be prosecuted before a District Magistrate of Port Louis by any officer of the Board, of Customs, of the Harbour Master's Department, or of Police.

Vouue.

Appropriation of fines.

63. Fines and the value of Forfeitures awarded in virtue of this Ordinance shall be appropriated as follows :

One half or any lesser portion thereof may, with the Governor's approval, be divided equally between the Prosecutor and the Informer, and if there be no Informer the sum allowed by the Governor shall be paid to the prosecutor. The other half shall in all cases accrue to the Treasury.

Repeal.

64. The Ordinances, Proclamations, and Notices mentioned in Schedule C. are hereby repealed.

Provided that this repeal shall not affect—

Saving clause.

(a) Anything duly done or suffered under any enactment hereby repealed, or

(b) Any right or liability acquired, accrued or incurred under any enactment hereby repealed, or

(c) Any penalty, forfeiture or punishment incurred in respect of any offence committed against any enactment hereby repealed, or

(d) Any investigation, legal proceeding or remedy in respect of any such right, liability, penalty, forfeiture or punishment as aforesaid; and any such investigation, legal proceeding and remedy may be carried on as if this Ordinance had not been passed.

65. Schedules A and B annexed to this Ordinance may be amended by Regulations.

66. This Ordinance shall come in force on a day to be fixed by the Governor by Proclamation.

PASSED in Council, at Port Louis, Island of Mauritius, this thirtieth day of August one thousand eight hundred and eighty seven.

D. P. GARRIOCH,

Acting Secretary to the Council of Government.

Published by order of His Honour the Officer Administering the Government.

H. N. D. BEYTS,

Acting Colonial Secretary.

SCHEDULE A.

Extracts from the Quarantine Ordinance, 1887.

Article 7. If a Vessel enters any Harbour before being admitted to Pratique, the Master and Owners are liable to a fine not exceeding Rs. 2,000.

Any person leaving the ship before Pratique is liable to a fine not exceeding Rs. 500 and to imprisonment not exceeding six months.

„ 15. The Health Officer may call for the ship's books and papers, and person refusing to produce such books or papers in his possession is liable to Rs. 500 fine.

„ 18 & 19. The Master or Surgeon is bound to make true declaration when there is or was, during the voyage, a contagious disease on board, or if the ship sailed from a place or communicated with a place or vessel when there was such disease, under a penalty of Rs. 2,000 and imprisonment not exceeding 12 months.

„ 20. A Surgeon concealing from the Master the existence of a contagious disease on board, or knowingly allowing a vessel having a contagious disease on board to enter any Harbour, is liable to the same penalties as above.

„ 21. The Master and all persons on board are bound to answer truly all questions put to them by the Health Officer, Superintendent or Pilot under penalty of Rs. 2,000 fine.

SCHEDULE B.

*Questions.**Answers.*

What is the name of the vessel and the name of the Commander or Master?

Are you the Commander or Master?

To what Port does she belong?

From whence do you come?

To what place are you bound?

At what ports or places has your vessel touched since leaving her first port of lading on this voyage?

What vessels have you had intercourse or communication with on your Passage and from whence did they come?

Did the cholera, plague or any epidemic, infectious or contagious disease or distemper prevail in any degree at the port or places from whence your vessel sailed, on this voyage, or on board any vessel with which you or any one on board had personal communication on the passage, or at any of the places at which your vessel has touched?

If at any, say at which, and when?

Are there any persons on board your ship suffering under cholera or any infectious, epidemic or contagious disease, or have any persons died or been ill of a disease of that nature during the voyage or within the last 21 days. And if any, what number? And if any persons on board your ship have died or been ill of such disease, were their bedding and clothes destroyed?

Have you any and what Bill of Health?

SCHEDULE C.

Enactments repealed.

Ordinance 3 of 1857 :—To amend the Laws concerning Quarantine.

„ 27 of 1857 :—For more effectually securing the observance of the Law concerning quarantine.

„ 1 of 1864 :—To amend the Laws as to persons embarking in vessels in Quarantine for the purpose of leaving the Colony.

„ 8 of 1877 :—To amend Ordinance No. 3 of 1857 entitled “An Ordinance to amend the Laws concerning Quarantine.”

„ 14 of 1880 :—To amend Ordinance No. 8 of 1874 in order to provide for the appointment of a Quarantine Committee.

„ 23 of 1880 :—To remove doubts as to the Quarantine Laws of this Colony and for the protection of persons who have put such Laws in force.

„ 30 of 1882 :—To provide for the payment of food and treatment supplied in cases of Quarantine.

No. 530-G.—Lieutenant M. A. Tighe, M.S.C., the Officer Commanding the escort of the Resident at Hyderabad, held charge, in addition to his own duties, of the Office of Assistant to the Resident and the General Superintendent of Operations for the Suppression of Thagi and Dakaiti, from the 21st November, 1887, to the 12th January, 1888, both days inclusive.

The 23rd March, 1888.

No. 535-G.—Colonel E. S. Reynolds, B. S. C., Political Agent of the 2nd class, is, on return from furlough, posted as Political Agent in South-Eastern Baluchistan.

No. 536-G.—Lieutenant-Colonel A. W. Roberts, General List, Cavalry, Political Agent of the 2nd class, is posted as Political Agent at Kalat.

No. 537-G.—Captain H. M. Temple, S. C., Political Agent of the 3rd class, substantive *pro tempore*, is posted temporarily as an Assistant to the Governor-General's Agent in Baluchistan.

The 22nd March, 1888.

No. 1143-I.—Whereas His Highness the Nizam of Hyderabad has granted to the British Government full jurisdiction within the lands in his territory which are occupied, or may be hereafter occupied, by His Highness the Nizam's Guaranteed State Railways Company, by the Great Indian Peninsula Railway, by the Madras Railway, and by the Southern Maratha Railway, respectively (including the lands occupied as stations, out-buildings and for other railway purposes): In exercise of this jurisdiction and of the powers conferred by sections 4 and 5 of the Foreign Jurisdiction and Extradition Act, 1879, and of all other powers enabling him in this behalf, the Governor-General in Council is pleased to issue the following orders:—

Part I.

(1) The provisions, so far as they may be applicable, and as amended for the time being by subsequent enactments, of the Acts mentioned below, are hereby extended to the aforesaid lands, namely:—

Act XLV of 1860 (the Indian Penal Code);

Act V of 1861 (for the regulation of Police);

Act VI of 1864 (the Whipping Act);

Act I of 1871 (the Cattle Trespass Act);

Act X of 1882 (the Code of Criminal Procedure);

(2) The Code of Criminal Procedure shall be subject in its application to the aforesaid lands to the following modifications, namely:—

(a) that trials before the Court of Session may in the discretion of the Judge, be without jury or aid of assessors; and

(b) that notwithstanding anything in the Code of Criminal Procedure (Act X of 1882) or the Police Act (V of 1861) or in any other enactment for the time being in force, the Governor-General in Council may confer on any police-officer all or any of the powers conferred or conferable by or under the Code on any Magistrate, in regard to particular cases or to a particular class or particular classes of cases or to cases generally.

Part II.

For the purposes of the exercise of criminal jurisdiction within the aforesaid lands, the Governor-General in Council is pleased to make the following arrangements:—

(1) There shall be a Railway Magistrate, who shall be the Second Assistant to the Resident at Hyderabad.

(2) The Railway Magistrate shall have the powers of a District Magistrate, as described in the Code of Criminal Procedure.

(3) There shall be a Superintendent of Railway Police, who shall be such person as the Governor-General in Council may from time to time appoint in that behalf.

(4) The Superintendent of Railway Police shall have the powers of a District Superintendent of Police as described in Act V of 1861, and the ordinary powers of a Magistrate of the second class as described in the Code of Criminal Procedure.

(5) The Inspector-General of Police in the Hyderabad Assigned Districts and the Resident at Hyderabad shall have, respectively, the powers of an Inspector-General of Police and of a Local Government, as described in Act V of 1861.

(6) The First Assistant to the Resident at Hyderabad shall have the powers of a Court of Session, as described in the Code of Criminal Procedure, in respect of all offences over which magisterial jurisdiction is exercised by the Railway Magistrate or the Superintendent of Railway Police.

(7) The Resident at Hyderabad shall have the powers of a High Court, as described in the Code of Criminal Procedure, in respect of all offences over which the jurisdiction of a Court of Session is exercised by the First Assistant to the Resident, and for all purposes whatsoever connected with the administration of criminal justice.

(8) This part of this Notification applies to all proceedings except—

(a) proceedings against European British subjects, or persons jointly charged with European British subjects; and

(b) proceedings pending at the date of this Notification, which should be carried on as if this Notification had not been issued.

No. 1144-I.—Whereas His Highness the Nizam of Hyderabad has granted to the British Government full jurisdiction within the lands in his territory which are occupied, or may be hereafter occupied, by the Nizam's Guaranteed State Railways Company, by the Great Indian Peninsula Railway, by the Madras Railway and by the Southern Maratha Railway, respectively

(including the lands occupied as stations, out-buildings and for other railway purposes): In exercise of this jurisdiction and of the powers conferred by sections 4 and 5 of the Foreign Jurisdiction and Extradition Act, 1879, and of all other powers enabling him in this behalf, the Governor-General in Council is pleased to issue the following orders :—

Part I.

The provisions, so far as they may be applicable, and as amended for the time being by subsequent enactments, of the Acts mentioned below are hereby extended to the aforesaid lands, namely :—

Act XXVII of 1860. (*For facilitating the collection of debts on successions and for the security of parties paying debts to the representatives of deceased persons.*)

Act X of 1865 (the Indian Succession Act, 1865);

Act XIV of 1866 (the Indian Post Office Act, 1866);

Act VII of 1870 (the Court Fees Act);

Act I of 1872 (the Indian Evidence Act, 1872);

Act IX of 1872 (the Indian Contract Act, 1872);

Act III of 1877 (the Indian Registration Act);

Act XV of 1877 (the Indian Limitation Act);

Act I of 1879 (the Indian Stamp Act);

Act V of 1881 (the Probate and Administration Act, 1881);

Act XIV of 1882 (the Code of Civil Procedure);

Act XIII of 1885 (the Indian Telegraph Act, 1885);

Act IX of 1887 (the Provincial Small Cause Courts Act, 1887).

Part II.

For the purposes of the exercise of civil jurisdiction within the aforesaid lands the Governor-General in Council is pleased to make the following arrangements :—

(1) There shall be a Court of Small Causes with jurisdiction in all suits cognizable under Act IX of 1887, when the amount or value of the subject-matter does not exceed five hundred rupees.

(2) The Second Assistant to the Resident at Hyderabad shall be the Judge of the Court of Small Causes.

(3) There shall be a District Court having the powers of a District Court as defined in section 2 of the Code of Civil Procedure, and with jurisdiction in all original suits, whatever be the amount or value of the subject-matter, and in all other cases in which jurisdiction is conferred on the District Court by the law for the time being in force to the aforesaid lands.

(4) The Second Assistant to the Resident at Hyderabad shall be the Judge of the District Court.

(5) Appeals shall lie, subject to the provisions of the enactments for the time being in force in the aforesaid lands, against the decrees and orders of the District Court to the First Assistant to the Resident at Hyderabad, who shall exercise the powers of an Appellate Court as defined in the Code of Civil Procedure.

(6) Subject to the provisions of the said enactments, a second appeal against the decrees and orders of the First Assistant shall lie to the Resident at Hyderabad, who shall exercise the powers of a High Court for all purposes whatsoever connected with the administration of civil justice within the aforesaid lands.

No. 1145-7.—Whereas His Highness the Nizam of Hyderabad has granted to the British Government full jurisdiction over the lands in his territory which are occupied, or may be hereafter occupied, by the railways comprised in the undertaking of the Nizam's Guaranteed State Railways Company, by the Great Indian Peninsula Railway, by the Madras Railway and by the Southern Maratha Railway, respectively, (including the lands occupied as stations, out-buildings and for other railway purposes): In exercise of this jurisdiction and of the powers conferred by sections 4 and 5 of the Foreign Jurisdiction and Extradition Act, 1879, and of all other powers enabling him in this behalf, the Governor-General in Council is pleased to issue the following orders :—

(1) The provisions, so far as they may be applicable, and as amended for the time being by subsequent enactments, of the Indian Railway Act (IV of 1879) are hereby extended to the aforesaid lands.

(2) In exercise of the power conferred by section 4 of the said Indian Railway Act, the Governor-General in Council is pleased to sanction the use of locomotive engines or other motive power, and carriages and waggons to be drawn or propelled thereby, on the aforesaid lands.

(3) In exercise of the power conferred by section 53 of the said Indian Railway Act the Governor-General in Council is pleased to declare that the Resident at Hyderabad shall be deemed to be, for the purposes of the said Act, the Local Government in respect of the aforesaid lands.

No. 1146-I.—With reference to the Notification of the Government of India in the Foreign Department, No. 1143 I, dated the 22nd March, 1888, the Governor-General in Council is pleased to appoint Mr. F. C. Crawford, an Assistant Superintendent of Police in the Hyderabad Assigned Districts, to be Superintendent of Railway Police for the purposes of the said Notification.

No. 1147-I.—In exercise of the powers conferred by section 6 of Act XXI of 1879 (the Foreign Jurisdiction and Extradition Act, 1879), the Governor-General in Council is pleased to appoint the Second Assistant to the Resident at Hyderabad, being a European British subject, to be a Justice of the Peace in the Hyderabad State.

No. 1150-I.—In exercise of the powers conferred by Section 6 of Act XXI of 1879 (the Foreign Jurisdiction and Extradition Act, 1879), the Governor-General in Council is pleased to appoint Major-General A. H. E. Campbell to be a Justice of the Peace in the Hyderabad State.

The 23rd March, 1888.

No. 1163-I.—Whereas the Governor-General in Council has power and jurisdiction within the cantonment of Baroda:—In exercise of this jurisdiction and of the powers conferred by sections 4 and 5 of the Foreign Jurisdiction and Extradition Act, 1879, and of all other powers enabling him in this behalf, the Governor-General in Council is pleased to issue the following orders:—

PART I.

The provisions, so far as they may be applicable, and as amended for the time being by subsequent Acts, of the Acts mentioned below are hereby extended to the cantonment of Baroda, namely:—

Act XVIII of 1850 (Protection of Judicial Officers);

Act XLV of 1860 (the Indian Penal Code);

Act VI of 1864 (the Whipping Act);

Act I of 1872 (the Indian Evidence Act, 1872); and

Act X of 1882 (the Code of Criminal Procedure, 1882).

PART II.

For the purposes of the exercise of criminal jurisdiction within the cantonment of Baroda—

(1) the Cantonment Magistrate for the time being of Baroda shall exercise the powers of a District Magistrate as described in the Code of Criminal Procedure, 1882;

(2) the First Assistant for the time being to the Agent to the Governor-General at Baroda

shall exercise the powers of a Court of Session as described in the Code of Criminal Procedure, 1882;

(3) the Agent to the Governor-General at Baroda for the time being shall exercise the powers of a High Court as described in the Code of Criminal Procedure, 1882, in respect of all offences over which the jurisdiction of a Court of Session is exercised by the First Assistant, except that, in cases in which the Code requires the sentence of a Court of Session to be confirmed by the High Court, the sentence shall be referred for confirmation to the Governor-General in Council instead of to the Agent to the Governor-General;

(4) in the exercise of the jurisdiction of a Court of Session conferred on him by these orders, the First Assistant to the Agent to the Governor-General may take cognizance of any offence, as a Court of original criminal jurisdiction, without the accused person being committed to him by a Magistrate, and shall, when so taking cognizance of any offence, follow the procedure laid down by the Code of Criminal Procedure, 1882, for the trial of warrant cases by Magistrates;

(5) a trial before the First Assistant to the Agent to the Governor-General of an accused person who has been committed by a Magistrate may be without jury or aid of assessors.

(6) This part of these orders applies to all proceedings except—

(a) proceedings against European British subjects or persons jointly charged with European British subjects, and

(b) proceedings pending at the date of this Notification, which should be carried on as if this Notification had not been issued.

(7) The Notification of the Government of India in the Foreign Department, No. 3125-I., dated the 1st September, 1886, is hereby cancelled.

No. 1164-I.—In exercise of the powers conferred by section 6 of the Foreign Jurisdiction and Extradition Act, 1879, the Governor-General in Council is pleased to appoint the Agent to the Governor-General for the time being at Baroda, the First Assistant for the time being to the said Agent, and the Cantonment Magistrate for the time being of Baroda, being European British subjects, to be Justices of the Peace within the limits of the Cantonment of Baroda.

2. The following Notifications of the Government of India in the Foreign Department are hereby cancelled:—

No. 3934-I., dated the 5th November, 1886.

No. 3936-I., dated the 5th November, 1886.

JOHN ELIOT,
Offg. Meteorological Reporter to the
Government of India.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat; the copies for subscribers registered by Messrs. Thacker, Spink & Co. are distributed by that firm; and the Madras, Bombay and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad, respectively.

In supersession of previous advertisements, on and from the 1st January, 1885, the terms of subscription and sale will be as follows:—

Terms of subscription, payable annually in advance.

	Without postage.	With postage.
For the complete Series, including postage	Rs. 22	Rs. 8
For the Calcutta Series	Rs. 10	Rs. 2
„ each of the Madras, Bombay and Allahabad Series.	„ 0	„ 7
„ a part of the Calcutta Series purchased separately, inclusive of postage in India	„	„ 2
„ a part of the Madras, Bombay and Allahabad Series purchased separately, inclusive of postage in India	„	„ 1

Persons desiring to subscribe for, or purchase, the Report, should apply to—

Messrs. Thacker, Spink and Co., Calcutta.

„ Thacker & Co., Bombay.

„ Higginbotham & Co., Madras.

The Government Central Book Depot, Bombay.

„ The Curator of Government Books, North-Western Provinces and Oudh.

„ Superintendent of Government Printing, Bengal.

Back parts of the Indian Law Reports may now be had at the above quoted rates.

NOTICE.

Indian Law Reports.

Advertisements will be received for publication on the wrappers of the Indian Law Reports, Calcutta Series, by the Calcutta Central Press Company, "Limited," 5-11, Council House Street, at the following rates, payable in advance:—

	One page.	Half page.	Quarter page.

EMIGRATION.

The 29th March, 1888.

No. 7 E.—In modification of the Notification No. 121 E., of the 1st April, 1886, which declared that a consolidated fee of ₹2-8 would be levied under Sections 38 and 73 of the Indian Emigration Act, XXI of 1883, on account of each emigrant who embarks on board an emigrant vessel for the colonies, the Governor-General in Council is pleased to declare that for every emigrant embarking for the colonies after the 31st March, 1888, a consolidated fee of ₹3-0 will be levied under the sections above referred to.

E. C. BUCK,

Secretary to the Government of India.

FOREIGN DEPARTMENT.

NOTIFICATIONS.

Fort William, the 29th March, 1888.

No. 567-G.—Consequent on the return to duty of Mr. H. M. Durand, C.S.I., C.S., Secretary to the Government of India in the Foreign Department, the following reversions are made in the Foreign Department, with effect from the forenoon of the 19th March, 1888:—

Mr. W. J. Cunningham, B.C.S., from Officiating Secretary, to his substantive appointment as Under-Secretary to the Government of India in the Foreign Department.

Mr. J. A. Crawford, B.C.S., Officiating Under-Secretary, is appointed to be Junior Under-Secretary to the Government of India in the Foreign Department.

No. 568-G.—Captain G. E. Money, Squadron Commander, 1st Regiment, Central India Horse, officiated as Political Assistant at Goona, in addition to his other duties, from the afternoon of the 17th December, 1887, to the forenoon of the 21st February, 1888, during the absence of Major H. A. Vincent.

No. 570-G.—Surgeon-Major T. Ffrench Mullen, M.D., Agency Surgeon at Ulwar, is appointed to officiate as Residency Surgeon in the Persian Gulf, with effect from the date of joining and during the absence on furlough of Surgeon D. R. Ross, or until further orders.

No. 572-G.—Sir L. H. Griffin, K.C.S.I., C.S., Resident of the 1st class and Governor-General's Agent in Central India, is granted furlough to Europe, on medical certificate, for one year, with effect from the 15th April, 1888, or the subsequent date on which he may avail himself of it.

No. 574-G.—Mr. J. A. Crawford, B.C.S., Junior Under-Secretary to the Government of India in the Foreign Department, is granted privilege leave for three months, with effect from the date on which he may avail himself of it.

No. 577-G.—The following promotions are made in the graded list of the Political Department, with effect from the 2nd March, 1888, consequent on the grant of furlough to Major G. Gaisford, Officiating Political Assistant of the 1st class:—

Captain A. F. DeLaessoe, C.M.G., C.I.E., Officiating Political Assistant of the 2nd class, to officiate as a Political Assistant of the 1st class.

Lieutenant J. Ramsay, Political Assistant of the 3rd class, substantive *pro tempore*, to officiate as a Political Assistant of the 2nd class.

Captain E. R. Penrose, Officiating Political Assistant of the 3rd class, to be Political Assistant of the 3rd class, substantive *pro tempore*.

No. 581-G.—The following reversions are made in the graded list of the Political Department, with effect from the 15th March, 1888, consequent on the return from furlough of Colonel E. S. Reynolds, Political Agent of the 2nd class:—

Major E. A. Fraser, from Officiating Political Agent of the 2nd class, to his substantive grade of Political Agent of the 3rd class.

Captain H. L. Ramsay, from Officiating Political Agent of the 3rd class, to his substantive grade of Political Assistant of the 1st class.

The 30th March, 1888.

No. 586-G.—The following reversion is made in the graded list of the Political Department, with effect from the 22nd March, 1888, consequent on the return from boundary duty of Mr. Ney Elias, C.I.E., Political Agent of the 3rd class:—

Mr. P. J. C. Robertson, from Officiating Political Agent of the 3rd class to his substantive grade of Political Assistant of the 1st class.

No. 589-G.—Mr. Ney Elias, C.I.E., Political Agent of the 3rd class, is posted as Assistant to the Agent to the Governor-General in Rajputana, with effect from the 22nd March, 1888.

The 26th March, 1888.

No. 1184-I.—The Governor-General in Council has received with satisfaction the information that the Thakur of Tharad in the Bombay Presidency has undertaken to abolish transit duties in his estate.

The 28th March, 1888.

No. 1225-I.—The Notifications cited marginally, which defined, for the purposes of Act XIV of 1860, the limits of the premises occupied by the late King of Oudh, and which were published in the Calcutta Gazettes of the 21st July, 1860, and the 11th April, 1863, respectively, are hereby cancelled.

H. M. DURAND,

Secretary to the Government of India.

DEPARTMENT OF FINANCE AND COMMERCE.

NOTIFICATIONS.

Calcutta, the 27th March, 1888.

No. 1605.

ACCOUNTS AND FINANCE.

SAVINGS BANKS.

RESOLUTION—By the Government of India, Department of Finance and Commerce.

READ—

Report by the Comptroller and Auditor General on Savings Banks for the year 1886-87 and annexed statements.

Ordered, that the report and the statements be published in the *Gazette of India* for general information.

No. 180, dated 30th January 1888.

From—E. GAY, Esq., Comptroller and Auditor General,

To—The Secretary to the Government of India, DEPT. OF FINANCE AND COMMERCE.

I have the honour to submit my report for the year 1886-87 on the Savings Banks established by Government in this country. The report is late this year, as it has been necessary to reconcile the figures in it with the Finance and Revenue Accounts of the year, and this at first presented some difficulty owing to a misunderstanding which has now been removed.

2. There are two descriptions of these Banks, *viz.*, Banks open to the Public and Service Institutions; the former comprise Presidency and Post Office Banks, and the latter State Railway Provident Institutions, Civil Engineers' Provident Fund and Military Banks. The State Railway Provident Institutions are for the non-pensionable employés of the State Railways. The Civil Engineers' Provident Fund is for the officers of the Public Works and Telegraph Departments, and the Military Banks for the non-commissioned officers and soldiers of the European Army; but when these men leave their regiments and go on detached military service, they are permitted under special arrangements to transfer their savings to a Presidency Bank.

3. Nothing special has occurred during the year in connection with these Banks. I enclose the usual statements marked I to VII, the principal facts in which may be summarised as follows:—On the 31st March 1887 there were 6,230 Government Savings Banks in India, and they contained 289,445 accounts, which received from Government ₹19,67,668 as interest and possessed balances aggregating ₹5,79,86,983. In addition to these balances the depositors held Government Promissory Notes, of which those in my custody amounted to ₹3,99,100 and in that of the Accountant General, Bombay, to ₹18,300, making a total of ₹4,17,400. The notes purchased on this account in Madras were withdrawn by the depositors. The following table distributes these figures among the several classes of Banks:—

DESCRIPTION OF BANKS.	Number of Banks.	Number of Depositors.	Interest earned.	Bank Balances.	Nominal value of Government Promissory Notes.
			₹	₹	₹
Presidency, Calcutta	1	11,155	97,562	26,75,965	16,100
Do., Madras	1	3,713	28,291	8,07,724	...
Do., Bombay	1	26,700	2,91,181	81,46,805	18,300
Railway	12	12,168	62,824	18,83,905	4,200
Civil Engineers	1	380	15,127	4,89,859	...
Military	160	16,151	58,039	14,09,542	...
Post Office	6,048	219,010	14,14,644	4,25,71,760	3,78,800

4. The net result of the year's operations will be observed from the subjoined statement:—

NAMES OF BANKS.	NUMBER OF BANKS.		NUMBER OF ACCOUNTS.		BANK BALANCES.		GOVERNMENT PROMISSORY NOTES.		AVERAGE OF DEPOSITOR'S BALANCES.	
	Increase.	Decrease.	Increase.	Decrease.	Increase.	Decrease.	Increase.	Decrease.	Increase.	Decrease.
Presidency, Calcutta	391	...	1,26,272	2,500	13
Do., Madras	6,413	...	18,09,922	40
Do., Bombay	21,728	...	82,62,897	13,000	34
Railway	1	530	...	51,889	...	1,500	3
Civil Engineers	67	...	2,18,754	423	...
Military	2	633	...	22,645	14
Post Office . . .	215	...	61,001	...	2,00,25,869	...	96,500	...	49	...

The chief increase is in the Post Office Savings Banks, and is partly due to transfers from the Presidency and District Banks. The decrease in the Railway Banks is caused by amalgamation of the Cawnpur-Achneyra with the Rajputana Bank and the Dacca and Northern Bengal with the Eastern Bengal Bank; but on the other hand a New Bank under the designation of Bilaspur-Etawah has been opened in January 1887. According to statement IV there has been a decline in the Bombay Military Banks, while those in Bengal and Madras have increased their deposits.

5. The investments by depositors in Government Promissory Notes continue to rise, while the increase in deposits as received in the Post Office Banks is spread through every Province of India.

6. I have checked these Savings Banks Accounts with those of the Provincial Accountants General, the Accountant General, Public Works Department, and the Examiners of Accounts of the several State Railways, and have settled all differences with the exception of the amounts connected with the Chittagong Bank in which frauds were committed two years ago, as explained in my report of last year. These differences have not yet been adjusted, as the claims upon the Bank are not fully established.

STATEMENT I.

Number of Working Banks and of the Depositors therein on 31st March 1886-87. '

ACCOUNTS AND FINANCE.
MINT.

The 28th March, 1888.

No. 1645.

RESOLUTION—By the Government of India, Department of Finance and Commerce.

READ the undermentioned letters transmitting reports on the working of the Mints and the Assay Offices of Calcutta and Bombay for the year 1886-87:—

- From Lieutenant-Colonel R. V. Riddell, R.E., Mint Master, Calcutta, No. 1133, dated the 13th September 1887.
- From Major-General J. H. White, R.E., Mint Master, Bombay, No. 1133, dated the 23rd September 1887.
- From Surgeon-Major J. Scully, Assay Master, Calcutta, Nos. 59 and 68, dated the 20th August and 13th October 1887, respectively.
- From Major G. Martin, F.R.G.S., F.C.S., Assay Master, Bombay, No. 52, dated the 25th June 1887.

I.—REPORTS ON THE WORKING OF THE MINTS.

Imports and coinage : Gold.—The net imports of gold into India in 1886-87 amounted in value to **Rs. 2,17,70,652** against **Rs. 2,76,29,347** in 1885-86. No gold was coined in either Mint. In Calcutta, gold of the value of **Rs. 92,686**, consisting almost entirely of bazar bar gold, was tendered for coinage, the tenderers being paid in gold mohurs from the reserve stock in the Bank of Bengal. A quantity of low touch gold, valued at **Rs. 91,980**, obtained from the melting down of plate, foil, &c., was also received in the Calcutta Mint from the Prize Committee at Mandalay; but, not being fit for coinage, was sold on behalf of the Committee.

In the Bombay Mint the stock of gold at the beginning of 1886-87 represented a value of only **Rs. 4,602**. It was increased to **Rs. 4,632** by 10 gold coins received from the Royal Asiatic Society. No gold was tendered for coinage by the public, and the only issues were in the form of medals for public departments and private individuals to the value of **Rs. 1,399**.

2. Imports and coinage : Silver.—The net imports of silver into India and the coinage in each year in both the Mints from 1872-73 were:—

							Net imports, Lakhs.	Coinage, Lakhs.
1872-73	72	398
1873-74	249	237
1874-75	464	490
1875-76	155	255
1876-77	720	627
1877-78	1,468	1,618
1878-79	397	721
1879-80	787	1,025
1880-81	389	425
1881-82	538	219
1882-83	748	651
1883-84	641	366
1884-85	725	579
1885-86	1,161	1,029
1886-87	716	462
TOTAL							9,230	9,102

Of the imports of the year, **625½ lakhs** were into Bombay, of which only **320½ lakhs** were tendered at the Mint. General White says that it is believed that the remainder was absorbed by the requirements of Native States. The coinage at both Mints during the year was much less than half that of the previous year.

3. *Total coinage: Gold and Silver.*—The value of the total coinage of gold and silver at each mint is shown below separately for the last five years:—

	CALCUTTA MINT.					BOMBAY MINT.				
	1882-83.	1883-84.	1884-85.	1885-86.	1886-87.	1882-83.	1883-84.	1884-85.	1885-86.	1886-87.
Gold	1,74,945	1,29,845	2,25,855
Silver	1,42,00,076	1,27,46,606	1,23,71,066	3,40,07,321	1,07,45,718	5,07,86,194	2,39,97,405	4,56,71,252	6,81,54,350	3,54,19,642
TOTAL	1,44,74,021	1,27,46,606	1,25,00,911	3,40,23,176	1,07,45,718	5,07,86,194	2,39,97,405	4,56,71,252	6,81,54,350	3,54,19,642

4. *Recoinage of old coin.*—The amount of defaced and uncurrent coin remitted to the Calcutta Mint for recoinage was R11,37,424, being less than that of the previous year by R31,61,712. This included Burmese Peacock rupees of the nominal value of R2,70,386, shroff-marked coin valued at R3,37,352, and uncurrent coin of the value of R4,51,068 transferred from the Bombay Mint. In the Bombay Mint the amount of uncurrent coin received for recoinage was 3½ lakhs of rupees, including coin of native mintage to the value of a lakh. The loss on recoinage operations amounted to R13,125 in Calcutta and R3,081 in Bombay.

5. *Silver tendered for coinage by or on behalf of the Currency Department.*—In 1886-87, silver to the value of R1,59,82,723 was tendered through the Currency Department for coinage in the Calcutta Mint; in 1885-86, the value was R1,83,23,963.

In the Bombay Mint R3,46,18,702 was tendered for coinage through the Currency Department. Of this sum R51,31,296 was transferred to Calcutta to be coined there; this sum is part of the 159 lakhs mentioned above.

6. *Copper coinage.*—The coinage of copper amounted to R11,71,289 in 1886-87 against R8,13,610 in 1885-86, more than three-fourths being coined in Calcutta. Cent pieces of the value of R34,020 and R50,300 were coined in Calcutta for the Governments of Ceylon and the Straits Settlements respectively. Tangas were coined for the Portuguese Indian Government to the value of R1,07,631 in Calcutta and R2,370 in Bombay.

The coinage of copper in each mint for the last five years has been as follows:—

	CALCUTTA.	BOMBAY.
	Value in R	Value in R
1882-83	8,62,580	2,14,214
1883-84	11,54,245	2,19,389
1884-85	7,02,560	3,55,250
1885-86	8,13,610
1886-87	9,13,955	2,57,334

For the Calcutta Mint nearly 15,000 maunds of copper slabs were purchased locally at an average rate of R23½ a maund, this rate being less than that of the previous year by R2½ a maund. The Bombay Mint obtained its copper from England through the India Office, the cost averaging R22 per maund against R24½ per maund in 1885-86, but the Mint Master says that the slabs recently sent out are of rather inferior quality.

7. The gain on the copper coinage in both Mints for the last five years is shown below:—

	R
1882-83	3,50,091
1883-84	5,60,227
1884-85	5,69,684
1885-86	1,11,053
1886-87	7,67,040

The coinage in 1885-86 was much smaller than in any of the other years mentioned. There was besides a loss on the mintage operations in Bombay which

had the effect of reducing to some extent the amount of net gain during that year.

8. *Operative losses in Mints.*—The operative losses at Calcutta and Bombay during 1886-87 were R23,849 and R21,447 against R96,063 and R60,736 in the preceding year.

The loss in the melting and mechanical departments of each mint per lakh of rupees during 1886-87 and the four previous years was as follows :—

	MELTING DEPARTMENT.		MECHANICAL DEPARTMENT.	
	Calcutta.	Bombay.	Calcutta. (approximate figures).	Bombay.
	R	R	R	R
1882-83	37.9	39.8	24.2	33.0
1883-84	37.9	50.4	16.6	30.4
1884-85	34.9	30.8	10.5	18.8
1885-86	27.0	33.1	3.9	5.3
1886-87	21.7	20.5	5.5	8.9

9. *Revenue and Expenditure.*—Total revenue and expenditure in connection with each mint from 1882-83 to 1886-87 :—

	REVENUE.						EXPENDITURE.		
	SEIGNORAGE.		TOTAL.	OTHER RECEIPTS.		TOTAL.	Calcutta.	Bombay.	TOTAL.
	Calcutta.	Bombay.		Calcutta.	Bombay.				
	R	R	R	R	R	R	R	R	R
1882-83	1,80,208	8,51,781	10,31,989	90,005	3,05,877	3,95,882	10,51,988	9,42,708	19,94,696
883-84	1,41,238	4,77,404	6,18,782	82,649	80,140	1,62,789	9,75,328	7,46,422	17,21,750
1884-85	2,19,718	8,74,585	10,94,303	64,013	1,29,031	1,93,044	12,06,283	8,39,084	20,45,367
1885-86	5,72,608	13,62,356	19,34,964	80,147	1,77,907	2,58,054	10,56,864	9,66,728	20,23,592
1886-87	2,01,787	6,87,834	8,89,621	60,724	93,991	1,54,715	8,46,922	7,43,318	15,90,240
	13,15,609	42,54,050	55,69,659	3,77,538	7,60,946	11,64,484	51,37,385	42,38,260	93,75,645
	67,34,143						93,75,642		

The total revenue at both mints during the last five years is less than the total expenditure during that period by R26,41,499. This gives an average loss of R5,28,300 a year, entirely in Calcutta.

10. The expenditure on account of salaries and establishments in the two mints during 1886-87 was R5,18,632, being less than that of the previous year by R44,490 as shown below :—

	CALCUTTA.			BOMBAY.		
	1885-86.	1886-87.	Increase + Decrease -	1885-86.	1886-87.	Increase + Decrease -
	R	R	R	R	R	R
Fixed Establishment	2,04,401	1,87,512	-16,889	2,15,853	2,17,238	+1,385
Extra Establishment	82,950	74,729	-8,221	59,918	39,153	-20,765
TOTAL	2,87,351	2,62,241	-25,110	2,75,771	2,56,391	-19,380

The diminished outlay in Calcutta in 1886-87 is due mainly to, (1) the Mint Master having been on furlough in 1886; (2) the absence of the Head Engraver; and (3) the fact that while for ten months in 1885-86 a large extra

establishment was required for the coinage of silver, as well as of copper, in 1886-87 a somewhat similar establishment was required for only five months of the year.

11. The expenditure on stores in Calcutta during 1886-87 was R65,780 against R86,792, and in Bombay R70,282 against R2,38,603, in the previous year. The reduced expenditure in Calcutta was due to the smaller quantity of silver coined. In Bombay, there was a large expenditure in 1885-86 for new lever presses and for fuel.

12. *Pro forma charges.*—In the Calcutta Mint these charges amount in 1886-87 to R4,33,068 against R5,37,874 in 1885-86, shewing a decrease of R1,04,806 as follows:—

	1885-86.	1886-87.	Increase + Decrease -
Cost of pension and furlough allowances	29,366	30,446	+1,080
Interest on Stock and Block	5,08,508	4,02,022	-1,05,886
TOTAL	5,37,874	4,33,068	-1,04,806

The cost of pension and furlough allowances of superior servants has in 1886-87 been rightly calculated at one-sixth of the salary, instead of one-seventh as was done in 1885-86. The decrease in the interest on stock and block is principally due to the smaller average silver balance as well as smaller balances of copper and stores in 1886-87.

13. *Capital Account.*—The capital account of the Calcutta Mint has been scarcely affected during the year 1886-87. The balance of the account at the commencement of the year stood at R76,35,773 and at the end at R76,36,686. The addition for original works was only R1,293, and it is expected by the Mint Master that for years to come there will be no material addition on this account.

In the Bombay Mint R18,325 was debited to capital account on account of buildings and plant. At the close of 1886-87 the balance of the account at debit to the mint was R35,68,217.

14. *Alterations in the machinery and working of the mints.*—The alterations and additions to the machinery in the Calcutta Mint, which were commenced four years ago to enable the mint to coin 3½ lakhs of rupees daily in a day of seven working hours, were finished in the year.

In the Adjusting Department of the Bombay Mint, the Calcutta system of work was introduced by Major Baird as Officiating Mint Master with great success. The rejections of light and heavy bits have been much reduced, and though the average is not yet as good as in Calcutta, it is 5 per cent. better than it was.

II.—REPORTS ON THE WORKING OF THE ASSAY OFFICES.

15. *Number of Assays made.*—The total number of assays made during 1886-87 in Calcutta was 10,605 against 19,630 in the previous year, and in Bombay 19,937 against 32,319. The decrease was due to the smaller quantity of silver received for coinage.

16. *Assays of silver bullion alligted to standard in the Calcutta Mint.*—The average fineness of the mixtures of silver and alloy for the purpose of coinage in the Calcutta Mint was 916.084 against 916.14 in the previous year.

17. *"Parting" assay of silver coins.*—The average proportion of gold found in silver coins at the Calcutta Mint during 1886-87 amounted to .283 per mille against .227 in the previous year. The maximum and the minimum found in March and February 1887 were .561 and .051 respectively.

The average of the Bombay Mint was .290 per mille, the maximum being .636 found in May 1886 and the minimum .156 found in February 1887. The average of 1885-86 was .239 per mille.

18. *Pyx trials of silver coins.*—The procedure in regard to these trials was described in the Resolution on the working of the Mints in 1885-86, but it may conveniently be repeated here. It is as follows :—

From every lakh of rupees coined, a certain number of pieces are taken at random. Of these, some coins are assayed singly and the remainder are melted and assayed together. The combined results of these two kinds of assay give the average fineness for the lakh. To test the weight of the rupees, sample pieces are taken at random from every lakh struck and weighed on an assay balance, coin by coin.

The difficulties in the way of securing an accurate standard of fineness and weight are thus described by Dr. Scully in paragraph 19 of his report :—

“ In the present stage of the art of minting it is quite impossible to avoid these variations in the weight and fineness of individual silver coins. It will readily be understood that when coins have to be manufactured at the rate of three or four lakhs a day, it must be impracticable to make them all of exactly the same weight. A most minute difference in the thickness of different parts of a strap from which the coins have to be cut out will occasion serious differences in the weights of the individual pieces.

“ The variation in fineness which has been pointed out results from an inherent property of some silver-copper alloys. When these two metals are mixed together by melting and thorough stirring, the fluid mass of metal will be of even composition throughout. But in the act of solidifying, this uniformity of composition is spontaneously altered in all directions, so that the proportions of silver found in different parts of a single coinage bar will vary to a remarkable extent. For instance in a bar having an average composition of 916 per mille, the extreme outer edge may contain only 913 of silver, and the core or central part as much as 920. Lengthways too, one end of the bar will be richer in silver than the opposite extremity ; and along any line in the bar in this direction variations will be found at every inch of surface. The coins resulting from such a bar must necessarily vary in fineness in the same way, though not quite to the same extent as the bar itself.”

The average results of the pyx trials of the silver coins in the Calcutta Mint are summarised in the following statement :—

DENOMINATION.	Number of coins weighed.	Number of coins assayed.	Average weight (grains).	Average fineness (per mille).	Proportion of gold in pyx coins per mille.
Rupees . . .	690	2,070	179.959	916.754	0.283
$\frac{1}{2}$ rupees . . .	350	1,750	90.008	916.573	
$\frac{1}{4}$ rupees . . .	670	6,700	45.014	916.629	
$\frac{1}{8}$ rupees . . .	650	13,000	22.506	916.581	

In the case of the Bombay Mint the Assay Master has given the result of the trial of the pyx for weight.

There were 367 pyx trials in all. Among the coins tested for weight only 12 were found beyond remedy, of which 8 were above and 4 below the standard. Two lakhs had to be re-adjusted for weight in consequence of two coins being found beyond remedy, in one case the coins being too heavy and in the other too light.

The Assay Master has only given a rough calculation of the fineness of the coin issued. The Mint Master, Bombay, has calculated the assay value upon the actual weight and fineness of the silver coins put into circulation during the year.

The details are given below :—

	Weight.	Fineness.	Value.	Average Weight.
Rupees .	3,40,46,650.9	916.431	3,40,37,914.9	180.00
$\frac{1}{2}$ rupees .	5,57,965	916.132	5,57,639.8	90.00
$\frac{1}{4}$ rupees .	4,20,507.5	915.867	4,20,140.5	44.96
$\frac{1}{8}$ rupees .	3,94,061	916.017	3,93,781.6	22.48
	3,54,19,184.4		3,54,09,476.8	

showing a gain of R10,166 on the issue of new coin. The number of coins used to determine the average fineness was R4,53,699.

The weight and fineness of individual coins vary much, though they are always well within the remedy allowed by law. In Calcutta last year the heaviest rupee was found to weigh 180.80 grains, the lightest 179.20; the greatest fineness of a single rupee was 918.6 per mille, the least 915.2.

exceed one-sixth of the whole income, in respect of which the person would, but for these exemptions, be liable.

- (3) Interest on securities which are held by, or are the property of, a Service Fund or a Friendly Society, as defined below :—

For the purposes of this exemption, a Service Fund is a fund established under the authority, or with the permission, of Government for the purpose of securing deferred annuities to the subscribers, or payments to them in the event of their resignation of or dismissal from the service in which they are employed, or provision for their wives or children after their death, or payments to their estate or their nominees upon their death; to which the servants of Government, or of a Local Authority, or of a Railway Company are alone admissible as subscribers or members, and the funds of which are either deposited with Government or invested in Government Securities;

and a Friendly Society is a Mutual Association established for the purpose of securing deferred annuities to the subscribers or provision for their wives or children after their death or payments to their estate or their nominees, upon their death; and in which the payment which may be made in respect of any one nominee does not exceed either a single payment of Rs. 3,000 or an annual payment of Rs. 500.

CODES.

The 28th March, 1888.

No. 1656.

CIVIL LEAVE CODE.

Page 163.

Sections 57, 58, and 59.

Substitute the following for these sections :—

57. An officer on ordinary furlough is entitled to a leave allowance equal to half his average salary subject to the following limits :—

- (a) in the case of a Covenanted Civil Servant—

(i) if paid at the Home Treasury of the Government of India, maximum £250 a quarter, and minimum £125 a quarter, or his last salary, whichever is less;

(ii) if paid in India, maximum Rs. 833½ a month, and minimum Rs. 416½ a month, or his last salary, whichever is less;

- (b) in the case of a Military Officer subject to Civil Rules—

the same maxima and minima as in the case of a Covenanted Civil Servant. Provided that, during furlough added, under proviso ii to Section 48 to the furlough earned under Civil Rules, the minimum shall be that prescribed by the Military Rules to which the officer was previously subject;

- (c) in the case of an Uncovenanted Officer—

(i) if paid at the Home Treasury of the Government of India, maximum £200 a quarter; no minimum.

(ii) if paid in India, maximum Rs. 666½ a month; no minimum.

Rule 1.—In the case of a military officer subject to military rules who takes subsidiary or preparatory leave, before furlough, the words “prior to his proceeding on furlough” in Rule V of the Military Furlough Regulations of the 10th November 1868 shall be understood to mean *before he is relieved of his duties.*

Rule 2.—An officer on furlough or special leave does not forfeit his past leave allowances by resigning the service without returning to India.

The 29th March, 1888.

No. 1692.

CIVIL PENSION CODE.

Page 57.

Section 110.

Rule 1.

Add the following to this rule:—

"The Local Government may delegate to Heads of Departments or to officers not under the rank of Collectors or District Judges, the power of declaring any non-gazetted subordinate to be efficient and permitting him to remain in the service for a definite period, up to, but not beyond, the age of 60 years. Each such subordinate's case must be taken up when he is 55 years old and after each extension of service. If the Head of Department or other officer does not consider him efficient, the case should be reported to the Local Government for orders."

No. 1711.

CIVIL PENSION CODE.

Page 3.

Section 8.

Add the following to proviso (3) of this section:—

"And also to any increase to a net salary which, before the increase, exceeds ₹250 a month."

E. J. SINKINSON,

Offg. Secretary to the Government of India.

MILITARY DEPARTMENT.

Fort William, the 30th March, 1888.

APPOINTMENTS.

No. 263.—STAFF CORPS—

With reference to G. G. O. No. 196 of 1888, Second Lieutenant G. R. DeH. Smith, North Lancashire Regiment, is posted to the Bengal instead of to the Madras Staff Corps, with effect from the date of his arrival in India.

FURLOUGH AND LEAVE.

No. 264.—The undermentioned officers are granted furlough out of India, with the necessary subsidiary leave:—

Colonel H. J. Nuthall, Bengal S.C., Executive Engineer, 1st grade, Public Works Department, (p. a.) for two years, under rule IX of the regulations of 1868, with effect from the 10th July, 1887.

Major G. Gaisford, Bengal S. C., Political Assistant, 2nd class, officiating 1st class, Assistant Political Agent, Thal-Chotiali, (p. a.) for one year, under rule IX of the regulations of 1868, with effect from the 4th March, 1888.

Surgeon-Major R. Harvey, M.D., Professor of Midwifery, Medical College, and Obstetric Physician to the College Hospital,

Calcutta, (m. c.) for 216 days, under rule XIV, clause I, of the regulations of 1868.

Surgeon-Major B. B. Gupta, M.B., (p. a.) for two years, under rule IX of the regulations of 1868.

First grade Senior Apothecary T. M. Sullivan, (m. c.) for 214 days, under the regulations of 1854.

Sub-Conductor S. J. Coleman, Barrack-master, 1st class, Military Works Department, (m. c.) for one year, under rule VI of the regulations of 1875.

Sub-Conductor L. Falkland, Commissariat Department, (m. c.) for one year, under rule VI of the regulations of 1875.

Sub-Conductor P. Hay, Military Works Department, (m. c.) for one year, under rule VI of the regulations of 1875.

No. 265.—With reference to G. G. O. No. 919, dated 25th November, 1887, Lieutenant C. Schofield, Bengal S. C., has been granted by the Secretary of State for India, furlough out of India, (m. c.) for one year, under rule VI of the regulations of 1875, with effect from 31st December, 1887.

No. 266.—The undermentioned officers are granted leave out of India under the leave rules for the Staff Corps, with effect from the dates on which they are respectively struck off duty:—

Lieutenant-Colonel T. O. Wingate, Bengal S. C., Military Works Department, (p. a.) for one year. Pension service,—26th year commenced 24th June, 1887.

Captain R. F. Jameson, Bengal S. C., 5th Punjab Infantry, Punjab Frontier Force, (m. c.) for one year. Pension service,—17th year commenced 28th October, 1887.

Captain H. R. L. Holmes, Bengal S. C., 36th Bengal Infantry, (p. a.) for 213 days. Pension service,—15th year commenced 9th August, 1887.

No. 267.—The special leave granted to Colonel J. M. Heywood, R.E., in G. G. O. No. 200 of 1888, is for one year.

No. 268.—With reference to G. G. O. No. 9, dated 6th January, 1888, Lieutenant C. F. Dobbie, Yorkshire Light Infantry, Probationer, Bengal S.C., has been granted, by the Secretary of State for India, leave out of India (m.c.) until the 30th June, 1888, under the leave rules for the Staff Corps. Pension service,—4th year commenced 7th March, 1888.

No. 269.—Lieutenant H. C. Vesey, 2nd Battalion, Lincolnshire Regiment, Probationer, Bengal S. C., is permitted to proceed to England, (m.c.) under paragraph 98, Army Regulations, India, Volume II.

No. 270.—The special leave granted to Colonel C. H. Luard, R.E., in Public Works Department Notification No. 407, dated 28th December, 1887, has been extended by the Secretary of State for India to the 14th December, 1888.

No. 271.—Colonel Sir J. Johnstone, K.C.S.I., Bengal Infantry, has been granted, by the Secre-

tary of State for India, an extension of furlough (m.c.) until the 16th July, 1888.

LONDON GAZETTE.

MADRAS STAFF CORPS.

The undermentioned Colonels, Madras, have been transferred to the Unemployed Supernumerary List. Dated 20th January, 1888 :—

John William Orr.

Alexander Charles Hay.

PROMOTIONS.

NATIVE ARMY.

6th Bengal Infantry.

No. 273.—Subadar Laddha Singh to be Subadar-Major, Jemadar Jahángir Bakhsh to be Subadar, and Havildar Mahdi Husain to be Jemadar, *vice* Subadar-Major Khazam Ali Khan, invalided,—with effect from the 1st February, 1888.

25th Bengal Infantry.

No. 274.—Havildar Santa Singh to be Jemadar, *vice* Jemadar Híra Singh, transferred to the 36th Bengal Infantry,—with effect from the 20th July, 1887.

38th Bengal Infantry.

No. 275.—Jemadar Gyadín Singh, from the 11th Bengal Infantry, to be Subadar, *vice* Subadar-Major Rambhungan Singh, invalided,—with effect from the 1st October, 1887.

No. 276.—With reference to G. G. O. No. 549 of 1871 His Excellency the Governor-General in Council is pleased to confer on pensioned Quartermaster Sergeant William Young, late Murree Depot, an annuity of £10,—with effect from the 1st April, 1887.

This cancels the grant of the gratuity and medal to pensioned Quartermaster Sergeant Young notified in General Order by His Excellency the Commander-in-Chief in India, dated 12th March, 1877.

No. 277.—ORDER OF BRITISH INDIA—

The Governor-General in Council is pleased to make the following promotion in and admission to the Order of British India, with effect from the date specified :—

MADRAS.

To the 1st class, with the title of Sirdar Bahadur.

Subadar-Major Venket Row, *Bahadur*, 2nd Madras Lancers, *vice* pensioned Subadar Major Mahomed Sauduck, *Sirdar Bahadur*, deceased,—31st December, 1887.

To the 2nd class, with the title of Bahadur.

Subadar Mahomed Aulum, 3rd Madras Cavalry, *vice* pensioned Subadar Jugganah, *Bahadur*, deceased,—29th December, 1887.

VOLUNTEER CORPS.

No. 278.—ORGANIZATION—

His Excellency the Governor-General in Council is pleased to sanction the formation of a Corps of Reserve Volunteers in Calcutta, to be designated the "Presidency Volunteer Reserve Battalion." This corps will be subject to the administrative control of the Officer Commanding the Administrative Battalion, Presidency Volunteers.

APPOINTMENTS.

Surma Valley Light Horse.

No. 279.—Dennis FitzPatrick, Esq., C.S.I., C.S., Chief Commissioner of Assam, to be Honorary Colonel, *vice* Sir C. A. Elliott, K.C.S.I., C.S., resigned.

Presidency Volunteer Reserve Battalion.

No. 280.—Major Reginald Craufurd Sterndale, Cantonment Magistrate, Dum-Dum, to be Commandant.

Agra Volunteer Rifle Corps.

No. 281.—Captain Henry Beaufoy Thornhill, Bengal S. C., Cantonment Magistrate, Agra, to be Major Commandant, *vice* R. E. Hamblin, who has resigned his commission.

RESIGNATIONS.

East Indian Railway Volunteer Rifle Corps.

No. 282.—Honorary Colonel Sir Bradford Leslie, K.C.I.E., resigns his appointment.

Agra Volunteer Rifle Corps.

No. 283.—Major R. E. Hamblin, Commandant, resigns his commission.

MARINE DEPARTMENT.

FURLOUGH AND LEAVE.

No. 16.—Mr. C. F. Fletcher, 1st grade officer, Indian Marine, has been granted by the Secretary of State for India an extension of furlough (m. c.) for six months.

RETIREMENTS.

No. 17.—Captain A. W. Stiffe, Indian Marine, Port Officer, Calcutta, is transferred to the Retired List, on completion of the tenure of his appointment. Dated 1st April, 1888.

E. H. H. COLLEN, *Lieut.-Colonel,*

Secretary to the Government of India.

MILITARY DEPARTMENT.

NOTIFICATION.

Calcutta, the 30th March, 1888.

Statement of Deposits on account of Estates between the 25th February and the 30th March, 1888.

On whose account.	Rank.	Corps.	Date of decease.	Testate or Intestate.	Total unclaimed amount deposited.	Amount paid in India.	Date to which claims will be received.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat; the copies for subscribers registered by Messrs. Thacker, Spink & Co. are distributed by that firm; and the Madras, Bombay and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad, respectively.

In supersession of previous advertisements, on and from the 1st January, 1888, the terms of subscription and sale will be as follows:—

LAWS AND REGULATIONS UNDER THE PROVISIONS OF
THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House on Friday, the 23rd March, 1888.

PRESENT:

His Excellency the Viceroy and Governor General of India, K.P., G.C.B.,
G.C.M.G., G.M.S.I., G.M.I.E., P.C., *presiding*.
His Honour the Lieutenant-Governor of Bengal, K.C.S.I., C.I.E.
The Hon'ble Lieutenant-General G. T. Chesney, R.E., C.B., C.S.I., C.I.E.
The Hon'ble A. R. Scoble, Q.C.
The Hon'ble Sir C. U. Aitchison, K.C.S.I., C.I.E., LL.D., D.O.L.
The Hon'ble Sir C. A. Elliott, K.C.S.I.
The Hon'ble J. Westland.
The Hon'ble Syud Ameer Hossein, C.I.E.
The Hon'ble Rájá Peári Mohan Mukerji, C.S.I.
The Hon'ble G. H. P. Evans.
The Hon'ble J. W. Quinton, C.S.I.
The Hon'ble R. Steel.
The Hon'ble F. M. Halliday:
The Hon'ble Sir Pasupati Ananda Gajapati Razu, K.C.I.E., Mahárájá of
Vizianagram.

THE FALL OF FORT LINGTU.

On the members taking their seats, His Excellency THE VICEROY said:—
“Before we commence the proceedings of today it may, perhaps, be interesting
to the Council to know that Her Majesty's troops have taken possession of Fort
Lingtu without opposition. On the 19th they came upon a small stockade
erected by the Tibetans at which some opposition was encountered, but with
their usual gallantry our troops rushed it, and the enemy fled with scarcely any
resistance. The effect of this success seems completely to have disorganised

them, and, as I have already mentioned, they have abandoned their position at Lintu. I am in great hopes that this slight and facile vindication of our treaty rights will in future free the road through Sikkim which had been blocked by the enemy, and will close this trifling dispute which has unfortunately arisen between us and the Tibetans."

DEBTORS BILL.

The Hon'ble MR. SCOBLE moved that the Report of the Select Committee on the Bill to amend the law relating to Imprisonment for Debt be taken into consideration.

The Motion was put and agreed to.

The Hon'ble RAJA PEARI MOHAN MUKERJI moved that the following sub-section be added to section 10 of the Bill :—

"(3) The provisions of this Act shall not apply to suits under Act VIII of 1885."

He said :—"Several of the Local Governments and Administrations have reserved to themselves a special procedure for the recovery of their own demands of land-revenue. The Punjab, the North-Western Provinces, the Oudh, the Madras, the Bombay and the Central Provinces Revenue Codes provide for the imprisonment of the defaulter of land-revenue independent of the provisions of the Code of Civil Procedure. In Bengal the sunset law and the certificate procedure place perhaps larger powers in the hands of the Local Government as regards the enforcement of its revenue-demands. I do not for a moment contend that these exceptional procedures for the recovery of revenue-demands are open to any serious objection, but I do most earnestly contend that those who have to pay the revenue should not be deprived, except in cases of absolute necessity, of any procedure which the law has placed at their service for the recovery of rents from their tenants. The relations between landlords and tenants radically differ from the relations subsisting between ordinary creditors and their debtors. An ordinary creditor takes care to enquire into the circumstances of the person who wants to borrow, and satisfies himself of his character and of his solvency before he lends him money; whereas a landholder has to collect small sums of money from a large number of persons, a majority of whom are notoriously improvident. It is a case of involuntary creditorship in which the creditor has no power of preventing the contraction of bad debts. There is again the important consideration that, whereas an ordinary creditor in suing for the recovery of debt sues for money which belongs to himself, a large portion of the rents which a landholder sues to recover does not belong to himself, but has to be paid to Government. The legislature has, therefore, very properly given exceptional procedures for the recovery of arrears of rent to landholders in the North-Western Provinces, Oudh, Madras and the Central Provinces.

"The effect of the measure now before this Hon'ble Council would be to place the landholders of Bengal and Behar in a singularly difficult position as regards the recovery of arrears of rent. While their brethren in several other provinces will continue to recover their rents under the present procedure, the landholders of Bengal and Behar, who have been recently deprived of the power of distraining the crops of their raiyats without the intervention of the Courts and ejecting them for non-payment of rent, would be deprived of a procedure which, without causing the slightest hardship to the raiyats, imposed a wholesome check upon improvidence and wilful recusancy. The proposed change of procedure is the more objectionable as official statistics clearly show that it is only in an extremely small number of cases that rent-defaulters are actually imprisoned. During the last official year it was only in about 600 rent-suits out of more than 100,000 that judgment-debtors were imprisoned for default of payment. There is, therefore, absolutely no case made out why there should be a change in the law regulating the relations of landlords and tenants so soon after it has been most carefully and elaborately considered and settled. It is not that this question of procedure was not considered by the Council when the Bengal Tenancy Bill was under consideration. The suggestion of the Rent Commission that the landlord shall not be entitled to resort to any other process for the recovery of rent until he has first brought the tenure or holding of the defaulter to sale

was carefully considered and ultimately rejected. Unless, therefore, this Hon'ble Council were to amend the Bill in the way suggested by me, the proposed measure would have the effect of altering one of the most important provisions of the Bengal Tenancy Act."

The Hon'ble MR. HALLIDAY said :— " My Lord, I would ask for the indulgence of the Council to permit me to make a few remarks on the amendment just moved by my hon'ble friend—an amendment which I am unable to support.

" As I understand my hon'ble friend, he is opposed to the provisions of this Bill now before the Council being made to apply to suits under Act VIII of 1885; because, among other reasons, the zamindárs of Bengal, under the provisions of the Public Works and Road Cess Acts, are placed in the position that a large portion of the claim in rent-suits represents a sum which belongs to, and has to be recovered for, the Government, and not for the plaintiffs. Upon this point I think my hon'ble friend is holding an erroneous opinion.

" The proceeds of the road-cess are, under section 9 of the Cess Act, paid into the District Road Fund, and are applied to the purposes mentioned in section 109, which are mainly construction, maintenance and repairs of roads and bridges and other means and appliances for facilitating communications within the district or between adjacent districts, and the general control and administration of the fund is vested in a committee, formed under the principles of local self-government, chiefly of gentlemen who have the requisite qualifications as payers of the road-cess of the district, and whose interest on that account it is to exercise the closest scrutiny over the manner of the expenditure of that fund.

" It can scarcely be a correct assertion then that the road-cess belongs exclusively to the Government.

" The proceeds of both the cesses in question are exclusively expended on improvement of the means of communication and other works of public utility, and these have the effect of raising the price of agricultural produce in the producing districts.

" The zamindárs under the law are entitled to get, and do in fact get, a very large, if not the largest, share of the benefits of this rise in prices, by obtaining enhanced rents. It is indeed questionable whether in some districts in this province they do not receive by way of enhancement of rents the entire benefit of the rise in prices which results from improved facilities for communication, though under the law they pay only half the cost of effecting such improvements, as their raiyats pay the other half.

" I would urge then that the hon'ble member is mistaken when he says that the zamindárs receive no consideration whatever for the risk and trouble of collecting these cesses.

" They receive very great consideration in the enhanced rents to which they are entitled in consequence of the rise in prices which ensues from improvements in communications and from the general development of the province.

" I believe I am expressing the hon'ble member's own acceptance of the amount of the cesses in question in the province at the figure of 80 lakhs, and it seems to me that these figures go to prove that the zamindárs have not been slow to take advantage of the general development of the province by obtaining enhanced rents.

" The Cess Act is in force in 43 of the districts of Bengal, and in all but the one district of Backergunge the full rate of one anna in the rupee is levied.

" Now, if 80 lakhs represent the amount of these cesses, the rental of these districts must be at least sixteen times that amount, or, allowing for the half rates in Backergunge, the rental of these districts must be in round numbers 13 crores of rupees.

" Now, the Government land-revenue demand against these districts is three and three-quarter crores, or about one-fourth of the rental.

" When it is remembered that the permanent settlement was made on the supposition that the land-revenue represented nine-tenths of the rental,

while now it represents only one-fourth part of it at the lowest estimate of the rental, it will be apparent how much the zamindárs have profited by increase in rents, due in a great measure to rise in prices from improved communications, and it will be evident how little cause that class has for saying that they get no consideration for the road and public works cesses. No valid argument for exclusion of their tenants from the operation of the Bill before the Council can therefore be based on this ground.

"I would urge, my Lord, that, whatever grounds there may be for giving the Courts discretion to exempt judgment-debtors from imprisonment in the execution of decrees, these grounds apply with greater force to agricultural raiyats than to any other class; because I hold that the possibility and probability of abuse of the power of imprisonment is greater in the case of raiyats than in the case of any other class; and moreover, in the case of cultivating tenants, the landlord or his agent most certainly has, or ought to have, a full knowledge of the position and circumstances of a defaulting tenant, whether he is insolvent or not, able or not able to pay; while it may be said that the *banyá* or the maháján is at a disadvantage in that he does not and cannot always know the circumstances of his debtors. It may not be fair perhaps to make the assumption *ab uno disce omnes*, but still I may be permitted to give a forcible example of the abuse of such power of imprisonment and of its mischievous consequences.

"The instance I give is that of a village in a pargana in a certain district in which it became the duty of an officer of Government to re-settle rents, and this instance, I understand, was typical of the way rents were enhanced by landlords throughout that pargana. Rents had been formerly fixed at Rs. 2-12 a bighá; the landlord had been demanding Rs. 5-2. The head raiyats, representing the body of the raiyats, refused to pay. The landlord prohibited the cutting of their crops; the raiyats sued and got damages for the illegal distraint; they also sued for leases at Rs. 2-12, and succeeded in their suits. The landlord's brother then sued them for the sum of Rs. 700 on a bond for money supposed to be lent, which bond was contested as forged. The Civil Court peons were intercepted. The raiyats got no notice of the suit; the first they heard of it was by being arrested in execution of decree, and they were imprisoned for three months. Then the other villagers collected a sum of money amongst themselves and paid up the amount due. The raiyats in question were thereupon released, but being, as they said, helpless, they submitted to the enhancement. This is an instance of one village only, but the results of a contest like this in one village strike terror throughout a pargana.

"I am afraid there can be little doubt that the abuse of the power of imprisoning raiyats for debt in execution of decrees has sometimes led to deplorable results in Behar and elsewhere, while it can hardly be seriously contended that the power of imprisonment is necessary in order to make solvent raiyats pay rents which they can and ought to pay but refuse to pay.

"Experience has shown me that the power of imprisoning raiyats is seldom had recourse to for the purpose of making them pay admitted or just demands, but it is often used to enforce prospective demands which are unjust, and in order to compel ignorant tenants to assent to illegitimate enhancements.

"When the law can be made an instrument of abuse the hour for reform has struck.

"I do not understand, my Lord, how any argument in favour of the exclusion of suits under the Bengal Tenancy Act can be based on the ground that the Tenancy Act deprived the Bengal zamindárs of the power of ejectment and distraining of crops.

"All that the Tenancy Act has done in these matters is to regulate the procedure by which distraint is to be made, and to define the conditions under which a tenant may be ejected, but it does not abolish the power of ejectment or distraint.

"But even were it otherwise, the retention of the arbitrary power of imprisonment, if bad in itself, cannot be justified on the ground that some other power formerly exercised by zamindárs has been curtailed or restricted."

The Hon'ble MR. QUINTON said :—"I must oppose the amendment. Throughout the greater part of British India, in Lower Bengal, in Bombay, in the Punjab, in the Central Provinces and in Lower Burma, the legislature has affirmed the principle that decrees in favour of landlords against tenants for arrears of rent should be executed in the same way and by the same processes as money-decrees in favour of other creditors.

"The Bill now under consideration modifies the law in respect to one of these processes, namely, imprisonment, as explained by my hon'ble friend Mr. Scoble on the 24th of February last, when presenting the Report of the Select Committee. Under the existing law any creditor who wishes to imprison his judgment-debtor has only to apply to the Court charged with the execution of the decree, and the Court, if certain preliminary formalities are complied with, must thereupon arrest the debtor, and, if he fails to satisfy his creditor, send him to jail. It has no option in the matter. It is true that the debtor has a partial remedy by which he may escape imprisonment, namely, by applying to be declared an insolvent, but the Select Committee were satisfied that this remedy was not resorted to to the extent which might be reasonably expected, and that from its nature it was not sufficient to meet the evil against which the Bill is intended to provide. This procedure is altered by the Bill in two important points—(1) women are not to be imprisoned at all in execution of money-decrees, and (2) in the case of male debtors, the option of imprisonment is to rest with the Court and not with the creditor.

"The amendment on the table asks the Council to make an exception to the Bill in favour of decrees passed under the Bengal Tenancy Act. The effect of the amendment will be that the landlords of Bengal will retain the power of imprisoning through the ministerial action of the Courts their tenants against whom decrees for arrears of rent have been given, while all other landlords throughout India and all other judgment-creditors in Bengal, as well as in the rest of the empire to which the Code of Civil Procedure extends, will be deprived of this power.

"I am quite willing to admit that the case of the Bengal zamindárs differs in some important respects from that of landlords in the greater part of the rest of India. In the first place, they are now paying a revenue that was fixed ninety years ago, whereas elsewhere the revenue now paid was settled within comparatively recent periods. Again, that revenue has been fixed for all time, whereas other landlords, less fortunate, know that their revenue will be liable to enhancement once in a generation. While in other provinces the revenue was fixed with more or less reference to the rent obtainable from the land, in Bengal there was no such canon of assessment, and the long lapse of time since the permanent settlement has operated to increase the difference between the aggregate amounts paid as rent and as revenue. In Bengal 90 or 95 per cent. of the tenants are said to be tenants with rights of occupancy and their tenures are saleable in execution of decrees for arrears of rent. In other parts of India the landlord has not commonly this security. The Bengal zamindár, in common with the landlords of the North-Western Provinces, Oudh, Madras and the Central Provinces, has the right of recovering arrears by distraining the crops of his tenant. It is true that this privilege must be exercised through the Court, but even with this limitation, which was advisedly imposed three years ago, the Bengal zamindárs are in a position superior to that of the Punjab and Bombay, where no such right of distraint exists at all. These differences between the relations of the Bengal zamindár to Government and his tenants and the corresponding relations of landlords in most other parts of India do not seem to justify the former in demanding exceptionally favourable treatment in the matter to which the Bill refers. They raise an *à priori* presumption that the Courts in Bengal should have the power, which we propose to give the Courts in other parts of India, of determining whether a tenant judgment-debtor should be sent to prison or not—a presumption not rebutted by anything that has fallen from the hon'ble mover of the amendment.

"The hon'ble mover has over-estimated the number of provinces excluded from the operation of the Bill. It is only in the North-Western Provinces and Madras that the procedure in collection of rent-decrees is not governed by the

Code of Civil Procedure. I would point out that the law as regards imprisonment in execution of rent-decrees in the two provinces already does very much what the Bill proposes to effect elsewhere. In the North-Western Provinces the Collector, by whom rent-decrees are executed, is not bound to send to jail a judgment-debtor who satisfies him that he has no *present* means of paying the amount of the decree; and in Madras a rent-defaulter is only sent to jail if there be no property to distrain or no saleable interest in the land, and if the Collector has reason to believe that the defaulter is wilfully withholding payment of an arrear or has been guilty of fraudulent conduct in order to evade payment.

"I am glad to observe that the hon'ble mover had no complaint to make against the law for the realization of revenue—a subject which is quite distinct from that of the present Bill; but, as pointed out by my hon'ble friend Mr. Halliday, the revenue of Bengal is about 25 per cent. of the rental, and the argument that no obstacle should be placed in the way of landlords realizing rent-decrees which constitute a large proportion of the money payable to Government as revenue comes with the worst grace from Bengal zamindárs, who in this respect are in a much better position than landholders elsewhere.

"The argument from statistics urged by my hon'ble friend seems to me to tell rather against him. The Bill in the opinion of the Select Committee should extend to all provinces where the procedure in rent-suits is regulated by the Code of Civil Procedure; and the amendment asks the Council to make an exception in favour of Bengal. It is urged that it is not worth while to make an alteration of the law in that province, as the cases in which imprisonment is resorted to are so few. But, if this be so, where is the necessity for treating Bengal in an exceptional manner? The burden of proving that it should be so treated rests on the supporters of the amendment, and by their own shewing the figures quoted prove that the alterations proposed by the Bill can have very little effect there."

The Hon'ble SYUD AMEER HOSSEIN said:—"My hon'ble friend having very ably advocated the cause of the zamindárs in support of his amendment, I beg, with Your Excellency's permission, to lay before the Council in a few words the other side of the question.

"We are to consider whether a raiyat should in respect of a debt covered by a rent-decree obtained against him by the zamindár be excluded from the benefit of the proposed law as regards the issue of a rule *nisi* before a warrant of arrest is issued against him. I feel no hesitation in saying that he should not be excluded from the benefit of this indulgent provision.

"The raiyat, of all debtors, should not be lightly sent to jail. As a factor in the food-supply of the country, he represents a class in whom the public generally are interested. His debt is practically a secured debt, the zamindár having the right to distrain his crops and to sell his tenure.

"If we go back to the provisions of the former Codes of Civil Procedure and the former Rent Acts and Regulations, we will find that there has been a parallel provision for the liability of a debtor in a money-decree and a debtor in a rent-decree to imprisonment in the execution of the same. But now that the legislature has thought it proper to give the debtors of money-decrees generally a chance to show cause against their arrest and imprisonment, I do not see why exception should be made against the debtor in a rent-decree.

"No honest and prudent zamindár would like to have an honest, though an unfortunate, raiyat locked up so long as he could have recourse to the other provisions of the Tenancy Act of 1885 for the realization of decrees in rent-suits.

"In the case of dishonest raiyats, the provision of section 4 of the Bill, by which the proposed law has been safeguarded, seems to me to be quite sufficient."

The Hon'ble Sir CHARLES AITCHISON said:—"I shall oppose this amendment. In the first place, the principle that in the province of Bengal the procedure in suits between landlords and tenants should be the ordinary civil procedure for the time being in force has been already adopted by the legislature.

We are all familiar with the history of Act X of 1859, which is a landmark in Indian legislation. By the provisions of that Act the jurisdiction of the Civil Courts was altogether barred in suits of the kind referred to in the amendment, which were made cognizable only in the Revenue Courts and under the special procedure laid down by the Act. Experience showed in a very short time that this was a mistake, and that in Bengal at any rate suits of the kind involve difficult questions of law and fact with which the ordinary Civil Courts were more competent to deal. Accordingly, after ten years' experience, the policy was reversed and the jurisdiction of the Civil Courts was restored by Bengal Act VIII of 1869, entitled *an Act to amend the procedure in suits between landlords and tenants*. Section 33 enacts that 'the jurisdiction of the Collectorate Courts to entertain such suits, save as regards any suits or proceedings then pending, shall cease, and all suits brought for any cause of action arising under Bengal Acts X of 1859 and VI of 1862 shall be cognizable by the Civil Courts according to their several jurisdictions.' And section 34 provided that 'suits of every description brought for any cause of action arising under the Act, and all proceedings therein, shall be regulated by the Code of Civil Procedure, being Act No. X of 1877, and by such further and other enactments of the Governor General in Council in relation to civil procedure as now are, or from time to time may be, in force; and all the provisions of the said Act and of such other enactments shall apply to such suits.' In Bengal, therefore, the special procedure in cases between landlords and tenants failed after trial, and the legislature expressly enacted that the procedure was to be the common procedure from time to time determined upon for ordinary civil suits. And this principle is still maintained. Section 143 of the Bengal Tenancy Act of 1885 gives power to the High Court, with the approval of the Governor General in Council, to make rules declaring that any portions of the Civil Procedure Code shall not apply to suits under that Act or shall apply to them subject to modifications; but the High Court has not yet seen fit to exercise that power. I can see no justification therefore for legislating now in a manner inconsistent with the policy deliberately adopted and followed for the last twenty years. There is indeed all the less necessity in that the High Court has power to prevent the application of any of the provisions of the general civil procedure which experience may show to be unsuitable.

"In the next place, except in the case of women, this Bill does not abolish imprisonment for debt; but leaves it to the Courts to determine whether or not imprisonment should be enforced. At present the Courts have no such discretion. Imprisonment depends upon the caprice of the creditor and not upon the merits of the case. The amendment, if carried, will still leave this power in the hands of landlords. Now, that the liberty of any subject of the Crown however humble, should be at the mercy of any man, however powerful or rich, even if the Court does not consider that the debtor should be imprisoned, is a state of things which ought not in my judgment to be tolerated by the laws of any civilized Government. The greatest of criminals even are not treated so, and it seems to me that Courts of justice exist for the express purpose of preventing the possibility of such things."

His Honour THE LIEUTENANT-GOVERNOR said:—"I, too, must oppose the motion of my hon'ble friend opposite. It seems to me that the landlord who wishes that the Bill which is now before the Council should not be applied to suits in which the judgment-debtors happen to be agricultural raiyats makes a proposal to limit the value of that law in the very point and with respect to the very classes in respect to which the law is likely to be most valuable, and in which in my opinion it is most seriously needed. The law does not prevent the hon'ble gentleman from imprisoning his defaulting raiyat. What it does do is to say that he should not imprison his debtor without first giving him an opportunity of being heard by the Court, and yet he would take away this small safeguard and say 'No, he must be imprisoned on my dictum and not on that of the Judge.' I say that the safeguard provided by this Bill is more needed in the case of agriculturists than in respect of debtors of other classes, and I say so for this reason: my hon'ble friend has himself pointed out in how few cases it has been found requisite absolutely to imprison judgment-debtors on

decrees for rent. Why then is it necessary to keep those sections of the old law as they stand? It is necessary as a most powerful reserve to those who apply a systematic method in harassing, worrying and finally breaking down those raiyats who combine to resist enhancement. The system by which monthly suits for arrears of rent are in very many cases in certain estates regularly introduced with the view of breaking down the opposition of raiyats was brought before the Council during the discussions on the Bengal Tenancy Bill, and I need not now refer to it further than to mention that the efficacy of that system depended upon the ability of the landlord to bring refractory raiyats to book by imprisoning them. The advantage is really immense to take a leader of the opposition and have him imprisoned without reference to what he may have to say before the Judge, and thus break down the opposition. Now, that is not a healthy state of things. The state of things proposed by the present Bill, by which a judgment-debtor may be afforded an opportunity to show before a Court of law why he should not be imprisoned, must be considered by everybody but the zamindárs—I would believe by most of them also—to be a far more healthy state of things. It is not the case that the Bengal landholders are absolutely helpless in the way of reaching their judgment-debtors: It is true, as my hon'ble friend has pointed out, that the power of distraint is somewhat limited by the Bengal Tenancy Act, but, on the other hand, the power of sale is strengthened and legitimatised. The facilities which a zamindár who is a judgment-creditor now has of selling up the tenure of his defaulting raiyat is certainly a facility greater than is given by the laws of other provinces, and may well be set against the deficiency in point of distraint. For these reasons I must oppose the amendment of my hon'ble friend."

The Hon'ble RAJA PEARI MOHAN MUKERJI said:—"The liability to pay cesses to which the Hon'ble Mr. Halliday referred may, I think, be considered an additional ground on which this Hon'ble Council should support my amendment. Cesses belong exclusively to the Government; no part of them goes to the coffers of the landholders. On the other hand, it is admitted that most landholders have to bear heavy losses in collecting cesses for the Government on account of bad debts, desertions, deaths and other causes. The accusation that the zamindárs want the present law because it places in their hands an engine for crushing their raiyats is based purely on sentiment, and it falls to the ground when it is seen that, during all these years in which the present procedure has been in operation, the landholders behaved in anything but a vindictive spirit in applying for the imprisonment of their raiyats for non-payment of rent. The great difference which the Hon'ble Mr. Quinton tried to make out between the profits of the landholders of Bengal and Behar and the landholders of other provinces is, I think, not borne out by facts. The question has been taken out of the region of controversy, and it is now a matter of bare reference to official records to determine what ratio the rent collected by landholders bears to the revenue collected by the Government. I am in a position to submit to the Council authoritatively the ratio which the revenue bears to rent. It varies from 50 per cent. to about 10 per cent. But in districts like Hooghly, Burdwan and the 24-Pergunnahs the ratio which the revenue bears to rent is very high. The fabulous wealth of the zamindárs of Bengal and Behar, based on figures which were placed before the public by irresponsible persons, should have no influence whatever on the hon'ble members of the Council in the consideration of this important question. I appeal to them to refer to official statistics on the question. His Honour the Lieutenant-Governor referred to the practice of landholders recovering their rents by monthly instalments. That, I submit, was an unfortunate allusion. The Government itself some years ago collected its revenue by monthly instalments, and the zamindárs were expected to recover their rents by monthly instalments in order to pay their revenue to Government."

[His Honour THE LIEUTENANT-GOVERNOR—"I referred to monthly suits, not to the payment of rent by monthly instalments."]

"Suits for monthly instalments were extremely rare and should not be taken into account in the consideration of a general question like this; and the Gov-

ernment was not satisfied in recovering its revenue by monthly instalments, but they charged interest at 25 per cent. on all arrears of such revenue. His Honour also said that 'although the right of distraint had been in some measure taken away from the landholders, they had been given increased facilities for the sale of tenures and holdings.'

"I do not remember that any increased facilities whatever in that direction had been given to landholders by the Bengal Tenancy Act which they did not possess before.

"The Hon'ble Mr. Ilbert, in submitting the Report of the Select Committee, expressed his regret that, although one of the objects of the Bill was to give larger facilities to the landholders for the recovery of rent, the Committee had been unable to accept any of the suggestions which had been put forward for simplification of the procedure for the recovery of rent. The question of giving increased facilities for the recovery of rent by the sale of holdings and tenures was fully discussed; and it was at the instance of the Bengal Government that those provisions were excluded from the Bill, on the ground that they would lead to the creation of a class of middlemen to the injury of the cultivators of the soil—a supposition which has been since borne out by the events which have taken place in the Dekkhan, and the Sonthal Parganas in the territories under the Lieutenant-Governor of Bengal, where the introduction of the free sale of tenures and holdings had led the Government to put a stop to all sales of raiyati holdings. I submit, therefore, with great confidence that not a single argument has been adduced to show why Bengal and Behar should have an exceptional law for the recovery of rent by landlords from their tenants when the law in the North-Western Provinces, in Oudh, in Bombay and in the Central Provinces—in fact, in almost all the other provinces in India—is very different. The Hon'ble Mr. Quinton has said that the onus lies on me to show why Bengal should have an exceptional law favourable to the landholders. I submit that his assumption is wholly erroneous, as the effect of the present Bill, if it is not amended, will be that it will not touch imprisonment of raiyats for debt in most of the other provinces in British India, whereas it will materially alter the law which obtains in Bengal and Behar. I shall give a short summary of what the law is in other provinces. In the Punjab the revenue law provides for the imprisonment of the debtor. The rent law allows no imprisonment, but it provides that no right of occupancy can grow by lapse of time. In the North-Western Provinces the revenue as well as the rent law provides for imprisonment. In Oudh the revenue law provides for imprisonment, and the rent law provides for imprisonment subject to the provisions of the Code, but there landholders have this additional privilege that they can distrain crops of their own accord. In Madras both the revenue and the rent law provide for imprisonment of the debtor. In Bombay the revenue law provides for imprisonment of the debtor. In the Central Provinces the revenue law provides for imprisonment of the debtor, and landholders distrain crops of their own accord against all but 'absolutely' occupancy-tenants. The consequence will therefore be, if the present amendment is not carried, that in large portions of the rest of British India landholders will have the power of imprisoning rent-defaulters independently of the provisions of the Code of Civil Procedure, whereas in Bengal and Behar, where it is admitted that landholders require facilities for the recovery of rent, the law, as settled after most careful consideration, will be disturbed. The Hon'ble Sir Charles Aitchison observed that the Bengal Tenancy Act provides that the procedure contained in the Code of Civil Procedure should be the procedure in execution of decrees, unless the High Court sees fit to exclude any part of it from application to rent-suits, but there is no legal bar to any amendment of the Code of Civil Procedure, although it affects the procedure in execution of decrees in rent-suits. I submit that when the Bengal Tenancy Act was passed the legislature carefully excluded those portions of the Code of Civil Procedure as regards execution of decrees which they thought would be inapplicable to execution of decrees in rent-suits. I may mention that sections 305 and 320 to 326 of the Code of Civil Procedure are declared inapplicable to rent-suits not in the interests of raiyats but in the interests of landholders. And it was simply with a view to save the bulk of the Act swelling to large dimensions that the provisions of the Code of Civil Procedure which are applicable to the Bengal Tenancy Act were not bodily

incorporated in that Act. It would be, I think, assuming a state of things which was never intended by the legislature which passed that measure to suppose that important provisions affecting the relations between landlords and tenants could be similarly altered by altering the provisions of the Code of Civil Procedure so soon after that Code was passed by the Council."

The Hon'ble MR. SCOBLE said:—"With reference to one matter which has been referred to by the hon'ble mover of the amendment, I wish to state that I think he is in error regarding the procedure which is now in force in other provinces besides Bengal. I had a careful note prepared and submitted to the Select Committee as to the law which exists in the provinces of India generally with reference to the enforcement of decrees against rent-defaulters. I have that note now before me, and it fully bears out the state of the law as described by the Hon'ble Mr. Quinton. In the Punjab, Oudh, Bombay, the Central Provinces and in Lower Burma a rent-defaulter against whom a decree is passed is liable to imprisonment in execution of the decree under the Civil Procedure Code for the time being in force. If the Council today adopts this Bill, the provisions of the Civil Procedure Code in reference to the execution of decrees in rent-suits in those provinces will be those incorporated in this Bill. In the North-Western Provinces and in Madras the law is as has been stated by the Hon'ble Mr. Quinton."

The Motion was put and negatived.

The Hon'ble MR. SCOBLE moved that the Bill, as amended, be passed.

The Hon'ble LIEUTENANT-GENERAL CHESNEY said:—"I think the Select Committee and the Council may be congratulated on the passing of this Bill, which I regard as a very useful step forward in the direction of a more humane and equitable treatment of this branch of the law. My only regret personally is that the Select Committee has not seen its way to go still further in the direction of abolishing the law of imprisonment for judgment-debtors in the terms of the original draft of the Bill. My hon'ble friend Mr. Scoble, when presenting up the Report of the Select Committee, observed that the provisions of the draft Bill had been objected to by a majority of high authorities who had been consulted; he added further that there was a strong and apparently a weighty minority in favour of the more liberal provisions of the draft Bill. Of course, it will be understood that under the method and the procedure adopted by the Select Committee it was not open to him in a general way to do more than put into form the recommendations and opinions which the Select Committee had received from the authorities consulted, and, the majority having expressed their opinions against it, it was perhaps not open to the Select Committee to do otherwise than to act on those suggestions. At the same time I am not surprised to find that the general opinion of the majority of the authorities consulted was unfavourable to the full conditions of the draft Bill, because I think that it is a matter of observation that lawyers generally are opposed, and have in most times been opposed, to a reform in the law in the direction of making its provisions less severe. We may remember that when any modification or reform has been proposed in the criminal law of England, there have always been found great legal authorities to object to these reforms and to declare that if these severe penalties and conditions were modified there would be an end to all social obligations, as that, for example, if a man was not hung for stealing a sheep or a few shillings from the person, then all social and commercial business would come to an end; and so, in the various reforms which the law of imprisonment for debt has undergone, there have never been wanting authorities to protest that the particular reform would be followed by disastrous consequences to the commercial and revenue laws. Happily the result has always been that notwithstanding these reforms the business of the world has gone on as smoothly as before. The truth seems to be that in all these matters we are somewhat under bondage to the conditions of the old Roman law. No doubt the modern world is under great obligations to the Roman nation for their system of jurisprudence. That people, with their remarkable love of order and method, instituted a system of laws which was a vast improvement on the law which then existed in all other parts of the world, equally superior to the total absence of law

in despotic countries as to the fanciful and fickle procedure obtaining in the Greek republic, where the whole of the free people sat in judgment in a case both as judge and jury. It is not wonderful, therefore, that, as the world emerged from the barbarism of the middle ages, those who had the business of legislation adopted the Roman Code. And to that could be traced the extreme severity obtaining for many generations relative to the law of debt. Now, it is not surprising that the Roman law of debt was very severe, because it was more or less in keeping with their hard ideas of jurisprudence. Under their law the master or the head of the house had absolute power not only over his servants but also over his own children and the members of his family, and it is not surprising that men should be sold into slavery for not being able to pay their debts. The tradition of imprisonment for debt was a tradition handed down from those days; but in establishing imprisonment for debt one object of this imprisonment was lost sight of; when a man became a slave in the old days he could work out his redemption, whereas under the modern system the debtor was subject to useless imprisonment. However, the practice of life-long imprisonment for debt has happily been abandoned. First of all, the term of imprisonment was reduced to two or three years. At the present time it was six months and for small debts six weeks; but I regret to see maintained in the new measure the apparent inconsistency in this distinction between the penalty prescribed for small debts and that for large ones. I fail to see why a man should be liable to a greater punishment because the debt is greater in one case than in another. It seems to me that the penalty due depends entirely upon the nature of the case and not on the amount, and that a person with a small debt may be just as criminal as another person whose debt is large. However that may be, I think the proposals of the Select Committee are all good as far as they go and in the direction of wise reform, and that they may be accepted as a valuable instalment towards the completion of a process when—and I hope the time is not far distant—imprisonment for debt will be entirely abolished."

The Hon'ble MR. SCOBLE said:—"I wish to make one observation with regard to what has fallen from my hon'ble and gallant colleague, because I think it is of some importance as regards the functions of Select Committees. I cannot accept, on behalf of Select Committees of this Council, the statement that they have only to register the opinions of the majority of the authorities consulted. The function of the Select Committee is to sift those opinions, and to ascertain from them what upon a consideration of the whole matter is best suited to the circumstances of the country. Having come to a conclusion, it is their business to recommend it to the Council in the form best calculated to attain the object aimed at. I wish also to say one word in defence of my own profession, which has been, I think unjustly, assailed by my hon'ble and gallant friend. I may remind him that, if he will look into the history of law reform in the present century, he will find that the greatest law reformers have been lawyers. The names of Romilly, Brougham, Jervis, Campbell and Cairns are a few among the eminent men who have devoted themselves to the amendment of the law with an experience and a success which I venture to say no layman could have attained. If the Bill now under consideration does not accomplish as much as the gallant General could have desired, I am bound to say that it has been framed to meet the wishes of men of business, whom it most nearly concerns, rather than to gratify any conservative feeling that may be supposed to be entertained on the subject by the legal community."

The Motion was put and agreed to.

CIVIL PROCEDURE CODE, &c., AMENDMENT BILL.

The Hon'ble MR. SCOBLE moved that the Report of the Select Committee on the Bill to amend the Code of Civil Procedure and the Indian Limitation Act, 1877, be taken into consideration.

The Motion was put and agreed to.

The Hon'ble MR. SCOBLE also moved that the Bill, as amended, be passed.

The Hon'ble MR. EVANS said :—" There are a good many amendments of the Civil Procedure Code contained in this Bill. Some—in fact, the majority of them—arose out of difficulties in the construction of the existing Code which have been felt by the different Courts which have been administering the law. In many cases the Courts have not been able to agree as to the true construction, and something was necessary to be done to make matters clear. There is another class of amendments arising from the fact that certain matters are not provided for by the Code regarding which the Courts have found difficulties, and there is a general desire to have these matters provided for. Most of the amendments which have been made by the Bill do not now require any detailed remarks before this Council, as no amendments have been proposed, and I may take it that they are generally accepted by the Council. But there is one provision as to which there is a good deal of conflict of opinion, and I wish to make a few remarks in respect of that provision. I refer to the provision that Judges who have been selected by the Local Government should have power to take down the evidence in English although it may be given in the vernacular. Although there has been a good deal of difference of opinion as regards this matter, clearly the balance of opinion is in favour of making the change; and I think that in making the change we have met the difficulties which have been suggested by providing that this power should only be given to Judges selected by the Local Governments, who will no doubt have regard to the knowledge which the Judges have of the vernacular in certain places, and also to the knowledge which the pleaders who appear before such Judges have of English as well. In many cases there will be no difficulty in finding Judges who have such a competent knowledge of the vernacular that there would be little chance of error in the record of the evidence taken down by them. Where there might be a possibility of such error, if the pleaders have a competent knowledge of English, we may safely trust them to draw the attention of the Judge to the error if he has misinterpreted the evidence or taken down wrongly what the witness said; they are wary enough to do it, and the error would thus be corrected. The Local Governments will, I have no doubt, exercise the power given to them in a cautious manner; we have given to the Local Governments power to make the experiment. If it proves a success,—as I have little doubt it will,—it will be an enormous gain as regards the saving of time and the expense of making translations and the rapidity with which appeals can be brought to hearing before the higher Courts. It will enable the Judges to get through more work within a shorter time and greatly lessen the expense of appeals. Anything which will lessen the cost of obtaining justice from the Courts of law will be a measure of great imperial importance."

The Motion was put and agreed to.

At the conclusion of the business of the Council His Excellency THE VICEROY said :—" This Council will now adjourn *sine die*, and as it will probably not be my good fortune to preside again over so full a meeting, or in the presence of His Honour the Lieutenant-Governor of Bengal, I trust I may be permitted to express my deep sense of obligation to all its members for the assistance which they have given to the Government in the discharge of its legislative duties. I especially desire to tender my thanks to the non-official members, who have been good enough to sacrifice their time and pretermitt their private and professional pursuits in order to devote their energies to the business of the country, and to give us the advantage of their experience. I can assure them that, as representatives of an independent public opinion, and of those various important interests which form so large an element in the Indian commonwealth, my colleagues and myself have welcomed their presence with the greatest satisfaction. I also wish to convey to our Native colleagues my appreciation of the ability with which from time to time they have handled the various matters which have come up for consideration. The manner in which they debate the several questions under discussion in a language which is not their own has always been to me a matter of surprise and admiration. I have been equally struck by the good temper, the courtesy and gentlemanlike bearing with which they engage even in the warmest controversies. I think I may congratulate the Council on the very considerable amount of

work which has been done during the four sessions over which I have presided. The number of Acts which have been passed has been no less than 73. Amongst these may be mentioned the Bengal Tenancy Act, the Oudh Rent Act, the Provincial Small Cause Courts Act, the Indian Marine Act, the Punjab Tenancy Act, the Punjab Land-revenue Act, the Inventions and Designs Act, and last, though by no means least, the Debtors Act. It must always be remembered that the debates which take place round this table, and to which the public are admitted, form but a very small part of the labours of the Legislative Council, inasmuch as the time, thought and attention devoted to Bills in Committee are infinitely greater than that which the Council when assembled in its full numbers is required to give them. It is true the Acts I have enumerated do not belong to that category which excite abnormal and universal attention throughout the country, but they have not for that reason been the less beneficent in their operation. In fact, if we regard our land legislation alone, as it affects Bengal, Oudh and the Punjab, it will be found that the labours of this Council have contributed vastly to the security, happiness and content of many millions of our fellow-subjects. I have also especially to express my thanks to the Legislative Department, and I shall always remember with gratitude the industry and devotion which Mr. Ilbert and Mr. Scoble, assisted by Mr. James, have given to the preparation of those various Bills which have eventually secured the assent of the legislature. Neither their colleagues nor the general public have any adequate idea of the amount of thought, correspondence, labour and research which are necessary before a Bill can be brought up for the consideration of the Council. I am glad to be able to add that experience has proved—and a sufficient time has now elapsed to justify the statement—that the legislation upon which we have been engaged during the last four years, whatever opinions or doubts existed at the time, is now admitted to have been necessary and desirable, and to have worked advantageously in the interests of those for whom it was initiated."

The Council adjourned *sine die*.

S. HARVEY JAMES,
Secretary to the Govt. of India,
Legislative Department.

FORT WILLIAM ; }
The 26th March, 1888. }

SUPPLEMENT TO
The Gazette of India.

No. 13.} CALCUTTA. SATURDAY, MARCH 31, 1888.

OFFICIAL PAPERS.

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully or make known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.

Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.

FINANCIAL STATEMENT for 1888-89.

Section I.—Introduction.

The Financial Statement of March 1887 admittedly left the financial position in a state of unstable equilibrium. Its key-note was the following paragraph, in which it was stated that the Government of India had, in consequence of increasing expenditure, exhausted all other resources available to it, but considered it too soon to address itself to the question of new taxation:—

“ It may be added here that, in view of the causes which have led to an increase of expenditure, and to the other considerations which present themselves in connection with the financial situation, it is not the intention of the Government to add to existing taxation. The growth of expenditure in the Estimates of 1886-87 and 1887-88 arises in part from war charges and in part from a further fall in the exchange; and the Government is of opinion that it would be undesirable to seek to meet the deficit at present arising from these causes by the imposition of further burdens. The attention of Her Majesty's Government has, during the year now closing, been turned to the difficulties caused to the Government of India by the fall in silver, and the question of gold and silver currency has been submitted to a Royal Commission, the result of whose deliberations must be awaited. The present military expenditure in Upper Burma is of a temporary nature; and although considerable sums must be expended during the next two or three years in opening up communications in Upper Burma, and in providing the public buildings necessary for the accommodation of the garrison and for the conduct of business, it may be expected that, with the return of order, the revenues of Upper Burma will expand, and that its resources will become, in an increasing degree, available. For the present, therefore, until the outcome of present difficulties is seen more clearly, the Government considers that, in providing for the necessary expenditure arising from its administrative needs, it should avail itself of resources which, in times of surplus, are assigned from its revenues to the construction of railways or to the diminution of the amount which it borrows annually for railways.”

2. The situation during the course of the year became, in an increasing degree, more unfavourable. It soon became manifest that the reduction of Military Expenditure in Burma, which the Budget Estimates had hoped for, could not, for the present, be effected in such a considerable degree as to afford to the finances sensible relief. Opium prices fell off with greater rapidity than could have been foreseen, and our opium revenue threatened to fall short of Budget by Rx. 400,000. Railways from the first instead of improving, as the experience of former years led us to expect, showed returns that were worse than those of 1886-87. Exchange, which seemed in February 1887 to have re-established itself for the time, rapidly dropped and settled at a rate of from $\frac{1}{2}d.$ to $\frac{3}{4}d.$ less than that which had been realized in 1886-87. Salt and other revenues shewed favourable returns, and the expenditure, apart from Exchange, was well within the estimates; but these favourable features were greatly outweighed by the unfavourable results which I have mentioned.

3. The causes which led to the deterioration here explained were not, for the most part, such as seemed likely to disappear with the close of the financial year then current. The Government therefore, before the first half of the year had expired, found itself face to face with the question of extra taxation. The result of their deliberations is already known to the public. It was determined that it was necessary to seek improvement of Revenue to an extent of nearly Rx. 2,000,000. Some small items of new Revenue presented themselves in connection with the new Province of Upper Burma. And the Government of

India had already been considering the question of raising an import duty on petroleum. But these small items went but a short way to fill up the gap, and the Government, as is already known, came to the resolution of restoring the eight-annas salt duty which had been remitted in 1882. The increase of salt duty was imposed, on 19th January 1888, by a notification issued under Act XII of 1882, and the necessary legislative measures were taken to raise a duty on petroleum.

4. A statement of the financial position was made on the occasion of introducing this Bill in January 1888, and the fulness of that statement, and of the discussions that took place upon it, a week later, will excuse me from entering, in this place, upon any explanations of a general character. I have to present little or nothing that is new, so far as the general position is concerned, and shall pass at once to the elucidation of the details which will apply to the particular estimates of the year 1888-89 the general conditions then set forth.

Section II.—Accounts of 1886-87.

5. The following statement shews the actual figures of the Accounts of 1886-87, and compares them with those presented as Revised Estimates for that year, in the Financial Statement of March 1887. The results agree in the main with those which were announced to Parliament in the Under-Secretary of State's Financial Statement of September 9th, 1887,(a) and which had already been published in the *Gazette of India* of April 30th (page 209) :—

		1886.87.		Accounts Better.	Accounts Worse.
		Revised Estimate.	Accounts.		
REVENUE.					
India (Imperial and Provincial)	Rx.	75,754,200	77,010,111	1,255,911	...
England	£	231,600	237,651	6,051	...
Exchange	Rx.	85,900	89,372	3,472	...
TOTAL Rx.		76,071,700	77,337,134	1,265,434	...
EXPENDITURE.					
India—					
Imperial	Rx.	35,736,100	36,181,626	...	445,526
Provincial	Rx.	21,200,900	21,112,381	88,519	...
Adjustment of Provincial	Rx.	—577,300	+35,665	...	612,965
England	£	14,373,000	14,409,949	...	36,949
Exchange	Rx.	5,338,500	5,419,086	...	80,586
TOTAL Rx.		76,071,200	77,158,707	88,519	1,176,026
SURPLUS .		(b)500	(c)178,427	177,927	

(a) "There has been an increase in the Revenue of Rx. 1,100,000; of which the Land Revenue gives Rx. 476,000; Salt Revenue, Rx. 117,000; Excise Revenue, Rx. 109,000; Railways, Rx. 166,000; and Revenue under other heads, Rx. 232,000; making a total improved Revenue, as I have said, of Rx. 1,100,000. Of this improved Revenue, however, Rx. 420,000 belong to the Provincial Governments, leaving an improved Revenue, for Imperial purposes, of Rx. 680,000. Then, on the Expenditure side, the expenditure on the Army has been Rx. 400,000 more than was anticipated. The other heads, besides that of the Army, have altogether improved to the extent of Rx. 504,000, of which Rx. 202,000 belong to the Provincial Governments, leaving a net improvement on these other heads of Rx. 302,000. Altogether, the expenditure has been worse than was anticipated by Rx. 98,000; therefore, on the whole, taking into account the increase of Revenue and the increase of Expenditure, there has been a net improvement of Rx. 582,000, which will turn the surplus of Rx. 62,110, shown in my statement, into a surplus of Rx. 642,110."

But against last figure the Special Defences expenditure was afterwards charged. See footnote under paragraph 11.

(b) Before deduction of Special Defences expenditure.

After deduction for Special Defences expenditure. See footnote under paragraph 11.

6. It will be seen that the main features in this comparison are that the Revenue in India was Rx. 1,255,911 better than the Estimate of Rx. 75,754,200, and that the "Imperial" Expenditure in India was Rx. 445,526 worse than the Estimate of Rx. 35,736,100. Under other heads there is very little difference from the Revised Estimate, and the only case which calls for any remarks is the small excess of expenditure in England, which is due to some unexpected Military charges. A complete account of the differences, and of the accounts generally, will be found in the Appropriation Report of the Comptroller and Auditor General, published in the *Gazette of India* of March 24th.

7. There is, apparently, a large difference under the head of "Adjustment of Provincial Expenditure," but it requires no separate explanation, as it is really the outcome of the large excess of Revenue, which has already been alluded to, and which amounts, as just stated, to Rx. 1,255,911. Now, although the expenditure is distributed between Imperial and Provincial according to its class, so that some kinds of expenditure are Imperial and some are Provincial, the division of the Revenues is quite different; Imperial and Provincial share, in definite proportions, the same Revenues. Accordingly, the improvement of Revenue by Rx. 1,255,911 was distributed between the Imperial Account, which received Rx. 731,465, and the Provincial Account, which received Rx. 524,446. According to the Revised Estimates, the Provincial Expenditure was to be met as follows:—

	Rx.
To the extent of the Provincial Revenues of the current year	20,623,600
By drawing upon Balances charged off the Revenues of former years	577,300
Total Provincial Expenditure as above	21,200,900

But by the improvement of their share of the Revenue they not only met the whole of their expenditure out of their current year's Revenue, but were able to lay by a small amount of Rx. 35,665. In other words, their account stood thus:—

	Rx.
Total Provincial Expenditure (slightly less than estimated)	21,112,381
Provincial Revenues, Rx. 524,446 better than estimated	21,148,046

And the general Revenue Account therefore, instead of having to be relieved by the charge of Rx. 577,300 to past accumulations, had to be charged first with the whole of the expenditure, and then with the write-off of the further addition of Rx. 35,665 to these accumulations.

8. The two matters that require explanation are therefore the better Revenue in India of Rx. 1,255,911, and the excess Expenditure in India of Rx. 445,526.

PRINCIPAL REVENUE HEADS.

9. Of the excess of Revenue the explanation is that the Revenue of the month of March 1887 was altogether exceptional.

The Estimate of our principal Revenues which was published on March 26th, 1887, was as usual a statement of eleven months' actuals (April to February), and an estimate for the remaining month of March. There are difficulties in estimating for the month of March which I shall afterwards explain; and the Revenue of March 1887 certainly altogether exceeded our anticipations. The consequence was that in publishing, one month after the Budget Statement, the usual monthly statement of accounts (*Gazette of India* for April 30th, 1887), we shewed

the following large excesses of Revenue over the Revised Estimate. I append, for purposes of comparison, the actual figures as now made up:—

(In thousands of Rx.)	Budget State- ment of March 26th, 1887.	Monthly State- ment of April 26th, 1887.	Actuals as now made up.
Land Revenue	23,170	23,610	23,653
Opium	8,900	8,950	8,943
Salt	6,540	6,660	6,658
Stamps	3,720	3,750	3,751
Excise	4,270	4,370	4,375
Provincial Rates	2,940	3,010	3,000
	<u>49,540</u>	<u>50,350</u>	<u>50,380</u>

The unusually high receipts of March, therefore, under the six principal Revenue heads, account for Rx. 810,000 of the improvement of Revenue. The greater part of this is under Land Revenue, where the Receipts were Rx. 440,000 more than estimated. It may be noted that in the two months of March and April we collect more than Rx. 6,000,000 out of the year's Revenue of Rx. 23,000,000; and a more or less favourable season, or a more or less active collection, may well make the portion of Revenue which comes within March vary by half a million. The last two years have been exceptionally favourable, for, whereas the collections of March had never before exceeded Rx. 4,360,000, they came up to Rx. 4,730,000 in 1885-86: and in the next year—that now under discussion—they exceeded Rx. 5,000,000. In the same way the collections under Excise were also nearly Rx. 40,000 higher than those of any previous March.

Besides this, Rx. 810,000 under the principal heads of Revenue, the Railway receipts shewed an improvement of Rx. 210,000; and this improvement is also due to the active traffic which developed itself in the last month or two of the year.

ARMY EXPENDITURE AND SPECIAL DEFENCE WORKS.

10. The improvement in the Revenue figures calls for no further remark. We turn now to the excess expenditure in India of Rx. 445,526.

This is for the most part under two heads, namely—

	Revised Estimate.	Accounts.	Excess.
	Rx.	Rx.	Rx.
Special Defence Works	(Charged to Loan Funds)	123,110	123,110
Army Expenditure	14,068,700	14,620,516	551,816

11. The first of these charges refers to a programme of Military Works for the defence of our Harbours and of our Frontiers, which was alluded to in paragraph 24 of the Financial Statement for 1886-87. The Secretary of State, at first, following the example of the fortifications scheme of Lord Palmerston, directed this expenditure to be shewn outside the Revenue Account. But the ground on which this policy was adopted in England, namely, the practical certainty that the amount which has been procured in the first instance by loan, will be paid off out of the surpluses of future years, unfortunately does not apply to our existing financial circumstances. The Secretary of State, accordingly, as was explained in the Financial Statement made to Parliament last September,* has revised

* Now, these special defence works consist of frontier forts and harbour defences. They are most essential to the safety of India, and the Government are obliged to push them on with the utmost possible expedition. But as these works are not productive works, it is contrary to the principles on which Indian finance is conducted that the charge should be otherwise than one against Revenue, and there is no doubt that if there is Revenue, and if the Revenue will bear such charges, they ought to be charged against Revenue. No one can have any desire that extra taxes should be placed upon the people of India for the purpose of meeting charges of this kind, and the Secretary of State has no intention of suggesting to the Government of India that any such extra taxes should be imposed. As regards the charge for 1887, the Committee will remember that the surplus which I was able to announce in 1886-87 would be large enough to bear the charge in 1886-87 for these special defence works; and, therefore, it is the intention, if the anticipation be realized of the Secretary of State, to pay for the special defence works out of the surplus of 1886-87.

this decision ; and while he agrees with the Government of India in thinking that for expenditure of the kind, we ought not to have recourse to any increase of taxation, he considers that the actual state of our finances is more plainly set forth by an account, which charges this expenditure against Revenue even at the risk of shewing a deficit, than by one which might delude us into thinking we had a surplus of Revenue, by leaving out of the reckoning this heavy, though temporary, unproductive expenditure.

12. As regards the Army Expenditure, it was again, as in the case of the Revenue, in the Accounts of the month of March, that our Estimates were overpassed. The statement of account published on 26th April 1887, to which I have already referred, shewed that for Military expenditure there had been an issue of Rx. 13,000,000 from the treasuries, as against Rx. 12,700,000, the estimate we had made a month earlier. This excess expenditure was practically entirely in connexion with the operations in Burma, and mostly arose out of heavy claims presented and paid during March, after the date of the information on which the Estimates were based. The Final excess, it will be seen, is still larger than the Rx. 300,000 then shewn.

13. These figures, therefore, dispose of the Revenue Account of 1886-87. The Revised Estimate anticipated an equilibrium of Expenditure and Revenue. In the end we gained by an excess of Revenue, which, after deduction of the Provincial share, gave the Imperial Accounts an improvement of Rx. 731,465; but as we had against this an excess of Imperial expenditure of Rx. 445,526 (including special defences now first brought within the Account), and also an excess in the charge for Exchange, the surplus of Rx. 500 taken in the Revised Estimates was increased only to Rx. 178,427.

14. The Capital Expenditure upon Railways and Productive Irrigation Works fell slightly short of the anticipations of the Revised Estimates, namely—

	Revised Estimate.	Accounts.
	Rx.	Rx.
Railways	5,170,500	5,123,105
Irrigation	631,000	547,379

Section III.—Estimates, 1887-88 and 1888-89.

15. In the statement of the financial position which I made on January 27th, 1888, I presented an abstract of our account in a form which I thought suitable for the explanations I had then to give. I showed that the position in the Budget Estimate of 1887-88 was a position of practical equilibrium. I showed that we had to face a loss of Opium Revenue of Rx. 300,000, and a falling off of Railway Revenue by Rx. 400,000; that the charge for Exchange had increased by Rx. 720,000; and that we proposed to meet these by enhancing the Salt Duty (Rx. 1,725,000), by a duty on Petroleum (Rx. 65,000, since raised to Rx. 100,000), and by minor measures in Burma (Rx. 100,000).

The result, I then estimated, would be to improve our financial position from equilibrium to a surplus of Rx. 470,000; or more accurately, from a surplus of Rx. 17,000 to one of Rx. 487,000.

16. I reproduce below the same form of abstract account which I then made up, repeating in the first column the figures which I then gave as those of the Budget Estimates of 1887-88, and shewing in the second column the same figures as they would stand after the losses and gains just summarized. As I have, for present purposes, no object in displaying the Exchange charge separately, I have distributed it in the second column over the six heads which are affected by it. This second column, therefore, shews the general financial posi-

tion as it was left after the measures which were then explained and which have now, except as regards excise in Upper Burma, been brought into operation:—

(In Thousands of Rx.)	Budget, 1887-88.	New Finan- cial Position, 27th January 1888.	Revised, 1887-88.	Budget, 1888-89.

Expenditure on Special Defences (f)	464	750	569	1,121

(a) Imperial Marine, which was included under this head in the statement of January 27th, is now separately shown below.

(b) Excluding the amount charged upon accumulated Provincial Balances brought forward from former years.

(c) Increased revenue as above explained.

(d) Diminished revenue as above explained.

(e) The excess of the figures of the second column, over those of the first column, is the amount of the charge for exchange.

(f) Includes Exchange.

17. I have added in this abstract, in the same form and in parallel columns, the Revised Estimates for 1887-88 and the Budget Estimate for 1888-89. The former should differ from our standard statement of January 27th last (*i.e.*, the second column of figures) only by such special receipts and charges as we may consider peculiar to the year itself, in the sense in which it may be said that the figures of any particular year necessarily differ, more or less, from what may be considered the general average financial position for that year. The Budget figures of 1888-89 should differ from the same standard, in this respect that, of the progressive revenues, we have one year's additional advance, and that of so much of our expenditure as is progressive, we have also one year's additions.

BASIS OF REVISED ESTIMATES.

18. Before I proceed to explain these special features, I think it well to show exactly to what extent we can depend upon our Revised Estimates as representing the probable actual outturn of the accounts.

The date upon which our Estimates are presented to the public is practically determined by the provisions of Section 53 of the Act of 1858 "for the better government of India." This section prescribes that "the Secretary of State * * shall, within the first fourteen days * * * after the first day of May in every year, lay before the Houses of Parliament an account for the financial year preceding that last completed * * together with the latest estimate of the same for the last financial year."

Strictly speaking, the "latest Estimate" here referred to is one which we now prepare, about the beginning of December, on the basis of six months' completed accounts; but our methods of account are now so much more perfect than in 1858, and communication with England so much more punctual, that it is out of the question that we should present to Parliament in May, an estimate founded on facts of no later date than the previous September.

We have, therefore, for many years past, arranged the preparation of our "Revised Estimate," so that it may be the "latest Estimate" presented to Parliament in the first fortnight of May; and this practically means that the Estimate must be completed some time in March.

19. By March 20th we have collected the preliminary accounts of revenue and expenditure for February, of which the leading figures, compiled from returns furnished by each of the 200 treasuries at which revenue is received and money issued for expenditure, are published every month in the Gazette. Thus, at the time of the issue of the Revised Estimates, we know, in very considerable detail, the receipts and expenditure of eleven months of the year; there remain only one month's actual transactions to be estimated.

20. Unfortunately this one month of March is by far the most difficult of estimate of any in the year. To the difficulty of estimating the receipts under Land Revenue, I have alluded in paragraph 9, and the same thing occurs under other heads. Provincial rates are collected with Land Revenue, and there is the same uncertainty in their case, as in the case of Land Revenue, how much will come in in March and how much in April. We are in the heart of the Rice-export season, and an early or a late season makes a great difference in the distribution between the current and the next financial year, of the Rx. 700,000 which the duty each season brings into our treasury. Railways, of which the gross earnings average over Rx. 1,500,000 a month, are at their busiest time, and all Public Works expenditure is in its most active phase.

It is thus evident that a very full knowledge of the transactions of eleven months is not in itself an adequate equipment for making the Revised Estimate for the whole year. In practice, we make a moderate estimate only for the month of March, and as the actuals of that month are apt to be better than our Estimate, the result—as in the case of the Estimate of the year 1886-87—usually is that the accounts of each year give better results than the Revised Estimates.

21. The final results are known to us within moderate limits of error before the end of April (see paragraph 9 above); and if our Revised Estimates could only be put off for one month later, and be closed on April 20th, instead of March 20th, we could present the account of the year with some assurance of its accuracy in all its main features. But as already explained, the terms of the Act of Parliament practically forbid this course, and require us to close our estimates while the uncertainty of the month of March still hangs over us.

GENERAL COMPARISON OF REVISED WITH BUDGET.

22. The Revised Estimates for 1887-88 work out, it will be seen, to a deficit of Rx. 2,447,800, without reckoning the expenditure upon Special Defences, which, in the Budget Account, was charged to Loan. This is worse than the Budget Estimate by Rx. 2,464,500.

23. The main differences we may account for at once under three heads—

First, the sterling charges for interest on debt have increased from £2,630,100 Budget, to £3,365,700 Revised, an increase which costs us, including Exchange, Rx. 1,059,000. This charge is really outside any consideration of our financial position, as it arises entirely through a special operation, which throws upon us the payment, within one year, of five quarters' interest upon forty-eight millions sterling of debt.

Secondly, the Burma Military charges have—as I intimated in my Statement of 27th January—largely exceeded the Budget Estimate. The excess, as will be seen from the Abstract Statement above given, is put down at Rx. 830,000, and will be explained in greater detail in the Section relating to Army charges.

Thirdly, there is the great loss by the fall in Exchange, which I explained, on 27th January, to amount to about Rx. 710,000 upon expenditure included in the Budget.

24. These three items, therefore, account for a deterioration in our accounts of Rx. 2,599,000; so that, apart from these three causes, we have, on the whole, an improvement over Budget by Rx. 135,000.

This, as usual, is the balance of several losses and several gains. On our principal Revenue accounts, it will be seen, if reference be made to the statement in paragraph 16, we have received Rx. 54,556,000, against an estimate of Rx. 54,127,000, as the gain under Salt, Excise, Stamps, and other heads has more than covered the loss of Rx. 349,000 under Opium. Salt has given us Rx. 119,000 (as we have probably lost as much during February and March, by the temporary disturbance of trade, as we have gained by the enhancement of duty). Excise and Stamps contribute Rx. 409,000, and Customs have been very productive, giving a return of Rx. 114,000, in excess of Budget.

The Railway account is worse than Budget by Rx. 302,000, for both the net earnings have fallen off by Rx. 78,000, and the charges against them have increased, quite apart from any question of exchange, from Rx. 10,854,000 to Rx. 11,078,000.

On the other hand, there have been savings or excess receipts, under several of the heads which, in the abstract statement, we have grouped as Expenditure heads. Among these we may note particularly an increase of Telegraph receipts of Rx. 131,000, which must for the most part be put down as a set off against the excess of expenditure in Upper Burma, where the Telegraph charges of Public Departments are very high.

The enumeration of other smaller differences may be summed up in saying that, while we have found it necessary, during the course of the year, to make additional grants for expenditure in Upper Burma, for Irrigation, for Army charges, and for Political Expenditure, and in a few other matters, we have, on the whole, obtained, under other heads, sufficient savings to meet the charges so involved.

GENERAL REMARKS ON BUDGET ESTIMATES FOR 1888-89.

25. The Budget Estimates will be best explained by comparing the figures with the standard financial position as explained on 27th January—that is, by a few words of remark in comparison of the second and fourth columns of the statement in paragraph 16.

26. The first question we have to settle, in casting up the Budget figures, is the rate of exchange at which they are to be taken. That rate has been singularly steady throughout 1887-88,—rarely less than 16½d., and rarely higher than 17d. It is certain that, upon Council Drawings of 1887-88, the exchange will be

very close to 16'9d., or, putting it in the way that more nearly explains its effect upon our accounts, the Exchange charge will be as nearly as possible Rx. 42 per £100. The rate has dropped for the moment since the beginning of March; but the drop seems to be, partly at least, connected with the heavy drawings of the last month or two, and as drawings will be on a smaller scale in 1888-89, we may reasonably hope to realize, on the whole, a rate equal to that of 1887-88. We have, therefore, reckoned the Exchange in the Budget Estimates at Rx. 42 for every £100.

The comparison of the second and fourth columns is, therefore, not affected by any difference in the rate of exchange.

27. The result, it will be seen, works out to a surplus only a little different from that which we anticipated; that is, to put matters from the point of view stated in paragraph 17, the one year's increase of revenue nearly covers the one year's increase of expenditure. In one respect, the year 1888-89 falls a little short of the standard we have established, for we do not, in that year, fully come up to our new standard of enhanced salt revenue. In Opium, too, we anticipate a smaller standard of revenue than in January last; but the revenue under Excise and Stamps and other heads is already sufficiently far advanced, beyond our standard, to cover these deficiencies and give us, on the whole, an improvement of Rx. 495,000, under our principal Revenue Heads.

28. In the Railway Account, the estimates are moderately taken. We estimate for better earnings, but the charges against them equally advance, and we have a net excess outgoing of Rx. 2,115,000 against Rx. 2,252,000 of our standard account.

29. With the exception of the Army charges, the Expenditure heads are estimated at amounts not greatly differing from the standard of expenditure, for which we explained in January that we had to provide. The increase of Civil Expenditure is, on the whole, only one per cent. The heads of Post Office, Telegraph, and Mint, we are warranted, by the figures of the current year, in putting down at a considerably lower figure of net charge than the Budget Estimates of 1887-88. The grants for Imperial Civil and Military Works have been cut down, as far as possible, to meet the existing financial necessities. Provincial Civil Works shew an increase, the necessary result, under the provincial system, of the share of increase of revenue which falls within their account.

30. The main increase under the Expenditure heads, comes under the head of Army, where, without reckoning the extra expenditure in Upper Burma, the net outgoings are estimated to increase from Rx. 17,763,000 to Rx. 18,223,000. This increase of expenditure cannot at present be avoided; it is a matter in which, for the time, financial considerations must of necessity yield to the more pressing requirements of the military position. The estimates of extra Military expenditure in Burma are placed at a much lower figure than the actual charges incurred in 1887-88. Certain special causes of increased expenditure, which were present in 1887-88, are not likely to repeat themselves in 1888-89, and measures are being taken to reduce the scale of expenditure on the force serving in Upper Burma.

31. Having completed this more general review, I pass on to an examination of the main heads of Revenue and Expenditure set forth in the statement in paragraph 16 above.

LAND REVENUE.

32. The figures of Land Revenue shew considerable irregularity when they are made up by the financial year, as will easily be understood from the circumstances stated in paragraph 9. But if the accounts are made up by the 12

months ending September, so as to close at a time when the collections of one season are for the most part finished and those of the next not yet begun, the figures present a more regular appearance and shew a steady advance of revenue year by year.

Land Revenue during the twelve months ending September 30th.

See Note	665	694	677	676	734	811	880

The figures in the lowest line are the alienated Land Revenue of Bombay, which, in the system of accounts of that province, are added on the Revenue side, and charged again as expenditure under Assignments, Land Revenue, and Police. The amounts are neglected in the statement itself.

It will be remembered that a portion of the total receipts of Land Revenue is in the accounts shewn under the separate head of Irrigation.

33. Although the growth of revenue shown in the above figures has been very steady, it can hardly, from a financial point of view, be said to be satisfactory in amount. It has been less than one per cent. a year, and is on the whole a poor return for the money which Government has spent, in the form of railways and of canals, in improving its estate.

But the fact is that the period covered by the above statement represents, in a general way, the close of the 30 years' settlements in several of the provinces, and the Government is only now beginning to reap its share in the advance of the past two or three decades. Settlement operations are at present being carried on on a more extensive scale than at any previous time, and we have every reason to expect a handsome increase of revenue under this head.

NEW SETTLEMENT SYSTEM.

34. During the last few years (and in a great measure in preparation for this re-settlement of revenue) a very great improvement has taken place in Northern India in the administration of this important head of revenue and in the means adopted by the Government to assess and settle from time to time that share of the produce of the land which has in all ages been the main source of the revenue of the sovereign powers in India.

As no systematic review has recently been published of the position and prospects of this our most important head of revenue, I propose to take up the subject in some detail, both from an administrative and from a financial point of view, the materials having been supplied to me by Sir Edward Buck, the Revenue Secretary to the Government of India, to whom personally is due by far the largest share of the credit of the improvements effected.

35. The system of land-assessment has hitherto, in every Province, involved the complete survey, field by field, of every village—an operation

which was rendered necessary by the absence of correct maps at the commencement of the 30-year period. The object of the system now introduced is to preserve, and to correct up to date, the records upon which the surveys and settlements are based, so that the re-settlements, when they fall due, may be made upon existing records, and may not require an elaborate investigation *de novo*. The maps which have been provided by the great cadastral survey which has now almost drawn to an end, are in future to be corrected up to date from year to year by permanent establishments in which the patwārīs or village accountants occupy the most important place. In the same way the settlements now being completed have involved a complete revision of all records-of-rights including details of the occupancy of every field, and these records, like the maps, are in future to be maintained from year to year by the permanent establishments. The assessment included also the valuation of the soil and productive powers of every field; but the valuation made during the past 30 years will in future revisions of settlement be accepted without material alteration. Three important elements of expenditure have thus been eliminated from future settlement operations, *vis.*, the cost of periodical field surveys, of revisions of records-of-right, and of soil valuations. The introduction of the new system is made possible both by the more complete maps and records which have been supplied by the operations of the past 30 years, and by the creation of Agricultural Departments which are permanent Departments of Survey and Settlement.

36. An examination of the cost under the old and new systems has recently been made in pursuance of the enquiries of the Finance Committee with the object of ascertaining the financial effect of the new arrangements and the probable cost of future settlement operations. This investigation is not complete, but it points to a maximum expenditure, in future, of ₹100 a square mile, including the cost of additional establishment, and in some Provinces to a considerably lower figure. The comparative results are shown in the following table, in which a maximum rate of ₹100 is applied to all provinces:—

PROVINCE (EXCLUDING ARABIA).	Rate per square mile under the old system at rates recently prevailing.	Average expenditure per annum at rates in preceding column.	Average expenditure per annum at the maximum rate of ₹100 per square mile.
	₹	Rx.	Rx.
North-Western Provinces and Oudh	350	115,000	30,000
Punjab	200	50,000	25,000
Central Provinces	220	35,000	15,000
Bengal	350	17,500	5,000
Madras	440	70,000	15,000
Bombay	260	65,000	25,000
TOTAL	303	352,500	116,000

showing an ultimate annual saving of Rx. 237,500.

The above table is based on an estimate of the maximum cost which may be incurred in the revision of assessments when the new arrangements have been completely established. In the meantime some saving has been already made by their partial introduction and by measures which have recently been taken to accelerate the current revisions of settlement. Under the programmes which have been arranged in recent conferences with the local authorities, there has been effected a saving either in the expenditure on survey and settlement, or in the more punctual recovery of increments of new revenue, which, in three Provinces—the Central Provinces, Punjab, and Madras—is estimated at a gross amount of Rx. 2,000,000 during the next ten years, or an average of Rx. 200,000 a year during the next decade. In these and other Provinces the new increments of Land

Revenue to which the Government is entitled will henceforth be assessed and collected up to date, while hitherto they have in many cases come into force only several years after the date of the expiry of the old settlement.

37. The general growth of the Land Revenue is exhibited in the following table:—

Table showing growth of Land Revenue (including Permanently-settled Tracts).

(The figures are thousands of Rx.)	Receipts, 1856-57.	Receipts, 1870-71.	Average annual growth (14 years).	Percentage of Increase (14 years).	Receipts, 1886-87. (a) Excluding Alienations.

The figures show actual collections both of Land Revenue and of miscellaneous items classed as Land Revenue, *e.g.*, sale-proceeds of waste-lands; water-rates in Madras; nominal revenue assessment on lands assigned for service in Bombay; capitation-tax and receipts from fisheries in Burma and Assam.

38. Three periods are taken, *viz*:—(1) the first 14 years after the mutiny, during which the growth was at the rate of Rx. 190,000 a year; (2) a period of thirty years from the mutiny to the present time, during which the growth was at the rate of Rx. 166,000 a year; (3) a period of twenty years (partly estimated) from 1870-71 to 1890-91, during which the growth is at the rate of Rx. 142,000 a year.

39. It will not fail to be seen that, while the fourteen years preceding 1870-71 shewed an annual increase of Rx. 190,000, the rate of increase in the twenty succeeding years has averaged only three-fourths of this. The reasons for this are, that the first period was, in many parts of India—Oudh and Orissa for example—a period of active re-assessment and settlement, and that, therefore, during the second there was less of the growth of revenue which comes in from settlement operations; that a large accession of land revenue occurred after the mutiny in consequence of confiscations; and finally, that there was, between 1860 and 1870, a rapid increase in the cultivated area of the provinces of Bombay and Madras, in which the system of land-settlement is such that newly-tilled land comes under annual assessment, and in which the demand for cotton during the American war gave a powerful impulse to cultivation. On the other hand, a corresponding check to cultivation occurred in the same Provinces during the last of the three periods in consequence of the drought of 1877-78.

40. Notwithstanding these causes of exceptional growth in the beginning of the post-mutiny period, it may reasonably be expected that the capital outlay which the Government has recently devoted to irrigation and railways will, dur-

ing the next few years, bring to it a larger return from the land, by reason of the great improvement of its produce, both in quantity and value, by the agency of canals and the opening-out of communications. In these accessions to the landed income of the State strict regard will be had to the principles which have invariably been followed by the Government of India in the assessment of the land, its guiding policy having always been the lenient consideration of the proprietary classes. During 30 years of peace and progress, the rentals of tenants have, through the cultivation of new fields or the imposition of new rents by landlords, been continually expanding, and, in some of the most fertile areas of India, the landlords themselves have, without the intervention of the Government, materially enhanced the rent paid to them, while at the same time that proportion of it paid by them to the State has been continuously reduced to lower and more definite limits. In the same way, a lenient consideration is extended to the agricultural community in Provinces where the cultivators or cultivating proprietors are assessed by the State itself, so that in these also the percentage of produce paid as land revenue has been constantly decreased.

The growth of land revenue, therefore, which is to be anticipated will be a growth due to that peace and prosperity which directly spring from a lenient and careful administration rather than to any direct action of the Government in the direction of raising rentals.

A brief review of the position in each Province will now be given.

REVIEW BY PROVINCES.

41. *North-Western Provinces.*—The old system comes to a final end within the next two years. The greater part of the Province is held by tenants on small holdings of a few acres paying rent to landlords who are charged with a payment of 50 per cent. of their assets to Government. The advanced condition of the Province led the Secretary of State to enquire, so long ago as 1863, whether a permanent settlement could not be introduced; but a final consideration of the subject between 1882 and 1884 ended in the adoption of the system already described, under which annually revised maps and records are made the basis of assessment.

The rate of growth of land revenue in the North-Western Provinces since the mutiny year has, however, been moderate. In the first 14 years it was only 5 per cent. (say '35 per cent. per annum), but it has in the current period of 20 years risen to 10 per cent. or '5 per cent. per annum. There was in the North-Western Provinces less room for extension of cultivation than in most parts of India. Lying mainly in the fertile alluvial plain between the Himalayas and the high-lands of Central India, the Province attracted a large population at an early historical period, and it was at the period of the mutiny highly assessed. But the large amount of State capital spent since that time in the form of railways and canals, and the contemporaneous rise of prices has given a fresh impulse to agricultural wealth, and the province is now in many districts as lightly, as it was formerly heavily, assessed. A considerable amount of relief was given at the commencement of the 30-years period of settlement now expiring, by the reduction of the standard of the State demand from 66 per cent. of assets to 50 per cent.—a change which was, however, somewhat counter-balanced by the high valuation of assets made under the rules which governed the operations of the Settlement Officers. The relief is now made complete by the elimination of soil valuation from the assessment system which, except in cases of suspected fraud, requires that the recorded assets should be accepted as a basis of assessment. Rentals are in many districts still growing at a rate of about 1 per cent. per annum, and in certain tracts the growth is likely to be so great that even under the lenient system now adopted, some difficulty may be anticipated in taking the Government quota in full at the next settlement

from the landlords, on account of the large and sudden increase which would be involved in such an assessment.

42. *Oudh*, with the exception of a closely populated tract between Lucknow and Benares, came under much later development than the North-Western Provinces. Its revenues were not, until after the mutiny, brought under the effective administration of the British Government, who applied to it the same system of settlement as that which prevailed in the North-Western Provinces. The tenants of *Oudh* have less positive rights than those of the adjacent Province, as in the latter the greater number are more securely protected by statutory rights against unlimited enhancement of rent. There is, therefore, a prospect of a larger growth of rental, and also of revenue, in *Oudh* than in the North-Western Provinces. The land is rich, the climate favourable, and although since 1860 the extension of cultivation has been very large, considerable areas still remain to be brought under the plough. Competition for the land is likely to increase, and with it the enhancement of the rents by the landlords, who have in *Oudh* practically a free hand. The development of the Province under British rule has been very great, and is still, with the extension of railways, progressing at a rapid rate. The Province will come under reassessment, on the new or economical system, between 1892 and 1906.

43. In the *Punjab* there is a large proportion of dry sandy soil which is only capable of development under the influence of irrigation. Subsoil water is generally too far from the surface for wells, and the growth of revenue depends mainly on the expenditure of State Capital on canals. The revenue-payers are for the most part cultivating proprietors paying direct to Government, no part of the produce being intercepted by middlemen. A large amount of State capital has been in recent years invested in the Province in railways and canals. Under these circumstances the growth of the land revenue, which has since the mutiny been slow, should now progress at a rapid rate.

The revision of settlement has, under the old system, involved, as in the North-Western Provinces, a high rate of expenditure and protracted operations, but only a very few districts now remain to be completed under that system, and measures have recently been taken to expedite their assessment. The whole Province will then come under the operation of the new rules which require the settlement to be based on annual maps and records.

44. The *Central Provinces* have shown a very small development of land revenue since the mutiny. They have been to a great extent cut off from the railway system and have at the same time been lightly assessed. The revision of settlement takes place during the current decade commencing with the first year of the present Provincial Contract, 1887-88, and it is estimated, after nine years, to yield an increase of Rx. 180,000. Owing to the backward state of the Province, the low rates now paid to Government, and the new development of the railway system which is taking place, it has been determined to make the new settlements for terms varying between 12 and 20 years, so that the reassessment of the Province will recommence shortly after the termination of the existing revision.

The revision of settlement is being made at present partly on the old and partly on the new system, but at a low cost not exceeding Rs 100 a square mile. The same necessity for a complete series of maps and records has existed in this as in other Provinces, but owing to the circumstance that the revision of annual records was commenced, with the creation of the Agricultural Department, five years before the old settlements began to expire, there has been more time than elsewhere to utilize the village and district establishments in the work of preparing for settlement. Arrangements were made under which a large number of parties of the Survey of India have covered the surface of the Provinces with a

network of triangulation available both for topographical and revenue purposes. These are filled in by the village officers under the supervision of the local Revenue officers, and they provide sufficiently good maps as a basis for future revisions of assessment. The revision of the record is also primarily effected by the permanent establishments, leaving only the valuation of soils and general supervision to be effected by a special staff. At the close of the present revision, 9 or 10 years hence, the new system will be introduced and the cost be brought considerably below the new maximum of ₹100 a square mile.

The land is held, as in the North-Western Provinces and Oudh, by cultivators of small holdings paying rent to proprietors from whom the Government takes revenue. But whereas in those Provinces the landlords have the power, which is freely used, of raising rents contemporaneously with increase of competition and rise of prices, they have no such power in the Central Provinces. The growth of rent and, therefore, of revenue entirely depends, except in land newly taken into cultivation, on the periodical assessments of rent made by the Government at the time of settlement. The existing rents are, in most parts of the province, an unusually small fraction of the total value of the produce; while, in consequence of the rising prices due to the extension of the railway system, the disproportion is continuously becoming greater. The area of culturable land still to be brought under the plough is exceptionally large. The province is one, therefore, from which a material growth of land-revenue may be looked for.

45. Thus far the provinces dealt with are those popularly known as the "temporarily-settled zemindari" or "landlord" provinces. I will next refer to *Bengal*, which is recognised generally as a "permanently-settled landlord province." But there are in Bengal not less than about 14,000 square miles which belong to the temporarily-settled landlord class and of which the old settlements will shortly fall in. In respect of this tract preparations are now being made for punctual assessment on much the same plan as in the Central Provinces, and at equally moderate rates of cost, by the Agricultural Department of the Province.

The area in question comprises large tracts in Orissa and Chittagong, and several Government estates. It will hereafter come entirely under the new system. An increment of land revenue of 20 per cent. would in this area be equivalent to a fixed addition of 10 lakhs a year to the annual demand.

46. The Province of *Madras* must be divided into two sections—the permanently-settled zemindari or landlord area, and the temporarily-settled ryotwari or tenant-proprietor area. The first is about 48,000 square miles and the second about 93,000 square miles, or roughly one-third and two-thirds respectively. The settlement on the old system, which required a complete series of field maps and a valuation of soils, is now drawing to a close and is being hastened by assistance lent to the local Survey Department by the Government of India. In a few years the whole Province will, in accordance with the intention which for some time has been declared by the Madras Government, be permanently relieved of special Settlement and Survey establishments.

The growth of land revenue in the tenant-proprietor tracts takes place in two different directions. There is the periodical growth due to the increase of rent-rates at the end of every 30 years period, and the annual growth due to the gradual increase of the area brought under cultivation. For in Madras all tenant-proprietor waste land has an annual rate attached to it at the time of assessment which is applied and collected whenever the land is occupied. The periodical growth (that is, the increase of rates between the last settlement and the one now being completed) is roughly estimated at from 5 to 7 per cent. and the annual increment due to increased cultivation at Rx. 10,000 per annum. The

rate of increase under this latter head will necessarily fall off as less land becomes available.

47. In *Bombay* the same general conditions prevail as in the ryotwari or tenant-proprietor area of Madras. The growth rate, however, is not checked by the presence of permanently-settled land, and has, as in the temporarily-settled section of Madras, a double growth, the one being due to the periodical increase of rent-rates every 30 years, and the other to the annual occupation of fresh land at the revenue-rates which were attached to it at settlement.

The whole Province has in recent years undergone a thorough and searching revision of assessment which is now drawing to a close. This revision has been in the hands of a separate Survey Department which will within five or six years be gradually broken up and absorbed in the new establishments, and the Province will then come permanently under the new system. It may be noticed here that both in the Madras and Bombay Presidencies the holdings or small farms of tenant-proprietors have had their boundaries fixed once and for ever by the Survey Department, and that instead of, as in other Provinces, the map requiring annual revision in order to keep it in accord with changing boundaries, it is here necessary to maintain the boundaries in accordance with the map as originally made. This duty, as well as that of the maintenance of the statistical record, is on the close of settlement operations in each district made over to the Agricultural Department.

The growth of land revenue has been more satisfactory in Bombay than in any Province. It began in a marked degree with the impetus given to cotton production at the time of the American War, and has been continued under the influence of rising prices, extended cultivation (and in Sind, extended irrigation), supplemented by a careful system of assessment.

48. In *Assam* the very backward state of the Province and the absence of communication with the seaboard in the years immediately succeeding the mutiny, have made the growth of revenue in the later years appear to be exceptionally rapid. A part of the Province (about 9,000 square miles) is, however, under the permanent settlement system of Bengal and the growth of revenue depends on the remaining area which is temporarily settled, chiefly with tenant-proprietors, at rates which are practically fixed, as there is hardly any competition for land on account of the great extent of waste area which can be taken up. The most fully-occupied portion has been revised on the system employed in other temporarily-settled Provinces, and this revision is nearly completed. The remainder will probably be surveyed and settled on a cheaper system under the direction of the Agricultural Department, and the whole Province will thereafter come under the new arrangements. As in Bombay and Madras, there is an annual growth (estimated at from Rx. 8,000 to Rx. 10,000 per annum) which is almost solely due to new occupation, as there is here no periodical growth due to increase of rates.

49. *Lower Burma* has been undergoing for some years a regular revision of settlement, of which about one-fifth, or nearly 10,000 square miles, is completed. Each district, when it leaves the settlement officer's hands, is made over to the permanent care of the Agricultural Department, which will henceforward be responsible for maintaining the maps and records. The land is held by tenant-proprietors, and there is again in this province a double growth due to annual increase of occupation and to periodical increase of rates. The annual assessments are complicated by the release of all fallow land from payment of any but a nominal revenue, but there is a steady extension of cultivation which, supplemented by the effect of a careful survey and assessment, has resulted in a growth of from two to three lakhs a year on a comparatively small total revenue. Lower Burma is practically a large rice field formed by the alluvial deltas of

the river systems, and at present it yields only 1 per cent. of other produce. About 37,000 square miles, or 84 per cent. of its cultivable area, are still uncultivated, and there is room for further growth both by extension of cultivation and by the improvement of the agricultural system through the introduction of other crops. The soil is rich.

50. *Upper Burma* is composed of high-lands, the agricultural value of which is under examination. The land revenue is, like that of all border Provinces on first occupation, initially small; but there is an equal promise of the same steady growth in the future which has taken place elsewhere.

51. The increase of revenue in minor Provinces under the direct control of the Government of India is mainly due to the re-assessment of the little district of Ajmir and the addition of Quetta.

OPIUM.

52. The following are the statistics of opium for a few years past :—

(Thousands of Rx.)	1881-82.	1882-83.	1883-84.	1884-85.	1885-86.	1886-87.	1887-88, Revised.
REVENUE—							
Bengal sales	7,465	6,891	6,804	6,052	6,296	6,147	6,034
Bombay duty	2,185	2,396	2,508	2,538	2,449	2,544	2,297
Excise and Miscellaneous	212	214	245	226	197	213	213
TOTAL	9,862	9,500	9,557	8,816	8,942	8,943	8,544
EXPENDITURE—							
Cultivation and Manufacture in Bengal	1,931	2,156	1,722	2,828	2,914	2,593	2,373
Agency establishments and other expenditure	127	127	133	139	144	136	139
TOTAL	2,058	2,283	1,855	2,967	3,058	2,729	2,512
STATISTICS—							
Price in Bengal Rupees	1,324	1,222	1,250	1,296	1,235	1,123	1,059
Chests paid duty in Bombay	31,196	36,327	38,586	39,039	37,677	39,745	35,374

53. During this period there has been a steady downward tendency in prices in Calcutta, the exception in 1884-85 being due to the fact that in that year the number of chests offered for sale was much smaller than it had been for several years before, or has been since. The price during 1886-87 fell from $\text{Rs. } 1,180$ in the beginning of the year to $\text{Rs. } 1,098$ at the end of it, the fall being due in a large measure to the operation of the additional Article of the Chefoo Convention, which came into force on February 1st, 1887, and added to the burden which the opium had to bear at the Chinese end of its voyage.

The same influence continued to operate in 1887-88, for the price gradually ran down to $\text{Rs. } 1,029$ in September. Since that date, however, there has been a recovery, the price having risen to $\text{Rs. } 1,067$ in February, though it dropped again to $\text{Rs. } 1,042$ in March. This gives an average of $\text{Rs. } 1,059$ for the whole year. For next year we take what we hope is a moderate estimate, reckoning the selling price no higher than the March figure of $\text{Rs. } 1,042$, and assuming for the present that there will be no alteration in the number of chests brought to sale. This gives us for the Budget Estimate of Bengal sales, Rx. 5,939,000.

54. The expenditure upon the production of Bengal opium is a very variable quantity, and depends very largely upon the season. We have lately had seasons which are almost too favourable from a financial point of view, for, beyond the necessity of our maintaining a sufficient reserve against bad seasons, it is not to our advantage to produce more chests of opium than we can well dispose of. In 1882-83 the production was as low as 38,214 chests, but in the three succeeding years we have got 65,993, 64,930, and 64,500. The year 1887-88 is estimated to produce 58,814, which must also be taken as a fairly good season, and it has

cost us only Rx. 6,600 more than the Budget Estimate of Rx. 2,500,000. For next year we take a good average and put down the cost at Rx. 2,555,000.

55. The Revenue from Bombay opium is not so directly affected as that of Bengal by the additional burden of taxation on the China side. Since June 28th, 1882, the duty has been Rs 650 per chest, and the amount of export has been very steady. The high figures of 1886-87 are no doubt due to the rush at the end of that year to get chests landed before the Chinese duty of 110 taels came into force; for it was followed by a considerable lull in the beginning of the year 1887-88. The export, however, has been more active during the later months of 1887-88, and reckoning up to March 3, the number of chests that had passed the scales was only 64½ less than the amount in 1885-86. But about that date a portion of the Malwa crop was severely damaged by a storm, and the merchants immediately held back their opium in expectation of higher prices, so that during the week ending March 10th only 80 chests came forward against an average expectation of 1,000. Later accounts are more favourable; but, on the whole, we estimate for a somewhat lower duty than that of 1885-86.

SALT REVENUE.

56. The following may be taken as a statement of the average supply of salt in India:—

	Maunds.
Northern India salt sources (mainly the Sambhar Lake and the Mayo Salt Mines)	7,200,000
Bengal—Imported by sea	10,300,000
Madras—Local manufacture, all along the Coast	7,800,000
Bombay—Local manufacture, chiefly near the Rann of Cutch	6,300,000
	<hr/>
Burma—Mainly imported by sea	31,600,000
	1,600,000
	<hr/>
TOTAL	33,400,000

57. Before 19th January 1888 the rates of duty were Rs 2 in Continental India, and annas 3 in Burma, and on that date they were raised to Rs 2-8 and Rs 1 respectively. At these rates the Salt Revenue would stand as follows:—

	Before January 19th. Rx.	After January 19th. Rx.
Duty in Continental India	6,320,000	7,900,000
Duty in Burma	30,000	160,000
Other receipts	300,000	300,000
	<hr/>	<hr/>
TOTAL	6,650,000	8,360,000

The actual Salt Revenue of 1886-87 was Rx. 6,657,600, and, as I mentioned in my Statement of 27th January, the consumption of the current year was only slightly in advance of that of 1886-87.

58. There are two reasons why we cannot expect to gain, at once, the higher standard of Revenue above noted as that corresponding to the higher rate of duty. In the first place, by the operation of Section 37 of the Sea Customs Act, all salt which was at sea and as yet unlanded, will continue to pay the lower rate of duty. This would cost us in Bengal, at the ordinary rate of importation, the amount of the enhanced duty on about 2,000,000 maunds in 1887-88, and 500,000 maunds in 1888-89, say Rx. 100,000 in 1887-88 and Rx. 25,000 in 1888-89. Besides this, stocks will for some time be allowed to run down, and the higher-taxed salt will have to wait for a little till the lower-taxed salt, now in stock, has passed into consumption; the deliveries of the month of February have, for this

reason, been unusually low. Taking these circumstances into consideration, we have estimated to obtain a revenue of only Rx. 6,723,100 in 1887-88 and Rx. 8,122,500 in 1888-89. For the full measure of the enhanced revenue, we shall have to wait till 1889-90.

EFFECT OF ENHANCED DUTY.

59. The following statement gives the retail prices of Salt in the different provinces of Bengal at the end of the two fortnights preceding and the two fortnights succeeding the increase of the duty :—

	2nd half of December 1887.	1st half of January 1888.	2nd half of January 1888.	1st half of February 1888.	2nd half of February 1888.
	Rupees per maund.				
Central Provinces	3'80	3'83	4'38	4'40	4'44
Burma	1'71	1'74	1'93	2'0	2'09
Assam	4'23	4'20	4'68	4'65	4'78
Bengal [West]	3'15	3'17	3'61	3'61	4'09
„ [Central]	3'42	3'47	4'08	4'17	4'41
„ [East]	3'60	3'60	4'02	4'09	4'40
„ [Behar]	3'37	3'38	3'89	3'95	4'20
„ [Orissa]	3'19	3'19	4'21	4'10	4'18
North-Western Provinces	3'30	3'41	3'62	3'69	3'76
Oudh	3'33	3'62	3'47	3'68	3'73
Punjab	2'82	2'82	3'11	3'22	3'27
Madras	2'89	2'92	3'27	3'33	3'38
Bombay	3'13	3'19	3'55	3'54	3'47
Sindh	2'78	2'85	3'38	3'30	3'39
Berar	3'67	3'60	4'05	4'30	4'18

60. Comparing the prices of the 1st half of January with those of the second half of February, it appears that in the Central Provinces, Assam, Sind, and Berar, the increase varied from 0'51 to 0'58 of a rupee. In Bengal it was considerably more, varying from about 13 annas to nearly a rupee. In the other Provinces the increase was less than half a rupee. The average increase of retail price for all India was 0'55 of a rupee, or about 8 annas and 9 pie, being a little more than the increase in the rate of duty.

61. It is not possible to state exactly what is the average annual rate of consumption of salt in any particular province, and it is certain that the consumption varies very much. The average rate of consumption for all India is a little under 10½ lb a head of the population. At the rate of half an ounce a day the average consumption would be 11½ lb 6oz. Assuming for the purpose of the moment that it is as much as 12½ lb, it may be taken that a man with a wife and three children will consume 42½ lb in the year between them. Let their consumption be taken at 50½ lb. At the present average price of, say, Rs 3-14-1 a maund the salt of the family will cost about two rupees and six annas in the year. This is about 16½ per cent. in excess of the cost before the duty was raised, so that the man's contribution to the salt-duty may be taken as having been raised from about two rupees to two rupees six annas nine pies a year.

I do not enter into the question, on which there is much diversity of opinion, as to the manner in which the actual incidence on individuals, which I here state only in averages, is affected by the social customs of the people.

STAMPS AND EXCISE.

62. The statistics of Stamps and Excise Revenue may be given in a single statement. They are both regularly progressive, and it may be said that almost without exception the revenue of each province under each of these heads is in each year, more or less in advance of what it was the year before. For this

reason it is not necessary to do more than give the figures of the first and last of the years under review :—

(Thousands of Rs.)	STAMPS.		EXCISE.	
	1880-81.	1886-87.	1880-81.	1886-87.
India	27	42	22	73
Central Provinces	113	147	186	257
Burma	78	89+3*	218	247+7*
Assam	62	74	196	220
Bengal	1,139	1,346	855	1,013
North-Western Provinces	536	637	369	578
Punjab	327	352	111	137
Madras	547	582	628	917
Bombay	422	479	550	926
TOTAL	3,251	3,751	3,135	4,375

* Upper Burma.

63. As regards the Stamp revenue little remark is required. Of the whole amount about 70 per cent. represents the income from Court-fees, and may be taken as the revenue side of the account to which the expenditure on Civil and Criminal Courts (under Law and Justice) and on Revenue Courts (under Land Revenue) is charged. The practice of levying fees by stamps has, during the last few years, been extended to some small items which formerly came in as Cash Receipts under the heads above quoted, and a small part of the increase shewn in the above figures does not represent new revenue.

64. As regards Excise, it will be seen that it is in Madras and Bombay that the revenue administration has been most successful, as these two Provinces, with 31 and 16½ millions of inhabitants, respectively, produce a revenue nearly as large as that of Bengal with 69 millions. In fact, in both these Provinces, a very remarkable progress has been made. The whole system of distillation has been more thoroughly brought under control, and stricter and more methodical preventive measures have enabled the Government to greatly enhance the rate of duty; for the question of the rate of duty which it is possible to levy in India, is simply the question of the prevention of illicit distillation. In Bengal, also, the subject of excise has received very special attention at the hands of the Government, and it is likely that the measures which are now being adopted, on the basis of the Report of the Excise Commission of 1883, will shew, in the immediate future, a development of Excise Revenue, not dissimilar to that which has been witnessed in Bombay and Madras. The first effect was an increase of expenditure, which has risen from Rx. 28,900 in 1884-85, to Rx. 42,000 in 1887-88, and will probably continue to increase. The Revenue, by the same measures, fell from Rx. 1,005,200 in 1884-85, to Rx. 958,500 in 1885-86, but it has now advanced on a sounder basis, and it is expected that Rx. 1,097,500 will be received in 1887-88.

ALLEGED INCREASE OF DRUNKENNESS.

65. The advance of Excise Revenue in India has attracted considerable attention in England, having been erroneously accepted as evidence of the increase of drinking habits in India. The Government of India took a recent opportunity of sending to England a report containing very full information of what was actually being done in each of the Provinces of India. This paper, which was afterwards printed as House-of-Commons Paper No. 269 of 1887, explained the restrictive system which was everywhere adopted, and showed that the improvement in Revenue arose from severer taxation, and more complete preven-

tion. I copy the following paragraphs from the covering despatch No. 166, dated the 25th June 1887, with which the report was sent, the Congress referred to being the British and Colonial Temperance Congress, which had addressed the Secretary of State on the subject :—

* * * * *

6. The information, therefore, which has reached the Congress on this subject is entirely erroneous. The Governments in India are not set in the midst of an abstemious people from whom they can realise no Excise Revenue, unless they place in their way temptations to drinking which would not otherwise exist. On the contrary, it is only by strong preventive establishments that illicit distillation can be prevented. The great increase in the Revenue to which the Congress allude does not mark the extension of drinking habits, but is the result of a great and general increase in the rate of tax which it would have been entirely impossible to realise but for the great improvement in preventive measures which has accompanied it. In fact the ability of the Excise Department to prevent illicit distillation is the only limit which is imposed in practice to increase in the rate of taxation.

7. The Congress are also misinformed in connecting this increased revenue with "the system by which the right to license outstills is farmed to the highest bidder." In scantily-inhabited tracts, and in places which border upon Native States, a system of this kind is employed as providing the only means by which a tax of any kind can be levied upon the consumption of spirits; these are places where the Government has no choice between untaxed distillation and trade and the system of farm to which the Congress allude. But outside these very narrow limits the system may be described as obsolete. The object of the Excise Department is to tax every gallon of spirits, first, by a fixed still-head duty, which is regulated at the discretion of the Government; and secondly, by a license fee for retail sale, which is usually determined by competition for the privilege of sale.

* * * * *

9. Before passing on to give actual statistics of the consumption, it must be remembered with what large tracts of country and with what a large population we are dealing. Judged by a European standard, the people of India are a remarkably abstemious people. Drunkenness in the English sense of the term hardly exists in India. Writers whose comparisons are based on Oriental experience describe as drunkenness and as spread of misery and ruin a condition of things which, if it existed in England, would be regarded almost as a millennium of temperance. The average consumption in India is only a bottle or a bottle and a half of spirits a year for every adult male, and in some provinces is even less than that. It may be conceded that, however small the rate of consumption, any increase of it is equally to be deprecated; but at the same time in dealing with subjects such as the present it should be borne in mind that such terms as "drunkenness," "drinking classes," and "spread of drinking," when used by natives of India or in connection with Indian Administration, bear a meaning wholly different from that which they convey to a mind familiar only with the English aspects of the temperance question.

* * * * *

16. In short the Temperance Congress, starting from the erroneous assumption that liquor traffic and liquor consumption are unnatural in India and would not exist but for the state of things created by the British Administration, have formed the conclusion that the mere orders of the Government are sufficient to confine the consumption within any desired limit, and that the Government is responsible for not drawing that limit much closer. The real problem, it will be seen, is much more difficult. There is a point at which restrictions on consumption are inevitably followed by illicit distillation,—a point which varies in every region, according to the habits of the people, the sparseness of population, and the nature of the country and its productions. The papers now forwarded to Your Lordship amply shew that the object which the various Governments have in view is the adaptation of the various methods of Excise Administration to the different conditions which present themselves and the imposition of as great restriction as circumstances in each case permit. In our opinion the papers are a record of success in the solution of this difficult problem.

66. It remains to say that after considering the advice of the Local Govern-

ments in each case, we have taken the following estimates of the Stamps and Excise Revenue :—

	Revised, 1887-88.	Budget, 1888-89.
Stamps	3,848,100	3,854,400
Excise	4,503,100	4,609,500

INCOME TAX.

67. The year 1886-87 was the first year of the Income Tax in its present form, and the opportunity may be taken to give an account of the first year's administration and its results.

68. The gross collections amounted to Rx. 1,354,735, and the net collections (deducting Refunds—Rx. 27,067—and charges for Collection—Rx. 50,157), to Rx. 1,277,511. The net revenue is compared Province by Province with that derived from the License Tax in 1885-86, in the Table below :—

	License Tax Collections, 1885-86.	Income Tax Collections, 1886-87.	Percentage of total Collec- tions.	Increase of Income Tax over License Tax.
	Rx.	Rx.		Rx.
India	106	122,406	9½	122,300
Central Provinces	22,656	39,836	3	17,180
Burma	16	...	16
Assam	5	19,905	1½	19,900
Bengal	139,167	333,627	26	194,460
North-Western Provinces and Oudh	112,954	213,639	17	100,685
Punjab	35,747	105,652	8	69,905
Madras	41,851	138,674	11	96,823
Bombay	120,314	303,756	24	183,442
TOTAL	472,800	1,277,511	100	804,711

The collections under India include the general collections in Ajmere and Coorg, and the assessments on salaries of Officers serving immediately under the Government of India and in Political employ, and of Military and Public Works Officers throughout India; and also a large amount of taxation on Interest on Securities.

69. Bengal and Bombay together have furnished about half of the total revenue; the towns of Calcutta and Bombay of course contribute largely to this result; the proportion which the gross collections in these towns bore to the total collections (excluding the tax on salaries of Government servants) in those Presidencies is indicated below :—

Bengal.	Calcutta.	Percentage of Calcutta on Bengal.	Bombay Presidency.	Bombay City.	Percentage of City on Presidency.
Rx.	Rx.		Rx.	Rx.	
338,468	170,588	50.4	257,500	140,652	54.6

The collections from these two cities, therefore, form more than one-fourth of the whole collections in India.

In Madras City the collections amounted to three lakhs.

The North-Western Provinces and Oudh produce a larger amount than any other Province, if the Presidency Towns be excluded.

70. The incidence of the tax in the various Provinces, and in Calcutta, Bombay, and Madras is shown below, the proportions being calculated with reference to the final-demand :—

	Number of population to each person assessed.	Number of population to each rupee of tax.	Incidence of tax on each person assessed.
			R
Central Provinces	1,136	39	29
Assam	811	50	29
Bengal—			
Calcutta	37	44	82
Elsewhere	853	39	22
North-Western Provinces	602	21	28
Oudh	866	35	24
Punjab	555	25	22
Madras—			
Madras City	80	13	62
Elsewhere	655	28	23
Bombay—			
Bombay City	37	55	68
Elsewhere	311	13	23

71. Comparing the Presidency Towns, the proportion of assesseees to the general population is the same in Calcutta and Bombay; but the average tax paid by each assessee is considerably higher in Calcutta than in Bombay; the Madras average tax is not far below that paid in Bombay.

Leaving out the Presidency Towns, the variations in the incidence of the tax on each assessee are inconsiderable, but the proportion which the taxable population bears to the whole varies very largely. Bombay appears to be by far the richest of the Provinces, one in 311 being taxed, whereas in the mofussil portions of Bengal only one in 853 is liable to taxation; in the Orissa Division the proportion falls as low as one in 1,466, and in the Patna and Chota Nagpore Divisions the proportion is one in 1,012 and one in 1,129 respectively. In the Bombay Presidency the Ratnagiri District has only one in 1,179 of the population taxed; the next lowest proportion being one in 656 in the Thana District. The Central Provinces naturally come out with the smallest proportion of taxable incomes, though curiously the incidence of the tax on the individual tax-payer is highest there, and in some Municipalities the incidence is very high indeed. The Punjab and the North-Western Provinces stand next to Bombay, though far behind it. These results must not be pressed too far; as some portion of the difference is due to variations in the proportion that the Agricultural population bears to the whole; and again, some portion may be due to variations in the method of assessment.

72. The following Table distributes the actual collections* between the various parts of the Schedule of Act II of 1886 :—

	Rx.	Percentage of the whole.
Part I.—Salaries	418,074	30.4
" II.—Companies	74,619	5.4
" III.—Interest	73,617	5.3
" IV.—Other Sources	808,831	58.9
	<u>1,375,141</u>	<u>100.0</u>

* The figures in the succeeding tables do not work up to those of the Finance and Revenue Accounts, as they are taken from the Administration Reports, and include in some cases collections made after the close of the Financial year.

The tax on salaries consists for the most part of that levied from Government servants, the amount being made up as follows :—

	Rx.	Per-centage	Number of Assessee.	Incidence of tax per Assessee. R
Government Servants	300,307	72	66,400	5
Servants of Local Authorities	12,246	3	5,010	24
Private Servants	105,521	25	30,636	34
	<u>418,074</u>	<u>100</u>	<u>102,046</u>	<u>...</u>

The Companies taxed numbered 774; thus paying an average of about R964 each.

Under the head of Interest the information as to the number of assesseees is defective; in many cases the number taxed has not been given.

73. Under Other Sources of Income it is a matter of difficulty to distribute the taxation under any general heads; it seems best to give the figures for some of the principal Professions and Trades, the rest being lumped together—

	Number of Assessee.	Amount of Collections. Rx.
House Proprietors	8,249	40,495
Ship or Boatowners	2,500	4,201
Professions—		
Legal Practitioners	8,568	42,500
Medical Practitioners	1,700	5,395
Brokers	4,198	17,213
Bankers	9,270	43,852
Agents	2,038	17,784
Other Professions	14,955	35,717
Manufacturers	17,499	39,551
Merchants—		
Agricultural Produce	15,704	28,592
General	14,626	80,580
Piece-goods	17,188	43,703
Grain	15,457	31,959
Money-lenders	98,768	241,255
Others	8,114	27,500
Traders—		
Food	11,666	18,205
Spirits and drugs	4,476	9,096
Metals	3,227	6,982
Others	36,488	74,251
TOTAL	<u>294,691</u>	<u>808,831</u>

The money-lenders furnish just about one-third of the assesseees, and pay about 30 per cent. of the tax in this Part; they pay about R24 each; and by far the largest proportion (88,777 out of 98,768) are assessed at incomes of under R2,000 a year.

The highest rates of tax are paid by the following classes :—

	Tax per Assessee. R
Agents	87
General Merchants	55
Legal Practitioners	50

The tax under Part IV as a whole falls on the assesseees at the rate of R27 each; and of the total number of assesseees 264,715, or very nearly 90 per cent., are assessed on incomes of R2,000 and under.

74. The assessments under Part IV were those which were most difficult, and regarding which objections were chiefly raised, Eleven per cent. of the

original assesseees were on objection absolved from taxation, while the amount of the assessment was reduced on the whole by 19 per cent. These results may be regarded as satisfactory, considering that they represent the first series of assessments to a new tax; in Madras it is stated that there was a tendency to assess lightly, and the same appears to be the case with regard to Bengal and Oudh. The general impression derived from the reports of the Local Governments is that considerable success has been obtained in the endeavours made to render the tax as palatable as possible. The Government of Bengal says—

“The unpopularity of a direct tax may be greatly enhanced by injudicious administration; but the Lieutenant-Governor is glad to be able to record his belief that in the present year the dislike to the tax has not been seriously aggravated by errors in its working,”

and this expresses the view generally of the other Governments.

75. Classifying the assesseees of all kinds according to their rates of income, it appears that 90 per cent. had incomes of under Rs. 2,000, and that this class paid nearly 50 lakhs,* or only about 38 per cent. of the total collections. The incomes of from Rs. 500 to Rs. 750 numbered 51 per cent. of the whole body of assesseees, but produced only 14 per cent. of the revenue; and the corresponding percentages for the next lowest class with incomes not exceeding Rs. 1,000 were 13 and 6 respectively.

Only 6,929 persons were taxed on incomes exceeding Rs. 10,000, of whom 3,350 (or nearly half) were Government servants.

Only 388 persons were assessed at incomes exceeding half a lakh, and of this number 102 were assessed at incomes over a lakh. These 102 incomes paid Rs. 91,837, or about 7 per cent. of the whole collections; they included 37 Companies paying Rs. 63,901. Forty-eight of the 102 were taxed in Bengal, and 29 in the Bombay Presidency.

FORESTS.

76. Under ‘Other principal revenue heads’ is included the Forest Revenue, under which, at present, we get a revenue of Rs. 1,150,000 by an outlay of about Rs. 750,000, or 68 per cent. on income. The percentage in the State Forests of Prussia, in which country Forestry has reached an advanced stage, is very nearly the same, being 62 per cent. on a revenue of about 2½ millions. The percentage in India is gradually improving. Both in India and in Prussia the income is considerably diminished by the large amount of forest produce which has to be given free to local right-holders.

77. Still the present occupation of the Forest Department consists more in building up a most valuable property for the future than in realizing a revenue in the present. In Burma the teak forests furnish a handsome revenue; the Sub-Himalayan forests, from which large supplies are brought down for the consumption of Northern India, and the Sunderbans near Calcutta, are also revenue-producing areas. The Bombay forests are also productive in teak. But hardly anywhere is the expenditure less than 50 per cent. of the Revenue, and in many places it is much higher. The work of the Department is at present, in fact, rather conservation and development than production of revenue. Centuries of neglect and denudation have to be remedied by systematic reservation, planting, and exploitation, and the return which the Department at present gives to Government is in the rapidly increasing value of the Government forests, rather than in the revenue immediately brought into the Gov-

* In these calculations as to classification, interest on securities is omitted from consideration, as in most cases the distribution of this by classes is not shown.

ernment treasury. The net revenue, however, is satisfactorily progressing, having, during twenty years, increased from Rx. 130,000 to Rx. 400,000.

RAILWAY FINANCE.

78. Railways form a very important part of our revenue and expenditure, and it may be well to exhibit, in a comparative statement, the general effect of the Railway Revenue Account upon our financial position. The arrangement of our accounts, following, as it does, the somewhat complicated differences in the relations of Government to the different Railways, does not very clearly set forth the purely financial part of their history. But the following abstract of the transactions of ten years, made up from the accounts, and working up to the same net result, will render the position clearer. I may also refer to the detailed statement of capital, earnings, and working expenses, shewn in Appendices C. and E. of this statement.

(In thousands of Rx.)	1879-80.	1880-81.	1881-82.	1882-83.	1883-84.	1884-85.	1885-86.	1886-87.	1887-88, Revised.	1888-89, Budget.

Net Result—Deficit	1,570	1,044	286	1,306	305	1,052	733	1,188	2,154	2,115

(a) The payment to the East Indian Railway Company is included in this line; but in our regular accounts, it is charged under working expenses. The figures in this statement work out to the same net result as the accounts, but for reconciliation of details some further explanation would be required.

79. During the first few years of the period included in this statement, the construction of railways on the Guaranteed system had practically closed; the main exception being the expenditure in completion of the Oudh and Rohilkund Railway. The sterling account of interest, therefore, which represents this part of the capital, rises only from £4,737,000 in the first year to £4,827,000 in the sixth year. The construction of State Railways was actively proceeding, and was adding to the Indian Interest-account very regularly about Rx. 200,000 every year.

Throughout this period, that is, for the first six years included in the above statement, the advance of the net earnings was about equal to the advance of charges for interest on capital. During the five years, 1880-81 to 1884-85, the total amount of net earnings was Rx. 37,645,000, and the total amount of interest charge (including exchange) was nearly the same, Rx. 37,689,000; in fact, in bad revenue years the net earnings fell short of the

interest by half a million, and in good revenue years they exceeded it by nearly half a million.

80. It has to be remembered, however, that a considerable deduction has to be made from the earnings before they are available for Railway charges. The contracts with the Companies give them a share of the earnings (somewhat miscalled a share of surplus profits, for it may and does accrue when there are no real profits at all), which amounts on the whole, at the present standard of Revenue, to about Rx. 700,000; and other charges, varying from about Rx. 150,000 to Rx. 200,000, have to be borne for Government establishments connected with Companies' Railways, for the purchase of land for these railways, and for Railway Surveys and other miscellaneous expenditure. When, therefore, the net Railway earnings are equivalent to the burden of interest on capital, the result to Government is that, on the whole Railway Revenue account, the Government suffers a loss of Rx. 850,000 to Rx. 900,000. During the five years period, just mentioned, the loss was rather less, and averaged about Rx. 799,000.

From the statement given above, it will be seen that during the more recent years, that is, since 1885, this loss has been greatly increasing; and in the Revised and the Budget Estimate it is placed at about Rx. 2,150,000.

81. It is not the earnings that have failed us, except in this temporary sense that they reached a specially high figure in 1885-86 and 1886-87; and have now fallen to a more normal figure. For this normal figure still shows, on the whole, a fair rate of increase—Rx. 7,000,000 was the average standard of earnings about 1881; in 1884, it stood at Rx. 8,000,000, and it is now Rx. 9,000,000. This must be regarded as very satisfactory, especially when we consider that the construction of State Railways, during the past three or four years, has almost left the purely commercial lines, and been limited to Famine lines, such as Assam-Bihar, Bellary-Kistna, and Cuddapah-Nellore, or to Quasi-military lines, such as the Sind-Sagar Railway, the lines in Biluchistan, and I may add the Mandalay extension, though this partakes also of a commercial character.

82. The cause of the deterioration will be found in the figures which show the interest paid in England. From these it will be seen that the increase of interest paid in England, and especially of exchange, has run away with much more than the improvement in the net earnings. This will be a little clearer if we shew the figures in two classes—

	1884-85.	1885-86.	1886-87.	1887-88.	1888-89.
New Subsidised Companies—					
Interest	{ (a) 118 {	171	312	437	620
Exchange		54	117	183	260
Older Companies—					
Interest	4,827	4,806	4,972	4,963	4,995
Exchange	1,173	1,541	1,870	2,085	2,098

(a) Paid in India.

The Companies included in the first set of these figures are the Southern Mahratta, the Bengal-Nagpur, and the Indian Midland; all these lines are still in active construction, and the capital on which interest is being paid is as yet hardly earning any money. It is, therefore, for the present almost a dead weight upon our Railway finance, although after a year or two, it ought to cease to be so. * The amount of this dead weight of unproductive capital is as follows :—

Total interest charge as above.	118	225	420	620	880
Less Earnings	22	128	166	234
Net	118	203	301	454	646

Of unproductive capital there has always been a certain amount outstanding ; but while our construction was confined to State Railways proper, the amount was limited to the outstandings under this head alone. Of recent years we have added to our State Railway construction, the construction by the Companies just mentioned, and until the lines of these Companies are fairly in working order, we have these special additions to the amount of unproductive Capital.

83. Under the second head, that of the older Companies, the new burden is mainly that of Exchange. The Exchange during the five years above detailed has been, for every £100, Rx. 24·3, Rx. 31·5, Rx. 37·6, Rx. 42 and Rx. 42 ; and this, for a sterling charge of £4,900,000, involves an increase of Exchange charge from Rx. 1,190,000 to Rx. 2,060,000 or nearly Rx. 220,000 a year for four years. During the period of five years preceding 1885-86, to which I referred in paragraph 79, the improvement of the rate of earnings was sufficient to cover the enhancement of the Exchange charge, but then that enhancement was only Rx. 220,000 for the whole period. Since 1885-86, however, the fall of the rupee has gone on at too rapid a rate and the increase of earnings has quite failed to make up for it.

84. The result of these considerations is to shew that at the present juncture we are at an unfavourable period in our Railway finance. Our State Railway construction is, perforce, running in a line from which little commercial earning can be expected ; we are burdened with the interest on the heavy capital of three large Railway Companies, which is not yet productive ; and we have suffered very greatly by the rapidity of the fall in the value of silver. The second of these causes is one from which we will certainly recover in a short period ; and we shall be very unfortunate if the third continues to add to our burdens in the same ratio as in the immediate past. Meantime the earnings taken by themselves shew fairly steady progress, and we may, therefore, reasonably look for early relief from a very large part of the present burden of Rx. 2,150,000, imposed upon us by our Railway accounts.

INTEREST ON DEBT.

85. The following figures shew, in thousands of £ the amount of sterling debt of the Government at the end of each year :—

1881-82.	1882-83.	1883-84.	1884-85.	1885-86.	1886-87.	1887-88.
68,142	68,586	68,109	69,271	73,807	84,228	84,228

But 10,152 of the first figure and 18,514 of the last is held on Railway account, and merely represents the part of the Capital account of Railways purchased by Government. The real increase of sterling debt during this period is therefore £7,724,000.

The interest payments shew this distribution between the Railway account and the account of ordinary debt, the total amount paid being as follows :—

(Thousands of £.)	1881-82.	1882-83.	1883-84.	1884-85.	1885-86.	1886-87.	1887-88.	1888-89.
							Revised.	Budget.
Ordinary account . . .	2,457	2,458	2,418	2,578	2,420	2,556	3,300	2,584
Railway account . . .	353	348	312	353	366	566	552	549

The figures of 1884-85 were increased above the average by a heavy payment of £184,000 on account of discount on a new loan raised at three per cent. in that year. With this exception the interest charge was almost constant from 1881-82 till 1885-86, but in the year after that it rose by about £170,000.

86. A very great increase above the average payments will be observed in the amount of interest paid in 1887-88, the explanation of which is as follows :—

On April 19th, 1887, the Secretary of State notified his intention to discharge, on October 10th, 1888, the 4 per cent. sterling stock (over £53,000,000)

repayable on that date, and offered to the holders terms of conversion into $3\frac{1}{4}$ per cent. stock. The terms of conversion involved anticipation payments of 10 shillings per cent. interest otherwise falling due in 1888-89. But, moreover, as the interest upon the new stock was to run quarterly, whereas that on the old stock was payable half-yearly only (April to October), the operation brings forward, to January 1888 (*i.e.*, the year 1887-88), one quarter's interest or 17s. 6d. per cent., which would otherwise be payable only in April 1888 (*i.e.*, the year 1888-89).

The offer was accepted by the holders of about £48,200,000 of stock, and thus the excess payments of interest which fell within the year came to £663,000, besides commission and other exceptional charges. This £663,000 is not, properly speaking, an excess payment, but it is rather a redistribution of existing charges, which we would have had in any case to meet, and which appears in our accounts in this peculiar manner by reason of the fact that our year of account closes during the interval by which the payment is brought forward. The charges in question were not provided in the Budget Estimates, as it was necessary to avoid risking the success of such an important operation, by advertising it prematurely; and the payment not being a real excess of charge, was easily met without any new arrangements in respect of ways and means. A similar, though not nearly so large, excess charge occurs in 1888-89 in respect of the remaining £5,000,000 of the Loan, and by reason of it, and of the further commission and other charges, we get very little apparent benefit from the reduction of interest in the Budget Estimates for 1888-89. But from 1889-90 we get a benefit of $\frac{1}{2}$ per cent. interest upon £53,262,000, that is, a reduction of charge amounting to £266,310 sterling a year.

87. The interest account in India is a little more complicated. The total amount of debt stands as follows:—

(Thousands of Rx.)	1881-82.	1882-83.	1883-84.	1884-85.	1885-86.	1886-87.	1887-88, Revised.
Ordinary Debt	88,653	90,689	93,191	93,184	92,704	92,654	98,088
Special Loans	4,952	1,953	1,809	1,799	1,782	1,782	1,782
Service Funds, &c.	899	951	1,000	1,056	1,082	1,437	1,184
Savings Banks	3,366	3,744	4,017	4,722	5,116	5,836	6,711
TOTAL	97,870	97,337	100,017	100,761	100,684	101,409	107,765

A large amount of the above debt represents the capital outlay upon Railways and Irrigation works, and another portion of it represents moneys lent at interest to Municipalities and Local Bodies, and in some cases to Native Chiefs. Six-and-a-quarter crores (6,250) of it are the investment of the Currency Department. The account of interest, therefore, shows considerable recoveries on these accounts, and stands as follows:—

(Thousands of Rx.)	1881-82.	1882-83.	1883-84.	1884-85.	1885-86.	1886-87.	1887-88, Revised.	1888-89, Budget.
Charged to Interest on debt	1,827	1,719	1,517	1,371	1,137	737	739	824
Recovered	840	670	820	668	687	614	655	642
NET BURDEN	987	1,049	697	703	450	123	84	182

These figures are somewhat remarkable. It must be remembered that the expenditure on State Railways is partly in sterling and partly in rupees; but the transfer from Debt Account to Capital Account is made upon the Rupee Account only. We have, therefore, written off the account of debt, each year, a

good deal more than the debt we have raised, and our Rupee debt has been gradually nearly all transferred to the Capital Account of the Railway and Irrigation works.

88. The following figures shew the portion of the interest payments which has, each year, been charged to the account of Railways and Irrigation, and which is, of course, in addition to the above stated charges—

(Thousands of Rx.)	1881-82.	1882-83.	1883-84.	1884-85.	1885-86.	1886-87.	1887-88.	1888-89.
Railways	1,462	1,621	1,785	1,959	2,182	2,423	2,587	2,706
Irrigation	742	816	895	932	965	993	1,019	1,047
TOTAL	2,204	2,437	2,680	2,891	3,147	3,416	3,606	3,753

These will be dealt with under the Heads of Railways and Irrigation.

89. The total of the Burden of Debt may be shewn by adding together the figures in paragraphs 85 and 87.

(Thousands of Rx.)	1881-82.	1882-83.	1883-84.	1884-85.	1885-86.	1886-87.	1887-88.	1888-89.
India	987	1,049	697	703	454	123	84	182
England	2,457	2,458	2,418	2,578	2,420	2,556	...	2,584
Exchange	507	564	552	626	762	977	(a)	1,086
TOTAL	3,951	4,071	3,667	3,907	3,632	3,656	...	3,852

(a) Omitted, being irregular as above explained.

CIVIL EXPENDITURE.

90. The Civil Expenditure, which is put down in the standard account in paragraph 16 at Rx. 22,021,000, is composed of the following items:—

	Standard of 1887-88. Rx.	Revised, 1887-88. Rx.	Budget, 1888-89. Rx.
REFUNDS AND ASSIGNMENTS OF REVENUE .	1,570	1,681	1,689
REVENUE DEPARTMENTS—			
Land Revenue (including District administration)	3,669	3,519	3,684
Forest Expenditure	738	763	771
Other Revenue Departments—India	1,075	1,057	1,073
England £	68	56	65
Exchange	29	23	27
CIVIL DEPARTMENTS (net)—			
Administration—India	1,372	1,394	1,387
England £	247	269	251
Exchange	104	113	105
Law and Justice (including Jails)	2,924	2,859	2,951
Police	3,392	3,396	3,454
Marine—Provincial	22	10	43
Education	1,121	1,069	1,130
Medical	747	705	728
Political	633	691	715
Other Departments	541	527	525
MISCELLANEOUS—(Net)			
Territorial and Political Pensions	677	609	571
Non-effective charges—India	458	467	492
England £	1,729	1,714	1,737
Exchange	726	720	730
Stationery, Printing, and Miscellaneous (net)	179	—83	163
TOTAL	22,021	21,559	22,291

(In the above statement, the sterling figures are shewn separately in the only cases in which they are of any importance. Exchange adds about 12, 8, 12, and 55 under Poli-

tical, Other Departments, Territorial Pensions, and Miscellaneous, respectively; in other cases, it only alters the unit figure by 1 at the most.

91. The *Land Revenue* Expenditure during the last few years has been as follows (in thousands of Rx.):—

1881-82.	1882-83.	1883-84.	1884-85.	1885-86.	1886-87.	1887-88, Revised.
3,004	3,043	3,329	3,363	3,414	3,464	3,519

The increase in 1883-84 is due to the assumption by the Government of about Rx. 300,000 of expenditure on patwaris (village accountants) in the North-Western Provinces and Oudh, by the abolition of the special cess from which they had till then been paid. During the last three years the expenditure has been increasing, owing to the progress of settlement work of which a full account has been given above. In 1887-88, although the Budget Estimate was for Rx. 3,668,000, the actual probable expenditure is Rx. 3,519,000 only, the difference arising from various savings on the estimated expenditure, the largest of which arises from the Madras Government not having brought into operation, during the year, the reorganisation of Subordinate establishments which is referred to in para. 132.

The Budget Estimate for 1888-89 is placed at Rx. 3,684,100, very slightly in advance of the Budget Estimate for 1887-88.

92. The charges under *Administration* in India have slowly increased from Rx. 1,291,000 in 1880-81 to about Rx. 1,392,000 in 1886-87, and just more than that in 1887-88. The increase has been general, that is, every Provincial Government contributes its share towards it. I do not think anything need be said about it, except that the amount of work of administration, which the expenditure represents, has certainly increased at a very much greater rate than the expenditure itself.

The Budget Estimate for 1887-88 was somewhat short of the actual existing standard of expenditure, and it is accordingly slightly exceeded in the Revised. The Budget Estimate for 1888-89 is for nearly the same amount as has been spent during the last two years.

The English expenditure has been practically steady at a little under £250,000.

93. Like the expenditure on Administration, that under *Law and Justice* has also steadily, but more rapidly, increased. The net figures stood at Rx. 2,562,000 in 1880-81, and about the same in 1881-82; but by 1886-87 they had risen to Rx. 2,809,000. It is Civil Justice that requires more and more provision being made for its demands, but as the increase of stamp revenue (mainly court-fees) is at least equal to the increase on the expenditure side, the expansion of the expenditure is hardly subject for objection. The net expenditure of 1887-88 is now put down at Rx. 2,859,000 against a Budget Estimate of Rx. 2,924,000, savings on the original estimate having occurred in nearly all the provinces. The Budget of 1888-89 is Rx. 2,951,000, being a slight advance over that for 1887-88.

94. The net charges on account of *Police* have been as follows (in thousands of Rx.):—

1880-81.	1881-82.	1882-83.	1883-84.	1884-85.	1885-86.	1886-87.	1887-88, Revised.
2,285	2,305	2,415	2,449	2,513	2,532	2,969	3,396

The increase which took place here in the years preceding 1885-86 represents for the most part the effect of the policy announced in 1882-83. In paragraph 65 of the Financial Statement for that year it was said that—

“Boards and Committees for the administration of certain Local Funds already exist in most parts of India. We now wish to widen the sphere of action hitherto assigned to

these Bodies. The Provincial Governments have therefore been invited to hand over to them such items of revenue and expenditure as may appear to be most suited to give them a real interest in the administration of the resources at their command, and on the other hand, to take over as a provincial charge some items of expenditure, such as police, over which Local Bodies cannot exercise any real control."

It was mainly medical and educational expenditure, which, in accordance with this policy, the Municipalities were expected to extend, in lieu of the police charges of which they were relieved. The increase of police expenditure therefore represents the charges formerly incurred by Municipalities, but of which they have now been in a great measure relieved.

95. The great expansion of police charges in the last two years is almost entirely in Burma. Burma Police expenditure in 1885-86 stood at Rx. 237,000 (net); in 1887-88, it stands at Rx. 1,031,700. Practically the whole of this increase represents the quasi-military force which has been recruited in India for service in Burma, and which will be necessary to bridge over the interval between the first military occupation of the country and its final settlement. The present high scale of expenditure is likely to last for two or three years, but after that we hope for rapid reduction of it.

96. The Provincial Portion of the *Marine Expenditure* consists of—

(1) The Pilotage service in Calcutta, of which the receipts exceed by Rx. 15,000 the portion of the charges that is brought to account under this head.

(2) Expenditure on Ports, Rivers, Light-houses, and river steamers which comes to about Rx. 40,000.

The net charge is therefore about Rx. 25,000.

97. *Educational Expenditure* has increased rather rapidly. The net outlay (deducting fees and other receipts) was Rx. 829,000 in 1880-81, but it has increased at the rate of between Rx. 40,000 and Rx. 50,000 a year, and in 1886-87, it stood at Rx. 1,097,000. Every province in India had its share in this increase. For 1887-88, as above shewn, Rx. 1,121,000 was estimated, but 1,069,000 only is likely to be spent, the reduction of provincial resources having compelled a slight retrograde movement. For 1888-89 the grants have again been increased, and the estimate stands at Rx. 1,130,000.

It should be noted that these figures do not shew the full measure of the increase of public expenditure on education in India, for Municipalities are also considerably increasing their expenditure on this head, and Municipal expenditure is not included in the Government accounts. It is part of the educational policy of the Local Governments to hand over schools, hitherto maintained from Government or from Local Funds, to the care of Municipalities, and every school so handed over disappears from our accounts of educational expenditure, though it remains, it is to be hoped, at least as efficient as before.

98. The net *Medical* charges have slightly increased from 1880-81 till 1884-85, having been Rx. 625,000 in the former year and Rx. 690,000 in the latter; but at this last figure they remained almost unchanged.

It should be remembered, however, that some part of the charges against this head have been passing into Municipal Accounts, and the diminution caused by this is probably the reason of the stationary nature of the charge during these years. The charges have now somewhat advanced, namely, to 705,000 (Revised, 1887-88) and 728,000 (Budget, 1888-89). Part of this increase arises in Upper Burma, but part of it is attributable to safe estimating, as this is one of the heads in which there is always a considerable saving on Budget.

99. The next head in the abstract represents the *Political* charges, and here there is unavoidably a very heavy increase during recent years. The increase arises almost entirely in connexion with our North-West Frontier. In 1879-80 and

1880-81, the standard of expenditure was about Rx. 450,000 (including the English charges of £10,000 and £15,000, as Indian contribution towards the cost of establishments in Persia and China respectively). But the subsidy of the Amir of Afghanistan, and the heavy charges for Afghan refugees, raised the standard of charge to Rx. 631,000 in the Estimates for 1887-88, and that will be considerably exceeded in the actuals by reason of the Boundary Delimitation and other special charges. The Estimate for next year again shews an advance (the greater portion of which is due to charges in connexion with Ayub Khan) and stands at Rx. 714,600.

100. On the remaining heads in the abstract I have little remark to make. Under Territorial and Political Pensions, we shall probably be relieved of at least Rx. 60,000 of charges by the death of the Ex-king of Oudh. The non-effective charges (leave allowances and pensions) are a very heavy burden, and must remain so in a country of which the public service is largely filled from foreign sources. The charge is necessarily every year mounting up, but it represents the fulfilment of positive obligations, and is not subject, except in a remote sense, to financial management. The Revised Estimate for the last group of Miscellaneous charges shews a considerable saving on the Budget Estimate.

POST OFFICE, TELEGRAPH, AND MINT.

101. The full account of the Rx. 248,000, put down in paragraph 16 as the net charge of these three quasi-commercial Departments, is as follows (in thousands) :—

		Revenue (+) and Expenditure (—).		
		India (Rx.)	England (£)	Exchange.
Post Office		1,216—1,212	—111	—46
Telegraph	Revenue Account	629—500	7—47	—17
	Capital Account	—123	—90	—38
Mint		170—79	—5	—2
TOTAL		2,015—1,914	7—253	—103
		+101	—246	

The English charges of the Post Office have for some years been very steady. More than half of them represent the payment, under Postal arrangements, to the Imperial Treasury, a payment which the new postal contract reduces from £66,000 in 1887-88 to £50,000 in 1888-89. The remainder represents stores.

Excluding consideration of this payment the purely Indian transactions which, in 1881-82 and 1882-83, shewed a loss of about Rx. 100,000, shew, in the Revised Estimates of 1887-88, a loss of Rx. 11,000 only, and in the Budget Estimates of 1888-89 a gain of Rx. 19,000.

To make a full account in the commercial sense, we would have to add charges for public works, for stationery, and for pensions and the like, but then we would also have to take into account the fact that the Post Office performs services for the district post in respect of which Government gets a revenue under Provincial Rates of nearly Rx. 100,000, and does all the work of the Postal Savings Banks without any credit in its account to represent its value.

102. Under *Telegraphs*, the Revenue account has, for a long time, paid a handsome surplus. This surplus, after taking into account a small charge for exchange, was, for the three last completed years, Rx. 129,000, Rx. 79,000, and Rx. 174,000.

The above standard gives us a net revenue of Rx. 72,000 after reckoning the exchange on the English charges.

The net Revenue is now estimated at Rx. 210,200 for 1887-88 and at Rx. 120,500 for 1888-89 (these figures including charges for exchange), the improvement being largely in Government Telegrams from Burma.

103. The *Mint* receipts have been a little better than the standard shewn in paragraph 16, as the importations were somewhat above average. The excess expenditure, however, has taken away all this advantage; it must be remembered that in 1887-88, the Mint had to incur the charges involved in coining over three crores of Gwalior bullion without getting the usual receipt of seignorage.

The figures taken for next year's Estimates differ very slightly from the Budget Estimates of 1887-88.

IMPERIAL MARINE.

104. The charges under this head are in two portions :

- (1) The expenditure connected with the Imperial Marine in India, which is normally about Rx. 120,000 or Rx. 130,000 net;
- (2) In England Admiralty charges, and Marine stores, which on the average is about £150,000.

Latterly, however, the expenditure has reached a much higher figure, operations in Burma have necessitated heavy charges for transport, and a considerable patrolling service has also been required for the Burma rivers, so that Rx. 321,600 was spent in 1886-87, and Rx. 234,600 are likely to be spent in 1887-88, under the first of these heads. The purchase of torpedo vessels and of Marine stores in connexion with the special defences was shewn under this head in the Budget Estimates of 1887-88, which accordingly stood at £326,700. These are now, however, removed to the special head of "Special Defences" and the Revised Estimates shew £148,300 only.

The Estimates for 1888-89 are Rx. 253,600 in India for the first head, and £92,000 in England.

IRRIGATION.

105. The following table shows the state of the account of *Major Works*—that is, of those works of which the construction is charged outside the Revenue Account, or to the Protective grant, and which are, in the Revenue Account, charged with the interest payable on the cost of construction :—

	1881-82.	1882-83.	1883-84.	1884-85.	1885-86.	1886-87.	1887-88, Revised.	1888-89, Budget.
Direct Revenue	866	931	937	1,075	865	910	975	1,014
Land Revenue	491	409	534	466	562	597	578	591
TOTAL	1,357	1,400	1,471	1,541	1,427	1,507	1,553	1,605
Maintenance	456	502	515	571	593	627	682	671
Net Revenue	901	898	956	970	834	880	871	934
Interest Charge	803	846	894	932	965	992	1,019	1,047
Surplus	98	52	62	38	—131	—112	—148	—113

A full account of the details of these figures will be found in Appendix F. They shew that the break-down of Revenue, which took place in 1885-86, occurred on the Ganges and Lower Ganges Canals, and that a heavy loss took place also on the Western Jumna Canal. In the last case, it was merely a revei-

sion from the excessively high standard of Revenue of the preceding two years, the receipts from this Canal being greatly influenced by the variations of season, as a year of good rainfall at once shews itself in a falling-off in the revenue. In the case of the Lower Ganges Canal, the break-down was caused by the destruction by floods of an aqueduct not far from the head of the Canal. Till this costly work is restored, the revenue will remain unduly low; the work of restoration is being actively carried on, but it will cost over Rx. 442,000, and will add Rx. 17,700 for all time to the account of interest.

106. From the details to which I have referred, it will be seen that the productive power of the Canals varies in a remarkable manner. The Lower Ganges Canal, even in its present crippled condition, pays a net revenue of Rx. 41,859 on a Capital Expenditure of Rx. 2,925,000, and the Godavari Delta System gives a revenue of Rx. 133,197 on a Capital Account of Rx. 1,065,535. On the other hand, the two canals which we have taken over from Companies do not even pay the charges of their maintenance, the return from them being as follows:—

	Capital Account.	Net loss, 1887-88.
Orissa (including the Midnapore and Tidal) Canals	3,315,022	35,000
Karnúl Canal	2,165,546	6,384

107. In the *Minor Works* classed under Irrigation, both Capital Expenditure and Maintenance are charged in the Revenue Account, but except in Madras, there are now few large items of expenditure remaining under this head. The works consist chiefly of—

Embankments in the deltas of Bengal and Madras.
Inundation Canals in Punjab and Sind.
Navigation Canals and Rivers in Bengal.
Tanks in Madras.

It is only under this last head that any immediate increase of expenditure may be expected. The land revenue of Madras is largely dependent upon irrigation from tanks, which are scattered all over the country and have come down from ancient times. The Government of Madras has, for some years, had it in contemplation to undertake systematic measures for the improvement and restoration of these works, and the investigations and plans being now sufficiently far advanced, it proposes to lay out, for some years at least, Rx. 50,000 or Rx. 60,000 upon them. The first year of the outlay is 1888-89, and the Madras Government promises an ample return in the form of improved Land Revenue.

The estimates under this head are as follow:—

	Bengal.	Punjab.	Madras.	Bombay.	Other Provinces.	Total.
1886-87. { Receipts	86	18	10	15	20	149
{ Expenditure	124	64	272	161	70	691
1887-88, { Receipts	93	19	9	15	18	154
Revised. { Expenditure	170	72	263	176	102	783
1888-89, { Receipts	92	18	10	15	19	154
Budget. { Expenditure	182	70	330	173	110	865

108. The estimates are, therefore, for net expenditure:—

1887-88 Major Works	148	Minor Works	629	Total	777
1888-89 Major Works	113	Minor Works	711	Total	824

CIVIL AND MILITARY WORKS. IMPERIAL.

109. Since 1880-81 it has been the practice of the Government of India to set aside an annual sum of Rx. 1,000,000 for Military Works, which include Forti-

fications and Military Roads, as well as accommodation for troops. The expenditure on Civil Works is mostly in the hands of Local Governments, and comes within the Provincial account, so that the Imperial portion—that is, the Expenditure on the Imperial Departments throughout India, and in the smaller provinces under the direct administration of the Government of India,—amounted to only about Rx. 400,000, unless special works were being undertaken. Accordingly, in the two years 1884-85 and 1885-86, the expenditure in India was—

	1884-85. Rx.	1885-86. Rx.
Military Works	943,344	960,415
Civil Works	465,169	350,452

Besides which about £70,000 are spent in England upon furlough and leave allowances of Public Works Officers of all branches, and Cooper's Hill College, besides a small amount for stores.

110. But since these years we have two sets of new and heavy charges added to the old standard. In the first place, about Rx. 200,000 a year are being set aside for the construction of a scheme of frontier roads, in the Punjab and Beluchistan, and in the second place, we have to fit out the new province of Upper Burma with new roads, and with the buildings required both for the Military forces there stationed and for purposes connected with civil administration. The two heads, therefore, shew a rapid increase of expenditure over the standard of 1884-85 and 1885-86, and the figures for the present three years are as follow :—

	1886-87. Rx.	1887-88, Revised. Rx.	1888-89, Budget. Rx.
India—			
Military Works—India	985,063	960,200	965,300
Upper Burma	73,950	312,500	190,000
Civil Works—Ordinary	292,042	347,200	306,900
Upper Burma	171,550	320,000	318,300
Frontier Roads	151,380	231,300	177,800
England	87,989	102,000	103,200
Exchange	33,089	42,800	43,400
TOTAL	1,794,763	2,316,000	2,104,900
Deduct Receipts	228,632*	85,400	82,300
Net Expenditure	1,566,131	2,230,600	2,022,600

* Includes Rx. 150,000 recovered from the Maharaja Sindia on account of Morar Cantonment and Gwalior Fort.

111. The roads, both in Upper Burma and on the Frontier, are at present being constructed by the Civil Works Department, and the ordinary Civil Works Grants are now being cut down to their lowest limit, in order to provide money for these new charges. Only Rx. 121,430 is allowed for ordinary "original works" in India in 1888-89, one of the large items being a charge of Rx. 15,500 for a new light-house for Oyster Island on the Burma coast.

PROVINCIAL.

112. The Provincial portion of this head represents the charges for roads and buildings all over India, and includes the portion that is met out of cesses upon land. This latter portion may be reckoned at Rx. 1,500,000 excluding the portion which the Governments of Bengal and the North-Western Provinces may be taken as spending out of the local rates which are credited in their provincial account.

113. The Local Governments vary their Public Works Expenditure, to a great extent according to the surplus of Funds which the Provincial Contracts leave in their hands; so that no particular year's expenditure can be taken as the necessary standard. The following figures compare their expenditure in 1887-88 and 1888-89 with the amount of expenditure which, on the Finance Committee's report, was fixed as a convenient minimum :—

	Minimum.	1887-88, Revised.	1888-89, Budget.
	Rx.	Rx.	Rx.
Central Provinces . . .	120,000	134,000	163,000
Burma	122,000	121,000	117,000
Assam	50,000	57,000	61,000
Bengal	310,000	283,000	403,000
North-Western Provinces .	275,000	301,000	275,000
Punjab	230,000	256,000	253,000
Madras	200,000	201,000	236,000
Bombay	293,000	420,000	437,000
TOTAL	1,600,000	1,773,000	1,945,000

The excess charges of Rx. 345,000 are for the most part met by drawing upon accumulated balances, of which a considerable amount, as will be explained in the section relating to Provincial Finance, is at present at the disposal of Provincial Governments. The whole account of the figure which is shewn in the statement on paragraph 16 is thus made up :—

(Thousands of Rx.)	1886-87.	1887-88, Revised.	1888-89, Budget.
Civil Works—Provincial . .	1,942	1,773	1,945
Local	1,425	1,511	1,543
TOTAL	3,407	3,284	3,488
Deduct Receipts	499	481	473
Net Expenditure	2,908	2,803	3,015
Deduct portion charged against accumulated Balances	—28(a)	484
Net Estimate	2,831	2,531

(a) This 28 (Rx. 27,700) turns out to be an addition and not a deduction; that is, the whole amount expended is charged to the year, and a further amount of Rx. 27,700 is charged off and laid by, to be spent hereafter, see paragraph 7.

MILITARY EXPENDITURE.

114. The following are the statistics during the past few years :—

(In thousands of Rx.)	1883-84.	1884-85.	1885-86.	1886-87.	1887-88, Budget.	1887-88, Revised.	1888-89, Budget.
ORDINARY ACCOUNT—							
India	11,003	11,190	11,640	12,188	12,440	12,593	12,931
England	3,966	3,907	3,630	3,513	3,748	3,758	3,727
Exchange	905	949	1,143	1,321	1,392	1,579	1,565
TOTAL	15,874	16,046	16,413	17,022	17,580	17,930	18,223
Afghanistan—net	103	2,146
Egypt—net	52
Burma—net	605	1,518	720	1,550	824
Arrear charges	1,230(a)
	17,156	16,149	19,134	18,540	18,300	19,480	19,047

(a) Payment of a million sterling to the English Exchequer.

115. The period included in the above figures is that during which the measures recently taken for the increase of the strength of the Army have been in operation.

The total cost of this increase of the Army may be stated, upon a comparison of Budget Estimates, as follows :—

Budget for 1884-85	11,190,000
Budget for 1887-88	12,440,000
						Difference	<u>1,250,000</u>

The standard of Expenditure before that increase may be seen from the figures of 1883-84 and 1884-85.

The details of the increase work up to a larger amount, and are, in a general way, as follow :—

1. Augmentation—							
British Troops (10,600)	603,000
Native Troops (19,000)	521,300
2. Increased privileges and pay—							
British Troops (mostly exchange)	273,900
Native Troops (mostly good conduct pay and hutting money)	73,300
Volunteers and Pensioners	17,600
3. Malt liquor purchased in India instead of in England	224,400
4. Remounts from Australia (increase)	31,400
5. Better Pension Rules	10,000
						TOTAL	<u>1,754,900</u>

The excess of this amount over the Rx. 1,250,000 may be described as due in about equal parts to economies introduced under other heads of the Accounts, and to the fact that the intended measures have not as yet reached their full development. It was stated last year that out of Rx. 657,000 of this expenditure, still remaining to be undertaken on April 1st, 1887-88, Rx. 345,000 had been entered in the Estimates of 1887-88, and Rx. 312,000, therefore, still remained to be undertaken after the close of that year.

116. For 1887-88 the Budget Estimate of Expenditure on the Army in India stood at—

Ordinary Account ; net	12,440,000
Burma Account	720,000
						TOTAL	<u>13,160,000</u>

as the figures now stand they are—

Ordinary Account ; net	12,593,000
Burma Account	1,550,000
						TOTAL	<u>14,143,000</u>

The increase under the first head may be described as mainly due to the following causes : (1) special purchases of transport which were made during the cold weather ; (2) the augmentation made in the establishment of British Troops having been effected somewhat more quickly than anticipated ; and (3) the expedition undertaken at the end of the year in the Sikkim territory.

117. As regards Burma, the estimates provided for only Rx. 720,000 of expenditure, but before many months had passed, it became obvious that the original intentions of Government as to withdrawing the forces could not be carried

out, and that it would be necessary to continue operations upon a larger scale than the Estimates provided for. An additional grant of Rx. 280,000 was made for this purpose, and a further amount of Rx. 150,000 was given for payment of gratuity to the troops engaged in Burma, which together made up the addition of Rx. 430,000, which was announced in September last to the House of Commons as having been made to the Estimates of Military expenditure.

Later in the year the state of Burma rendered it advisable to take some active measures for a display of force near the Shan territory and for operating with small columns in other directions. It was estimated that Rx. 200,000 would be further required for this purpose; but the latest information indicates that another Rx. 200,000 may be necessary. These additions, it will be found, bring the Burma account up to the figure shown in the Revised Estimates.

118. The Budget Estimates of 1888-89 provide for a still further increase under the ordinary head; which is mainly due to the completion of the augmentation of the army, but partly also to the commencement of the issue of new arms; an operation in respect of which some heavy expenditure will have to be incurred in the near future.

SPECIAL DEFENCES.

119. It will be seen that the Budget Estimates for 1888-89 provide for a very large amount of expenditure under the new head of "Special Defences." The Estimates for 1887-88 provided for only Rx. 474,600, but the Secretary of State, in a Despatch received in May last, urged more speedy progress in the works contemplated under this head. More elaborate arrangements were, therefore, made for this expenditure, and additional grants being given for it, the expenditure has amounted to Rx. 487,100 in India, besides £57,600 in England. This English expenditure, which is mostly for armaments and torpedo-vessels, would have stood at a higher figure, but for delays which will have the effect of postponing to 1888-89, part of the expenditure originally estimated to come into 1887-88. The English expenditure of 1888-89, accordingly, stands at the high figure of £437,700 sterling, and we have granted Rx. 500,000 for expenditure in India.

120. I may refer to the quotation, under paragraph 11, from the speech of the Under-Secretary of State, in which he explains why this expenditure is shown within the Revenue Account, instead of, as was at first intended, under the category of Capital Expenditure. The whole amount of the expenditure is at present reckoned at about £930,000 in England, and Rx. 1,650,000 in India, but these figures cannot be put forward but as very rough estimates, and it is possible that the present programme may be extended.

Section IV.—General Financial Position.

121. Having concluded these observations upon the several divisions of our Revenue and Expenditure, I would make some remarks upon our general financial position, but that no one can be more conscious than myself how difficult it is, in Indian Finance, to look very far beyond the present. Our finance is a strange blending of elements which we can regard with a feeling of certainty and confidence, and of large outlying uncertainties over which we have no control. If we look at those heads of Revenue and Expenditure which depend upon our own administration, we have every reason to be satisfied. Land Revenue, Salt, Stamps, Excise, Customs,—all of these are elastic and progressive. Post Office, Telegraph, and Forests, all of which may be regarded as *quasi-commercial* departments, are more remunerative every year. Civil and Public Works expenditure are well under control. Railways afford a certain and an advancing income, and the only difficulty connected, from a financial point of view, with the account of their revenues, is the vastness of the transactions, which is such that

five per cent. increase or decrease in their earnings may make a difference of a million, each way, in our accounts.

122. These are the elements of satisfaction and of comparative certainty. On the other side, we have 8½ millions of our revenue,—namely, the Opium Revenue—liable to be adversely affected, and at the present moment adversely affected, by the policy of China, and the increasing competition of other nations to supply the Chinese demand. We are obliged, by our military position, to take a share in the policy of armament which, willingly or unwillingly, the great European nations have been driven to adopt. And finally, and more directly affecting us, is the uncertainty of silver. The fall in its value seems to be temporarily arrested, but no one can say for how long we shall have a respite from the progressive increase of our burdens which this fall has hitherto imposed upon us. The chances of famine, too, are to be regarded, though it is certain that, through the extension of Railways, a new famine will be combated with very much smaller outlay of money than any former one.

123. The question of Indian Finance is, therefore, the question whether, in the face of all these uncertainties, our margin is sufficiently large. And in talking of this margin, I do not refer simply to the surplus of Rx. 423,000 which our Budget account shews, before the expenditure on Special Defence works is charged against it. When we write of the margin we hold against special uncertainties and special expenditure, we must not reckon merely that portion of the margin which remains to us after much of the special expenditure alluded to is charged against it.

For example, we have, at present, the special burden of the Upper Burma account which, for 1888-89, stands as follows:—

Rx.	Rx.
Revenues 547,000	Civil Expenditure:—
	Police 732,000
	Other Departments . . 339,000
	Military Works . . . 190,000
	Civil Works 314,000
	Irrigation 23,000
	Army Special Expenditure . 824,000
	<u>TOTAL 2,422,000</u>

shewing a net charge of about Rx. 1,879,000, all of which is within our revenue account. So also, we are charging to Revenue about Rx. 178,000 for Military roads on the North-Western Frontier.

Reckoning these, in the sense in which we are at present discussing the financial position, to be charges against our "margin," we might write the Budget Estimates thus, somewhat re-arranging the totals of the statement under paragraph 16:—

Rx.	Rx.
Ordinary net revenues, excluding Upper Burma 53,550,000	Ordinary net expenditure, excluding the above . . 51,074,000
Upper Burma 547,000	Upper Burma 2,422,000
	Frontier Roads . . . 178,000
	Special Defences . . . 1,121,000
	<u>3,721,000</u>
<u>TOTAL 54,097,000</u>	<u>54,795,000</u>
	Deficit, including Special Defences <u>698,000</u>

124. If, therefore, we look only at ordinary items, we have a margin of Revenue of Rx. 2,476,000, the excess of Rx. 53,550,000 over Rx. 51,074,000. This margin is what we have to oppose to what, in European continental practice, would be called the "*Budget Extraordinaire*," namely, the special burdens and risks of Famine and Exchange, of defence of our frontiers

and coasts, and of the conquest and settlement of our new province. In the present year, the charges of our "*Budget Extraordinaire*" are specially heavy, and (without reckoning any part of the account of Railway construction on our North-West Frontier) they absorb not only all our margin, but Rx. 698,000 in addition. The security of our present financial position depends upon our estimate of how far we may consider that, though these special burdens cost us net Rx. 3,174,000 in the particular year 1888-89, it is sufficient, on an average of years, to provide only Rx. 2,476,000 for them. The present scale of expenditure in Upper Burma and on Special Defences is practically certain of early reduction; but although it is possible that Famine charges and Exchange may add to our expenditure as much as we are in other directions relieved of, we have adopted a high standard in measuring our financial obligations, and can point with some confidence to the recuperative power shewn by our revenues, and to the fact that their natural increase, much more than any special measures of taxation, has hitherto enabled us to meet the ever-growing burdens which recent years have forced upon us.

Section V.—Provincial Finance.

125. It may be convenient in this place to enter upon a short review of the state of Provincial Finances. The new contracts with the Provincial Governments have now been in operation for one year, and the state of their Accounts and Estimates, after the close of the first year's transactions, shews very fairly how the new contracts may be expected to operate during their five years' currency. It will be borne in mind that the operation of the Provincial Contracts upon the general account is this; their Revenue and Expenditure is brought to account in the same way as general Revenue and Expenditure; but the amount by which their expenditure in any year falls short of their revenue is at once charged off the general revenue account as if it had been spent, and remains at their credit for expenditure in a subsequent year.

REVIEW BY PROVINCES.

126. *Central Provinces*.—(Disposable Revenue, about Rx. 700,000.) The Chief Commissioner will have, on March 31st, an excess of Revenue of about Rx. 180,200 to his credit, his fixed minimum being Rx. 80,000. The scale of expenditure appears to be within the means of the current Revenue, and the Chief Commissioner is proposing to expend a considerable portion of his accumulated balances upon Public Works. As a present excess in this class of expenditure can be discontinued as soon as necessary, the position of Central Provinces finance may be described as safe, but requiring careful management.

127. *Burma*.—(Disposable Revenue, from Rx. 1,250,000 to Rx. 1,300,000.) The minimum balance in this province is Rx. 60,000, so that a considerable part of the existing balance (Rx. 116,400 upon March 31st, 1888) may be described as available for expenditure. The Police expenditure is a heavy weight upon Provincial finances. A considerable improvement in Railway receipts has added to the balance at credit during 1887-88; but in the estimates of 1888-89 the increase of Police and other charges absorbs this improvement of Revenue. The balance at credit is meantime maintained, and the position is therefore a safe one.

128. *Assam*.—(Disposable Revenue, about Rx. 490,000.) With an economical measure of Public Works expenditure the Chief Commissioner's means are sufficient for the demands upon him.

129. *Bengal*.—(Disposable Revenue, about Rx. 4,800,000.) The contract made last year imposed upon the Government of Bengal the necessity of very careful management, if not of positive economies. The Budget estimates for 1887-88 not only opened with a balance below the prescribed minimum (Rx. 200,000), but proposed still further to trench upon it. Careful finance and prosperous revenues have largely restored its position. The revenue under Stamps (of

which three-quarters goes to the Provincial share) continues to show considerable elasticity, and Excise has also so greatly improved that the Provincial Government, on its one-quarter share, has gained an advantage of nearly Rx. 24,000. Bengal Railways have, during 1887-88, contributed an unexpectedly large revenue.

The result of these improvements, and of enforced economies on the expenditure side, is that the financial position of Bengal is, for the time, completely re-established, and it enters upon the year 1888-89 with a balance of Rx. 150,000 to the good, in excess of the minimum it is obliged to keep in hand. According to the Budget Estimates for 1888-89 this balance will be reduced, during the year, by grants made to Local Funds in aid of Local Expenditure.

130. *North-Western Provinces*.—(Disposable Revenue, about Rx. 3,200,000.) The year 1886-87, the last of the old contract, was a very prosperous year for the North-Western Provinces account, and they found their account close with a balance of Rx. 433,800, while they had estimated for Rx. 296,400 only. The account is at present, and has for two or three years been, seriously affected by a failure of Irrigation Revenue, caused by the break-down of the Nadrai Aqueduct. The loss due to this cause is partly made up for by a special temporary grant from Imperial Revenues, but even including this special grant, the revenue received by the Provincial account has been, in 1887-88, about Rx. 35,000 worse than anticipated. On the other hand, there has been a fair improvement under the Principal Revenue heads, though not enough to make up for the loss under Irrigation.

The North-Western Provinces Government has, in 1887-88, spent a part of its excess balances in Railway construction and in increasing the grants to Local Funds, a kind of expenditure which, within certain limits, can be reduced when necessary. It proposes to continue the same policy in 1888-89; and for that year its estimates are safe. But after 1888-89 its present scale of expenditure is dependent upon its receiving improvements in its revenue. If its Irrigation Revenue is restored within a year or two, it will be in easy circumstances; but apart from this consideration, it is, on its present scale of expenditure, making full use of its assigned revenues.

131. *Punjab*.—(Disposable Revenue, Rx. 1,580,000.) The account at present shews only a small scale of improvement of Revenue, and the Revenue is only enough to meet the expenditure. There is at present a small excess in the balance, which is Rx. 70,000 in excess of the fixed minimum, and this for the present affords a small margin on which to work. As Land Revenue Settlement is going on actively in the province, and as the Punjab gets 40 per cent. of any increase of Land Revenue, it is not unlikely that it may find, in increases of Land Revenue, a means of more easily meeting the demands for expenditure that are made upon it.

132. *Madras*.—(Disposable Revenue, Rx. 2,700,000.) The contract with the Government of Madras was based upon a moderate estimate of Land Revenue, as the Land Revenue of that province is much more liable to be affected by vicissitude of seasons than that of any other part of India. The season 1887-88 has been and promises to be favourable, and Madras has secured under this head a considerable advance of Revenue. Stamps and Excise Revenue have also advanced, and under these three heads and Assessed Taxes (which appear to have been estimated too moderately), the Provincial Revenues of Madras have been, in 1887-88, about Rx. 109,000 in excess of the estimate at which they were assigned. But part of this improvement may, as just stated, disappear in a bad season, by short collections of Land Revenue.

The very favourable year 1886-87, combined with economical management of its finances, left Madras with the very high balance of Rx. 433,700 with which to commence the new quinquennial period. It has taken advantage of

this high balance to seek a long postponed reform, in the reorganization of its Subordinate Revenue Service, which will involve an annual expenditure of Rx. 50,000; but will ultimately, it is not unlikely, result in an improvement of Revenue.

Only a moderate extension of expenditure having been incurred in 1887-88, the year will finish with a balance of about Rx. 58,500 in excess of the amount in hand in the beginning of the year; but as in 1888-89 the Madras Government will have to meet the expenditure upon improved establishments already mentioned, and proposes also to enhance its grants for Public Works and for Irrigation, the balance is estimated to be somewhat reduced by the year's operations. It will still, however, stand at the very high figure of Rx. 455,300 (the minimum being Rx. 200,000), and this margin affords ample security both for continuing the higher scale of expenditure now entered upon, and against the chances of a bad Land Revenue year.

133. *Bombay*.—(Disposable Revenue, Rx. 2,900,000.*) The contract made with Bombay in 1882 was a very favourable one, and became still more favourable through the large increases of revenue which accrued in that wealthy Presidency. The result was that, notwithstanding considerable increases of expenditure under Education and other heads, the account of the Provincial Government closed at the end of 1886-87 with the very high balance of Rx. 548,900. This high balance the Government of Bombay are utilizing for Public Works Expenditure, and having, during the two years 1887-88 and 1888-89, increased by Rx. 128,000 and Rx. 145,000 respectively, the rate of expenditure (Rx. 293,000) which was fixed, after the Finance Committee's investigations, as the necessary minimum, they will, it is estimated, reduce the balance, by the end of 1888-89, to Rx. 318,200, still considerably in excess of the fixed minimum of Rx. 200,000.

Apart from the high balance which is thus being disposed of, the Revenues have also considerably increased. Land Revenue steadily advances, Stamps and Excise show considerable increase, and Assessed Taxes have also produced a higher income than anticipated. The Revenue Account of the Provincial Government stands, on the whole, at nearly Rx. 80,000 higher than it did a year ago. Part of this improvement in its resources the Provincial Government has assigned for increases in its expenditure, but the financial position is, on the whole, extremely flourishing.

134. There is therefore none of the Provincial Governments which has not revenue enough for its present scale of expenditure, or rather, which has incurred any permanent obligations as to expenditure, which are beyond the scale of its revenue. Moreover, all the principal ones have balances which they are seeking the means of profitably expending. Their position is in curious contrast with that of the Imperial Government. But though the Imperial Government may for the time envy the Provincial Governments in their possession of assured revenues and high balances, it should be borne in mind that these ample revenues have been created by the provincial system, and would not have existed but for the assignment to the Provincial Governments of their share in the improvement of them

Section VI.—Capital Expenditure of Government.

135. It will be appropriate in this place to give some account of the Capital Expenditure on construction of Railways and Irrigation Works, which, in the Statements of expenditure, are shown "under the line," that is, as carried on out of funds supplied by borrowing.

* The adjustment of alienated Land Revenue being omitted from both sides.

The Budget and Revised Estimates for 1887-88 compare as follows :—

	1887-88.		1888-89.
	Budget.	Revised.	Budget.
	Rx.	Rx.	Rx.
<i>State Railways—</i>			
India	2,435,900	2,145,600	2,062,800
England	1,355,000	1,140,000	973,000
Exchange	503,300	478,800	408,700
<i>Irrigation—</i>			
India	700,000	592,900	600,000
England	7,000	...
Exchange	2,900	...
TOTAL	4,994,200	4,367,200	4,044,500
Deduct refund by the Bengal-Nagpore Company	1,390,400	...
NET	4,994,200	2,976,800	4,044,500

From these figures it will be seen that the programme of expenditure laid down for 1887-88 has been fairly adhered to, though the large refund from the Bengal-Nagpore Company, on their taking over the Nagpore-Chhattisgarh Line, alters largely the total appearing under the head of Capital Outlay.

136. The following are the main items included in the Railway figures :—

RAILWAYS.	Revised Estimate, 1887-88. Rx.	Budget Estimate, 1888-89. Rx.
<i>Open Lines—</i>		
Rajputana-Malwa	170,900	—11,000
Eastern Bengal	243,500	22,300
North-Western	780,500	111,000
Cuddapah-Nellore	85,679	7,700
<i>Lines under Construction—</i>		
Toung-hoo-Mandalay	1,053,800	738,200
Assam-Bihar	229,750	308,000
Bellary-Kistna	405,000	25,000
Bezvada-Hyderabad Frontier	115,400	52,000
Sind-Pishin	231,050	301,560
Chaman Extension	138,800	536,600
Bolan (High Level line)	194,730	64,500
Frontier Reserve Stores	42,652	—12,400
Chenab Bridge	10,600	181,000
Sind-Sagar (Western Section)	237,050	250,500
Sutlej Bridge	77,170	20,000
Sealkote-Jummoo	32,500
Metre gauge, Rolling-Stock, Plant, and Permanent-way material to be taken over by Government from the Bengal-Nagpur Railway, on completion of conversion to standard gauge.	...	200,000

Rajputana-Malwa.—There has been a large accumulation of stores during 1887-88, chiefly of coal and other supplies from England, which will, it is expected, be utilised during 1888-89. The greater portion of the charge to Capital in 1887-88 is due to this cause. The balance of the expenditure was chiefly incurred on land and additional Rolling-Stock found necessary.

Eastern Bengal.—The bulk of the expenditure during 1887-88 has been incurred in providing additional Rolling-Stock and Steamers, which the increasing traffic has rendered necessary, in completing the Kidderpore dock line, doubling the Chitpore line, re-modelling the Chitpore yard, and constructing the Chitpore over-bridge, all required for working the growing traffic. In 1888-89, the proposed expenditure is chiefly to provide additional waterway to make the line safe against floods and some additional stock. Additions to workshops and offices are also contemplated.

North-Western.—The expenditure during 1887-88 is chiefly on additional stock for the North-Western system and improving the gradients on the Punjab Northern Section. The estimate also includes the cost of a large quantity of permanent way material for renewals received from England too late in the year to be laid before the 31st March. This material will be issued to Revenue in 1888-89, and the credit has been provided for in the Budget Estimate. The expenditure proposed for 1888-89 is chiefly on the improvement of gradients on the Punjab Northern Section, the Sukkur Bridge, and on additional sidings, crossing stations, and watering arrangements to bring the line up to the standard required to meet the traffic that will pass over this line in the event of military operations beyond the frontier.

Cuddapah-Nellore.—The funds allotted are required to complete the works on this line.

Toung-hoo-Mandatay and Assam-Bihar.—The funds allotted will practically complete these lines by the close of 1888-89.

Bellary-Kistna.—This line has been transferred to the Southern Mahratta Railway Company as from 1st January 1888. Under the terms of the transfer the State has to bear all expenditure incurred up to the 31st December 1887, and all liabilities outstanding on that date. Provision has been made accordingly in the estimates.

Bezvada-Hyderabad Frontier.—The funds allotted will complete this line.

Sind-Pishin.—The grants provide for the completion, by the close of 1888-89, of all works now considered necessary.

Chaman Extension.—Provision has been made for this work being vigorously pushed on during 1888-89. The bulk of the expenditure in 1888-89 will be incurred on the tunnel.

Bolun (High Level line).—Funds have been allotted to admit of the completion, during the coming year, of the section at present sanctioned.

Frontier Reserve Stores.—The estimates provide for the supply and collection of the material which Government has decided to retain as a reserve. The credit in 1888-89 is due to the issue of stores to the Chaman Extension.

Chenab Bridge at Ramawalla.—Only preliminary operations have been carried out during 1887-88, but the Budget of 1888-89 provides for work being vigorously pushed on.

Sind-Sagar (Western Section).—The grants will practically complete this line. The expenditure proposed for 1888-89 is chiefly in equipping the line with Rolling-Stock.

Sutlej Bridge (Ferozepore).—The grants provide for the completion of the Bridge. Some further expenditure on training works may hereafter be found necessary.

Sealkote-Jummoo.—The grant for 1888-89 provides for the completion of the section of this line which lies in British territory. That within Jummoo territory will be constructed, at the same time, by the Durbar.

Bengal-Nagpore.—Under the terms of the contract with the Bengal-Nagpore Railway Company, the State is bound to take over, from the Company, the metre gauge stock, plant, and materials of the Nagpore-Raj Nandgaon Section (formerly known as the Nagpore-Chattisgarh State Railway) on the completion of the conversion of that section from metre to broad gauge. The value of the material is estimated at Rx. 200,000. This material will be utilized or disposed of hereafter as opportunity offers.

137. Among the Irrigation grants, the only large works are the Nadrai Aqueduct upon the Lower Ganges Canal (see paragraph 105), which, it is hoped to complete by October 1889, the completion of the Orissa Canals, and of the Kistna Delta System, and the Periar Project in Madras. This last is a project for conveying eastward, into the Madura District, a stream which at present flows westward, and it includes a tunnel through the hills which at present form the watershed. The remaining works are mostly developments of existing irrigation systems.

Section VII.—Ways and Means—Home Treasury.

138. The Secretary of State's estimates of the transactions at the Home Treasury for 1887-88 were as follows:—

	Budget. £	Revised. £
NET RECEIPTS.		
Council Bills	16,250,000	15,250,000
Receipts from Railway Companies for Capital Expenditure	3,772,800	7,166,700 (a)
Deposits and Advances	5,900	— 900
Add Opening Balance	2,077,100	3,280,800
TOTAL	22,105,800	25,696,600
NET OUTGOINGS.		
Excess of Expenditure over Revenue	14,632,100	15,216,200
Capital Expenditure of Government in England	1,421,300	1,147,000
Issues to Railway Companies for expenditure	2,755,800	2,718,600
On account of Remittances from India	1,125,300	1,000,500
Add Closing Balance	2,171,300	5,614,300
TOTAL	22,105,800	25,696,600

AIDED RAILWAY COMPANIES.

139. The Secretary of State's operations are at present greatly influenced by the transactions arising in connection with the Railway Companies. During the year 1887-88, it will be seen that the receipts of capital subscribed by them were greatly in excess of the original estimates. This was mainly under the following heads:—

	Original Estimate.	Revised Estimate.
Indian Midland	105,000	1,093,500
Southern Mahratta	300,000	1,133,250
Bengal-Nagpore	1,000,000	2,338,400
Bengal Central	250,000
	1,405,000	4,815,150
EXCESS		3,410,150

(a) £2,000,000 of the amount shewn in the Budget Estimate was received between the settlement of those Estimates and March 31st 1887 and therefore came into the accounts of 1886-87. The amount, however, is included here for purposes of comparison as if it had come in after March 31st, the opening balance being altered correspondingly.

These great differences partly arose out of new arrangements entered into after the Budget Estimates were compiled; and partly from the fact that the Companies arrange their raising of Capital more with reference to the state of the Money Market than with reference to their immediate prospects of expenditure.

The present condition of the operations of these Companies is as follows:—

140. The *Indian Midland Company* had paid up £2,896,500, and spent Rx. 2,270,000 by the end of 1886-87; an operation which, at the Contract rate of Exchange, leaves them with a balance to credit of Rx. 1,350,000. The funds which the Company estimate they will require for their expenditure are as follows:—

	In England. £	In India. Rx.
1887-88	898,400	1,393,700
1888-89	635,000	1,500,000

and as they estimate to raise a little over £1,000,000 in each year, they will considerably overspend their Capital.

141. A great part of the extra Capital of the *Southern Mahratta Railway* has been raised in connection with the recent transfer to them of the Bellary-Kistna Railway. They do not pay up any of the Capital already spent by Government, but they undertake to complete the line, and they have raised the Capital necessary to do so.

Their estimates of expenditure, including the Mysore Railway, are—

	In England. £	In India. Rx.
1887-88	203,200	790,000
1888-89	241,000	958,800

and they propose to raise £500,000 in 1888-89.

142. The *Bengal-Nagpur Railway Company* was formed towards the end of 1886-87, the initial Capital being £3,000,000. Of this amount they paid to Government about Rx. 1,390,000 for the existing Chhattisgarh State line and work done on the extension of it, and they have been actively spending money on construction during the last half of 1887-88. They will have paid up about £4,000,000 of Capital by the end of 1887-88, and of this Rx. 2,800,000 will have been spent, including the above Rx. 1,390,000.

Their estimates of expenditure are—

	England. £	India. Rx.
1887-88	593,000	1,965,500
1888-89	871,000	1,500,000

These will only a little more than exhaust the Capital at their credit on 31st March 1888. They propose, however, to raise a further amount of capital of about £1,032,700.

143. The Secretary of State, having to make payments of over £1,500,000 during the first week of April, requires to finish the financial year with a Cash Balance of at least £2,000,000. This, it will be seen, was the result aimed at in the Budget Estimates, but the receipts of Railway Capital altogether altered the position in this respect, and the Secretary of State, notwithstanding the reduction from £16,250,000 to £15,250,000 of his demands in the shape of Council Bills will end the year with a Cash Balance of about £3,500,000 in excess of the required amount. This excess, which is ordinarily lent at interest in the London Market, represents funds which will be drawn upon in 1888-89 by the Railway Companies in England and in India for their Capital outlay.

COUNCIL BILLS.

144. The following is the Secretary of State's Budget Estimate of Ways and Means for 1888-89, made up in the same form as above, the transactions

being, as before, necessarily governed by the estimates of receipts and payments on account of the Railway Companies :—

NET RECEIPTS.		£
Council Bills	.	14,000,000
Receipts from Railway Companies for Capital Expenditure	.	2,653,800
Deposits and Advances	.	4,500
Add Opening Balance	.	5,614,300
TOTAL	.	22,272,600

NET OUTGOINGS.		
Excess of Expenditure over Revenue	.	15,028,700
Capital Expenditure of Government in England	.	973,000
Issues to Railway Companies for Expenditure	.	2,901,300
On account of Remittances from India	.	1,091,200
Add Closing Balance	.	2,278,400
TOTAL	.	22,272,600

145. It will be observed that the Secretary of State proposes to draw £14,000,000 of Council Bills during the year, and does not propose to raise any new funds by sterling loans. It will be fully understood that in stating these as the present intentions of the Secretary of State, no sort of pledge is given that he will adhere to the programme thus explained, and he remains absolutely at liberty to raise money either by bills or by loans, from time to time, as he deems expedient.

There will be two operations on the money market, namely, the settlement of the remainder of the 4 per cent. sterling stock (about five millions), and the purchase of the Oudh and Rohilkhand Railway under the terms of its contract (an operation of over ten millions), but these transactions do not enter the above account.

Section VIII.—Ways and Means—India, 1887-88.

146. The following figures compare the Budget Estimate of Ways and Means of 1887-88 with the Revised Estimates :—

	Budget.	Revised.
NET RECEIPTS.		
1. Excess of Revenue in India over the Expenditure charged against it	Rx. 20,083,600	Rx. 18,590,300
2. Public Loan	2,000,000	1,934,000
3. Loan from the Gwalior State	3,500,000	3,500,000
4. Increase of Unfunded Debt—mostly Savings Bank Deposits	713,100	922,100
5. <i>For Remittance to Secretary of State</i>	1,032,000	982,300
Add Opening Balance	13,016,600	13,195,800
	<u>40,345,300</u>	<u>39,124,500</u>
NET OUTGOINGS.		
6. Expenditure charged to Provincial Balances	759,600	—27,700
7. Capital Expenditure of Government in India	3,519,600	1,348,100
8. Loans to Municipalities, &c. (chiefly the Calcutta and Bombay Dock Loans)	677,200	422,500
9. Other Items(a)	325,400	—344,700
10. <i>Issues on Capital Account to Railway Companies, against receipts in England</i>	1,673,200	3,165,000
11. Council Bills. <i>Sterling Account</i>	16,250,000	14,691,100
12. Do. <i>Exchange</i>	6,035,600	6,137,100
Add Closing Balance	11,104,700	13,733,100
	<u>40,345,300</u>	<u>39,124,500</u>

The transactions recorded in italics are connected with, and explained by, the corresponding figures of the Secretary of State's account in England. The others are purely Indian transactions.

(a) The explanation of this is omitted, as it would be of a highly technical character. It arises to a very large extent out of the exchange entries that are necessary in charging off exchange upon the English expenditure and in connection with Railway Companies and other Remittance accounts.

147. The first entry shews the result of the falling off in Opium and Railway Revenue, and of the excess of Military expenditure in Burma, and the transfer to expenditure of the Special Defences charges, which, in the Budget, were taken under Head 7. The remaining accounts on the Receipt side shew little variation from estimate.

148. On the outgoing side, the main departures from estimate are explained by the alterations which have been explained in dealing with Railway Companies' transactions. The figures may be explained thus—

	Capital Expenditure.	Railway Companies.	Council Bills.
Budget Estimate	3,519,600	1,673,200	16,250,000
Transfer of Special Defence Works to Revenue Account	—383,700
Bengal-Nagpur Company's Purchase of existing Railway	—1,390,400	+ 1,390,400	...
Bengal-Nagpur Company's further transactions	+ 575,100	...
Reduction of Drawings by one million	—1,000,000
Further reduction of demand by cessation of Telegraphic Drawings, about	—550,000
Result	1,745,500	3,638,700	14,700,000
Compare actual outturn of Revised Estimates	1,348,100	3,165,000	14,691,100

149. The loans were, as usual, estimated to be sufficient to carry us over the low period of Balances—November and December—with a Cash Balance of about Rx. 8,000,000. The Secretary of State's drawings, during the first four months of the year, were very considerable, £6,090,729—Rx. 8,649,500 having been allotted during that time, and Rx. 7,820,300 having been paid in India. The rate of both allotments and payments fell off during the next four months, the total, up to the end of November, being Rx. 13,432,300 allotted, and Rx. 12,277,800 paid in India. The payments thus fell short of the drawings by Rx. 1,154,500, a circumstance due for the most part to the fact that the proportion of Telegraphic Drawings greatly fell off.

We were meantime receiving the proceeds of the two Loans indicated as Nos. 2 and 3 in the above statement of account, the receipts being in the first case completed in September, and in the second, in the beginning of November.

The Balances therefore were unusually easy, and never fell below Rx. 10,000,000.

RUPEE LOAN OF 1887-88.

150. The public Loan of 200 lakhs was issued upon July 5th, and tenders were received upon August 2nd. The total amount tendered was Rx. 4,538,580, of which the following were accepted :—

	Rx.
At minimum accepted rate of R97-4 (52 per cent.)	235,800
Above said rate	1,764,200
	<hr/>
	2,000,000

The actual receipts being Rx. 1,948,511, or an average rate of R97-6-10 per R100.

GWALIOR LOAN.

151. Of the Gwalior Loan the terms were arranged with the Council of Regency as follows :—

- (1) The amount received, which was mostly in Gwalior and Chandori Rupees, to be credited at their bullion equivalent—R1 for every

165 grains pure silver—without deduction of seignorage or melting charges.

- (2) The amount to bear interest at 4 per cent. per annum, payable half-yearly.
- (3) The loan to be repaid in annual instalments of 12 lakhs each, commencing when the present Maharaja is invested with full powers of administration.

A small portion of the loan was received in Government rupees at the Agra Treasury, but the rest was brought down to the Calcutta Mint in four successive remittances. So uniform did the Mint find the standard of the coinage to be, that it was found possible so to alligate the numbers of Gwalior Rupees (which are above British Indian standard) and of Chandori Rupees (which are below it), that silver of rupee standard was produced with a single melting; and after the whole operation was over, the amount received in remittance was found to fall short of the bullion required for the standard outturn in Government Rupees by Rs. 5,967 only.

The settlement of the interest account up to date was made on February 1st, 1888, by a payment to the Council of Regency of about Rx. 75,000, and Rx. 70,000 (seven lakhs) will be paid every 1st February and 1st August hereafter.

152. It seems desirable to take this opportunity of explaining how this loan affects the finances of the Gwalior State. The revenue of that State has for a long time largely exceeded the expenditure, and in fact it is this excess which is represented in the silver which the late Maharaja Sindia left hoarded in his palaces. The present Council of Regency have entered upon an enlightened policy of administration, which will involve considerable additions to the expenditure of the State; but their reforms would certainly border upon recklessness if there were any chance of their immediately not only absorbing the whole of the present surplus of Revenue, but also trenching upon the accumulations of the past. In investing these accumulations in a loan to the Government of India, the Council of Regency, therefore, have not given up, out of their possession, a single rupee which there was any chance of their being able to devote to the benefit of the Gwalior State itself. The interests of expenditure being already amply secured by the existing surplus of Revenue, the Council had before them the choice between leaving the hoards lying absolutely unproductive in the palaces or fort of Gwalior, and lending them, so as to produce a still further surplus of Revenue, of several lakhs a year. There can be no doubt which of these two courses will add most to the wealth and prosperity of the State, and to the means at the disposal of the Maharaja's Government. The conditions which the Council have made for the repayment of the amount, ensure the return of the money to the Treasury of the State long before there can be any claim upon it on account of local needs; and meantime the local revenues will have received a handsome addition from the interest arising out of the investment.

INDIAN SAVINGS BANKS.

153. Our borrowing transactions at present obtain no inconsiderable supplement from the operations of the Savings Banks and allied institutions.

The Indian Savings Banks date from 1833, when they were opened in the Presidency towns of Calcutta, Madras, and Bombay. The Madras and Bombay Banks gradually extended their operations into the interior of their respective Presidencies through the agency of the various Government treasuries. The Calcutta Bank did not achieve similar results, and accordingly in 1870 arrangements were made for establishing District Savings Banks at the District Treasuries in the Bengal Presidency and in Burma and Berar. A further development of

the system occurred in 1882, when Post Office Savings Banks were introduced. These have rapidly advanced in public estimation and have now superseded the older institutions, so far as the District Treasuries are concerned. There now exist, therefore, outside the three Presidency towns only the Postal Banks. In 1886 these began to receive and repay deposits at rural Post Offices, thereby carrying encouragements to thrift into tracts of country where these had never been known before.

While the wants of the general public were being provided for in this way, the Government opened in 1859 Military Banks for its European non-commissioned officers and soldiers, and in 1879 Provident Institutions for the employes of State Railways. In 1884 the Civil Engineers' Provident Fund was commenced, and it has since been opened to officers of the Telegraph Department.

The following figures shew the progress of these Banks since the mutiny of 1857:

YEARS.	Total Deposits.	Total Withdrawals.	Total Balances.
	Rx.	Rx.	Rx.
1857-58	228,400	159,700	389,800
1860-61	327,600	311,900	623,700
1865-66	380,400	362,700	633,800
1870-71	674,100	605,100	1,150,000
1875-76	737,500	653,400	1,895,500
1880-81	2,044,800	1,114,000	3,213,700
1885-86	3,772,200	3,378,100	5,081,200
1886-87	5,330,700	4,616,400	5,795,500
1887-88 Revised Estimate	4,440,400	3,570,800	6,665,100
1888-89 Budget Estimate	4,949,300	4,162,900	7,451,500

To the figures thus estimated, we have to add the probable transactions of the Uncovenanted Service Funds and a few smaller amounts, and these give us the net receipts shewn under "Unfunded Debt" in our statements.

CALCUTTA AND BOMBAY DOCKS.

154. The eighth item in the above list of transactions refers to the arrangement under which the Government are finding funds for the Kidderpore Dock works at Calcutta, and the extension of Docks at Bombay. The former of these projects was estimated to cost, when complete, Rx. 2,750,000, and the latter, Rx. 940,000; but the Port Trustees not being able to obtain money in the Indian money market on sufficiently favourable terms, an arrangement was made whereby the Government raises the money for them and advances it on condition of receiving the same rate of interest which it has to pay (a little over four per cent.), and of having an additional one per cent. put aside as a sinking fund in repayment.

The advances made by Government to the Port Trustees of Calcutta and of Bombay, on account of their Dock-works, have been as follows:—

Advances.	Calcutta. Rx.	Bombay. Rx.
Till end of 1886-87	560,500	511,800
In 1887-88 (a)	300,000	300,000
TOTAL	860,500	811,800

In 1888-89 the Trustees will, it is estimated, require funds as follows:—

	Calcutta. Rx.	Bombay. Rx.
1888-89	449,000	75,000

(a) Partly estimate.

Section IX.—Ways and Means—India, 1888-89.

155. It remains to estimate for the Ways and Means of 1888-89. We have already dealt with the separate items which enter into this estimate,—the excess of revenue over expenditure in India, the provision required for capital expenditure, of Government, of Railway Companies, and of the Port Trusts of Calcutta and Bombay, the demands of the Secretary of State on account of Council drawings.

NECESSARY CASH BALANCES.

156. It is necessary to explain in a few words the principle which regulates our calculation of Ways and Means in India. Our receipts of Revenue, and some of our other transactions, are very unevenly distributed through the year. The four months, January to April, embrace a very heavy revenue period, during which, notwithstanding heavy payments of Council Bills, our Cash Balances continually increase; and during May and June the revenue is still good enough to maintain the high figure. But during the next five months, and especially August, September, and October, the Revenue receipts fall far short of the demands on the treasuries, and the balances run down quickly, even when we are receiving the proceeds of a loan. December is the month during which the balances are ordinarily at their lowest point.

Now, many years of experiment have shown us that the amount below which we may not suffer our balances to fall is 800 lakhs (Rx. 8,000,000). Our daily transactions average about 50 lakhs (Rx. 500,000) of receipts and the same amount of outgoings, and we have to provide for them at somewhat over 200 treasuries, and about four times that number of sub-treasuries. There is no system of Treasury Bills as in England, and little borrowable capital, to carry us over a temporary deficit—we have to keep our own money ready to meet the demands upon us.

Our Ways and Means Estimates are therefore so regulated that we may be sure of having, in the months of November and December, the necessary minimum of 800 lakhs. A slackness of Council-bill drawings, or other causes, may result in our tiding over the low period with ease, and with a margin over the fixed minimum; but we cannot afford in any case to go below it.

PROPOSED RUPEE LOAN.

157. We estimate that we will require a loan of Rx. 3,000,000 to carry us over the year, but, as in the case of the English Account, no pledge can be given either as to the amount of the loan, or the time when it will be issued, or the conditions which will attach to it.

158. The estimate accordingly, made up in the same form as in paragraph 146, stands as follows:—

NET RECEIPTS.	
Excess of Revenue in India over the Expenditure charged against it	20,642,800
Public Loan	3,000,000
Increase of Unfunded Debt—mostly Savings Bank Deposits	845,300
For Remittance to Secretary of State	1,020,700
Add Opening Balance	13,733,100
	<hr/>
	39,241,900
NET OUTGOINGS.	
Expenditure charged to Provincial Balances	483,600
Capital Expenditure of Government in India	2,662,800
Loans to Municipalities, &c. (chiefly the Calcutta and Bombay Dock Loans)	486,800
Other items	472,500
Issues on Capital Account to Railway Companies, against receipts in England	2,895,900
Council Bills—Sterling Account	14,548,500(a)
„ Exchange (at Rx. 42 per £100)	6,110,400
Add Closing Balance	11,581,400
	<hr/>
	39,241,900

(a) Allowing for an excess of payments against the deficiency in 1887-88.

It will be seen that, in addition to the ordinary capital expenditure of the Government of India we have unusually heavy payments for loan works and to Railway Companies. We begin the year with a strong balance, and estimate to finish it with a sufficient one.

Section X.—Summary.

159. I summarise the various points in this Financial Statement as follows :—

- (a) The accounts of 1886-87 close with a surplus of Rx. 178,427, even after charging off the Special Defence Works. The Revenue was much better than the Revised Estimates, and the excess amply covered an excess of Army expenditure, besides meeting the charges for Special Defence Works.
- (b) The Revised Estimates of 1887-88 shew a deficit of Rx. 2,447,800, to which must be added the charges of Rx. 568,900 for Special Defence Works. This depreciation is mainly due to an exceptional charge of Rx. 1,059,000 arising in connexion with the conversion of the 4 per cent. Sterling Loan into $3\frac{1}{2}$ per cent.; to further fall of silver and consequent increase of exchange charges by about Rx. 710,000; and to heavy Military expenditure, Rx. 830,000, in excess of Budget Estimate, in Upper Burma. The losses of Opium and of Railway Revenue have been made up for by improving revenue under other heads, and saving in expenditure.
- (c) The Budget Estimates for 1888-89 shew a financial position closely approximating to that explained on 27th January. The surplus in the Estimates, apart from the Special Defence expenditure, is Rx. 423,000. As compared with the Statement of January 27th, there is considerable increase in the expenditure on the Army, but the improvements in revenue are sufficient to make up for it. Upper Burma continues to require high expenditure, both under Police and under Army.

The Special Defences expenditure, however, is to be vigorously pushed on, and anticipated charges of Rx. 1,121,000 under this head (about Rx. 370,000 more than was put down on January 27th as the annual demand) convert the surplus of Rx. 423,000 into a deficit of Rx. 698,000.

- (d) For Capital Expenditure on Railways and Irrigation, Rx. 4,367,200 will be spent in 1887-88, and Rx. 4,044,500 is provided for 1888-89. The largest items are the Mandalay Railway and the Railways on the North-Western Frontier.

The Bengal-Nagpur, the Indian Midland, and the Southern Mahratta Railway Companies have, during 1887-88, extended their arrangements with the Secretary of State, and are all engaged in active Railway construction.

- (e) The Secretary of State proposes to draw, during 1888-89, for £14,000,000 of Council Bills. He does not propose to raise any sterling loan.
- (f) The Government of India propose to raise a Rupee Loan of Rx. 3,000,000, of which Rx. 524,000 is required for the Dock Works at Calcutta and Bombay.

J. WESTLAND.

March 26, 1888.

APPENDIX.

ACCOUNTS AND ESTIMATES.

Accounts	1886-87.
Revised Estimates	1887-88.
Budget Estimates	1888-89.

RETURNS OF ACCIDENTS ON INDIAN RAILWAYS FOR THE THIRD QUARTER
OF 1887.

No. 379 R. T., dated Calcutta, the 23rd March 1888.

RESOLUTION—By the Government of India, Public Works Department.

Read again—

Public Works Department Resolution No. 270 R. T., dated the 15th March 1887.

Ditto ditto No. 1531 R. T., dated the 30th December 1887.

Read also—

Director General of Railways' No. 116 T., dated the 20th February 1888, forwarding the Abstract Returns of Accidents to trains, &c., on the open lines of Railways in India for the quarter ending 30th September 1887.

OBSERVATIONS.—As compared with the corresponding quarter of the previous year, the number of accidents to trains, rolling stock, permanent way, &c., shows an increase of 31* or 4·57 per cent. against an increase of 1,424 miles or 11·58 per cent. in the mean mileage open, and a decrease of 522,149 miles, or 4·84 per cent. in the train mileage. The following are the Railways on which the more important fluctuations occurred:—

RAILWAYS.	ACCIDENTS.				TRAIN MILEAGE.	
	Increase.	Decrease.	Percentage of increase.	Percentage of decrease.	Percentage of increase.	Percentage of decrease.
Rajputana-Malwa	33	...	32·35	...	28·81
Southern Mahratta	26	...	371·43	...	103·34	...
North Western	12	..	7·79	...	9·69
Great Indian Peninsula	12	...	34·28	...	4·89
Bombay, Baroda and Central India	14	.	58·33	9·41
Oudh and Rohilkhand	19	...	40·43	...	12·49
Dibru-Sadiya	48	...	150·00	...	16·69	...

2. The decrease on the Rajputana-Malwa Railway is due chiefly to a diminution in the number of cattle accidents (40 against 53) and to the total absence of accidents under "Goods trains or parts of goods trains; engines, &c., leaving the rails" against 12 accidents recorded under this head in the corresponding previous quarter.

3. On the Southern Mahratta Railway there is no noticeable increase under any head, except that of "Trains running over cattle on the line," which shows an increase of 9 accidents.

4. The largest variations on the North Western Railway were under "Trains running over cattle on the line" and "Failures of Machinery, Springs, &c., of Engines," the former showing an increase, and the latter a decrease, of 12 accidents. Under "Fire in trains" there was also a decrease of 10 accidents.

5. On the Great Indian Peninsula Railway there was no important difference under any head.

* The returns for the Cherra-Companyganj, Darjeeling-Himalayan and Mysore Railways for the 3rd quarter of 1886 were received too late for inclusion in the general returns. The numbers of accidents returned by these lines for the quarter under review are 11, 11 and 3 respectively.

6. On the Bombay, Baroda and Central India Railway the number of "Trains running over cattle on the line" increased from 1 to 11, and that of accidents classified as "Other accidents", from 17 to 24.

7. The decrease on the Oudh and Rohilkhand Railway was entirely under the head "Trains running over cattle on the line."

8. On the Dibru-Sadiya Railway the number of "Failures of couplings" exhibits an unusual increase, there being 55 cases against 6 in the corresponding quarter of 1886.

9. The casualties resulting from accidents to trains, &c., were among passengers and others, 3 killed and 9 injured, against 9 injured, and among servants 6 killed and 14 injured against 1 killed and 2 injured. Of the total casualties, 3 passengers were killed and 6 injured on the North Western Railway by the derailment, on the 19th September, of No. 4 Down Calcutta mail train at mileage 164 between Sarái Banjára and Rajpura stations owing to the settlement of the embankment from floods and heavy rain.

On the Rajputana-Malwa Railway there were 2 servants killed and 4 injured in the accident to the up goods on the 31st August. The train was passing over Bandi Bridge near Asalpur when it ran into a herd of cattle straying on the line, and the whole train, consisting of an Engine and forty-one vehicles, was precipitated into the river. The damage done to rolling stock by this accident is estimated at about Rs. 50,000.

10. The following table exhibits the number of accidents under the different classes, and the number of persons killed and injured thereby:—

CLASS.	Number of accidents.	NUMBER OF PASSENGERS AND OTHERS.		NUMBER OF SERVANTS.		TOTAL.	
		Killed.	Injured.	Killed.	Injured.	Killed.	Injured.
Collisions between passenger trains or parts of passenger trains	1
Collisions between passenger trains and goods or mineral trains, engines and vehicles standing foul of the line	9	...	1	1	3	1	4
Collisions between goods trains or parts of goods trains	6
Passenger trains, or parts of passenger trains leaving the rails	20	3	6	1	2	4	8
Goods trains, or parts of goods trains, Engines, &c., leaving the rails	83	2	...	2
Trains or Engines travelling in the wrong direction through points	16
Trains running into stations or sidings at too high a speed	1
Trains running over cattle on the line	249	2	4	2	4
Trains running over obstructions on the line	14	...	2	...	1	...	3
Trains running through gates at level-crossings	6
The bursting of tubes, &c., of Engines	24	1	...	1
The failure of machinery, springs, &c., of Engines	41
The failure of tyres	6
Do. of wheels	2
Do. of axles	4
Do. of couplings	86	1	...	1	...
Broken rails	11
The flooding of portions of permanent-way	41
Slips in cuttings or embankments	6
Fire in trains	21
Fire at stations or involving injury to bridges or viaducts	5
Other accidents	57	1	1	1	1
TOTAL	709	3	9	6	14	9	23

11. The number of "collisions between goods trains or parts of goods trains" shows a large decrease, being only 6 against 18.

12. The cattle accidents, which number 249 against 274, were most numerous on the Rajputana-Malwa, and North Western, Railways. The numbers returned by these lines were 40 and 37 respectively.

13. The cases of the "Bursting of tubes, &c., of Engines" chiefly occurred on the North Western and South Indian Railways. Out of a total of 24 accidents, 11 were on the former line and 9 on the latter.

14. The numbers of "Failures of machinery, springs, &c., of engines" were very large on the North Western Railway and Eastern Bengal State Railway system, being 19 and 10 respectively out of a total of 41. As compared with the corresponding previous period, there was, however, as already noticed in para. 4, a decrease on the former line of 12 accidents under this head.

15. Under "Failure of couplings" the number has risen from 36 to 86, owing to there being 55 cases against 6 on the Dibru-Sadiya Railway.

16. The number of cases of "Fire in trains" was very nearly the same as previously, *viz.*, 21 against 20. There were 9 accidents under this head on the South Indian Railway and 6 on the Madras Railway.

17. Out of 57 accidents classed as "Other accidents," 24 occurred on the Bombay, Baroda and Central India Railway.

18. The casualties to passengers from causes other than accidents to trains, &c., were—

Cause of accident.	Killed.	Injured.
From falling between carriages and platforms	1
Falling on to the platform, ballast, &c., when getting into or out of trains	3
Whilst crossing the line at stations	1	...
By closing of carriage doors	1
Falling out of carriages during the travelling of trains	7	6
Other accidents	2	5
Total	10	16

19. The accidents to servants in the employ of Railways, or of contractors, whilst performing duties connected directly with the transit of passengers and goods from causes other than accidents to trains, &c., were as follows:—

Cause of accident.	Killed.	Injured.
During shunting operations	7	9
Falling off engines, vans, wagons, &c.	2	12
Coming in contact with overbridges, &c., during the travelling of trains	1	1
Coming in contact, while shunting, with vehicles, &c., standing in adjoining lines	1
Getting on or off trains, engines, &c.	1	8
Whilst loading, unloading or sheeting	5	4
Whilst working on the permanent-way or in sidings	2	2
Whilst walking along the line on the way home or to work	1
Whilst walking, crossing or standing on the line	10	11
Whilst passing between vehicles	3
Whilst attending to gates at level-crossings	1
Falling or being caught between vehicles and platforms	3
Falling off ladders, scaffolds, platforms, &c.	2	3
By falling of lamps, wagon doors, timber, weights, &c.	1	9
Whilst coupling or uncoupling wagons	1	5
Miscellaneous	5	28
Total	37	101

20. Of other persons killed and injured by running trains, &c., 5 were killed and 1 injured whilst passing over the line at level-crossings; 43 were killed and 15 injured whilst trespassing on the line; 9 committed suicide; and 5 were killed and 1 injured from miscellaneous causes.

21. The following table shows the total number of persons killed and injured from causes connected with the working of trains, as compared with the corresponding quarter of 1886:—

	3RD QUARTER, 1886.		3RD QUARTER, 1887.	
	Killed.	Injured.	Killed.	Injured.
<i>Passengers.</i>				
From causes beyond their own control	1	10	5	8
From misconduct or want of caution	7	36	8	17
<i>Servants.</i>				
From causes beyond their own control	3	18	8	20
From misconduct or want of caution	41	115	35	95
<i>Others.</i>				
Whilst passing at level-crossings	2	2	5	1
Trespassers, including suicides	55	17	52	15
Other persons	2	4	5	1
Total	111	202	118	157
Total open mileage	12,292½		13,716½	
Total train mileage	10,782,892		10,260,743	

22. In addition to the above, 13 persons are reported to have been killed and 38 injured in yards, workshops, &c., and 93 persons to have met death in carriages, and at stations from causes unconnected with the working of trains.

RESOLUTION.—The Government of India is pleased to notice the decrease in the number of accidents on the Rajputana-Malwa and the Oudh and Rohilkhand Railways, but requests that the attention of the officers concerned may be invited to the increased number of “trains running over cattle on the line” on the North Western, Southern Mahratta, and Bombay, Baroda and Central India Railways; and to the increased number of “Failures of couplings” on the Dibru-Sadiya Railway.

The Governments of Madras, Bombay, Bengal, the North-Western Provinces and Oudh, and the Punjab.
The Chief Commissioners of the Central Provinces, Assam, and Burma.
The Resident at Hyderabad.
The Agents to the Governor General for Rajputana, Central India, and Baluchistan.
The Director General of Railways.
The Consulting Engineers to the Government of India for Railways, Calcutta, Lucknow, and Central Division.

ORDER.—Ordered, that this Resolution, with the Abstract Returns, be communicated, for information, to the Local Governments, Administrations and Officers

noted in the margin.

Ordered also that copies be forwarded for the information of Her Majesty's Government.

Ordered further that this Resolution, with the Abstract Returns, be published in the Supplement to the *Gazette of India*.

M. C. BRACKENBURY, *Major, R.E.*
Under Secretary.

26	Jorhat	1887	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1	1</

GOVERNMENT OF INDIA.
HOME DEPARTMENT.

ACKNOWLEDGMENTS TO SIR W. HUNTER, K.C.S.I., C.I.E., IN CONNECTION WITH THE COMPLETION OF THE 2nd EDITION OF THE IMPERIAL GAZETTEER OF INDIA.

No. 753-54.

*Extract from the Proceedings of the Government of India in the Home Department—
(Public),—under date Calcutta, the 21th March 1888.*

READ—

Letter No. 8264, dated the 26th March 1887, from Sir William Hunter, K.C.S.I., C.I.E., reporting the completion of the second edition of the Imperial Gazetteer of India.

RESOLUTION.

THE revision of the Imperial Gazetteer of India which was sanctioned by the Government of India in the beginning of the year 1882 has now been completed. The first edition of 9 volumes has been expanded into 14; of these eleven volumes were received and distributed some time ago, while the last three volumes have only recently been received and circulated.

2. The Governor General in Council now desires to place on record his cordial acknowledgments to Sir William Hunter for the great ability and industry which he has displayed in carrying through the important work which was entrusted to him. As a condensed epitome of the Statistical Survey of India, it appears to His Excellency in Council all that could be desired, and as a standard work of reference, it will be of the greatest use to those charged with the administration of the country.

ORDER.—Ordered, that a copy of this Resolution be forwarded to Sir William Hunter for information, and that it be published in the *Gazette of India* for general information.

(True Extract.)

W. M. YOUNG,

Offg. Secretary to the Govt. of India.

CIVIL WORKS.
Irrigation.

REVENUE REPORT OF IRRIGATION WORKS IN BENGAL FOR 1836-87.

No. 651., dated Calcutta, the 27th March 1888.

RESOLUTION—By the Government of India, Public Works Department.

Read—

The Revenue Report of Irrigation Works in Bengal for 1886-87 and the Resolution thereon by the Government of Bengal, No. 289 I. A., dated 20th February 1888.

OBSERVATIONS.—Capital accounts are kept for all canals in the province of Bengal, except for the system of navigable streams known as the Nuddea Rivers, and for the Eden and the Madhuban Canals. The capital expenditure during the year 1836-87 amounted to Rs. 98,393 including indirect charges, as follows:—

		Number of Works.	EXPENDITURE	
			During the year 1886-87.	To end of the year 1886-87.
			<i>R</i>	<i>R</i>
Productive Public Works	{ Direct : : } Indirect : : }	4 {	5,76,359 12,880	5,75,63,328 16,27,981
			5,89,239	5,91,91,309
MINOR WORKS AND NAVIGATION (for which Capital and Revenue Accounts are kept)				
Imperial (in abeyance)	{ Direct : : } Indirect : : }	2 {	—1,200 ...	6,84,966 90,889
			—1,200	7,75,855
Provincial (in operation)	{ Direct : : } Indirect : : }	3 {	3,02,370 79~4	95,67,613 1,76,797
			3,10,354	97,44,410
TOTAL	8,98,393	6,97,11,574

There are no Protective Public Works in Bengal: but the Orissa Coast Canal, which is a Provincial Minor Work, has received a total grant-in-aid of Rs. 8,66,000 from the fund for Famine Relief and Insurance, of which Rs. 84,000 was given during 1886-87. The two works which are in abeyance are the Tirhoot and Damoodah projects. The works in operation contemplate 897 miles of canals and 3,161 miles of distributaries, of which 837 miles and 2,133 miles respectively are completed. The balance of estimates unexpended is about 130 lakhs of rupees.

2. The actual financial results of the year on the works in operation, as shewn by the revenue accounts, are as follows:—

	Gross Revenue.	Net Revenue.	Percentage of net Revenue on Total Capital outlay to end of the year.
	<i>R</i>	<i>R</i>	
Productive Public Works	(a) 13,69,679	—6,458	<i>Nil</i>
Minor Works and Navigation	5,25,569	2,43,220	2.5

(a) After deduction of ₹16,950, cash refunds of revenue.

These results compare unfavourably with those of recent years, but they are to some extent due to exceptional causes which will be presently mentioned. The net revenue of the previous year was ₹3,75,981 from Productive and ₹2,84,093 from Minor Works.

3. The amount payable for the year under review on account of interest on the Capital cost of Productive Public Works was ₹22,73,490; so the total charge for the year on account of these works was ₹22,79,948. The total difference between the net revenue and the gross charges for simple interest up to the end of 1886-87 was ₹3,02,88,425: this sum is the total loss incurred by the working of the canals.

4. The gross revenue assessed in 1886-87 on the systems classed as Productive is compared in the following table with the assessments of the four preceding years:—

PRODUCTIVE PUBLIC WORKS.	ASSESSMENTS.				
	1886-87.	1885-86.	1884-85.	1883-84.	1882-83.
	<i>R</i>	<i>R</i>	<i>R</i>	<i>R</i>	<i>R</i>
Orissa	2,08,311	2,05,527	1,74,525	1,97,213	3,38,323
Midnapur	2,32,101	2,64,643	2,63,469	2,81,554	3,20,900
Hidgellee	54,404	52,455	43,507	63,590	45,032
Sone	7,87,054	8,92,025	12,07,514	8,61,909	6,20,354
TOTAL	12,81,870	14,14,650	16,89,015	14,04,266	13,24,609

This statement shows that the indifferent results referred to in para. 2 were to a certain extent due to an actual reduction in the earnings of the canals. The reduction in the revenue assessed on the Midnapur Canal was due almost entirely to a decrease in the navigation on that canal; the decrease on the Sone Canals was caused by reduction in the area irrigated under annual leases.

5. Of the gross revenue of ₹12,81,870 assessed on Productive Public Works the sum of ₹9,27,512 is due to water rates, based on the areas irrigated as shewn in the following statement where they are compared with the areas of the two previous years:—

	1886-87.	1885-86.	1884-85.
	Acres.	Acres.	Acres.
Productive Public Works—			
Orissa Canals	77,709	72,339	57,362
Midnapur Canals	69,762	70,604	69,294
Sone Canals	268,204	332,570	370,661
TOTAL	415,675	475,513	497,327
Minor Works—			
Sarun Canals	2,146	4,565	7,223
TOTAL AREA IRRIGATED	417,821	480,078	504,550

The decrease in irrigated area is practically confined to the Sone Canals, and is due to the rainfall both of the year under review and of the previous one being favourable to cultivation without the aid of canal water. The areas given in the above statement do not agree with those given in the last Resolution of the Government of India, as certain corrections have been made in order to make the figures for the Sone Canals more accurate. The system under which the area irrigated on these canals was formerly stated is explained in para. 65 of the Chief Engineer's note of 1885-86: it is satisfactory that an imperfect system has now been abandoned.

6. Although the decrease in irrigation on the Sone Canals is large, the circumstances are by no means so unsatisfactory as the actual decrease would appear to imply. The decrease is entirely under annual leases. Thus :—

	AREAS IRRIGATED, SONE CANALS.		
	1886-87.	1885-86.	1884-85.
Five-year leases	194,556	179,784	151,510
Annual leases	73,648	152,786	219,151
TOTAL	268,204	332,570	370,661

The steady increase in five-year leases indicates that the people are learning to appreciate the advantages of insuring the development of their crops by leases which afford them a first claim on the available supply. On the Orissa Canals, where the area irrigated is almost entirely under five-year leases, there is the same tendency to increase; and it would appear, from para. 39 of the Chief Engineer's note, that there is no reason to anticipate that the area held under these leases on the Midnapur Canal will decrease; on that canal 56 per cent. of the entire area irrigable is now leased on this system.

7. The working expenses of productive Public Works including indirect charges are detailed below :—

CANALS.	WORKING EXPENSES.				
	1886-87.	1885-86.	1884-85.	1883-84.	1882-83.
	<i>R</i>	<i>R</i>	<i>R</i>	<i>R</i>	<i>R</i>
Orissa	5,20,543	3,56,672	3,29,288	3,05,530	3,55,280
Midnapur	2,35,038	2,18,127	2,31,803	2,23,586	2,46,502
Hidgellée	22,735	50,147	38,248	48,093	41,897
Sone	5,97,821	5,73,345	6,28,075	5,42,159	5,49,774
TOTAL	13,76,137	11,98,291	12,27,414	11,19,368	11,93,453

These figures show an increase in all cases except the Hidgellée Tidal Canal. The decrease on that canal is only apparent: it is due to silt clearance having been postponed, pending consideration of the proposals for remodelling the canal.

The large increase in the working expenses of the Orissa Canals is due to a breach which occurred in the Mahanuddee weir on the first rise of the river at the end of June 1886: the repairs of this accident cost *R*1,70,278 in 1886-87, and there was still further expenditure in the following year. An accident also occurred to the Naraj weir which cost nearly *R*17,000 to repair, and there was additional expenditure on four other weirs for extensive repairs to the aprons. This abnormal expenditure raised the cost of repairs to weirs from *R*2'79, which was the rate last year, to *R*12'20 per foot run during the present year.

The increase in the maintenance charges of the Midnapur Canal was mainly due to exceptional repairs and alterations to tidal locks, on which an expenditure of *R*36,892 was incurred as compared with *R*13,694 in the preceding year.

On the Sone Canals considerable expenditure was incurred on special repairs to the sluice piers of the Sone weir, which had been severely damaged; there was also an increase in the cost of repairs on the Buxar Canal, said to be due to restriction of necessary expenditure in the previous year.

8. The Province of Bengal has always been greatly in arrears in the matter of the collection of water-rates. The arrears have been sensibly reduced during the last three years, but there is still room for improvement. In these years the sums outstanding have been—

	<i>R</i>
On the first of April 1885	9,24,311
" " " 1886	5,49,089
" " " 1887	3,96,225

In 1885 special measures were adopted to check accumulation of arrears, and the results obtained must, on the whole, be regarded as satisfactory, although the decrease has been partly due to remissions of revenue which might have been collected had the demand been promptly enforced. It is satisfactory to notice that the remissions made during the year under review shew a considerable decrease. Thus, on the Sone Canals, the remissions of 1885-86 were 16·0 per cent. of the older demands and 7·2 in 1886-87; in Orissa the corresponding figures were 9·1 per cent. and 5·3 per cent. respectively. On the Midnapur Canal, where the remissions in 1885-86 were actually 37·3 per cent. of the older demands, it is noticed that the percentage has considerably decreased, but the actual figure is not stated.

Commenting on the results of the year His Honour the Lieutenant-Governor remarks that "the arrears still amount, however, to a large proportion of the year's assessments, and Sir Stuart Bayley is hopeful that a continuance of the measures introduced will result in a further reduction of arrears, and allow of greater facilities for the prompt realization of the current demand." Nearly one-fourth of the current year's demand was outstanding at the close of the year. The Governor-General in Council trusts that the measures which have been introduced may be worked with persistent energy until the results obtained are more in consonance with those which are recorded in other provinces.

9. The receipts from navigation form an important item in the revenue derived from canals in Bengal. The following statement shews the revenue of the last three years from this source, exclusive of that received from Government transport services:—

NAVIGATION REVENUE.			
	1886-87.	1885-86.	1884-85.
	<i>R</i>	<i>R</i>	<i>R</i>
<i>Works partly for Irrigation and partly for Navigation—</i>			
Orissa Canals	58,664	64,093	52,784
Midnapur Canal	1,09,693	1,37,578	1,19,797
Sone Canals	49,719	41,712	37,335
<i>Works for Navigation only—</i>			
Hidgellce Tidal Canal	54,404	52,455	43,507
Calcutta and Eastern Canals	4,83,654	5,14,669*	5,34,541*
Orissa Coast Canal	29,488	13,718	...
TOTAL	7,85,622	8,24,225	7,87,964

* These are the corrected figures as given in para. 93, page 35 of the Chief Engineer's note.

In addition to the above works there is a system of navigable rivers—the Nuddea Rivers—which are maintained by the Public Works Department. The navigation revenue on these rivers has been—

	1886-87.	1885-86.	1884-85.
Nuddea Rivers	2,03,250	1,83,781	1,95,457

10. The decrease in navigation revenue on the Orissa Canals was due to the deficiency of water caused by the breach in the Mahanuddee weir. The decrease on the Midnapur Canal is ascribed to slackness in the export trade in grain due to low prices in the Calcutta market. The decrease on the Calcutta and Eastern Canals is partly due to the abolition of certain tolls and partly to dullness in the jute and rice trade; these canals, however, continue to be the most remunerative navigable system in India. They give a net return of more than five per cent. on their capital cost. There has been a steady decrease in the working expenses of the Nuddea Rivers during the last five years which is very satisfactory.

11. The quantity and value of goods carried on the canals were as follows—

	Tons.	Value. ₹
Orissa Canals	42,56,181
Midnapur Canals	115,127	97,25,587
Hidgellee Tidal Canal	53,587	31,48,826
Sone Canals	78,684	64,65,651
Orissa Coast Canal	27,656	11,91,892
Calcutta and Eastern Canals	860,934	5,30,42,670
TOTAL VALUE		7,78,30,807

The principal articles carried were 398,000 tons of grain, valued at 242 lakhs of rupees; 102,000 tons of salt, valued at 84 lakhs; 25,000 tons of oil-seeds, valued at 26 lakhs; 90,000 tons of jute, valued at 88 lakhs; and piece-goods, valued at 19 lakhs.

The value of the crops irrigated by the canals was rather more than 93 lakhs of rupees. The chief items were 30,204 acres of sugarcane, valued at 27 lakhs; 321,415 acres of rice, valued at 52 lakhs; and 1,276 acres of tobacco, valued at 5 lakhs. Nearly the whole of the sugarcane crop was on the Sone Canals.

12. Attention is drawn to the very late date on which this Report has been submitted: every effort should be made to submit future reports on the 15th November.

ORDER.—Ordered that copies of this Resolution and of the Report and its accompaniments be forwarded to the Secretary of State, and to the Finance and Commerce and the Revenue and Agricultural Departments for information.

Also that a copy of this Resolution be forwarded to the Government of Bengal for information and guidance.

Also that copies of this Resolution and of the Report be forwarded to the

The Governments of Madras, Bombay, the North-Western Provinces and Oudh, and the Punjab.

The Chief Commissioners, Central Provinces and Burma.

The Resident at Hyderabad.

The Agents to the Governor General, Central India and Rajputana.

Local Governments and Administrations noted in the margin, in the Public Works Department, for information.

Also to the Foreign Department for communication to the Resident at Mysore and Chief Commissioner of Coorg.

Also that this Resolution and the Resolution of the Government of Bengal, with a few selected statements, be published in the Supplement to the *Gazette of India*.

R. C. B. PEMBERTON, Colonel, R.E.,
Secy. to the Govt. of India.

RESOLUTION—By the Government of Bengal, Public Works Department,—No. 289 I. A., dated Calcutta, the 20th February 1888.

Read—

The Canal Revenue Reports for 1886-87, and the Chief Engineer's note on the same.

The total outlay direct and indirect to the close of the year 1886-87, on canals in Bengal, of which capital accounts are kept, has been ₹6,97,11,574. Of this sum ₹8,66,000 have been contributed by the Imperial Government from Famine Relief and Insurance funds, ₹5,91,91,309 have been charged to loan funds, and ₹88,78,410 have been provided from Provincial revenues. In addition to the sums abovementioned, ₹7,75,855 have been expended on surveys, &c., for irrigation works which have not been carried out.

2. There are now in actual operation in Bengal 837½ miles of canal of which 608 miles are navigable. The total area commanded by irrigation canals is 2,698, 846 acres, of which 417,821 acres, producing crops of the estimated value of ₹93,34,374, were irrigated during the year. The total number of boats plying in the canals was 181,173, of which 27,314 were passenger boats. The total value of goods passing the canals in boats and rafts aggregated ₹7,78,30,811 approximately.

3. The receipts from, and expenditure on, the canals in operation for the last three years, are given in the statement below, the figures include indirect charges :—

NAME OF CANAL.	1886-87.		1885-86.		1884-85.	
	Receipts.	Expenditure.	Receipts.	Expenditure.	Receipts.	Expenditure.
<i>Major Irrigation Works.</i>	<i>₹</i>	<i>₹</i>	<i>₹</i>	<i>₹</i>	<i>₹</i>	<i>₹</i>
Orissa Canals	1,70,611	5,20,635	2,07,350	3,56,678	1,41,585	3,29,366
Midnapore Canal	2,34,185	2,35,240	2,02,484	2,18,127	2,57,955	2,31,915
Hidgellee Tidal Canal	54,101	23,045	52,155	50,147	43,507	38,248
Sone Canals	9,18,429	6,13,558	10,02,040	5,84,001	8,02,474	6,35,530
TOTAL	13,80,326	13,03,087	15,84,935	12,08,054	13,07,521	12,35,059
<i>MINOR WORKS AND NAVIGATION.</i>						
<i>Irrigation and Navigation Works.</i>						
Saran Canals	12,427	28,659	41,143	23,331	9,341	25,593
Calcutta and Eastern Canals	4,83,654	1,02,214	4,79,484	1,90,209	5,69,726	2,91,214
Orissa Coast Canal	20,188	61,420	11,718	30,712
TOTAL	5,25,509	2,82,340	5,34,345	2,50,252	5,79,067	3,16,807
GRAND TOTAL	19,12,108	16,75,430	21,19,280	14,59,206	18,86,588	15,51,866

The net income for the year was therefore ₹2,36,762. Interest amounting to ₹22,91,006 was, however, payable to the Imperial Government, so that there was a deficit of ₹19,56,284, to be met from Provincial revenues. This result is unfavourable as compared with that of the previous year, and is owing as much to a decrease in the receipts, the cause of which is explained further on, as to an increase in the expenditure owing to the necessity for special heavy repairs.

4. On the Orissa canals, the occurrence of a large breach in the main weir of the system, that on the Mahandi river, on the 26th June 1886, necessitated a very large outlay, of which about one and a half lakhs were spent within the year, and the rest in the following year, the work being completed before the rains of 1887. Considerable damage was also caused by the floods of 1886 to nearly all the other weirs, the result being that, with scarcely an exception, the expenditure on them during 1886-87 was in excess of that of the previous year. On the Sone canals the repairs to the centre and Baroon shore sluices of the Sone weir, and the replacing of the old four feet thick piers by piers of six feet thickness, caused an increase in the expenditure. On the Midnapore canal the repairs to tidal locks and silt clearance of tidal reaches were heavier than usual. Lastly on the Orissa Coast Canal the repairs on account of the floods and cyclone of 1885, added about ₹40,000 to what would otherwise have probably been the cost of maintenance.

5. The revenue collected in the last three years on the works mentioned in the above statement is shown below:—

HEAD.	REVENUE.		
	1886-87.	1885-86.	1884-85.
	₹	₹	₹
Water-rates	10,43,343	12,33,612	9,46,808
Navigation	7,88,685	8,34,780	8,22,187
Miscellaneous	80,170	50,888	1,17,593
TOTAL	19,12,198	21,19,280	18,86,588

6. The assessments or earnings of the same year are as follows:—

HEAD.	EARNINGS.		
	1886-87.	1885-86.	1884-85.
	₹	₹	₹
Water-rates	9,49,260	10,45,339	13,41,655
Navigation	7,88,685	8,34,780	8,21,876
Miscellaneous	80,171	90,481	81,519
TOTAL	18,18,116	19,70,600	22,45,050

The revenue shows a falling off under both heads of water-rates and navigation. As regards the water-rate, the decrease is due partly to the falling off in the area irrigated, and partly to the much smaller amount of arrears to be collected as compared with the balance at the beginning of the previous year. Allusion is made to the falling off in navigation further on.

The excess of revenue over the assessments is due largely to the collections of arrears of water-rates of former years.

7. The arrears of water-rates outstanding at the close of each of the last three years, are shown in the statement following:—

NAME OF CANAL.	ARREARS.		
	1st April 1887.	1st April 1886.	1st April 1885.
	₹	₹	₹
Orissa Canals	87,458	64,884	77,469
Midnapore Canal	59,749	69,972	1,11,212
Sone Canals	2,31,582	3,98,321	6,95,208
Sarun Canals	26,437	15,912	40,022
TOTAL	3,96,226	5,49,089	9,24,311

The result for the year may be considered favourable, and shows a satisfactory reduction in the total amount of arrears. The remissions made amount to a comparatively small sum, and point to an improved system of working both as regards assessments and collections.

8. To understand more clearly the results of the working of the year, it is necessary to distinguish between the collections of arrears and those of the current demand. Of the former a sum of ₹4,10,658 or 77 per cent. of the outstanding of former years was adjusted. Of this amount 86·4 per cent. was collected, 5·5 written off as irrecoverable, and 8·1 per cent. remitted. Of the current year's demands (which include ₹43,645 not payable till after the expiry of the year) ₹2,37,196 or 25 per cent. only is left for recovery, 0·3 per cent. was remitted and the balance collected. On the Sone canals very good results were obtained, more especially in the Shahabad district. A considerable sum of arrears was,

however, written off as irrecoverable. In Gya an improvement in collections is apparent, and the remissions are unimportant. In Patna, although remissions are less than in the other districts, the collections were considerably smaller. In Orissa remissions were merely nominal; but collections of the current demand cannot be considered satisfactory, and resulted in an increase in the arrear balance at the end of the year. The results in Midnapore are satisfactory both as regards collections and remissions. In Sarun the collections of the year, including arrears, amounted to less than one half of the total of the guarantee for the year, a result which must be considered far from satisfactory. On the whole the results of the year, with the exception noted above, show a considerable improvement in the working of the principal systems; and the Lieutenant-Governor notices with approval that the orders of the Local Government have received the careful attention of Civil officers. The arrears still amount, however, to a large proportion of the year's assessments, and Sir Steuart Bayley is hopeful that a continuance of the measures introduced will result in a further reduction of arrears, and allow of greater facilities for the prompt realization of the current demand.

9. The total number of certificates for the recovery of arrears issued during the year was 30,504 against 60,942 in the previous year in all districts. None were issued in the Gya District. The decrease is attributable chiefly to the large numbers previously issued under the stringent orders of Government for the recovery of arrears, but it is confidently expected that less recourse to this procedure will be necessary in future. The immediate effect of the increased exertion in collecting arrears has doubtless had its effects in bringing about the state of friction which subsequently rendered necessary the appointment of a Commission to enquire into the working of the Sone Revenue system.

10. Information regarding complaints is either non-existent or very meagre in the reports from Superintending Engineers and Revenue Authorities, so that it is impossible to say whether the canal administration worked smoothly or not. That it was not doing so formerly is clearly shown by the agitations of late years on the Orissa and Sone Canals; but, from what little can be gathered on this point in the reports, there appears to be no doubt that there was a decided improvement in this respect in the year under review. Further information should be afforded in future reports.

11. The areas irrigated (actuals) during the last three years are detailed in the following table:—

						1886-87.	1885-86.	1884-85.
						Acres.	Acres.	Acres.
Orissa .	{	Kharif				75,269	70,563	54,181

GRAND TOTAL, MAJOR AND MINOR WORKS .						417,821	480,078	504,550

NOTE.—The figures for the Sone canals for the years 1884-85 and 1885-86 do not agree with those given in last year's Resolution. The reason is that last year the areas "assessed" within the year were given as the areas "irrigated," the figures for 1884-85 not being then available. The figures now given have been obtained from the Superintending Engineer's report and show the areas actually irrigated within each year.

A still further decrease in the total area under irrigation has taken place, and the reason is not difficult to assign. The decline is entirely in annual leases, and chiefly on the Sone canals. The season was one of favourable rainfall, and the need for irrigation not pressing. On the other hand, the steady increase in the area under five-year leases on the Sone and in the area leased on the Orissa canals which is almost entirely under five-year leases, appears to be a satisfactory indication that the idea is gaining ground that it is advantageous to lease for a long term at a reduced rate as an insurance against failure in a bad year of rainfall; and the result will be probably a gradual extension of irrigation which cannot be expected under a system of short leases, the irrigation under which is subject to fluctuation with the amount and distribution of the rainfall.

12. The tollage collections from the various canals for the last three years are given in the table following:—

YEAR.	Orissa Canals.	Midnapore Canal.	Hidgellie Tidal Canal.	Orissa Coast Canal.	Sone Canals.	Calcutta and Eastern Canals.	TOTAL.
	<i>R</i>	<i>R</i>	<i>R</i>	<i>R</i>	<i>R</i>	<i>R</i>	<i>R</i>
1884-85	52,784	1,19,797	41,382	...	37,335	5,08,466	7,59,764
1885-86	64,003	1,25,331	52,143	13,663	41,712	(a) 4,97,578	7,94,520
1886-87	58,664	1,09,693	51,904	28,587	49,005	4,73,193	7,71,706

(a) In last year's Resolution Rs10,025 on account of demurrage was omitted and Rs26,280, miscellaneous receipts, wrongly added. The figure has therefore been reduced by the difference, *vis.*, Rs16,255

There is a decrease in tollage collections on all canals except the Sone and Orissa Coast. On the latter the increase is due to a further length of 55 miles having been temporarily opened for traffic. The whole length has been opened out during the current year, and the canal route from Gewankally on the Hooghly through to Cuttack is now established.

13. The causes that have led to a diminution in the receipts are chiefly the depression in the rice and jute trade, and do not point to any permanent decline in the traffic. The receipts on the Calcutta and Eastern Canals were also affected by alterations in tolls. In Orissa the traffic was to some extent impeded by the low level of the water in the Kendrapara and High Level Canals, but is also due to the falling off in the exports of rice from the Central Provinces on account of absence of floods in the Mahanadi.

14. In the Nuddea Rivers the receipts are higher than those of the previous four years, the cause being attributed to the favourable state of the channels and to an increase in trade generally.

15. With the exception of the revenue report of the Superintending Engineer of the South-Western Circle, all the reports were received with fair punctuality. In the case of the South-Western Circle the report was delayed owing to the ill-health of the Superintending Engineer. There was an improvement in the date of receipt of the Examiner's Finance Accounts.

ORDER.—Ordered that a copy of this Resolution and of the note and its accompaniments be submitted to the Government of India, in the Public Works Department, for information; also that copies be forwarded to the Appointment, Revenue, and Financial Departments of this Government; the Board of Revenue Lower Provinces; the Commissioners of the Presidency, Burdwan, Patna and Orissa Divisions; the Collectors of the 24-Pergunnahs, Nuddea, Hooghly, Midnapore, Burdwan, Patna, Shahabad, Gya, Sarun, Cuttack and Balasore; the Superintending Engineers of the Orissa, South-Western and Sone Circles; and the Examiner of Public Works Accounts, Bengal, for information.

By order of the Lieutenant-Governor of Bengal,

C. W. I. HARRISON, *Lieut.-Col., R.E.,*
Offg. Joint-Secretary to the Govt. of Bengal,
P. W. Dept.

GOVERNMENT OF INDIA.
REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the Week ending 21st March 1888.

During the past week the weather, without being actually rainy or stormy, has yet been in an unsettled and changeable state—pressure has been unsteady and subject to considerable oscillations, while the distribution has undergone large changes from day to day. The wind on either side of the Peninsula has been strong, and squally, and the weather altogether has been less quiet than is usual during the middle of March.

On the 15th the chart showed a large high-pressure area over the west and south of the Peninsula, and a band of low pressure lying along the foot of the hills. At the same time relatively low pressures were reported from Bengal and the Central Provinces, with small centres of depression, one near Raipur and a second near Hazaribagh. The barometer was falling and the weather was cloudy at several stations in Northern India, though it was generally clear in the centre and south. Rain had fallen at some stations in Bengal, Assam and the north-west of the Punjab, as well as at Jacobabad, Quetta, and Jeypore. The thermometric readings from the Central Provinces, the Deccan, and the Eastern Peninsula, were about equally high—Thytmio reporting a maximum of 102° , and Nagpur, Kurnool, and Bellary of 101° . On the 16th the barometer continued to fall very generally. The depression over Bengal had to a large extent filled up and that over the Central Provinces had moved southward towards the Deccan. At the same time a high-pressure area was appearing in the north-west of the Punjab. These were the only important changes in pressure. On the Bombay coast, owing to the southward movement of the Deccan depression, the north-westerly wind had increased in force, but at the head of the Bay its strength had decreased. Rain had fallen in Assam, the cis-Gangetic portions of the North-Western Provinces, and the north-west of the Punjab, but the amounts, except at Silchar and Sibsagar, were small. The hottest part of the Indian region was the centre of the Peninsula, where Kurnool and Cuddapah reported maxima of 102° and Secunderabad, Bellary and Salem of 100° . In Orissa also the temperature was high. The chart of the morning of the 17th showed that the depression over the Deccan had still further developed, and the north-westerly winds on the west coast were blowing very strongly. Some cloud accompanied this depression, but the only rainfall reported from its neighbourhood was a few drops at Seoni. At Saugor Island and in Assam rain still fell, the amount received at Silchar exceeding 1 inch. The inland portion of the Peninsula remained the hottest part of the Indian region, the maxima at Kurnool and Cuddapah being 103° . On the 18th the barometric depression over the Deccan had become slighter, and pressure generally more uniform throughout India. A large anticyclone overlay the Bay and its surrounding coasts, while readings were lowest along the foot of the hills. In consequence of this decrease in the intensity of the Deccan depression, the north-westerly winds on the west coast had become lighter, and the winds generally were more variable in direction. Over and around the Bay there was a well marked anticyclonic circulation. Slight rain had fallen at False Point, Silchar, and Sibsagar, and a few drops at Quetta. The weather was very fine. There was no change in the position of the area of greatest heat which remained over the inland parts of the Peninsula. The maxima reported were about the same as those on the preceding day. Beyond a rapid rise of pressure and the appearance of a high-pressure area in the Punjab, there was little change in the barometer on the 19th. Rain was reported from Ceylon, False Point, Silchar, and the north-west of the Punjab. At False Point the rainfall exceeded $1\frac{1}{2}$ inches, but elsewhere the amounts were small. There was no change in the position of the region of greatest heat, and the maxima within it were practically the same as those reported on the two previous days. On the 20th the barometric distribution was complicated and irregular, and the wind very variable in direction. The only stations reporting rainfall were Peshawar, Poona, Colombo and Galle, but the amount of cloud had on the whole increased. The region of greatest heat had apparently commenced its normal northward advance, and the maximum temperatures reported from the Central Provinces and the north of the Peninsula were nearly as high as those reported from the centre and south. On the 21st high-pressure areas were shown over the Punjab and the Carnatic

with, between them, a belt of relatively low pressures, stretching from the west coast, between Bombay and Mangalore, north-eastward across the central parts of the country to Bengal. The only rainfall reported was a few drops at Dera-Ismael Khan and Colombo, and the weather was less cloudy than on the preceding day. Temperature continued to increase over the north of the Peninsula and the central parts of the country. The absolute maximum for the whole of India was 104° at Surat.

Pressure.—The variations of pressure from the normal average were slightly irregular. In the Irrawaddy Valley, and at Berhampore, and the stations along the foot of the hills, there was a slight deficiency, but in all other parts of Northern India, alike on the hills and on the plains, there was an excess. In Central and Southern India there was a general excess, but at some stations in the inland parts of Madras there was a slight deficiency.

Temperature.—The mean temperature of the week has been above the average over by far the greater part of India, but in Eastern Bengal, part of Assam, and in the south of the Peninsula, there has been a slight deficiency. The excess exceeded 5° at Agra, Bareilly, Ludhiana, Raipur and Hyderabad.

The following table gives the mean temperatures for the 15th and the 21st :—

STATIONS.	15th.	21st.	Difference.	STATIONS.	15th.	21st.	Difference.
Rangoon .	85°	86°	+ 1°	Mangalore .	81°	84°	+ 3°
Calcutta .	79°	82°	+ 3°	Bombay .	79°	85°	+ 6°
Gya .	80°	84°	+ 4°	Akola .	83°	83°	0
Allahabad .	78°	83°	+ 5°	Nagpur .	87°	87°	0
Jhansi .	83°	86°	+ 3°	Jeypore .	78°	83°	+ 5°
Delhi .	71°	85°	+ 14°	Kurnool .	87°	88°	+ 1°
Lahore .	67°	79°	+ 12°	Cuddapah .	87°	88°	+ 1°
Colombo .	83°	83°	0				

and shows that, while there has been a fairly general increase of temperature during the week, the change has been very much greater in Northern than in Southern and Central India.

Humidity.—The variations of humidity from the mean have been very irregular.

Rain.—There has been no rain in Burma, on the Malabar Coast, or in Madras. In all other parts of India rain has fallen, but, except in Bengal, Assam, the Punjab and in Ceylon, the amounts received were not large. In Bombay, the Berars, Sind, and Rajputana the total of the week's fall did not reach one-tenth of an inch per province, and in Guzerat and Central India the fall was only slightly heavier. In Bengal and Assam rain has been frequent, though as a rule not heavy.

The concluding table gives the total rainfall of the past week according to provinces :—

DIVISIONS.	Number of stations.	Total rainfall.
Burma4	...
Bengal and Assam	10	8.44
North-Western Provinces and Oudh	3	0.20
Punjab	4	0.84
Hill Stations	2	0.75
Ceylon	2	1.21
Malabar Coast
Bombay	1	0.07
Berars and Central Provinces	1	0.02
Guzerat and Central India	1	0.12
Sind—Rajputana	2	0.08
Madras

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the State of the Season and Prospects of the Crops.

Madras.—*For week ending 24th March 1888.*—No rain except in Ganjam and Vizagapatam; rainfall to date generally sufficient, except in parts of Vizagapatam, Bellary, North Arcot, Madura, Tinnevely, Coimbatore, Salem, and South Canara. Crops generally good, but very slightly damaged here and there by disease or want of rain. Wet crops under rain-fed tanks in parts of Bellary and Madura have withered owing to deficient water supply. Pasture generally sufficient, but scanty in Malabar and parts of Anantapore, North Arcot, Trichinopoly, Madura, and Nilgiris, and decreasing in Vizagapatam and parts of Salem and Coimbatore. Prices falling where not stationary. General prospects favourable.

Bombay.—*For week ending 28th March 1888.*—Slight rain in Bombay City and in parts of Poona, Sholapur and Nasik. Crops slightly injured by it in Nasik. Standing crops otherwise good, except cotton in Broach which is damaged. Cotton-picking continues in parts of Gujarat and Southern Maratha Country. Harvesting of late crops continues in most districts. Ploughing operations for next season's crops in progress in Nasik, Poona, Satara, Bijapur, Dharwar, Ratnagiri, Kanara, Kathiawar and Shikarpur. Probable outturn of late crops 10 to 11 annas in Nasik and 7 annas on an average in Sholapur.

Bengal.—*For the week ending 27th March 1888.*—No rain during the week. General prospects continue favourable. *Rabi* crops are being harvested, good outturn is generally expected, except in parts of the Bhagulpore and Chota Nagpore Divisions where the crops are below the average. Opium collections are nearly over, the produce being everywhere satisfactory. Spring rice is doing well. Ploughing for early rice and jute is well forward. Indigo sowings are in full swing. Planting of sugarcane cuttings has begun. *Mohua* promises to be a good crop in Chota Nagpore and Sonthal Pergunnahs. No further information regarding reported scarcity in parts of Pooree received.

North-Western Provinces and Oudh.—*For week ending 28th March 1888.*—The weather is generally cloudy. Crops are being cut, and the yield is good. Operations for the autumn harvest have commenced in Kumaun. Opium collection is in progress. Supplies of food-grains are ample and prices are falling. The condition of agricultural stock continues satisfactory.

Punjab.—*For week ending 28th March 1888.*—Rain has fallen in some districts. Prices are generally stationary though falling in two districts, they are rising in Rawalpindi. *Kharif* ploughings and sugarcane and cotton sowings in progress. Harvesting of *rabi* crops commenced. *Rabi* prospects are generally reported good. Crops slightly injured by western winds in Jullundhur. Cattle are reported healthy. Prospects of fodder are improving, but fodder is still scarce in some districts. Poppy crops average, extraction of opium commenced in Ajnala tahsil.

Central Provinces.—*For week ending 28th March 1888.*—Weather cloudy in northern districts where harvest of winter crops continues. Under favourable circumstances crops in other districts have been cut. Outturn good. Cattle in fair condition.

Assam.—*For week ending 28th March 1888.*—Weather showery with high winds, which have done some damage. Early rice being sown. Prospects of tea good.

Mysore and Coorg—*For week ending 28th March 1888.*—No rain. Standing crops in good condition. Paddy and sugarcane sown in parts of the Bangalore and Tumkur districts. Outturn of crops fair. Cattle generally in good condition.

Want of rain much felt in Coorg.

Berar and Hyderabad.—*For week ending 28th March 1888.*—Weather clear and warm. Threshing of *rabi* crops continues. Probable outturn of wheat and gram is expected to be between 14 and 16 annas. Land under preparation for the ensuing *kharif* crop as reported previously, except in the Amraoti district. Agricultural stock is in good condition and fodder is sufficient in the other districts of the Province.

No rain in Hyderabad during the week. Agricultural prospects continue good. Prices stationary.

Central India.—*For week ending 28th March 1888.*—Slight rain in Neemuch during week. The only change since last report is in Baghelkhand and Neemuch where prices are reported to be fallen, otherwise conditions remain the same.

Rajputana.—*For week ending 28th March 1888.*—Slight rain in Bhurtpur; elsewhere nil. Agricultural operations satisfactory. Reaping in progress at places. Standing crops good. Crop prospects and agricultural stock generally good. Pasture or fodder fairly sufficient. Prices falling generally. Opium being collected at places.

E. C. BUCK,
Secretary to the Government of India.
